Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Oromiya Region which appear in six separate parts:

Volume I: Part I - Statistical Report on Population Size and Characteristics.
Volume I: Part II - Statistical Report on Education and Economic Activity.
Volume I: Part III- Statistical Report on Migration, Fertility and Mortality.
Volume I: Part IV - Statistical Report on Housing Characteristics.
Volume I: Part V - Abridged Statistical Report.
Volume I: Part VI - Statistical Report on Population Size of Kebeles.

Thus, the Office of the Population and Housing Census Commission is pleased to present the census report "The 1994 Population and Housing Census of Ethiopia: Results for Oromiya Region, Volume I: Part I - Statistical Report on Population Size and Characteristics" for users. Another report which deals with the detailed analysis of the results of the 1994 Population and Housing Census data for Oromiya Region will also be produced soon.

The 1994 Population and Housing Census was a huge nation wide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non- government organizations, external donor agencies and the public in general was obtained. A number of preparatory activities were also carried-out before the census enumeration was begun. Among the major census preparatory activities was the conduct of the Population and Housing Census Map Work. In the census map work the peasant associations in rural areas and the urban dwellers associations in urban areas were sub-divided into enumeration areas with 150-200 housing units in urban areas and 150-200 households in rural areas. About 5-6 contiguous enumeration areas were formed into one supervision area. In this exercise enumeration area and supervision area maps were also prepared. In the census map work operation a total of 49,978 enumeration areas and 9,845 supervision areas were constructed in the settled rural areas and 8,724 enumeration areas and 1,575 supervision areas in the urban areas of the country. In rural areas of Oromiya Region a total of 19,143 enumeration areas and 3,814 supervision areas were delineated. On the other hand, in the urban areas of the region, a total of 2,457 enumeration areas and 443 supervision areas were formed.

During the census enumeration, one enumerator was given the map of one enumeration area and was responsible to record all persons and housing units in that enumeration area. One supervisor was later assigned to a supervision area and was responsible for the quality of the information collected in that area.

The Office of the Population and Housing Census Commission would like to thank all government and non-government agencies who participated in the organization of the census, the supervision of the field work, the data collection, and the respondents who participated in providing the necessary information. The government of Ethiopia has given huge financial and unreserved administrative support in undertaking the 1994 National Population and Housing Census from its inception till the dissemination of the results. This indicates the commitment and high priority offered by the government for socio-economic and demographic data collection, processing, evaluation and dissemination of the results to users.

The Office would also like to take this opportunity to express its many thanks to the United Nations Population Fund (UNFPA) to its generous financial assistance and technical support in conducting the census. Moreover, thanks are due to United States Agency for International Development (USAID) for its financial and technical assistance for the census. Further thanks are due to the United Nations Development Program (UNDP) and to the Swedish International Development Authority (SIDA) for their financial assistance. The office hopes that the data presented in this report will be found useful by all data users.

Abdulahi Hasen(Ph.D.)

Member
and
Secretary,
Central Census Commission

CHAPTER I

INTRODUCTION

This chapter presents an overview of the content of the census report " The 1994 Population and Housing Census of Ethiopia: Results for Oromiya Region, Volume I: Part I- Statistical Report on Population Size and Characteristics". This report presents information on Population size of zones, weredas and towns. It also presents the sex, age, ethnic, language, religion, marital status, disability, ...etc. conditions of the population of the region. Projections of population sizes up to the year 2000 are also presented in this report. The data presented in this report constitute the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Oromiya Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Oromiya Region are: Volume I: Part II- Statistical Report on Education and Economic Activity; Volume I: Part III- Statistical Report on Migration, Fertility and Mortality; Volume I: Part IV - Statistical Report on Housing Characteristics; Volume I: Part V- Abridged Statistical Report; and Volume I: Part VI- Statistical Report on Population Size of Kebeles.

Oromiya Region consists of twelve zones, 180 weredas and 375 towns. The rural parts of the region had 10,161 farmers' association areas at the time of the census. However, this number has recently declined drastically after the reorganization of the rural kebeles. The urban parts of the region have 564 kebeles in the 375 towns. The census fully covered most of the areas in the region except for 97 farmers' associations in the rural areas and 4 kebeles in the urban areas. The areas that were not covered in the census are in Misrak Harerge Zone, Borena Zone, and Mirab Harerge Zone. Out of the 180 weredas in the region, 165 weredas were fully covered. In 14 weredas some FAs or urban kebeles were not covered in the census while in one wereda (Jarso wereda of Misrak Harerge Zone) the entire FAs (that number 30) and its town(Ejersa Goro) were not covered. These weredas were: Kombolcha,

Babile, Fedis, Haro Maya, Kurfa Chele, Kersa, Malka Balo, Bedeno, Girawa, and Gola Odana Meyumuluke weredas in Misrak Harerge zone; Arero and Moyale weredas of Borena Zone; Mieso and Darolebu weredas of Mirab Harerge Zone. The kebeles that were not covered in the census were: a kebele in Ejersa Goro Town (i.e the whole town) of Jarso Wereda; a kebele in Mulu Town (i.e the whole town) of Mieso Wereda; parts of kebele 01 and parts of kebele 02 in Moyale Town of Moyale Wereda. For details concerning the farmers' associations not covered in the census, reference may be made to Table 7.2 Volume I: Part VI.

The statistical tables presented in this report all refer to the areas that were covered during the census only, except in a few cases where it is explicitly stated that estimates for the areas not covered in the census are included. In this report, the population size of the areas covered in the census plus those that were not covered in the census is presented by zones and weredas in Table 2.1. The estimated population size of the areas not covered in the census by zones and weredas are presented in Table 2.2, and the estimated population sizes of towns not covered in the census are presented in Table 2.3. The population size estimates for the farmers' associations not covered in the census are presented in Table 7.2 in Volume I: Part VI. The population projection for the region is prepared using the total of the census covered plus the estimated population sizes. All the other tables refer to the census covered population only. In these tables, the information for weredas that were only partly covered during the census refer to the census covered population only. Jarso wereda will not appear in any of these tables because it was not covered during the census.

Localities were identified as towns or rural areas during the census cartographic work. Towns were defined as localities in which Urban Kebele Administration (previously known as Urban Dwellers Association) has been established. Localities that had 1000 or more persons whose inhabitants were primarily engaged in non agricultural activities were identified as towns irrespective of whether Urban Kebele Administration has been established or not. Similarly capitals of weredas were also identified as towns

even if Urban Kebele Administration has not been established. However, changes of wereda boundaries have occurred since the conduct of the census cartographic work; and in some instances two or more previous weredas have been combined to form one wereda. Thus, localities that were seats of wereda administration at the time of the census cartographic work, and subsequently identified as towns in the census report, may no longer be wereda capitals.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were prepared in Amharic. English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

i) Short Questionnaire (Appendix I)
ii) Long Urban Questionnaire (Appendix II)
iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and

housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religion and marital distributions was collected from all persons covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Eventhough the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity,... etc. represent the entire population of Oromiya Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling-in the questionnaires designed for the purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains two chapters. The first chapter serves as an introduction to the report. Chapter II presents the population sizes, sex, age, language, ethnic, religion, and marital status distributions of the population. It also provides the disability condition in Oromiya Region. Annex I presents population projection up to the year 2000. Annex II presents the list of tables that appear on other parts of Volume I.

The accompanying Volume I: Part II consists of Chapter III which presents the Educational Characteristics of the Population and Chapter IV which deals with the Economic Characteristics of the population in the region. Volume I: Part III presents Chapter V which deals with Migration, Fertility and Mortality conditions. Volume I: Part IV presents Chapter VI which deals with the Housing Characteristics. Volume I: Part V has six chapters and presents selected tables from Volume I: Parts I, II, III and IV; and thus deals in an abridged form on population size and characteristics, educational characteristics, economic characteristics, migration, fertility, mortality and housing characteristics. The abridged form was found necessary as the size of the region is huge and hence data tabulated is enormous, which required binding in five separate parts. Volume I: Part VI presents Chapter VII which deals on the Population Size of Kebeles (both the urban kebeles and the rural farmers' associations).

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility, and mortality exclude the homeless. Since the homeless population is very small compared to the population of the Oromiya Region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were sleeping, and it was not convenient to apply long questionnaires

in these situations. Homeless persons were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for Oromiya Region. The forthcoming analytical report for the 1994 Population and Housing Census data of Oromiya Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census data are expected to continue even after the production of the analytical report.

CHAPTER II

POPULATION SIZE AND CHARACTERISTICS

This chapter presents data on population size for Oromiya Region at zone, and wereda, levels classified into rural and urban areas, and at town levels. Also presented are population sizes by age, sex, type of residence, household size, ethnic group, language, religion, relationship to head of the household, marital status and disability. The chapter consists of various tables which are self-explanatory. However, short definitions of some important terms and concepts used in the chapter are provided.

The 1994 Census did not cover some areas in Oromiya Region. Areas that were not covered during the census were parts of Mirab Harerge zone, Misrak Harerge zone and Borena zone. Estimates of population size of these areas are given separately in Tables 2.2 and 2.3 of this chapter. Except for Tables 2.1, 2.2, and 2.3, all other tables in this chapter refer to the population covered in the census.

Oromiya Region's total population was found to be 18,732,525 of which 9,371,228 were males and 9,361,297 were females. This figure includes both the areas covered during the census and the areas not covered in the census. The areas not covered during the census constitute 258,705 persons, of which 251,421 are found in the rural areas, while 7,284 are found in the urban areas.

The estimated rural population refers to parts of Darolebu Wereda in Mirab Harerge Zone; the entire Jarso Wereda, and parts of Kombolcha, Babile, Fedis, Haro Maya, Kurfa Chele, Kersa, Girawa, and Gola Odana Meyumuluke Weredas in East Harerge Zone; and parts of Arero, and Moyale Weredas in Borena Zone. The estimated urban population refers to Mulu Town of Mieso Wereda in Mirab Harerge Zone; the only town of Jarso Wereda (Ejersa Goro Town) in Misrak Harerge Zone; and parts of Kebele 01 and Kebele 02 of Moyale Town of Moyale Wereda in Borena Zone. Estimates were done on EA (Enumeration Area) basis from the population figures

obtained in the household listing carried out during census cartographic work, which was conducted 1-2 years prior to the undertaking of the 1994 census. The estimation (projection) was made using an assumed growth rate. In some weredas, for farmers associations where census cartographic work had not been conducted, estimates were obtained by using the average population size of farmers associations for which estimates were available.

The first table of this chapter (Table 2.1) presents the sum of counted population size and estimates of areas not covered in the census for Oromiya Region. Table 2.2 provides the estimated population sizes of the areas not covered during the 1994 census by zone and wereda, while Table 2.3 presents the estimated population size of kebeles and towns not covered during the census. Each of the kebeles of Moyale town were partially uncovered and hence the total population for the town will be the sum of estimated population size in Table 2.3 and that of counted population size in Table 2.5.

Table 2.4 and subsequent tables refer to counted population only. The total (counted) population of Oromiya region is presented in Table 2.4. Table 2.5 provides the population size of towns covered in the census. According to the 1994 Census, the population size of areas covered during the census was found to be 18,473,820; of which 9,240,408 were males and 9,233,412 were females. The population sizes refer to the de jure population size of Oromiya Region as of 11 October, 1994. De jure population comprises of all the people who "belong" to a given area at a given time by virtue of usual residence (Shryock et al., 1973). In the census a person is said to be a usual resident of a household (and hence an area) if he/she has been residing in the area continuously for at least six months before the census day or intends to reside in the area for six months or longer. Thus, visitors are not included with the usual population. Homeless persons were enumerated in the place where they were spending the night. The 1994 Census includes foreign nationals who were residing in the region. On the other hand all Ethiopians living abroad were not counted.

Tables 2.6A - 2.6C classify population size by broad age group and type of residence, and Table 2.7 shows population size of zones by sex and type of residence. Type of residence is categorized into two major groups, namely, conventional and non-conventional. Respondents who live in the same housing unit and have common cooking arrangements (eat their food together) are said to be residing in conventional households. The non-conventional population in turn is sub-divided into residents of collective quarters (hotel/hostel and other collective quarters) and the homeless. A collective quarter is a housing unit, a building, or a compound in which a number of unrelated persons reside together and share common facilities e.g. boarding schools, prisons, hotels, hostels,... etc. Homeless persons refer to individuals without any fixed residence.

The distribution of the number of members per household for the population living in conventional households of zones is given in Table 2.8. A household often consists of the head, the spouse, their children and some other persons residing in the household. A person is considered to be a member of a household if he has the same cooking arrangement with the other members.

The population size of Oromiya Region by single years of age and sex is presented in Table 2.9, while Table 2.10 and 2.11, provide the five year age group and sex distribution of the population for weredas, and towns, respectively. During the census, age of respondents was registered in completed years. Enumerators used several probing questions to get exact ages from respondents who did not know their exact ages.

Ethnic identity of a person is traced through his/her national or tribal origin. To assist the enumerators in recording the information, detailed list of the ethnic groups in the country, obtained from The Institute of Nationalities Study, was provided in the census enumerators' manual. In this report ethnic groups are listed down in alphabetical order, except where indentation is used to present related ethnic groups next to one another. For example the Kembata, Alaba, Kebena and Timbaro are related ethnic groups. For this reason all these ethnic groups

are presented next to one another. To indicate that these are related ethnic groups, the names Alaba, Kebena and Timbaro appear indented in the list below the name Kembata. The selection regarding which ethnic group will appear indented in the table does not imply that one ethnic group is dominant over the others. All the ethnic groups are treated independently and separate figures are presented for each.

The size of each ethnic group residing in Oromiya Region and its zones is presented in detail in Table 2.12. The ethnic group distribution of weredas and towns are provided in Table 2.13 and 2.14, respectively. However in Tables 2.13 and 2.14 only the five major ethnic groups and ethnic groups that have population size of 500 persons or above within a wereda/town are presented separately, while the rest are grouped together and presented as "others". This was done to keep the table to a manageable size.

In the 1994 Census mother tongue is defined as the language used by the child for communication with his family members or guardians during childhood. Whereas second language is additional language used by the respondent. If the respondent uses more than one additional language, the one that is used more frequently is recorded. Similar to the previous table, indentation is used to present related language groups one after another. Table 2.15 presents the detail distribution of all mother tongues spoken in the region. In Tables 2.16 and 2.17, however, only the largest five mother tongues spoken and mother tongues spoken by 500 or more persons in weredas and towns, respectively, are presented. The remaining mother tongues spoken are grouped together and labeled as 'others'. Table 2.18 provides all the second languages spoken in Oromiya Region.

Religion is presented under four major groups; namely, Christian, Muslim, Others and Traditional. Christian is further sub divided into Orthodox, Protestant and Catholic. Orthodox Christianity includes the Kibat and Tsega while Seven Day Adventist, Pentecost, Lutheran, Baptist, Anglican, Presbyterian, Meserete Kirstos, Mulu Wengel, Kale Hiywot,...etc. are presented as Protestants. Hindus, Jews, Behais, Johovas, Atheists,... etc.

fall under the "others" category. Tables 2.19A - 2.19C present the religious distribution of the population by age group, while Table 2.20 and 2.21 show religious groups and their respective size of population for weredas and towns, respectively.

The 1994 census has also collected information on members of the household and their relationship to the head. The head of the household is any member of the household who is recognized as a head by the members. In a polygamous marriage where the wives have separate households, the husband is considered to be the head of the household of the first wife. The other wives or other members (eg. elder son) is considered to be the head of their respective households. The data on relationship to the heads of conventional households is presented in Tables 2.22A - 2.22C.

Marital status of the population aged ten years and over by age group and sex is presented in Table 2.23A - 2.23C. Marital status is presented in four major groups; namely, single, married, divorced, and widowed. A person who had never been married is considered to be single; married persons include couples who are living together bonded by any kind of marital engagement at the time of the census (Traditional, Church, or Municipality); separated couples are also considered to be married unless they had dissolved their marriage agreement. Any body who had been married but whose marriage was dissolved before the census day is categorized as divorced. A person who has not married again after the death of a spouse is categorized as widowed.

Table 2.24 present disability status and type of disability by broad age groups and sex for the region. Table 2.25 provides disability status and type of disability by sex for each zone. Note that figures in these tables exclude the homeless. In the census a disabled person was defined as one who, due to physical or mental injuries, could not fully perform activities that other healthy persons could do. This represents decrease or loss of ability to discharge various social or economic functions. Disability is presented under ten major groups, namely; i)

totally blind ii) partially blind (one whose eyes could only see partially or one who is blind on one eye); iii) hearing problems (totally deaf or partially deaf); iv) hearing and speaking problems; v) leg problems (lame, amputated or crippled); vi) hand/arm problems; vii) leprosy; viii) mental problems (epilepsy, madness, mental retardation, melancholia...etc); ix) other types of disability (different from what is specified above); and x) multiple disability (with two or more physical defects mentioned above).

TABLE 2.1 COUNTED PLUS ESTIMATED POPULATION SIZE OF ZONES AND WEREDAS BY SEX, URBAN AND RURAL: 1994

ZONE / WEREDA	Urban+Rural			Urban			Rural		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

Note:– * Estimates were obtained from the population sizes registered during the census cartographic work, and the results updated to refer to the date of the census.

**Estimates were obtained from the population sizes registered during the census cartographic work and the results updated to refer to the date of the census. However, in the case of the five farmers' associations of Malka Balo Wereda estimates were obtained using the average population size of a farmers' associations in the Wereda. In the case of the six farmers' associations and nomadic areas of Gola Odana Meyumuluke Wereda estimtes were obtained based on the results of the 1984 Population and Housing Census.

ANNEX TABLES

AND

APPENDICES

ANNEX I

POPULATION PROJECTION

Population projection gives information on the size, structure and characteristics of the population in the future. The resulting projected population figures can be used for drawing development plans and for policy making. This annex provides the projected population size of Oromiya Region by rural-urban, sex, and five years age group for period from 1995-2000.

Methodology:

There are two main categories of methods for population projection: (a) procedures for projecting the population considering mortality, fertility and migration by age and sex (cohort component method); and (b) procedures for projecting the population using mathematical functions. The former technique is usually applicable to a longer time period projection under different variants, i.e., low, medium and high variants. In this report, a simple mathematical function (exponential) is used to project the population up to the year 2000.

The 1994 Population and Housing Census has not covered some areas in Oromiya Region. The total counted population size of urban and rural areas of Oromiya Region under the 1994 census were 1,962,804 and 16,511,016 respectively. The not-counted population size of urban areas were estimated to be 3661 males and 3623 females, while the not-counted rural population were estimated at 127,159 males and 124,262 females. The not-counted population size of urban and rural areas of the region were distributed among the age groups, in proportion to the reported age distribution of the counted urban and rural population obtained during the 1994 census. The sum of the counted and not-counted population size of urban and rural areas of the region were used as the base population for the projection.

The population projection is made separately for rural and urban areas by applying the national estimated annual average

growth rates for rural and urban areas (2.23 percent for rural and 4.11 percent for urban areas). The projected population size of rural and urban areas were made using an exponent method of projection. The projected population size of rural and urban areas were split into males and females by applying and keeping constant the sex ratios of rural and urban population of Oromiya Region obtained in the 1994 census. Then, the projected population of urban and rural areas by sex were added up to give the total projected population size of Oromiya Region.

Assessment of age structure of the population:

Information on age of the population collected in the census is often subjected to age mis-reporting. This is because some people, do not know their true age and others do not report their age accurately. The indices and graphs of the age structure of the population have indicated that, there is some distortion of the reported age pattern of the population. This distortion on the reported age pattern of the population may be attributed to age misreporting and migration. Despite some distortion on the age pattern, the reported age structure of the rural-urban population of Oromiya Region obtained from the 1994 census were used as a base year population. The age structure of the base year population for urban and rural areas of the Oromiya Region are given in Annex Table I.1.

Assumptions:

The projection presented in this chapter is made under the assumption that the annual average population growth rates of rural and urban areas for the nation observed between 1984-1994 which are 2.23 percent and 4.11 percent respectively will remain constant during the projection period. Then, these observed growth rates are applied for projecting the rural and urban population of Oromiya Region for each year between 1995-2000. The reported age distribution obtained in rural and urban areas during 1994 are assumed to remain constant up to the year 2000. The assumption that age distribution will remain constant may not hold because changes in fertility and mortality will have an

effect on age distribution. This assumptions may be revised when detailed population projections are made in the forthcoming census analytical report of the region.

Projection Results:

Based on the above assumptions, the projected population results of Oromiya Region and rural-urban breakdowns by sex, five years age group up to the year 2000 is given in Annex Table I.2. Figures in the tables refer to mid-year population i.e., July first of the indicated years.

This projection is made for a limited number of years and under very broad assumptions. This was made to provide figures that will be useful for institutions or individuals who would like to use the projected figures, till detailed projections under various assumptions and for longer periods can be made. These detailed projections will be presented in the census analytical report of the region that will be forthcoming.

ANNEX II - LIST OF TABLES ON OTHER PARTS OF VOLUME I

VOLUME I: PART II

CHAPTER III - EDUCATIONAL CHARACTERISTICS

TABLE 3.1A Population aged five years and over by status of school attendance, age and sex (Oromiya Region-total): 1994

TABLE 3.1B Population aged five years and over by status of school attendance, age and sex (Oromiya Region-urban): 1994

TABLE 3.1C Population aged five years and over by status of school attendance, age and sex (Oromiya Region-rural): 1994

TABLE 3.2 Population of zones aged five years and over by status of school attendance, sex, urban and rural: 1994

TABLE 3.3A Population aged five years and over currently attending school by level, age and sex (Oromiya Region-total): 1994

TABLE 3.3B Population aged five years and over currently attending school by level, age and sex (Oromiya Region-urban): 1994

TABLE 3.3C Population aged five years and over currently attending school by level, age and sex (Oromiya Region-rural): 1994

TABLE 3.4 Population of zones aged five years and over currently attending school by level, sex, urban and rural :1994

TABLE 3.5 Gross and net enrolment ratios in primary, junior and senior secondary school for weredas: 1994

TABLE 3.6A Population aged ten years and over by literacy status, highest grade completed and sex (Oromiya Region-total): 1994

TABLE 3.6B Population aged ten years and over by literacy status, highest grade completed and sex (Oromiya Region-urban): 1994

TABLE 3.6C Population aged ten years and over by literacy status, highest grade completed and sex (Oromiya Region-rural): 1994

TABLE 3.7 Population of weredas aged ten years and over by literacy status, highest grade completed (grouped), percent literate, sex, urban and rural: 1994

TABLE 3.8 Population of towns aged ten years and over by literacy status, highest grade completed (grouped), percent literate and sex: 1994

CHAPTER IV - ECONOMIC ACTIVITY STATUS

TABLE 4.1A Population aged ten years and over by age group, sex, activity status and rate (Oromiya Region-total): 1994

TABLE 4.1B Population aged ten years and over by age group, sex, activity status and rate (Oromiya Region-urban): 1994

TABLE 4.1C Population aged ten years and over by age group, sex, activity status and rate (Oromiya Region-rural): 1994

TABLE 4.2 Population of zones aged ten years and over by sex, activity status and rate, urban and rural 1994:

TABLE 4.3 Population of towns aged ten years and over by sex, activity status and rate 1994:

TABLE 4.4A Economically non-active population aged ten years and over by age group, sex and reason for not working (Oromiya Region-total): 1994

TABLE 4.4B Economically non-active population aged ten years and over by age group, sex and reason for not working (Oromiya Region-urban): 1994

TABLE 4.4C Economically non-active population aged ten years and over by age group, sex and reason for not working (Oromiya Region-rural): 1994

TABLE 4.5A Unemployed population aged ten years and over by sex and age group (Oromiya Region -total): 1994

TABLE 4.5B Unemployed population aged ten years and over by sex and age group (Oromiya Region -urban): 1994

TABLE 4.5C Unemployed population aged ten years and over by sex and age group (Oromiya Region -rural): 1994

TABLE 4.6 Unemployed population of zones aged ten years and over by sex, urban and rural): 1994

TABLE 4.7 Unemployed population of towns aged ten years and over by sex: 1994

TABLE 4.8A Unemployed population aged ten years and over by age group, sex and educational level (Oromiya Region-total): 1994

TABLE 4.8B Unemployed population aged ten years and over by age group, sex and educational level (Oromiya Region-urban): 1994

TABLE 4.8C Unemployed population aged ten years and over by age group, sex and educational level (Oromiya Region-rural): 1994

TABLE 4.9A Economically active population aged ten years and over by age group, sex and employment status (Oromiya Region-total): 1994

TABLE 4.9B Economically active population aged ten years and over by age group, sex and employment status (Oromiya Region-urban): 1994

TABLE 4.9C Economically active population aged ten years and over by age group, sex and employment status (Oromiya Region-rural): 1994

TABLE 4.10A Economically active population aged ten years and over by age group, sex and major occupational groups (Oromiya Region-total): 1994

TABLE 4.10B Economically active population aged ten years and over by age group, sex and major occupational groups (Oromiya Region-urban): 1994

TABLE 4.10C Economically active population aged ten years and over by age group, sex and major occupational groups (Oromiya Region-rural): 1994

TABLE 4.11 Economically active population aged ten years and over by sex and minor occupational groups

TABLE 4.12A Economically active population aged ten years and over by age group, sex and major industrial divisions (Oromiya Region-total): 1994

TABLE 4.12B Economically active population aged ten years and over by age group, sex and major industrial divisions (Oromiya Region-urban): 1994

TABLE 4.12C Economically active population aged ten years and over by age group, sex and major industrial divisions (Oromiya Region-rural): 1994

TABLE 4.13 Economically active population aged ten years and over by sex and minor industrial groups

TABLE 4.14 Employed population of zones in urban areas aged ten years and over by sex and number of days worked: 1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Counted plus estimated population size of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Estimated population size of areas not covered by the 1994 census by zones and weredas

ANNEX TABLE 3 Estimated population size of towns not covered by the 1994 census

ANNEX TABLE 4 Total population of towns by sex: 1994

ANNEX TABLE 5 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 6 Population projection of Oromiya Region by urban-rural, five years age group and sex, 1995 - 2000

VOLUME I: PART III

CHAPTER V - MIGRATION, FERTILITY AND MORTALITY

A - MIGRATION

TABLE 5.1A Population by age group, sex, migration status and area of previous residence (Oromiya Region-total): 1994

TABLE 5.1B Population by age group, sex, migration status and area of previous residence (Oromiya Region-urban): 1994

TABLE 5.1C Population by age group, sex, migration status and area of previous residence (Oromiya Region-rural): 1994

TABLE 5.2A Population of zones by sex, migration status and area of previous residence, urban and rural: 1994

TABLE 5.2B Population of towns by sex, migration status and area of previous residence (Oromiya Region): 1944

TABLE 5.3A Migrant population by age group, sex and length of residence (Oromiya Region-total): 1994

TABLE 5.3B Migrant population by age group, sex and length of residence (Oromiya Region-urban): 1994

TABLE 5.3C Migrant population by age group, sex and length of residence (Oromiya Region-rural): 1994

TABLE 5.4A Migrant population of zones by sex and length of residence, urban and rural: 1994

TABLE 5.4B Migrant population of towns by sex and length of residence (Oromiya Region): 1994

B - FERTILITY

TABLE 5.5A Summary measures of fertility based on reported data for zones, Oromiya Region: 1994

TABLE 5.5B Summary measures of fertility based on reported data for towns that have 10,000 and above persons, Oromiya Region: 1994

TABLE 5.6 Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate, urban and rural: 1994

TABLE 5.7 Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate for major urban centers (with 10,000 or more inhabitants): 1994

TABLE 5.8 Women aged 10 years and over by age group, number of children everborn and mean number of children ever born: 1994

C- MORTALITY

SECTION 4 - DETAILED INFORMATION ON HOUSING UNIT

39. WILL HOUSING UNIT INFORMATION TO BE COLLECTED ?

1= YES 2= NO

40. WHAT IS THE TOTAL NUMBER OF HOUSEHOLDS LIVING IN THE HOUSING UNIT ?

41. WHAT IS THE TOTAL NUMBER OF MEMBERS OF HOUSEHOLD OR HOUSEHOLDS IN THE HOUSING UNIT ?

MALE	FEMALE	TOTAL

42. WHAT IS THE TYPE OF HOUSING UNIT ?

1- PERMANENET

2= IMPROVISED

3= MOBILE

4= OTHER/SPECIFY/_____

43. WHAT IS THE TYPE OF BUILDING IN WHICH THE HOUSING UNIT IS FOUND?

0= NON-STOREYED DETACHED
1= NON-STOREYED 2 UNITS ATTACHED
2= NON-STOREYED 3-5 UNITS ATTACHED
3= NON-STOREYED 6 OR MORE UNITS ATTACHED
4= ONE OR MORE STOREYED DETACHED
5= ONE OR MORE STOREYED,2-3 UNITS ATTACHED
6= ONE OR MORE STOREYED, 4-6 UNITS ATTACHED
7= ONE OR MORE STOREYED,7-10 UNITS ATTACHED
8= ONE OR MORE STOREYED, 11 OR MORE UNITS ATTACHED

44. HOW MANY YEARS AGO WAS THE HOUSING UNIT BUILT ?

1= LESS THAN FIVE YEARS

2= 5-9 YEARS

3= 10-14 YEARS

4= 15-19 YEARS

5= 20 YEARS OR MORE

45. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE WALL OF THE HOUSING UNIT ?

1= WOOD AND MUD
2= WOOD AND THATCH
3= STONE AND MUD
4= STONE AND CEMENT
5= BLOCKETS
6= BRICKS
7= REED/BAMBOO
8= OTHER/SPECIFY/
_____

46. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE ROOF OF THE HOUSING UNIT ?

1= CORRUGATED IRON SHEET
2= CONCRETE OR CEMENT
3= THATCH
4= WOOD AND MUD
5= BAMBOO OR REED
6= OTHER/SPECIFY/____

47. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE CEILING OF THE HOUSING UNIT ?

1= NONE
2= FABRICS
3= CHIPWOOD/HARD BOARD
4= WOODEN
5= CONCRETE
6= OTHER/SPECIFY/
_____

48. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE FLOOR OF THE HOUSING UNIT ?

1= MUD
2= WOOD TILES
3= CEMENT/CONCRETE FINISH
4= PLASTIC TILES
5= CEMENT BRICK TILE
6= BAMBOO OR REED
7= OTHER/SPECIFY/_____

49. HOW MANY ROOMS ARE THERE IN THE HOUSING UNIT?

_____

50. WHAT IS THE TYPE OF TENURE OF THE HOUSING UNIT ?

1= OWNER OCCUPIED
2= RENTED FROM KEBELE
3= RENTED FROM PUBLIC HOUSING AGENCY
4= RENTED FROM OTHER ORGANIZATION
5= PAYING DIFFERENCE IN RENT
6= RENTED FROM PRIVATE HOUSEHOLD
7= RENT FREE

51. IF RENTED, WHAT IS THE MONTHLY AMOUNT OF RENT IN BIRR ?

_____

52. WHAT IS THE MAIN SOURCE OF DRINKING WATER FOR THE MEMBERS OF THIS HOUSING UNIT ?

1= TAP INSIDE THE HOUSE
2= TAP IN COMPOUND, PRIVATE
3= TAP IN COMPOUND, SHARED
4= TAP OUTSIDE COMPOUND/ FROM PRIVATE TAP, PUBLIC TAP, OTHER ORGANIZATION, BOUGHT OR FREE OF CHARGE/
5= PROTECTED WELL OR SPRING
6= UNPROTECTED WELL OR SPRING
7= RIVER, LAKE/POND

53. WHAT TYPE OF KITCHEN DOES THE HOUSING UNIT HAVE?

1= NO KITCHEN
2= MODERN KITCHEN PRIVET
3= MODERN KITCHEN SHARED
4= TRADITIONAL KITCHEN PRIVATE
5= TRADITIONAL KITCHEN SHARED

54. WHAT TYPE OF FUEL IS MOSTLY USED FOR COOKING IN THE HOUSING UNIT ?

01= USES NO FUEL
02= ELECTRICITY
03= GAS
04= KEROSINE
05= CHARCOAL
06= FIREWOOD/LEAVES SAWDUST
07= DUNG/MANURE
08= FIREWOOD AND CHARCOAL
09= FIREWOOD AND DUNG
10= FIREWOOD AND KEROSINE
11= FIREWOOD AND GAS
12 =ELECTRICITY AND KEROSINE
13 =ELECTRICITY AND FIREWOOD
14 =ELECTRICITY AND CHARCOAL
15= ELECTRICITY AND GAS
16= OTHER/SPECIFY/
_____

55. WHAT TYPE OF BATHING FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE

2= BATHTUB PRIVATE

3= BATHTUB SHARED

4= SHOWER PRIVATE

5= SHOWER SHARED

6= OTHER/SPECIFY/_____

56. WHAT TYPE OF TOILET FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE

2= FLUSH TOILET, PRIVATE

3= FLUSH TOILET, SHARED

4= PIT, PRIVATE

5= PIT, SHARED

57. WHAT TYPE OF LIGHTING HAS THE HOUSING UNIT ?

1= ELECTRICITY (METER PRIVATE)
2= ELECTRICITY (METER SHARED)
3= LANTERN
4= KEROSINE
5= OTHER/SPECIFY/____

58. IS THERE A RADIO IN THIS HOUSING UNIT ?

1= YES
2= NO

59. IS THERE A TELEPHONE IN THIS HOSING UNIT ?

1= YES
2= NO

60. IS THERE A TELEVISION SET IN THIS HOUSING UNIT ?

1= YES

2= NO
