FOREWORD

The twenty-ninth issue of the Statistical Abstract, as in the past is prepared in Amharic and English languages. The Publication presents a wide range of data illustrating various socio-economic conditions of the country. The statistical information contained in the publication provides basic information for policy and programme formulation, evaluation and as input for under taking socio - economic activities.

Reliable and timely statistical data are required for the purpose of launching the short, medium and long-term socio-economic development plans and for realizing the free market economy system that is in operation. Hence, the collection of reliable and timely data and the analysis and presentation of the same are the main task of current statistical development. In this respect, the Central Statistical Authority has made significant progress in furnishing the required statistical data by undertaking population and housing censuses and several socio-economic and demographic surveys.

On the other hand, the timely publication of the Statistical Abstract, the Central Statistical Authority can discharge its responsibility only if it obtains the active and timely participation of the concerned ministries, government agencies, mass organizations as well as individuals who provide the basic inputs to this publication. Hence, the office urges all those concerned to enlist further cooperation for the timely publication of the Statistical Abstract.

In the 1980's the Authority carried-out several socio-economic and demographic surveys in the country and these surveys include Agricultural; Price; Household Income; Consumption and Expenditure; Welfare Monitoring; large and Medium Scale Manufacturing and Electricity Industries; Small Scale Manufacturing Industries; Cottage/Handicraft Manufacturing Industries; Informal Sector; Distributive Trade and Services; Manpower; Family and Fertility; Health and Nutrition; Demographic and Health; Child Labour; Current Employment Unemployment,.... etc.

Furthermore, the first and the second National Population and Housing Censuses were conducted in May 1984 and in October 1994, respectively. The data processing, analysis and preparation of the reports have been completed and the numerous reports that present the results of the census have been disseminated to the users. Similarly, the first ever Ethiopian Agricultural Sample Enumeration was conducted in 2001/2002 and the census data have been processed, evaluated, analyzed and the agricultural census reports have been prepared at woreda, zonal, regional and country levels and disseminated to data users. At the moment, the preparatory activities including census cartographic map works are under way to conduct the third Population and Housing Census in 2007 as per schedule.

The Authority has also given prior attention to the current business surveys in addition to its regular sample and census activities. To implement this a detailed survey action plan has been prepared and the actual data collection activities in the sectors are under way.

In order to improve the existing administrative data flow in the country, the Authority has carried-out a study in some Federal and Regional institutions and collected information on statistical record systems, standards, concepts and definitions used ...etc. Based on this study the Authority is expected to prescribe a system for collection, compilation, classification and flow of statistical data. Currently, the Authority's top priority is strengthening its data dissemination strategy and enhancing its capacity in utilizing the information communication technology for the statistical development.

In conclusion, compliments are due to the various government ministries, agencies, mass organizations and individuals for their cooperation in providing the required data for the preparation of this Statistical Abstract as well as to the staff of the Central Statistical Authority for their efforts in producing this edition.

NOTES ON THE CALENDAR

In Ethiopia various authorities use different calendar years in compilation of statistical series. The following table sets out the relation between the Ethiopian and the Gregorian calandar. In the Ethiopian year there are 12 months of 30 days each and one short month, Pagume, which has 5 days for three consecutive years and 6 days on the fourth year. Moreover, The trade year and the fiscal year are shown in the table.

Throughout the Abstract when figures were obtained for the Gregorian year a split year is shown in the Ethiopian calendar, and inversely, split Gregorian years are shown where the figures are for Ethiopian years. For example 2002 in the Gregorian calendar is the period between Tahasas 23,1995 to Tahasas 22, 1996 E.C and is shown to 1995/ 96.Likewise, 1995 E.C covers the Gregorian year between September 11,2002 & September 12,2003 and is shown as 2002/ 2003.

SECTION J: NATIONAL ACCOUNTS

In Principle, in the measurement of national accounts aggregates three basic approaches may be applied depending upon the available statistics, i.e. production, income and expenditure approaches.

(I) ***The production approach****: takes production as the total value of goods and services less intermediate inputs originating in the various industries which make up the economy.*

(Ii) ***The income approach****: considers production as the sum of the incomes received by those producing these goods and services.*

(iii) ***The expenditure approach****: sums up the value of the final uses of goods and services reduced by the value of imports of goods and services.*

In Ethiopia's National Accounts, the production approach has been mainly used but the expenditure approach is applied in the case of Public Administration and Defense, Education, Medical and Health Services. The income approach is hardly used except in some service sectors such as domestic services. The total value of goods and services thus arrived at has been given according to the industry producing them. However, no breakdown by type of factor income has been attempted. In the expenditure side of Ethiopia's National Accounts private consumption expenditure was arrived at by utilizing information from rural and urban consumption surveys conducted by the Central Statistical Authority over the years.

Since the reference period for the government budget and plans in general is the Ethiopian Fiscal Year (E. F. Y.), in order to facilitate the monitoring and evaluation of plan implementation it has been decided to change the reference period of national accounts data from G. C. Y. To E. F. Y. Accordingly, all national accounts tables except the Rest of the World Accounts, have been complied in the E. F. Y.

The concepts and definitions of major aggregates used in the National Accounts are given below.

***Gross Domestic Product (GDP) at Market Prices**: is the market value of the goods and services produced within the territory of Ethiopia, before any allowance is made for the consumption of fixed capital. It is equal to the sum of consumption expenditure by private consumers and government, gross domestic capital formation, and net export of goods and services.*

***Gross Domestic Product (GDP) at Factor Cost**: is the sum of income accruing from the production of goods and services. It differs from the Gross Domestic Product at Market Price by the amount equal to indirect taxes less of subsidies.*

***Gross National Product (GNP) at Market Prices**: is the market value of goods and services before deduction of provision for the consumption of fixed capital, attributable to the factors of production supplied by residents of Ethiopia. It is equal to the sum of consumption expenditure, gross domestic capital formation, and net export of goods and services plus net factor income received from abroad. It differs from the Gross Domestic Product at Market Prices by the amount of net factor income from abroad.*

***Net Factor Income from Abroad**: is excess of factor incomes (interest, dividends, profits, etc.) paid abroad over factor incomes received from abroad.*

***Private Consumption Expenditure**: is the value of goods and services (purchased or self-produced) consumed by households and private non-profit institutions plus the net value of gifts in kind received from abroad.*

***Government Consumption Expenditure**: represents the current expenditure on goods and services by central and municipal government. It comprises compensation of employees, purchases by government from local enterprises and from abroad, less sale by government of goods and services. Government consumption expenditure excludes transfer payments, interest paid by government and subsidies.*

***Gross Fixed Capital Formation**: includes the value of the purchases and own account construction of fixed assets (land, civil construction and works, machinery and equipment) by enterprises, households, private non- profit institutions and government.*
