I. Introduction

The Central Statistical Authority, CSA, has been conducting the Rural Integrated Household Survey Program, RIHSP, since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP the price survey, that covers both retail and producers' prices, is being carried out on monthly basis since May 1981 in selected Farmer Associations, FAs, (currently Enumeration Areas, EAs) of the country. The survey was conducted on quarterly basis until July 1987 then on monthly basis since September 1987. The reports were made available at regional level up until July 1994.

However, the reporting level was revised and the rural retail price reports were made available at regional (killil) and group of zones level for the three larger regions (i.e., Oromiya, Amhara, and Southern Nations, Nationalities and Peoples) from November 1994 up until August 1997. In an effort to fulfill data users demand, the CSA expanded its sample size and started collecting price data in such a way that results of the survey can be provided at zone level starting from September 1997.

In the process of preparing the rural retail price report at zone level (for about 500 items of goods and services of each month) it is clear that the size of the report will be bulky and the printing and publishing activities would be time consuming. Hence, it was decided to prepare the report in two formats:-

- The first type of report provides quarterly average retail price of goods and services (i.e., from December 1997 to February 1998) at region (killil) and zone levels. This report would be disseminated at large to all data users.
- The second type of report that contain monthly retail price at regional and zone levels will be printed in a limited copy and will be made available at the CSA library in Addis Ababa and at all CSA branch statistical offices in the country.

Hence, this report provides average retail prices of goods and services in rural areas on **quarterly basis** from March 1998 to May 1998 (Megabit 1990 to Ginbot 1990 of Ethiopian Calendar).

Due to lack of adequate space to accommodate all killils and zones in one page the price data of the killils and zones are presented in six parts.

Part I - Consists of quarterly average retail price of Tigray killil (and its zones, i.e., Mirabawi Tigray, Mehakelegnaw Tigray, Misrakawi Tigray and Debubawi Tigray) and Affar killil (and its zones, i.e., zone 1, zone 3 and zone 5).

Part II - Consists of quarterly average retail price of Amhara killil (and its zones i.e., Semen Gondar, Debub Gondar, Semen Wello, Debub Wello, Semen Shewa, Misrak Gojam, Mirab Gojam, Wag Hemra, Agew Awi and Oromiya).

Part III - Consists of quarterly average retail price of Oromiya killil (and its zones i.e., Mirab Wellega, Misrak Wellega, Illubabor, Jimma, Mirab Shewa, Semen Shewa, Misrak Shewa, Arssi, Mirab Harerge, Misrak Harerge, Bale and Borena).

Part IV - Consists of quarterly average retail price of Somali killil (and its zones i.e., Shinile, Jigjiga and Liben) and Benishangul-Gumuz killil (and its zones i.e., Metekel, Asosa and Kamashi).

Part V - Consists of quarterly average retail price of Southern Nations, Nationalities and Peoples killil (and its zones and special weredas i.e., Gurage, Hadiya, Kembata-Alaba-Tembaro, Sidama, Gedeo, Semen Omo, Debub Omo, Keficho-Shekicho, Bench-Maji, Yem special wereda, Amaro special wereda, Burji special wereda, Konso special wereda and Dirashe special wereda).

Part VI - Consists of quarterly average retail price of Gambella killil (and its zones i.e., zone 1, zone 2 and zone 4), Harari killil, Addis Ababa (and its zones i.e., zone 3 and zone 6), Dire Dawa and quarterly national average.

This twenty fourth issue updates Statistical Bulletin 201-2. Earlier issues on the same subject are Statistical Bulletins 37, 45, 57, 64, 83, 93, 96, 106, 107, 115, 117, 124, 138, 143, 151, 153, 157, 164, 167, 175, 186, 195-2 and 201-2.

II. Objectives

The objectives of the survey are to:-

- study the level of retail prices charged by retailers;
- study the disparities between prices charged at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct rural consumer price index.

III. Scope and Coverage

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in an effort to incorporate commodities mostly consumed by the rural population. The geographic coverage of the survey was revised as of September 1988 to produce price reports in one Autonomous Region and 25 Administrative Regions. The geographical coverage was revised once again in September 1995 and the present report is based on the current administrative hierarchy which is Killil (Regional States) and zones.

The major groups of items covered by the survey include food; drinks; cigarettes and tobacco; clothing and footwear; construction materials, water, and fuel and power; household equipment and durable household items; medical care; transport; personal care and effects; recreation, entertainment and reading and miscellaneous goods and services.

Information on retail prices of selected agricultural and industrial commodities is collected from retail outlets in the sample Enumeration Areas, (EAs). The allocation of EAs to the regions takes into account the population size of the regions/stratum and cost consideration. The number of EAs in each region has been considered to be a reasonable minimum size to provide meaningful estimates at regional and zone levels.

The coverage of the National integrated Household Survey Program, NIHSP, is about 1,380 EAs in the rural areas of the country. However, the number of EAs covered by the price survey are less than that of NIHSP. The main reasons are:-

- a) some sampled EAs do not have market places in their vicinities,
- b) in areas where two or three EAs have a common market, the market was covered by one of the EAs that is very close,
- c) as shown in Table A the number of EAs covered fluctuated from month to month.

IV. Method of Data Collection

Each month of the Ethiopian Calendar (September to August) data collection staff of the CSA attempt to collect prices in retail markets for a list of about 500 items with the use of kitchen balance and measuring tape in the markets of the selected EAs or from adjacent market places where households purchase most of the goods and services for consumption and other purposes. For each item on the price list the data collector is expected to get a maximum of three prices from three different retailers or shops in the local market places.

As the enumerators are stationed nearby the market outlets, it is believed that they are familiar with the market places where various items can be purchased. If one retailer or shop does not have the items they continue searching until they find one that does. Although price is collected from traders, in some cases it is also obtained from consumer at the time of purchase. Retail price data is mainly collected on market days throughout the reference month considering the work load of the enumerators and in accordance with the purchasing habits of consumers in the selected EAs.

Since an interview method of data collection is utilized rather than an actual purchase and recording of price, it may result, in some instance, in exaggeration or under estimation of prices. However, as stated above, since enumerators are permanently assigned to each sample EA and reside there, they have a good chance of familiarizing themselves and be on friendly terms with retailers and owners of economic establishments the result of which is a reasonably reliable price information over time.

V. Definitions

- **Retail Price:** A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.
- **Enumeration Area:** An Enumeration Area in rural areas is a locality that is less than or equal to a farmer's association area and mostly consists of about 150-200 households.
- **Farmers' Association:-** It is the lowest administrative unit in a settled rural area with its own jurisdiction. It is an association of rural dwellers formed by the inhabitants of a given area whose members are engaged either in agricultural or non-agricultural activities.

VI. Note

1. The minimum that the balance can weigh is 10 grams. Thus, items which are sold in small quantities (like spices) and whose weight fall under 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the price of these items in some respect.
2. The average column is a simple arithmetic average prices for each item.
3. The symbol "-" is used for data not available or doubtful.

V. Agricultural Associations

V.1. Definitions

- **Association:** A retail price fixing entity set up for the purpose of a specific kind of sale. It is intended to strengthen producer relations.
- **Association-Agreement:** An Agreement in which there is a jointly held institution operating in farmer's association and this entity consists of 10000 households.
- **Farmer's Association:** It is a retail price fixing entity established by the members of a given area whose members are engaged either in agricultural or non-agricultural activities.

V.2. Types

1. The manner that the balance can weigh is 40 grams. This is a small quantity (like sugar) which is sold in small quantities and is sold in small quantities and is sold in small quantities.
2. The average column is a sample of the average price for each item.
3. The symbol "-" is used for data not available in the official.
