Table 4 Part 3 - June '90(Sene '82) - - - - -	166-180

Introduction

The Central Statistical Authority, CSA, started the collection of rural prices in May 1981 in selected Farmers' Association Areas (FIAs) in 12 regions, excluding Tigray, Eritrea and areas inhabited by nomadic population. Thus, as part of the Rural Integrated Household Survey Program (RIHSP) which was launched in 1980 the rural prices survey, covering both retail prices and producers' prices, is conducted on a monthly basis.

This report provides results of monthly average retail prices of goods and services in 26 Administrative/Autonomous regions for the period March 1990 to June 1990 (Megabit 1982 - Sene 1982 E.C.).

Averages of retail prices of goods and services are presented in three parts. Each of the first two parts consists of tables on average retail prices of goods and services in nine rural areas and the third part consists of tables on average retail price of goods and services in the remaining eight rural areas and the national average.

This ninth issue updates Statistical Bulletin number 106 of February, 1992. Earlier issues on the same subject are Statistical Bulletin Numbers 37, 45, 57, 64, 83, 93, 96 and 106.

Objectives

Objectives of the collection of retail prices in rural areas are to:-

1. study the level of retail prices;
2. study the disparities between prices at various distribution levels;
3. study changes in the economy;
4. provide data for national accounting and prepare retail prices index for rural area.

Scope and Coverage

The scope and coverage of the survey are constantly under review and necessary improvements are effected from year to year in the light of experience of the staff and in an effort to incorporate commodities mostly consumed in the rural area.

The major groups of items covered include food, drinks, tobacco and stimulants, household equipment, clothing, footwear, energy, medical care, personal care and effects, education, recreation, building materials and other goods and services.

Information on retail prices of selected agricultural and industrial products are collected from retail outlets in the sample FAs. The allocation of FAs to the regions takes into account the size of the regions and has been considered to be a reasonable minimum size to provide meaningful estimates at regional level. The number of FAs covered by the survey, during the period under review, in each of the 26 regions is given below. However, the number of FAs given below differs from that of earlier years due to various reasons.

## Number of FAs in which prices survey was conducted

Method of Data Collection

The retail prices are collected every month of the Ethiopian Calendar Year from major outlets in the selected FAs or from adjacent areas where the households purchase most of the goods and services for consumption and other purposes. Although retail prices are usually collected from traders, in certain cases the prices are obtained from consumers at the time of purchase. For each item a maximum of three price quotations are collected from three different retailers.

The collection of retail prices is distributed throughout the month considering the work load of the enumerator and in accordance with the purchasing habits of consumers in the area.

Definition

A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

## Notes:-

1. The average column, in the 3rd part of this report, provides a simple arithmetic average of quotations for the corresponding items in all regions.
2. The minimum that the balance can weigh is 10 gms. Thus items which are sold in small quantities and whose weight fall below 10 gms. can not be weighed as accurately as possible and as a result may affect the reliability of the prices of these items in some respect.
3. The list of 26 Autonomous/Administrative regions follows the list provided in "Negarit Gazeta" 48th year No. 16, Addis Ababa, 28th April, 1989.
4. The symbol "N.A." is used for data not available or doubtful.
