## **INTRODUCTION**

The Central Statistical Authority, CSA, started the collection of rural prices in May 1981 in selected Farmers' Association areas, FAs, in 12 regions. Thus, as part of the Rural Integrated Household Survey Program, RIHSP, which was launched in 1980, the Rural Price Survey, covering both retail price and producer price, is conducted on a monthly basis. As of September 1988, the rural price collection was undertaken in Dire Dawa Autonomous Region and twenty five Administrative Regions.

This report provides results of average price of goods and services for the period of April 1994 to July 1994 (Miazia 1986 to Hamle 1994 of Ethiopian Calendar). Due to lack of space to accommodate all regions in one page, the report is presented in three parts.

This thirteenth issue updates Statistical Bulletin 124. Earlier issues on the same topic are Statistical Bulletins 37, 45, 57, 64, 83, 93, 96, 106, 107, 115, 117 and 124.

## **OBJECTIVES**

Main objectives of collecting retail prices in rural areas are to:

- study the level of retail prices,
- study the disparities between prices charged at various distribution levels,
- study changes in the economy,
- provide data for national accountants in the valuation of output.
- construct rural price indexes.

## SCOPE AND COVERAGE

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in an effort to incorporate commodities mostly consumed by the rural population. The geographic coverage of the survey was revised as of September 1988. As a result the rural price survey was conducted in one Autonomous Region and twenty five Administrative Regions. Due to census cartographic map work and later on due to the October 1994 Population and Housing Census, the collection of price data was suspended from August 1992 to March 1994 and from August 1994 to October 1994. Hence, this report covers only the period from April 1994 to July 1994.

The survey covers major groups of items such as, food, drinks, tobacco and stimulants, household equipment's, clothing, footwear, energy, medical care, personal care and effects, education, recreation, building materials and other goods and services.

Information on retail price of selected agricultural and industrial commodities is collected from retail outlets in the sample FAs. The allocation of FAs to the regions takes into account the size of the regions and has been considered to be a reasonable minimum size to provide meaningful estimates at regional level.

The number of FAs covered by the survey are shown in Table A. However, price survey was not conducted in some FAs due to several reasons.

Table A: Number of FAs covered by Region

Regions		FAs Covered
1. Arsi	Administrative	32
2. Bale	"	28
3. North Omo	"	52
4. South Omo	"	12
5. East Gojam	"	30

23. Welega	"	48
24. Asosa	"	6
25. North Wello	"	23
26. South Welo	"	30

6-44

## **METHOD OF DATA COLLECTION**

Each month of the Ethiopian Calendar (September to August) data collection staff of the CSA attempt to collect prices in retail markets for a list of about 476 items in the selected FAs or from adjacent market places where households purchase most of the goods and services for consumption and other purposes. For each item on the price list the data collector is expected to get a maximum of three prices from three different retailers or shops in the local market places. (The sample questionnaire is given in the appendix).

Enumerators are familiar with the market places and where various items can be purchased. If one retailer or shop does not have the items, they continue searching until they find one that does. Although price is collected from traders, in some cases price is obtained from consumers at the time of purchase. Retail price data is mainly collected on market days throughout the reference month considering the work load of the enumerators and in accordance with the purchasing habits of consumers in the selected FAs.

Since an interview method of data collection is utilized rather than an actual purchase and recording of price, it may result, in some instance, in exaggeration or under estimation of prices. However since enumerators were permanently assigned to each sample FA and reside there, they have a good chance of familiarizing themselves and be on friendly terms with retailers and owners of economic establishments, the result of which is a reasonably reliable and accurate information over time.

## **DEFINITIONS**

A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

### **NOTE:**

- The average column in each month gives a simple average of the corresponding item over the regions.
- The minimum that the balance can weigh is 10 grams. Thus, items which are sold in small quantities and whose weight fall under 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the price of these items in some respect.
- The symbol "N.A." is used for data not available or doubtful.
