EXPLANATORY NOTES

The External Trade Statistics of Ethiopia are compiled on the basis of the general trade system. Goods which are intended for domestic consumption or for re-export are included under import. Export includes domestic merchandise and articles of import which are exported after being transformed, improved or repaired. Re-exports consists of foreign merchandise which leaves the Empire in substantially the same state as when it enters.

Coverage. Statistics in this publications cover following transactions:

(1) All Government and non Government transactions;
(2) Goods financed by grants and loans;
(3) Postal trade;and
(4) Bunkers and ships's stores;

The following transactions are excluded:

(1) Temporary imports;
(2) Gold;
(3) Personal effects of passengers;
(4) Goods imported by diplomatic and consular missions to the extent that the details are shown in the declarations, and
(5) Cinema films.

The statistics included in this publication refer to all customs ports, stations, airports and post offices of the Empire.

Classification. The Ethiopian Commodity Trade Classification (E.C.T.C.) has been adopted beginning January 1962 for compiling commodity trade statistics. This classification is based on the Standard International Trade Classification(Revised) recommended by the Statistical Commission of the United Nations. It consists of ten broad economic categories styled as sections which are subdivided into 177 economic groups most sought in international comparisons of trade statistics; the groups are further divided into 2,000 items (shown with 6' digit code numbers) frequently occuring in Ethiopian trade.

Country Classification. Imports are classified according to the country of origin, i.e. the place or country in which the goods were produced or manufactured, and exports according to the country of final destination to the extent identifiable from records, especially in the case of the trade through the ports of Djibouti and Aden.

The code numbers and the nomenclature follow mainly the classification recommended by the United Nations Statistical Commission.

Valuation. Exports are valued F.O.B. and imports C.I.F. at the Customs border, stations with the following exceptions:

(1) Exports. Goods are valued F.O.B. at the Ethiopian Customs station of clearance on the Franco-Ethiopian Railway, and hence exclude freight insurance and other charges from the loading station up to the border ofEthiopia.

(2) Imports. C.I.F. Djibouti values are accepted if so shown in the declaration. Value figures thus do not include transit charges, insurance and freight charges for railway carriage between Djibouti port and the border of Ethiopia.

Quantity. Generally, quantity figures are shown in net weight expressed in Kilogrammes. In some cases quantity figures are also shown in numbers, pairs and litres etc. as the case may be.
