1. INTRODUCTION

International trade is the exchange of goods and services between nations. It enables a nation to specialize in those goods it can produce most cheaply and efficiently. Trade also enables a country to consume more than it would be able to produce if it depended only on its own resources. Moreover, trade enlarges the potential market for the goods of a particular economy. Trade has always been the major force behind the economic relations among nations. The increased international demand for goods translates into greater production and more extensive use of raw materials and labor, which in turn leads to growth in domestic employment. Competition from international trade can also force domestic firms to become more efficient through modernization and innovation. Since the beginnings of international trade, nations have striven to achieve and maintain a favorable balance of trade – that is, to export more than they import.

In view of the vital role international trade plays in the economic development of a country, and the overall responsibility of the Central Statistical Authority (CSA) to provide a convenient statistical reference in all fields of statistics, the Authority found it imperative to resume the publication of data pertaining to Ethiopia's international trade. International trade statistics are a good starting point for market research, as they provide an overview of present imports and exports (expressed in quantities and in values) as well as trends, broken down by product and country. Moreover, analysis of trade flows allows a smooth shift of focus from national markets to regional grouping, or even towards a global view.

For exporters, an analysis of international trade statistics is important in particular, for:

- pre-selecting new export markets (market screening),
- scanning new sources of import supply,
- analyzing trends in international demand and in the target country and,
- assessing competition with exporters or importers from other countries.

For trade promotion organizations, international trade statistics are useful for:

- developing national trade development strategies and programs,
- monitoring national trade performance,
- identifying priority products and markets for special trade promotion activities such as market prospect missions, trade fair participation, and market studies and,
- as an element of trade information services.

Therefore, the purpose of this publication is to assist the user of international trade statistics in making the most of the data at hand. In this respect eight selected tables are presented. The types of data captured among others include: trade balances (export less import), quantity and value of exports by commodity and destination, import of commodities by type, quantity, country of origin and end use. These data are expected to meet most of the demands by users of international trade data. The Harmonized System (HS) trade classification as provided by the Customs Authority is used. As regards valuation, generally imports are valued c.i.f., i.e. the value at which the goods were purchased plus the cost of transportation and insurance. Exports are valued at free on board (f.o.b.) at the frontier of the country. This is the value at which the goods were sold by exporter, including transportation and insurance, to bring the goods onto the transporting vehicle at the frontier of the country.

It is hoped that the publication will meet the growing demand for international trade data by policy makers, entrepreneurs, researchers, and other interested groups.

2. SUMMARY OF THE MAJOR RESULTS

2.1 Summary of Trade Balance, 1997-1999

Table 1 presents data on trade balance for the period 1997 to 1999. As the figures in this table indicate, the country had a negative balance of trade i.e., it had imported more than its exports, in all the three years under review, except that of April 1998, during which, a positive trade balance amounting to Birr 3.2 million was recorded. Generally, there was an increasing trend of negative balance, which is evidenced, by an annual increase of 70.3 percent in 1998, and 99.3 percent in 1999, compared to that of 1997. Export values in December (Birr 454.7 million), March (Birr 455.5 million) and April (Birr 413.4 million), and import values in May (Birr 811.8 million), February (Birr 1848.3 million) and July (Birr 1274.2 million) were the top ones in 1997, 1998 and 1999, respectively. Balance of trade by months showed ups and downs, the biggest gap being in February 1998, which was Birr 1,573.3 million in favour of imports.

2.2 Quantity and Value of Exports and Imports by Commodity Section, 1997-1999

As summarized in Table 2, in 1997, 1998 and 1999 exports were mainly concentrated on sections 2 and 8. These were mainly agricultural products including coffee, hides and skins which are the leading export items, throughout the period under review. Imports are well scattered throughout sections except sections 5, 6, 7, 11, 15, 16, and 17, which took relatively significant shares. These sections comprise fuel, chemicals, plastics, textiles, machinery and appliances, vehicles, aircraft vessels and associated transport equipment. For further detailed description of sections please refer to pages 184 and 185.

2.3 Quantity and Value of Major Export Commodities, by Destination 1997-1999

As the details in Table - 3 show, coffee was the major export item taking 63.1, 68.2 and 60.0 percent of the export value, followed by vegetable products which accounted for 7.3 percent, 9.0 percent and 14.6 percent in 1997, 1998 and 1999, respectively. These percentage shares indicate that there was a high dependence of export on few agricultural commodities.

Major buyers of Ethiopian coffee in 1997 were Germany (Birr 578.1 million), USA (Birr 421.1 million) and Japan (Birr 378.6 million). Their shares were 24.6, 17.9 and 16.1 percent of the total coffee export, in that order. Germany, Japan and Saudi Arabia bought coffee that worth, Birr 896.7 million (33.2 percent), 431.7 million (16.0 percent) and 365.3 million (13.5 percent), in 1998 and Birr 579.2 million (27.2 percent), 442.9 million (20.8 percent) and 381.3 million (17.9 percent) in 1999, respectively. That indicates these countries were the leading markets for Ethiopian coffee in 1998 and 1999.

Italy was the leading market for hides and skins during 1997 - 1999. Ethiopia earned a total of Birr 101.2, 74.4 and 30.0 million from the export of hides and skins out of which Italy bought 90.8, 70.3 and 28.1 million Birr worth in 1997, 1998 and 1999, respectively.

2.4 Trade Balance by Partners, 1997-1999

As can be seen from the data in Table 4, overall, the country had a negative balance of trade in 1997, 1998 and 1999 standing at Birr 3.8 billion, respectively. In 1997 Ethiopia had a positive balance with Africa and America, and a negative balance with the rest of the continents. In Africa, Ethiopia registered a substantial trade surplus with Djibouti amounting to Birr 260.6 million, i.e., it imported that goods worth Birr 40 million while exporting merchandise items to the tune of 300.6 million.

On the contrary, it had the largest trade imbalance with Kenya, that worth, Birr 44.8 million. During the same period Djibouti, Kenya and Egypt were the first three big markets for Ethiopia's exports in the African continent.

Comparative figures for 1998 and 1999 indicate that, in line with the previous year, the country registered a positive trade balance with Africa. However, unlike the previous year the country recorded a significant negative balance of trade with America. It registered a positive balance of Birr 145.5 and 133.9 million, with Africa in 1998 and 1999, respectively. But it exhibited a negative balance of Birr 4.5 billion with Asia, 1.5 billion with Europe, 501.6 million with America and 51.5 million with Oceania, in 1998. The corresponding figures for 1999 were 3.7 billion, 3.2 billion, 636.3 million and 72.6 million, in that order.

Djibouti, Egypt and Somalia were the biggest markets for Ethiopian exports in 1998 and 1999 while Kenya, Egypt and South Africa, respectively, were the top exporters to Ethiopia from the African continent. In 1998, the country had a positive balance with a few number of European countries: Germany (Birr 328.7 million), Belgium (Birr 8.8 million.), Romania (Birr 8.3 million) Bulgaria (2.0 Million) and Finland (5.4 Million) and with only Bulgaria (10.5 million) in 1999. However, it had a negative balance of Birr 1.5 billion and 3.2 billion with Europe as a whole in 1998 and 1999, respectively.

On the other hand, USA and Canada were the major partners of Ethiopia, from the American continent. Exports valued at Birr 448.1 million and 22.9 million in 1997, Birr 267.5 million and 30.8 million in 1998 and Birr 173.3 million and 26.0 million in 1999 reached to the two countries, respectively. Import values from the USA and Canada amounted to Birr 358.6 million and 33.7 million in 1997, Birr 573.9 million and 46.3 million in 1998 and Birr 723.1 million and 24.9 million in 1999, respectively.

In 1997 among Asian countries, Japan and Saudi Arabia were both the top export markets to Ethiopian products and leading exporters to the country. The following years also Japan and Saudi Arabia topped the list for exports and at the

same time they were the main origins of imports. On the other hand, Jordan was the leading importer of Ethiopian products, while India was the major exporter to Ethiopia in the year 1997. Like that of the previous year India were the main origin of imports, while Israel was the top among the list of exports to Ethiopian in 1998. Ethiopia imported goods that worth Birr 2.5 billion (almost one fourth of total imports) in 1998 from Saudi Arabia alone. In 1999 Japan, Saudi Arabia and Israel were the major markets for Ethiopian exports among Asian countries, while Japan, Yemen and China were the main origins of imports.

Ethiopia exhibited a staggering negative balance of trade amounting to Birr 4.5 billion in 1998 with Asia in general, and Birr 2.1 billion with Saudi Arabia alone. This negative trade balance with Asia is almost three times bigger than the balance with Europe, nine times with that of the American continent and double that of its level in 1997. Overall, in the year 1998 Ethiopia had a negative balance to the tune of Birr 6.4 billion, a rise of 68.4 percent as against a year before. However, in 1999 the country encountered Birr 3.7 billion negative trade balance with Asia, which was higher than the comparative balance in 1997 but lower than its level in 1998.

2.5 Quantity and Value of Exports and Imports by Commodity Group, Destination and Origin, 1997-1999

Table 5 and 6 present data on exports and Imports by commodity group, origin and destination for 1997, 1998 and 1999 in a more detailed way, and complemented by unit value calculations. However users are advised to use the unit value figures with caution, as they are unit values of heterogeneous products.

2.6 IMPORTS BY END USE, 1997 - 1999

Table 7 presents data on end use of imports. In 1997, 27.0 percent of imports were industrial goods, 19.4 percent semi-finished products and 15.7 percent, transport equipment. It is worth noting here that, during the same year non-durable consumer goods took 13.1 percent of the total import, while raw materials and capital

On the contrary, it had the largest trade imbalance with Kenya, that worth, Birr 44.8 million. During the same period Djibouti, Kenya and Egypt were the first three big markets for Ethiopia's exports in the African continent.

Comparative figures for 1998 and 1999 indicate that, in line with the previous year, the country registered a positive trade balance with Africa. However, unlike the previous year the country recorded a significant negative balance of trade with America. It registered a positive balance of Birr 145.5 and 133.9 million, with Africa in 1998 and 1999, respectively. But it exhibited a negative balance of Birr 4.5 billion with Asia, 1.5 billion with Europe, 501.6 million with America and 51.5 million with Oceania, in 1998. The corresponding figures for 1999 were 3.7 billion, 3.2 billion, 636.3 million and 72.6 million, in that order.

Djibouti, Egypt and Somalia were the biggest markets for Ethiopian exports in 1998 and 1999 while Kenya, Egypt and South Africa, respectively, were the top exporters to Ethiopia from the African continent. In 1998, the country had a positive balance with a few number of European countries: Germany (Birr 328.7 million), Belgium (Birr 8.8 million.), Romania (Birr 8.3 million) Bulgaria (2.0 Million) and Finland (5.4 Million) and with only Bulgaria (10.5 million) in 1999. However, it had a negative balance of Birr 1.5 billion and 3.2 billion with Europe as a whole in 1998 and 1999, respectively.

On the other hand, USA and Canada were the major partners of Ethiopia, from the American continent. Exports valued at Birr 448.1 million and 22.9 million in 1997, Birr 267.5 million and 30.8 million in 1998 and Birr 173.3 million and 26.0 million in 1999 reached to the two countries, respectively. Import values from the USA and Canada amounted to Birr 358.6 million and 33.7 million in 1997, Birr 573.9 million and 46.3 million in 1998 and Birr 723.1 million and 24.9 million in 1999, respectively.

In 1997 among Asian countries, Japan and Saudi Arabia were both the top export markets to Ethiopian products and leading exporters to the country. The following years also Japan and Saudi Arabia topped the list for exports and at the

same time they were the main origins of imports. On the other hand, Jordan was the leading importer of Ethiopian products, while India was the major exporter to Ethiopia in the year 1997. Like that of the previous year India were the main origin of imports, while Israel was the top among the list of exports to Ethiopian in 1998. Ethiopia imported goods that worth Birr 2.5 billion (almost one fourth of total imports) in 1998 from Saudi Arabia alone. In 1999 Japan, Saudi Arabia and Israel were the major markets for Ethiopian exports among Asian countries, while Japan, Yemen and China were the main origins of imports.

Ethiopia exhibited a staggering negative balance of trade amounting to Birr 4.5 billion in 1998 with Asia in general, and Birr 2.1 billion with Saudi Arabia alone. This negative trade balance with Asia is almost three times bigger than the balance with Europe, nine times with that of the American continent and double that of its level in 1997. Overall, in the year 1998 Ethiopia had a negative balance to the tune of Birr 6.4 billion, a rise of 68.4 percent as against a year before. However, in 1999 the country encountered Birr 3.7 billion negative trade balance with Asia, which was higher than the comparative balance in 1997 but lower than its level in 1998.

2.5 Quantity and Value of Exports and Imports by Commodity Group, Destination and Origin, 1997-1999

Table 5 and 6 present data on exports and Imports by commodity group, origin and destination for 1997, 1998 and 1999 in a more detailed way, and complemented by unit value calculations. However users are advised to use the unit value figures with caution, as they are unit values of heterogeneous products.

2.6 IMPORTS BY END USE, 1997 - 1999

Table 7 presents data on end use of imports. In 1997, 27.0 percent of imports were industrial goods, 19.4 percent semi-finished products and 15.7 percent, transport equipment. It is worth noting here that, during the same year non-durable consumer goods took 13.1 percent of the total import, while raw materials and capital

goods for agriculture gained only 2.2 and 1.1 percent, respectively. Except for minor changes, the picture is the same for 1998. Fuel imports were 24.7 percent of the total, in 1998, which is significantly higher from the 10.2 percent in 1997, followed by industrial goods (21.7 percent) and semi finished products (17.6 percent). In the same year, non-durable consumer goods took 16.2 percent of the total import, while raw materials and capital goods for agriculture, managed only 1.74 and 0.9 percent, respectively. Textile fabrics and clothing were the leading import items under non-durable items category both in 1997 and 1998. Compared to 1997, import of fuel in 1998, has increased by 297.2 and 235.0 percent in volume and value, respectively, making it the leading import item. In the same year import of transport equipment decreased by 37.8 percent compared to that of 1997.

In 1999, 24.7 percent of imports were industrial goods 20.7 percent non-durable consumer goods, 15.4 percent- semi-finished products, 12.4 percent – durable capital goods (transport), 11.1 percent – fuel, 11.0 percent – durable consumer goods. The remaining 4.7 percent went to raw materials (1.8 percent), agricultural capital goods (0.8 percent), miscellaneous items (0.5 percent) and unspecified items (1.6 percent).

The share of fuel imports went down by 55.1 percent, i.e., from 24.7 percent of total imports in 1998 to 11.1 percent in 1999. Nevertheless, petroleum products remain to be the leading import items with 11.0 percent of total imports followed by heavy weight road motor vehicles (10.4 percent) and electrical machinery and equipment (7.2 percent).

It is worth noting here that in 1999, 20.7 percent (slightly more than one fifth) of total imports constitute non-durable consumer goods. Textile fabrics and clothing, (which are included under the above-mentioned category of import items) took 5.2 percent of total imports, while capital goods for agriculture managed only 0.8 percent of total import value.

2.7 DIRECTION OF TRADE, 1997 - 1999

The data in table 8 makes clear that, in 1997, 46.8 percent of exports went to Europe, followed by Asia 26.1 percent and Africa 14.1 percent. The American continent's share was 12.7 percent, while Oceania took only 0.3 percent of Ethiopia's total export. Germany was the leading country for Ethiopia's exports, taking up 17.0 percent of the total export, USA following with 12.1 percent and Japan ranking third (11.0 percent). Other major export destinations were Saudi Arabia (8.9 percent), Italy (8.3 percent) and Djibouti (8.1 percent).

During 1997 and 1998, Ethiopia's trade with African countries was not well distributed, as only two countries namely Djibouti, and Egypt absorbed 68.6 and 89.0 percent of the total export to the continent, respectively. The same argument holds true for other continents as well. Only five countries in Europe: Germany, Italy, Belgium, France and the United Kingdom absorbed 76.1 percent of Ethiopia's exports to the continent and 35.6 percent of the total to the world. On the other side, only one country, the USA took 94.8 percent of Ethiopia's export to the American continent or 12.0 percent of the total. Similarly only two countries in Asia, namely, Japan and Saudi Arabia took 75.9 percent of the continent's share and almost one fifth of Ethiopia's export to the whole world.

In 1998, one country, Germany alone, took almost a quarter (24.7 percent) of Ethiopia's export to the world, registering a growth of 45.3 percent compared to its position a year before. On the contrary, neighboring Kenya's share plunged from 2.7 percent of the total export in 1997 to 0.0 percent in 1998. In other words, Kenya took merchandise worth Birr 100.3 million from Ethiopia in 1997, while a year later it imported goods to the amount of Birr 30.0 thousand only. During the same year, two other countries in Africa, i.e., Djibouti and Egypt increased their share out of the total exports by 22.2 and 33.1 percent, respectively. Overall, in 1998 Africa's share for Ethiopia's exports showed a decline of 4.5 percent compared to its level in 1997.

During the year 1998, almost half (50.7 percent) of Ethiopian exports went to Europe, registering an increase of 8.3 percent as against a year before. On the

other side one of the leading markets in Europe for Ethiopia's exports, namely Italy, took merchandise valued at in Birr 269.3 million, a decline of 13.0 percent, compared to the value registered in the previous year. Italy's share of Ethiopia's export to the whole world also decreased by 18.4 percent. With regards to another European country, out of the total export Belgium's share improved by 10.2 percent in 1998 compared to its position in 1999. Ethiopia's exports to the American continent in 1998 was far less than that of 1997. The continent's share has decreased by 35.3 percent, while the USA's share (the leading market for Ethiopia's exports in the continent) went down by 44.1 percent compared to its position in 1997.

During 1998, three major destinations for Ethiopia's exports in Asia: Japan, Saudi Arabia and Israel improved their share by 10.9, 11.7 and 174.5 percent, respectively. Oceania's position overall and Australia's in particular, (the significant market for Ethiopia's exports in the continent), remained the same as a year before.

In 1999, 19.4 percent of exports went to Africa, 40.1 percent to Europe, 5.6 percent to the American continent, 34.6 percent to Asia and the remaining 0.3 percent to Oceania.

As in the previous two years Europe was the leading market for Ethiopia's exports in 1999, followed by Asia, Africa, America and Oceania. Africa's share in 1999 has shown a significant rise compared to the previous two years, i.e., it has gone up by 37.6 and 44.0 percent, compared to 1997 and 1998, in that order. The three leading countries for Ethiopia's export merchandise in the continent in 1999 were Djibouti, Somalia and Egypt. Djibouti alone took about 11.0 percent of the total exports and 56.6 percent of Africa's share.

On the other hand, despite the fact that Europe still remained the largest market for Ethiopia's exports, its overall share has declined by 14.2 and 20.8 percent in 1999 as against that of 1997 and 1998, respectively. In 1999 the continent took 40.1 percent of the total export, while Germany, Italy and France were the leading destinations, respectively. Germany alone took merchandise to the tune of 608.8 million (17.1 percent of the total export). However, Germany's share in 1999 has

declined by 30.6 percent as compared to 1998. Nevertheless, it remained the largest market for Ethiopia's exports during 1997 to 1999, from the continent and the world as a whole. Conversely, Italy's share for Ethiopia's exports has shown a steady decline during the period 1997 to 1999. In 1999 its share was 19.5 percent less than that of 1997.

Asia's share for Ethiopia's exports has grown up consistently, during the period, from 1997 to 1999. In 1999 the continent's share has grown by 32.5 and 26.9 percent compared to 1997 and 1998, respectively. As in the previous two years, in 1999 Japan and Saudi Arabia, were the biggest markets for Ethiopia's exports taking 12.9 and 11.5 percent of total exports and 37.3 and 33.2 percent of the continent's share, respectively.

The other continent, Oceania remains to be the smallest market for Ethiopia's exports taking only about 0.3 percent of the total to all continents. From this continent Australia remains to be the leading market.

Table 1: Summary of Trade Balance, 1997 - 1999
