INTRODUCTION

The Central Statistical Authority, CSA, started the collection of rural prices in May 1981 in selected Farmers' Association Areas, FAs, in 12 regions, excluding Tigray, Eritrea and areas inhabited by nomadic population. Thus as part of the Rural Integrated Household Survey Program, RIHSP, which was launched in 1980 the rural price survey, covering both Retail price and Producer price, is conducted on a monthly basis.

This report provides results of monthly average retail prices of goods and services for the period September 1990 to January 1991 (Meskerem 1983 to Tir 1983 of Ethiopian Calendar). Due to lack of space, to accommodate all regions, prices are presented in three parts. This paper attempts to discuss the objective, scope and coverage, method of data collection, definitions and provide list of tables on average retail prices in rural area by region and by item.

This tenth issue updates Statistical Bulletin 107. Earlier issues on the same subject are Statistical Bulletins 37, 45, 57, 64, 83, 93, 96, 106, and 107.

Objectives

The collection of retail prices in rural areas has the following objectives:

1. to study the level of retail prices,
2. to study the disparities between prices at various distribution levels,
3. to study changes in the economy,
4. to provide data for national accountants in the valuation of output,
5. to construct rural price indices.

Scope and Coverage

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in the light of staff experience and in an effort to incorporate commodities mostly consumed by the rural population. Since September 1988 the geographical coverage of the survey was revised to follow the establishment of Autonomous Regions, Administrative Regions and Provinces (Proclamation No. 26/1989) and covers one Autonomous Region and twenty five Administrative Regions. However, due to certain reasons data collection was not undertaken in Metekel Administrative Region in January 1991 and in North Wello Administrative Region for the entire period under review.

The major groups of items covered in the survey include food, drinks, tobacco and stimulants, household equipment, clothing, footwear, energy, medical care, personal care and effects, education, recreation, building materials and other goods and services.

Information on retail prices of selected agricultural and industrial commodities are collected from retail outlets in the sample FAs. The allocation of FAs to the Regions takes into account the size of the Regions and has been considered to be a reasonable minimum size to provide meaningful estimates at Regional level.

The number of FAs covered in the survey, during the period under review, in each of the twenty five Regions is given below. However, the number of FAs given below differs from that of previous period due to various reasons.

Number of FAs covered in the survey by Region

Total		556

Method of Data Collection

The retail prices are collected every month of the Ethiopian Calendar (September to August) from major outlets in the selected FAs or from adjacent area where households purchase most of goods and services for consumption and other purposes. Although prices are collected from traders, in some cases prices are obtained from consumers at the time of purchase. For each item a maximum of three price quotations are collected from three different retailers.

Price data is mainly collected on market days throughout the reference month considering the work load of the field representatives and in accordance with the purchasing habits of consumers in the selected FAs.

Definition

A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

Note

1. The average column in the third part of the report gives a simple average of quotations for the corresponding item in all Regions.

2. The minimum that the balance can weigh is 10 grams. Thus items which are sold in small quantities and whose weight fall under 19 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the prices of these items in some respect.

3. The symbol "N.A." is used for data not available or doubtful.
