FEDERAL DEMOCRATIC REPUBLIC OF ETHIOPIA  
OFFICE OF POPULATION AND HOUSING CENSUS COMMISSION  
CENTRAL STATISTICAL AUTHORITY

**THE 1994 POPULATION AND HOUSING  
CENSUS OF ETHIOPIA  
RESULTS FOR OROMIYA REGION**

**VOLUME I : PART VI  
STATISTICAL REPORT ON  
POPULATION SIZE OF KEBELES**

## F O R E W O R D

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Oromiya Region which appear in six separate parts:

- Volume I: Part I - Statistical Report on Population size and Characteristics.
- Volume I: Part II - Statistical Report on Education and Economic Activity.
- Volume I: Part III- Statistical Report on Migration Fertility and Mortality.
- Volume I: Part IV - Statistical Report on Housing Characteristics.
- Volume I: Part V - Abridged Statistical Report.
- Volume I: Part VI - Statistical Report on Population Size of Kebeles.

Thus, the Office of the Population and Housing Census Commission is pleased to present the census report "The 1994 Population and Housing Census of Ethiopia: Results for Oromiya Region, Volume I: Part VI - Statistical Report on Population Size of Kebeles" for users. The 1994 Population and Housing Census was a huge nation wide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non-government organizations, external donor agencies and the public in general was obtained. A number of preparatory activities were also carried-out before the census enumeration was begun. Among the major census preparatory activities was the conduct of the Population and Housing Census Map Work. In the census map work the peasant associations in rural areas and the urban dwellers associations in urban areas were sub-divided into enumeration areas with 150-200 housing units in urban areas and 150-200 households in rural areas. About 5-6 contiguous enumeration areas were formed into one supervision area. In this exercise enumeration area and supervision area maps were also prepared. In the census map work operation a total of 49,978 enumeration areas and 9,845 supervision areas were constructed in the settled rural areas and 8,724 enumeration areas and 1,575 supervision areas in the urban areas of the country. In rural areas of Oromiya Region a total of 19143 enumeration areas and 3814 supervision areas were delineated. On the other hand in the urban areas of the region, a total of 2457 enumeration areas and 443 supervision areas were formed.

During the census enumeration, one enumerator was given the map of one enumeration area and was responsible to record all persons and housing units in that enumeration area. One supervisor was later assigned to a supervision area and was responsible for the quality of the information collected in that area.

The Office of the Population and Housing Census Commission would like to thank all government and non-government agencies who participated in the organization of the census, the supervision of the field work, the data collection, and the respondents who participated in providing the necessary

information. The government of Ethiopia has given huge financial and unreserved administrative support in undertaking the 1994 National Population and Housing Census from its inception till the dissemination of the results. This indicates the commitment and high priority offered by the government for socio-economic and demographic data collection, processing, evaluation and dissemination of the results to users.

The Office would also like to take this opportunity to express its many thanks to the United Nations Population Fund (UNFPA) to its generous financial assistance and technical support in conducting the census. Moreover, thanks are due to United States Agency for International Development (USAID) for its financial and technical assistance for the census. Further thanks are due to the United Nations Development Program (UNDP) and to the Swedish International Development Authority (SIDA) for their financial assistance. The office hopes that the data presented in this report will be found useful by all data users.

Abdulahi Hasen(Ph.D.)

Member  
and  
Secretary,  
Central Census Commission

## CHAPTER I

### INTRODUCTION

This chapter presents an overview of the content of the census report "The 1994 Population and Housing Census of Ethiopia: Results for Oromiya Region, Volume I: Part VI - Statistical Report on Population Size of Kebeles". This report presents information on population size of kebeles (both urban kebeles and rural farmers' associations). The kebeles presented in this report refer to kebeles that existed at the time of the census. Since the census operation was conducted, kebele boundaries have changed and the number of kebeles reduced. Population sizes of zones, weredas, and towns are also presented in the report. Summaries of population sizes by single ages and projected population figures up to the year 2000 are also presented. The data presented in this report constitute some of the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Oromiya Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Oromiya Region are: Volume I: Part I- Statistical Report on Population Size and Characteristics; Volume I: Part II- Statistical Report on Education and Economic Characteristics; Volume I: Part III- Statistical Report on Migration, Fertility and Mortality; Volume I: Part IV - Statistical Report on Housing Characteristics; and Volume I Part V- Abridged Statistical Report.

Oromiya Region consists of twelve zones, 180 weredas and 375 towns. The rural parts of the region had 10,161 farmers' association areas at the time of the census. However, this number has recently declined drastically after the reorganization of the rural kebeles. The urban parts of the region have 564 kebeles in the 375 towns. The census fully covered most of the areas in the region except for 97 farmers' associations in the rural areas and 4 kebeles in the urban areas. The areas that were not covered in the census are in Misrak Harerge Zone, Borena Zone, and Mirab Harerge Zone. Out of the 180 weredas in the region, 165 weredas

were fully covered. In 14 weredas some FAs or urban kebeles were not covered in the census while in one wereda (Jarso wereda of Misrak Harerge Zone) the entire FAs (that number 30) and its town (Ejersa Goro) were not covered. These weredas were: Kombolcha, Babile, Fedis, Haro Maya, Kurfa Chele, Kersa, Malka Balo, Bedeno, Girawa, and Gola Odana Meyumuluke weredas in Misrak Harerge zone; Arero and Moyale weredas of Borena Zone; Mieso and Darolebu weredas of Mirab Harerge Zone. The kebeles that were not covered in the census were: a kebele in Ejersa Goro Town (i.e the whole town) of Jarso Wereda; a kebele in Mulu Town (i.e the whole town) of Mieso Wereda; parts of kebele 01 and parts of kebele 02 in Moyale Town of Moyale Wereda. For details concerning the farmers' associations not covered in the census, reference may be made to Table 7.2 Volume I: Part VI.

The statistical tables presented in this report all refer to the areas that were covered during the census only, except in a few cases where it is explicitly stated that estimates for the areas not covered in the census are included. In this report, the population size of the areas covered in the census plus those that were not covered in the census is presented by zones and weredas in Table 2.1. The estimated population size of the areas not covered in the census by zones and weredas are presented in Table 2.2, and the estimated population sizes of towns not covered in the census are presented in Table 2.3. The population size estimates for the farmers' associations not covered in the census are presented in Table 7.2. The population projection for the region is prepared using the total of the census covered plus the estimated population sizes. All the other tables refer to the census covered population only. In these tables, the information for weredas that were only partly covered during the census refers to the census covered population only. Jarso wereda will not appear in any of these tables because it was entirely uncovered during the census.

Localities were identified as towns or rural areas during the census cartographic work. Towns were defined as localities in which Urban Kebele Administration (previously known as Urban Dwellers Association) has been established. Localities that had

1000 or more persons whose inhabitants were primarily engaged in non agricultural activities were identified as towns irrespective of whether Urban Kebele Administration has been established or not. Similarly capitals of weredas were also identified as towns even if Urban Kebele Administration has not been established. However, changes of wereda boundaries have occurred since the conduct of the census cartographic work; and in some instances two or more previous weredas have been combined to form one wereda. Thus, localities that were seats of wereda administration at the time of the census cartographic work, and subsequently identified as towns in the census report, may no longer be wereda capitals.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were Prepared in Amharic. English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

- i) Short Questionnaire (Appendix I)
- ii) Long Urban Questionnaire (Appendix II)
- iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education,

economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religious and marital distributions was collected from all persons covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Even though the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity, ... etc. represent the entire population of Oromiya Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding

and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling in the questionnaires designed for the purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains three chapters. The first chapter serves as an introduction to the report. Chapter II presents summary population size which deal on population sizes by zones, weredas and towns. It also presents population sizes by single years of ages and projected population sizes up to the year 2000. Chapter VII presents population size of the region by kebeles (both urban kebeles and rural farmers' associations). Annex I presents results of population projection up to the year 2000, while Annex II presents the list of tables on other parts of Volume I.

The accompanying Volume I: Part I consists of Chapter II which presents the population sizes, sex, age, language, ethnic, religious, marital status and disability conditions of the population. Volume I: Part II presents Chapter III which deals with education, and Chapter IV which deals on economic characteristics. Volume I: Part III presents Chapter V which deals on migration, fertility and mortality conditions; and Volume I: Part IV presents Chapter VI which deals on housing stocks and conditions. Volume I: Part V has six chapters and presents selected tables from volume I: Parts I, II, III and IV; and thus deals in an abridged form on population size and characteristics, educational characteristics, economic characteristics, migration, fertility, mortality and housing characteristics. The abridged form was found necessary as the size of the region is huge and hence data tabulated is enormous, which required binding in five separate parts.

The tables presented here were selected from a long list of tables that have already been produced for Oromiya Region. The forthcoming analytical report for the 1994 Population and Housing Census data of Oromiya Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census data are expected to continue even after the production of the analytical report.

## CHAPTER II

### POPULATION SIZE AND CHARACTERISTICS

This chapter presents summary data on population size for Oromiya Region at zone and wereda levels classified into rural and urban areas, and at town levels. Also presented in this chapter, are population sizes by single years of age and sex. The chapter consists of various tables which are self-explanatory. However, short definitions of some important terms and concepts used in the chapter are provided.

The 1994 Census did not cover some areas in Oromiya Region. Areas that were not covered during the census are found in Mirab Harerge zone, Misrak Harerge zone and Borena zone. Estimates of population size of these areas are given separately in Tables 2.2 and 2.3 of this chapter. Tables 2.4 and 2.5 refer to the population covered in the census.

Oromiya Region's total population was found to be 18,732,525 of which 9,371,228 were males and 9,361,297 were females. This figure includes both the areas covered during the census and the areas not covered in the census. The areas not covered during the census constitute 258,705 persons, of which 251,421 are found in the rural areas, while 7,284 are found in the urban areas.

The estimated rural population refers to parts of Darolebu Wereda in Mirab Harerge Zone; the entire Jarso Wereda, and parts of Kombolcha, Babile, Fedis, Haro Maya, Kurfa Chele, Kersa, Girawa, and Gola Odana Meyumuluke Weredas in Misrak Harerge Zone; and parts of Arero, and Moyale Weredas in Borena Zone. The estimated urban population refers to Mulu Town of Mieso Wereda in Mirab Harerge Zone; the only town of Jarso Wereda (Ejersa Goro Town) in Misrak Harerge Zone; and parts of Kebele 01 and Kebele 02 of Moyale Town of Moyale Wereda in Borena Zone. Estimates were done on EA (Enumeration Area) basis from the population estimates obtained from the listing of households during census cartographic work, which had been conducted 1-2 years prior to the 1994 census. The estimation (projection) was made using an assumed growth rate. In some weredas, for farmers' associations

where census cartographic work was not conducted, estimates were obtained by using the average population size of farmers associations for which estimates were available.

The first table of this chapter (Table 2.1) presents the sum of counted population size and estimates of areas not covered in the census for Oromiya Region. Table 2.2 provides the estimated population sizes of the areas not covered during the 1994 census by zone and wereda, while Table 2.3 presents the estimated population size of kebeles and towns not covered during the census. Each of the kebeles of Moyale town were partially uncovered, and hence the total population for the town will be the sum of estimated population size in Table 2.3 and that of counted population size in Table 2.4.

Table 2.4 provides the population size of towns, while Table 2.5 also provides the single years of age distribution of the population covered in the census. According to the 1994 Census, the population size of areas covered during the census was found to be 18,473,820; of which 16,511,016 were found in rural areas and 1,962,804 were found in the urban areas. The population sizes refer to the de jure population size of Oromiya Region as of 11 October, 1994. De jure population comprises of all the people who "belong" to a given area at a given time by virtue of usual residence (Shryock et al., 1973). In the census a person is said to be a usual resident of a household (and hence an area) if he/she has been residing in the area continuously for at least six months before the census day or intends to reside in the area for six months or longer. Thus, visitors are not included with the usual population. Homeless persons were enumerated in the place where they were spending the night. The 1994 Census includes foreign nationals who were residing in the region. On the other hand all Ethiopians living abroad were not counted.

## CHAPTER VII

### POPULATION SIZE OF KEBELES

This chapter presents the population size of Kebeles (both urban kebeles and rural farmers' associations) in Oromiya Region. Table 7.1 presents the population size of towns by Kebeles in the region. This table refers to Kebeles covered in the census, while the Kebeles not covered in the census are presented as Table 2.3 in the previous chapter. The estimated population size for the rural farmers' associations not covered in the census are presented in Table 7.2, while the population size of the farmers' associations covered in the census are presented in Table 7.3. Some farmers' associations appear both in Table 7.2 and 7.3 because some parts of the FA were covered in the census, while some other parts remained uncovered. In these instances, the estimates provided for the FA refer to the part of the FA that was uncovered only, and these FAs are indicated with an asterisk in Table 7.2.

\* – Refers to farmers' association partially covered in the 1994 census

\*\* – Refers to Burunekie, Dera Jibera, Jiremie, Dabelie and Hufie Farmers' Associations

\*\*\* – Refers to Aliso, Golo Sodoma, Chira, Guguf, Gebibida, Gola Biko Farmers' Associations and other Nomadic areas

**Note:** – Estimates were obtained from the population sizes registered during the census cartographic work, and the results updated to refer to the date of the census. However, in the case of the five farmers' associations of Malka Balo Wereda estimates were obtained using the average population size of a farmers' associations in the Wereda. In the case of the six farmers' associations and nomadic areas of Gola Odana Meyumuluke Wereda estimates were obtained based on the results of the 1984 Population and Housing Census.

ANNEX II - LIST OF TABLES ON OTHER PARTS OF VOLUME I

VOLUME I: PART I

CHAPTER II - POPULATION SIZE AND CHARACTERISTICS

- TABLE 2.1 Counted plus estimated population size of zones and weredas by sex, urban and rural: 1994
- TABLE 2.2 Estimated population size of areas not covered during the 1994 census by zones and weredas
- TABLE 2.3 Estimated population size of towns not covered by the 1994 census
- TABLE 2.4 Total population size of zones and weredas by sex, urban and rural: 1994
- TABLE 2.5 Total population of towns by sex: 1994
- TABLE 2.6A Population size by broad age group, sex and type of residence (Oromiya Region-total): 1994
- TABLE 2.6B Population size by broad age group, sex and type of residence (Oromiya Region-urban): 1994
- TABLE 2.6C Population size by broad age group, sex and type of residence (Oromiya Region-rural): 1994
- TABLE 2.7 Population size of zones by sex and type of residence, urban and rural: 1994
- TABLE 2.8 Household size and average number of persons per household in conventional households by zones, urban and rural: 1994
- TABLE 2.9 Population size by sex and age in single year, urban and rural: 1994
- TABLE 2.10 Population size of weredas by sex and age group, urban and rural: 1994
- TABLE 2.11 Population size of towns by sex and age group: 1994
- TABLE 2.12 Population size by ethnic group and sex, urban and rural: 1994
- TABLE 2.13 Five major ethnic groups and ethnic groups with population size of 500 and over of weredas by sex, urban and rural: 1994
- TABLE 2.14 Five major ethnic groups and ethnic groups with population size of 500 and over of towns by sex: 1994

- TABLE 2.15 Population size by mother tongue and sex, urban and rural: 1994
- TABLE 2.16 Five major mother tongue and mother tongue with population size 500 and over of weredas by sex, urban and rural: 1994
- TABLE 2.17 Five major mother tongue and mother tongue with population size 500 and over of towns by sex: 1994
- TABLE 2.18 Population size by second language spoken and sex, urban and rural: 1994
- TABLE 2.19A Population size by religion, sex and age group (Oromiya Region-total): 1994
- TABLE 2.19B Population size by religion, sex and age group (Oromiya Region-urban): 1994
- TABLE 2.19C Population size by religion, sex and age group (Oromiya Region-rural): 1994
- TABLE 2.20 Population size of weredas by religion and sex, urban and rural: 1994
- TABLE 2.21 Population size of towns by religion and sex: 1994
- TABLE 2.22A Population in conventional households by relationship to head of household, sex and age group (Oromiya Region-total): 1994
- TABLE 2.22B Population in conventional households by relationship to head of household, sex and age group (Oromiya Region-urban):1994
- TABLE 2.22C Population in conventional households by relationship to head of household, sex and age group (Oromiya Region-rural): 1994
- TABLE 2.23A Population aged ten years and over by marital status, sex and age group (Oromiya Region-total): 1994
- TABLE 2.23B Population aged ten years and over by marital status, sex and age group (Oromiya Region-urban): 1994
- TABLE 2.23C Population aged ten years and over by marital status, sex and age group (Oromiya Region-rural): 1994
- TABLE 2.24 Population by broad age groups, disability status, type of disability and sex ratio: 1994
- TABLE 2.25 Population by disability status and type of disability, urban and rural: 1994

**ANNEX I - POPULATION PROJECTIONS**

ANNEX TABLE I.1 Reported population size of Oromiya Region by urban and rural, five years age group and sex October, 1994 census
