## F O R E W O R D

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Oromiya Region which appear in six separate parts:

- Volume I: Part I - Statistical Report on Population Size and Characteristics.
- Volume I: Part II - Statistical Report on Education and Economic Activity.
- Volume I: Part III- Statistical Report on Migration Fertility and Mortality.
- Volume I: Part IV - Statistical Report on Housing Characteristics.
- Volume I: Part V - Statistical Report on Population Size of Kebeles.
- Volume I: Part VI - Abridged Statistical Report.

## CHAPTER I

### INTRODUCTION

This chapter presents an overview of the content of the census report "The 1994 Population and Housing Census of Ethiopia: Results for Oromiya Region, Volume I: Part II - Statistical Report on Education and Economic Activity". This report presents information on education (school attendance, educational attainment, ...etc.) and economic activity (activity rates, unemployment rates, occupational distribution, industrial groups, status, ...etc.). Summaries of population sizes (for zones, weredas, and towns; and projected population figures up to the year 2000) are also presented as an Annex. The data presented in this report constitute some of the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Oromiya Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Oromiya Region are: Volume I: Part I- Statistical Report on Population Size and Characteristics; Volume I: Part III- Statistical Report on Migration, Fertility and Mortality; Volume I: Part IV - Statistical Report on Housing Characteristics; Volume I: Part V- Abridged Statistical Report and Volume I: Part VI - Statistical Report on Population Size of Kebeles.

Oromiya Region consists of twelve zones, 180 weredas and 375 towns. The rural parts of the region had 10,161 farmers' association areas at the time of the census. However, this number has recently declined drastically after the reorganization of the rural kebeles. The urban parts of the region have 564 kebeles in the 375 towns. The census fully covered most of the areas in the region except for 97 farmers' associations in the rural areas and 4 kebeles in the urban areas. The areas that were not covered in the census are in Misrak Harerge Zone, Borena Zone, and Mirab Harerge Zone. Out of the 180 weredas in the region, 165 weredas were fully covered. In 14 weredas some FAs or urban kebeles were not covered in the census while in one wereda (Jarso wereda of Misrak Harerge Zone) the entire FAs (that number 30) and its

town(Ejersa Goro) were not covered. These weredas were: Kombolcha, Babile, Fedis, Haro Maya, Kurfa Chele, Kersa, Malka Balo, Bedeno, Girawa, and Gola Odana Meyumuluke weredas in Misrak Harerge zone; Arero and Moyale weredas of Borena Zone; Mieso and Darolebu weredas of Mirab Harerge Zone. The kebeles that were not covered in the census were: a kebele in Ejersa Goro Town (i.e the whole town) of Jarso Wereda; a kebele in Mulu Town (i.e the whole town) of Mieso Wereda; parts of kebele 01 and parts of kebele 02 in Moyale Town of Moyale Wereda. For details concerning the farmers' associations not covered in the census, reference may be made to Table 7.2 Volume I: Part VI.

The statistical tables presented in this report all refer to the areas that were covered during the census only, except in a few cases where it is explicitly stated that estimates for the areas not covered in the census are included. In this report, the population size of the areas covered in the census plus those that were not covered in the census is presented by zones and weredas in Annex Table 1. The estimated population size of the areas not covered in the census by zones and weredas are presented in Annex Table 2, and the estimated population sizes of towns not covered in the census are presented in Annex Table 3. The population size estimates for the farmers associations not covered in the census are presented in Table 7.2 in Volume I: Part VI. The population projection for the region is prepared using the total of the census covered plus the estimated population sizes. All the other tables refer to the census covered population only. In these tables, the information for weredas that were only partly covered during the census refers to the census covered population only. Jarso wereda will not appear in any of these tables because it was not covered during the census.

Localities were identified as towns or rural areas during the census cartographic work. Towns were defined as localities in which Urban Kebele Administration (previously known as Urban Dwellers Association) has been established. Localities that had 1000 or more persons whose inhabitants were primarily engaged in non agricultural activities were identified as towns irrespective

of whether Urban Kebele Administration has been established or not. Similarly capitals of weredas were also identified as towns even if Urban Kebele Administration has not been established. However, changes of wereda boundaries have occurred since the conduct of the census cartographic work; and in some instances two or more previous weredas have been combined to form one wereda. Thus, localities that were seats of wereda administration at the time of the census cartographic work, and subsequently identified as towns in the census report, may no longer be wereda capitals.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were prepared in Amharic. English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

- i) Short Questionnaire (Appendix I)
- ii) Long Urban Questionnaire (Appendix II)
- iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religious and marital distributions was collected from all persons covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Even though the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity, ... etc. represent the entire population of Oromiya Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling in the questionnaires designed for the

purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains three chapters. The first chapter serves as an introduction to the report. Chapter III presents the educational characteristics of the population and Chapter IV deals with the economic characteristics in the region. Annex I presents six summary tables about the population size of the region. Annex Table 1 presents the population size of the region obtained from the census plus estimates for areas not covered in the census classified into zones and weredas. Annex Table 2 presents the estimated population size of the areas not covered in the census classified into zones and weredas. Annex Table 3 presents the population size of the towns not covered in the census, while Annex Table 4 presents the population size of towns covered in the census. Annex Table 5 presents the single year age distribution of the population covered in the census. Annex Table 6 presents the projected population size for the region up to the year 2000. Annex II presents the list of tables on other parts of Volume I.

The accompanying Volume I: Part I consists of Chapter II which presents the population sizes, sex, age, language, ethnic, religion, marital status and disability condition of the population. Volume I: Part III presents Chapter V which deals with migration, fertility and mortality conditions. Volume I: Part IV presents Chapter V which deals on the housing stocks and conditions. Volume I: Part V has six chapters and presents selected tables from volume I: Parts I, II, III and IV; and thus deals in an abridged form on population size and characteristics, educational characteristics, economic characteristics, migration, fertility, mortality and housing characteristics. The abridged form was found necessary as the size of the region is huge and hence data tabulated is enormous, which required be binding in five separate parts. Volume I Part VI presents Chapter VII which deals on the Population Size of Kebeles (both the urban kebeles and the rural farmers' associations).

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility and mortality exclude the homeless. Since the homeless population is very small compared to the population of Oromiya Region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were sleeping, and it was not convenient to apply long questionnaires in these situations. Homeless persons were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for Oromiya Region. The forthcoming analytical report for the 1994 Population and Housing Census data of Oromiya Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census data are expected to continue even after the production of the analytical report.

## CHAPTER III

### EDUCATIONAL CHARACTERISTICS

This chapter presents data on educational characteristics of the population of Oromiya Region . The data was collected from members of the sampled household. Two questions on education were included in the census questionnaire to measure school attendance and educational attainment. The information was collected from persons who were covered using the long questionnaire. However, the information has been weighted and all the figures in this chapter refer to the entire population of Oromiya Region.

Every person aged five years and over in a sampled household was asked to report his/her educational status. The three alternative answers given were (1) attending school during the census year, (2) attended school in the past and left during the census year and (3) never attended. The resulting data is given on Table 3.1A, 3.1B and 3.1C. Similarly, data on school attendance for zones classified by urban and rural areas is given in Table 3.2.

Those who were attending school during the census year were further asked to indicate the grade in which they were attending. The distribution of the region's population classified by age and grade attending is presented on Table 3.3A, 3.3B and 3.3C. Population of zones classified by grade are given in Table 3.4. In order to measure the proportion of students out of the school age population it is essential to compute gross and net enrollment ratios.

Gross enrollment ratio in primary education is defined as the ratio of students in primary education divided by total number of children aged 7-12 years (multiplied by 100 percent). Gross enrollment ratio in junior secondary education is the number of students in junior secondary education divided by total children aged 13-14 years (multiplied by 100 percent). Gross enrollment ratio in senior secondary education is the number of students in senior secondary education divided by total children

aged 15-18 years (multiplied by 100 percent). The gross enrollment ratios for primary, junior and senior secondary levels for weredas classified by urban and rural areas are presented in Table 3.5. Enrollment ratios that exceed 100 indicate enrollment of over-aged children in each level. Since this ratio does not consider the age distribution of the enrolled population the net enrollment ratio was calculated.

Net enrollment ratio in primary education is defined as students in primary education, aged 7-12 years divided by total children aged 7-12 years (multiplied by 100 percent). Net enrollment ratio in junior secondary education is defined as students in junior secondary education aged 13-14 years divided by total children aged 13-14 years (multiplied by 100 percent). Net enrollment ratio in senior secondary education is the number of students in senior secondary education aged 15-18 years divided by total children aged 15-18 years (multiplied by 100 percent). The net enrollment ratios for weredas are presented in Table 3.5.

Data on educational attainment is also given in this chapter. Those who were attending school during the census day and attended in the past and left school prior to the census day were asked to state whether they were literate or not. If literate, respondents were further enquired to report the highest grade completed in the formal education system. Following the recommendation of the United Nations that states age of 10 years as the minimum age for compiling and analyzing data on educational attainment, Table 3.6A - 3.6C and Table 3.7 present data on educational attainment for the population aged 10 years and over for the region and weredas, respectively. Similarly, data on educational attainment for the towns is given in Table 3.8.

The report in general and this chapter in particular refers to formal education only. "A formal education is defined as education in which students are enrolled or registered regardless of the mode of teaching used. It includes both 'regular school and university education' and 'adult education'. All regular

schools and university education is essentially formal. Adult education, however, can be formal and non-formal. The 1994 population and housing census covered only the formal component of the adult education and all regular and university education.

Regular and University education is used to describe the system that provides a 'ladder' by which children and young people may progress from primary schools through universities (although many drop out on the way). Adult education is used to describe out-of-school education, which provides education for people who are not in the regular school and university system and who are generally fifteen or older (although in some circumstances, younger students are accommodated along with their older colleagues)" (United Nations, 1976).

CHAPTER IV  
ECONOMIC ACTIVITY STATUS

In the 1994 population and housing census, information on economic activity status was collected for all persons aged ten years and over using the long questionnaire. The long questionnaire was administered only on selected households. The selection was done on the basis of systematic sampling and covered one fifth of the total households. However, statistical weights were later applied which makes the figures presented in this chapter to refer to the entire population. Information on economic activity collected in the census was:

- a) whether engaged in productive work during the reference period.
- b) reason for not being engaged in productive work during the reference period (for those who were not so engaged).
- c) major type of occupation.
- d) major product or service of the establishment or industry.
- e) employment status in the main activity.
- f) number of days worked during the last seven days for those engaged in productive work (for urban areas only).

The approaches used in the collection of the above information in urban and rural areas were different. The current status approach was employed in the urban areas, while the usual status approach was used in the rural areas. The main difference between the two approaches is in the length of the reference period. The current status approach is based on a short reference period, which in this case is the seven days before the census day. On the other hand, the usual status approach has a long reference period, that is, the twelve months before the census day.

In urban areas all persons aged ten years and over who were productively engaged for at least one day during the seven days reference period were classified as economically active. In rural

areas all persons aged ten years and over were classified to be participating in a productive activity if they were engaged in the production of economic goods and services during most of the twelve months prior to the census day. For those engaged in agricultural activities, persons who were engaged in agricultural and related work during most of the main agricultural season were classified to be economically active.

Economic or productive activity in the census was defined in terms of production of goods and services following the concepts presented in the United Nations System of National Accounts (SNA) production boundary (ILO, 1990a). Economic activity is defined as work which involves the production of goods or services for sell or exchange for other commodities including:- production and processing of primary products (agriculture, hunting, fishing, forestry and logging, and mining and quarrying) for own consumption, own account construction and fixed asset formation (expected life use of one year or more) for own use. Such activities could be performed for an individual, family or private enterprise, government establishment or public organization. The remuneration may be on daily, monthly, yearly or contract basis. However the activities of apprentices are considered as productive activity. On the other hand, unpaid household chores such as preparing food, cleaning the house, taking care of children or collecting firewood are not considered to be productive activities. In addition unpaid community and volunteer services and prostitution are classified as non-economic activities.

#### Economically Active and Non-active Population

The economically active population comprises all persons aged ten years and over who were employed and unemployed. The employed population consists of those who were engaged in productive activity for at least one day during the seven days prior to the census day for urban areas and most of the twelve months prior to the census day for rural areas. Persons who had regular jobs but

did not work during the reference period because of poor health, social reason, seasonality of work, annual leave or due to temporary closure of establishment were included as employed persons. The unemployed population consists of those who were not working during the reference period and were actively looking for work or were discouraged job seekers, that is, those who were not actively looking for work but were ready and willing to take up a job if one was available. A person who is looking for work but was engaged in a productive activity during the reference period is recorded as economically active and not as an unemployed person. The number of economically active and the non-active population by five year age group, sex and region is presented in Tables 4.1A - 4.1C. The tables also present activity rates which are defined as the percentage of the economically active over the total of the active plus the non-active population. Table 4.2 provides economic activity status and activity rate of zones by sex and urban/rural residence, while Table 4.3 shows economic activity status and activity rate of population of towns by sex.

The reason for not being engaged in an economic activity (for those who were not so engaged) is presented in Tables 4.4A - 4.4C. The reasons are classified as: students, homemakers, disabled, too young, pensioners, prostitutes and "others". However students, pensioners, ... etc. are considered economically active if they were productively engaged during the reference period. The distribution of the unemployed population by five year age group, sex and region is presented in Tables 4.5A - 4.5C. Table 4.6 provides unemployed population of zones by sex and urban/rural residence, while Table 4.7 shows unemployed population of towns by sex. Some of the towns in the region are very small, and because of the use of sampling in the census some bias was introduced in the estimation of rates of unemployment. Thus, high rates of unemployment was recorded for some towns while for some other towns low rates were recorded.

## Type of Activity

Employed persons were asked about the type of occupation, and major product or industrial group of the establishment in which they were engaged during the reference period and the status of their employment. This information was also collected from unemployed persons who had previous work experience. The information collected from these persons referred to the job they held before they became unemployed. The information on type of activity was not collected from unemployed persons with no previous work experience. Therefore, analysis of economically active population by occupation, major product or type of service of their establishment and status will be based on a number fewer than the total economically active persons by the number of unemployed persons who never had any work experience.

A national occupation and industrial classification code list was prepared for the census. The list prepared closely followed the International Standard Classifications of Occupation (ILO, 1990b) and International Standard Industrial Classification (UN, 1990) but took into account the prevailing national socio-economic conditions. These classifications were used for coding the responses on occupation and the type of industrial group of the establishment.

The distribution of the status in employment of the economically active population by five year age group and sex is presented in Tables 4.9A - 4.9C. The distribution of the economically active population by the major occupational group by five year age groups and sex appears in Tables 4.10A - 4.10C. The Sub-major and the minor occupational groups by sex and urban/rural residence appear in Table 4.11. Tables 4.12A - 4.12C present the distribution of the major industrial divisions classified by five year age groups and sex. The Sub-major and the minor industrial groups are presented by sex and urban/rural residence in Table 4.13. Table 4.14 presents the distribution of number of days worked

for the employed population by sex and zone. This table also presents the mean number of days worked by employed persons. The data presented in the table is limited to urban areas only because the number of days worked was not collected in rural areas.

ANNEX II - LIST OF TABLES ON OTHER PARTS OF VOLUME I

VOLUME I: PART I

CHAPTER II - POPULATION SIZE AND CHARACTERISTICS

- TABLE 2.1 Counted plus estimated population size of zones and weredas by sex, urban and rural: 1994
- TABLE 2.2 Estimated population size of areas not covered during the 1994 census by zones and weredas
- TABLE 2.3 Estimated population size of towns not covered by the 1994 census
- TABLE 2.4 Total population size of zones and weredas by sex, urban and rural: 1994
- TABLE 2.5 Total population of towns by sex: 1994
- TABLE 2.6A Population size by broad age group, sex and type of residence (Oromiya Region-total): 1994
- TABLE 2.6B Population size by broad age group, sex and type of residence (Oromiya Region-urban): 1994
- TABLE 2.6C Population size by broad age group, sex and type of residence (Oromiya Region-rural): 1994
- TABLE 2.7 Population size of zones by sex and type of residence, urban and rural: 1994
- TABLE 2.8 Household size and average number of persons per household in conventional households by zones, urban and rural: 1994
- TABLE 2.9 Population size by sex and age in single year, urban and rural: 1994
- TABLE 2.10 Population size of weredas by sex and age group, urban and rural: 1994
- TABLE 2.11 Population size of towns by sex and age group: 1994
- TABLE 2.12 Population size by ethnic group and sex, urban and rural: 1994
- TABLE 2.13 Five major ethnic groups and ethnic groups with population size of 500 and over of weredas by sex, urban and rural: 1994
- TABLE 2.14 Five major ethnic groups and ethnic groups with population size of 500 and over of towns by sex: 1994

TABLE 5.5B Summary measures of fertility based on reported data for towns that have 10,000 and above persons, Oromiya Region: 1994

TABLE 5.6 Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate, urban and rural: 1994

TABLE 5.7 Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate for major urban centers (with 10,000 or more inhabitants): 1994

TABLE 5.8 Women aged 10 years and over by age group, number of children everborn and mean number of children ever born: 1994

#### C- MORTALITY

TABLE 5.9A Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for zones, Oromiya Region: 1994

TABLE 5.9B Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for towns with population size of 10,000 and above persons, Oromiya Region: 1994

TABLE 5.10 Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born: 1994

TABLE 5.11 Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born for major urban centers (with 10,000 and over population): 1994

#### ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Counted plus estimated population size of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Estimated population size of areas not covered by the 1994 census by zones and weredas

ANNEX TABLE 3 Estimated population size of towns not covered by the 1994 census

ANNEX TABLE 4 Total population of towns by sex: 1994

ANNEX TABLE 5 Population size by sex and age in single year,  
urban and rural: 1994

ANNEX TABLE 6 Population projection of Oromiya Region by urban-  
rural, five years age group and sex, 1995 - 2000

VOLUME I: PART IV

CHAPTER VI - HOUSING CHARACTERISTICS AND CONDITIONS

TABLE 6.1 Housing units of towns by type of building: 1994

TABLE 6.2 Housing units of towns by type of construction: 1994

TABLE 6.3 Housing units of zones and weredas by construction  
material of wall, urban and rural: 1994

TABLE 6.4 Housing units of zones and weredas by construction  
material of roof, urban and rural: 1994

TABLE 6.5 Housing units of towns by construction material of  
floor: 1994

TABLE 6.6 Housing units of towns by construction material of  
ceiling: 1994

TABLE 6.7 Housing units of zones and weredas by number of  
rooms and persons per room, urban and rural: 1994

TABLE 6.8 Housing units of zones and weredas by whether  
livestock spend the night in the room where persons  
also spend the night in rural areas: 1994

TABLE 6.9 Housing units of towns by total number of persons  
per housing unit: 1994

TABLE 6.10 Housing units of towns by number of households  
per housing unit: 1994

TABLE 6.11 Housing units of zones and weredas by source of  
drinking water, urban and rural: 1994

TABLE 6.12 Housing units of towns by source of drinking water 1994

TABLE 6.13 Housing units of zones and weredas by availability  
of toilet facility, urban and rural: 1994

TABLE 6.14 Housing units of towns by type of toilet facility: 1994

TABLE 6.15 Housing units of towns by type of bathing facility: 1994

TABLE 2.15A Population aged ten years and over by marital status, sex and age group (Oromiya-total): 1994

TABLE 2.15B Population aged ten years and over by marital status, sex and age group (Oromiya-urban): 1994

TABLE 2.15C Population aged ten years and over by marital status, sex and age group (Oromiya-rural): 1994

TABLE 2.16 Population by broad age groups, disability status, type of disability and sex ratio: 1994

### CHAPTER III - EDUCATIONAL CHARACTERISTICS

TABLE 3.1 Population of zones aged five years and over by status of school attendance, sex, urban and rural: 1994

TABLE 3.2 Gross and net enrolment ratios in primary, junior and senior secondary school for zones: 1994

TABLE 3.3 Population of zones aged ten years and over by literacy status, highest grade completed (grouped), percent literate, sex, urban and rural: 1994

### CHAPTER IV - ECONOMIC ACTIVITY STATUS

TABLE 4.1 Population of zones aged ten years and over by sex, activity status and rate, urban and rural: 1994

TABLE 4.2 Unemployed population of zones aged ten years and over by sex, urban and rural: 1994

TABLE 4.3 Economically active population of zones aged ten years and over by sex, major occupational groups: 1994

TABLE 4.4 Economically active population of zones aged ten years and over by sex, major industrial divisions, urban and rural: 1994

### CHAPTER V - MIGRATION, FERTILITY AND MORTALITY

#### A - MIGRATION

TABLE 5.1 Population of zones by sex, migration status and area of previous residence, urban and rural: 1994

TABLE 5.2 Migrant population of zones by sex and length of residence, urban and rural: 1994

## B - FERTILITY

- TABLE 5.3 Summary measures of fertility based on reported data for zones, Oromiya Region: 1994
- TABLE 5.4 Summary measures of fertility based on reported data for towns that have 10,000 and above persons, Oromiya Region: 1994
- TABLE 5.5 Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate, urban and rural: 1994
- TABLE 5.6 Women aged 10 years and over by age group, number of children everborn and mean number of children ever born: 1994

## C- MORTALITY

- TABLE 5.7 Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for zones, Oromiya Region: 1994
- TABLE 5.8 Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for towns with population size of 10,000 and above persons, Oromiya Region: 1994
- TABLE 5.9 Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born: 1994

## CHAPTER VI - HOUSING CHARACTERISTICS AND CONDITIONS

- TABLE 6.1 Housing units of zones by source of drinking water urban and rural: 1994
- TABLE 6.2 Housing units of zones by number of rooms and persons per room, urban and rural: 1994
- TABLE 6.3 Housing units of towns by number of households per housing unit: 1994
- TABLE 6.4 Housing units of towns by source of drinking water 1994

TABLE 6.5 Housing units of towns by type of toilet facility: 1994

TABLE 6.6 Housing units of towns by type of lighting: 1994

TABLE 6.7 Housing units of towns by type of tenure: 1994

**CHAPTER VII - POPULATION PROJECTIONS**

TABLE 7.1 Reported population size of Oromiya Region by urban and rural, five years age group and sex October, 1994 census

TABLE 7.2 Population projection of Oromiya Region by rural-urban, five years age group and sex, 1995 - 2000

**VOLUME I: PART VI**

**CHAPTER II - SUMMARY OF POPULATION SIZES**

TABLE 2.1 Counted plus estimated population size of zones and weredas by sex, urban and rural: 1994

TABLE 2.2 Estimated population size of areas not covered by the 1994 census by zones and weredas

TABLE 2.3 Estimated population size of towns not covered by the 1994 census

TABLE 2.4 Total population of towns by sex: 1994

TABLE 2.5 Population size by sex and age in single year, urban and rural: 1994

**CHAPTER VII - POPULATION SIZE OF KEBELES**

TABLE 7.1 Total population of kebeles by sex, urban areas: 1994

TABLE 7.2 Estimated population size of farmers' associations not covered by the 1994 Census

TABLE 7.3 Total population of farmers' associations by sex, rural areas: 1994

**ANNEX I - RESULTS OF POPULATION PROJECTION**

ANNEX TABLE I.1 Population projection of Oromiya Region by rural-urban, five years age group and sex, 1995 - 2000
