MAJOR CROPS AND CROP SEASONS  
IN  
ELEVEN PROVINCES

ADDIS ABABA, JULY 1970.

3 STATISTICAL BULLETIN 3

The information contained within this publication was obtained during the second round of the National Sample Survey. It was provided by weredas (district) elders and officials who were supposed to have good knowledge of their respective weredas by virtue of being there for a long time.

It is believed that information on major crops and crop seasons by weredas is extremely useful in agricultural enquires particularly for planning crop cutting experiments.

In this report is presented information on major crops and crop seasons for 377 weredas in eleven provinces.
