ETHIOPIAN TRADE STATISTICS

EXPLANATORY NOTE

1963

Territory:-

The statistics included in this publication refer to all Customs ports, stations, airports and Post Offices of the Ethiopian Empire.

System:-

The External Trade Statistics of Ethiopia are compiled on the basis of the general trade system, i.e. goods which are intended for domestic consumption or for re-export are included under import; export includes domestic merchandise and articles of import which are exported after being transformed, improved or repaired; re-exports consist of foreign merchandise which leaves the Empire in substantially the same state as when it entered.

Classification:-

The Ethiopian Commodity Trade Classification (E.C.T.C.) has been adopted from January 1962 for compiling commodity trade statistics. This classification is based on the Standard International Trade Classification (Revised) recommended by the Statistical Commission of the United Nations. It consists of ten broad economic categories styled as sections which are subdivided into 177 economic groups most sought in international comparisons of trade statistics; the groups are further divided into 997 items (shown with 6 digit code Numbers) frequently occurring in Ethiopian trade.

Coverage:-

A. Inclusions

- (1) All Government and non Government transactions.
- (2) Goods financed by grants and loans.
- (3) Postal trade.
- (4) Bunkers and ship's stores.

B. Exclusions

- (1) Temporary imports.
- (2) Gold.
- (3) Personal effects of passengers.
- (4) Goods imported by Diplomatic and Consular missions to the extent that the details are shown in the declaration.

Valuation:-

Exports are valued F.O.B. and imports C.I.F. at the Customs border, stations with the following exceptions:-

(1) Exports

Goods are valued F.O.B. at the Ethiopian Customs station of clearance on the Franco-Ethiopian Railway, and hence exclude freight, insurance and other charges from the loading station up to the border of Ethiopia.

(2) Imports

C.I.F. Djibuti values are accepted if so shown in the declaration. Value figures thus do not include transit charges, insurance and freight charges for railway carriage between Djibuti port in French Somaliland and the border of Ethiopia.

Country Classification:-

Imports are classified according to the country of origin and exports according to the country of final destination to the extent identifiable from records, especially in the case of the trade through the ports of Djibuti and Aden.

The code numbers and the nomenclature follow mainly the classification recommended by the United Nations Statistical Commission.

Quantity:-

Quantity figures are shown in net weight expressed in kilogrammes. Quantity data for import commodities are shown only to the extent reported from the Customs station of import.
