Part I

INTRODUCTION AND OBJECTIVES OF THE SURVEY

1. INTRODUCTION

Agriculture is the dominant feature of the economy in which the livestock sub-sector is an integral part. Livestock products such as hides and skins have a considerable share in the export market next to coffee and this indicates that the sub-sector plays a momentous role in generating foreign export earnings and has a great potential for development.

The country did not exploit potential advantages of its geographical location and huge animal resources to materialize a substantial live animal and meat export to the North African & Middle East countries. To raise income of farmers and improve the nutritional status of the population, the development of this sub-sector is of a paramount importance and exploitation of these large animal resource should be an integral part of the total strategy of the national food self-sufficiency drive.

Thus, to introduce modern management systems, and improve the quality of livestock for attaining better livestock productivity, reliable statistical data is essential.

The Central Statistical Authority has been conducting Agricultural Sample Surveys since 1980/81 (1973 E.C.) on annual basis to provide information on certain livestock characteristics. This bulletin, which is volume II of the Agricultural Sample Survey, 1998/99 (1991 E.C.) presents the objectives of the survey, coverage and content of the survey, sample design, training of field staff, field

organization, method of data collection, some basic concepts and definitions and survey results of Livestock, Poultry and Beehives. Furthermore, it presents survey questionnaire, number of sampling units, sampled EAs and covered by strata and estimation procedures of total, ratio and sampling errors for livestock, poultry and beehives in appendices I, II and III respectively. Likewise, standard errors and coefficient of variation for cattle, sheep and goats by age and purposes are presented in the Appendix IV at national and regional levels.

2. OBJECTIVES OF THE SURVEY

The general objective of the agricultural sample survey was to collect basic quantitative information on the nation's agriculture that are considered essential for development planning and socio-economic policy formulation.

In particular, the objectives of the survey were to estimate the total cultivated land; total production and yield of major crops per hectare; crop land uses (temporary and permanent); number of livestock and poultry by type, purpose, sex and age; number of beehives and honey production in the private peasant holdings for the country, regions and zones.

Part II

SURVEY METHODOLOGY, DATA COLLECTION AND PROCESSING

1. SCOPE, COVERAGE AND CONTENT OF THE SURVEY

The 1998/99 (1991 E.C.) livestock survey, which is part of the annual agricultural sample survey, covered the rural part of the country, except six zones in Somalie region, two zones in Afar region, and one zone in the Gambela region. Furthermore the survey coverage was limited to weredas in the covered zones of the different regions. Accordingly a total of 56 zones and 417 weredas were covered in the survey. The areas covered by the survey are given in Table A.

A total of 1450 EAs (2.9% of the total EAs in the rural sedentary areas of the country) were selected for the survey. However, 7 EAs were closed for various reasons beyond the control of the Authority and the survey succeeded in covering 1443 (99.52%) EAs. With respect to ultimate sampling units, it was planned to cover 58,000 agricultural households. The response rate was found to be 97.78% Distribution of sample units by domain (reporting levels) is given in Appendix II of this bulletin.

This volume deals with number of livestock by type, sex, age category, purpose, number of poultry by kind, number of beehives by type and total honey production for the country, regions and zones taken as reporting levels.

TABLE A: AREA COVERAGE OF THE 1998/99 (1991 E.C) LIVESTOCK SURVEY

TOTAL	71	56	15	417	417	

Note

1= Zones not covered in these regions are urban.

2 = Zones not covered in these regions are not inhabited by significant number of sedentary population.

3 = Numbers of total weredas signify those weredas in covered zones of the respective regions.

SNNPR = Southern Nations Nationalities and People's Region.

2. BASIC CONCEPTS AND DEFINITIONS

The concepts and definitions used in the survey are defined as follows.

Enumeration Area (EA): An enumeration area in rural parts of the Country is a locality that is less than or equal to a farmer's association area and usually it consists of 150-200 households.

Households: A household may be either;

a) a one person household, that is a person who makes provision for his own food or other essentials for living without combining with any other person to form part of a multi person household or

b) a multi person household, that is, a group of two or more persons who live together and make common provision for food or other essentials for living. The persons in the group may pool their incomes and have a common budget to greater or lesser extent. They may be related or unrelated persons, or a combination of both.

Agricultural Households: A household is considered an agricultural household when at least one member of the household is engaged in growing crops and /or breeding and raising livestock in private or in partnership with others.

Holder: A holder is a person who exercises management control over the operations of the agricultural holding and takes the major decision regarding the

utilization of the available resources. He has technical and economic responsibility for the holding. He may operate the holding directly as an owner or as a manager.

Under conditions of traditional agricultural holding the holder may be regarded as the person, who with or without help of others, operates land or raises livestock in his own right, i.e. the person who decides on what, when, where and how to grow crops or raise livestock and has right to determine the utilization of the products.

Holding: A holding is all the land and livestock kept which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone, or with others, without regard to title, legal form, size or location.

Draught Animals: For this survey refer to animals that are engaged in activities such as ploughing, threshing... etc.

Dairy Cows: Refer to any type of cow used to give milk previously and/or provide milk currently or have never given milk before and pregnant now. Heifers are not included in this category.

Milking Cows: Refer to cows actually milked during the year, Feb. 9, 1997 to Feb. 8, 1998.

Meat Purpose: Cattle, sheep and Goats reared only for meat purpose either for home consumption or for sale are defined as animals used for meat purpose.

Laying Hens: Refer to all hens and pullets of all types which have laid eggs during the year Feb. 9, 1997 to Feb. 8, 1998.

Other Purposes:. Cattle which participate in activities like transporting... etc. other than animals kept for draught, milk and beef purposes are categorized as cattle for other purposes. Moreover, Sheep and Goats that are kept for other purposes other than breeding, wool, meat and milk production are included in this category.

3. SAMPLE DESIGN

The 1998/99 (1991 E.C.) livestock survey covered the rural part of the country except two zones in Afar region, six zones in Somale region and one zone in Gambela region that are predominantly nomadic. A two-stage stratified sample design was used to select the sample. Each zone/special wereda was adopted as stratum for which major findings of the survey are reported. But each of the four regions; namely, Gambela, Harari, Addis Ababa and Dire Dawa were considered as strata/reporting levels. The primary sampling units (PSUs) were enumeration areas (EAs) and agricultural households were the secondary sampling units. The survey questionnaires were administered to all agricultural holders within the sample households. A fixed number of sample EAs was determined for each stratum/reporting level based on precision of major estimates and cost considerations. Within each stratum EAs were selected using probability proportional to size; size being total number of households in the EAs as obtained from the 1994 population and housing census. From each sample EA, 40 agricultural households were systematically selected for the annual livestock survey from a fresh list of households prepared at the beginning of the field work of the annual agricultural survey.

A total of 1,450 EAs (2.9 % of total EAs in the rural areas of the country) were selected for the survey. However 7 EAs were closed for various reasons beyond the control of the authority and the survey succeeded in covering 1443 (99.52 %) EAs. With respect to ultimate sampling units, for the livestock survey, it was planned to cover 58,000 agricultural households. The response rate was found to be 97.78 % . Survey questionnaire and distribution of the number of sampling units sampled and

covered by strata are given in Appendices I and II, respectively. Estimation procedures of total , ratio and their sampling error is presented in Appendix III.

4. FIELD ORGANIZATION

All the 22 branch offices of the CSA participated in the survey undertaking, especially in organizing the second stage training, in deploying the field staff to their respective sites of assignment, and retrieving completed questionnaires and submitting them to the head office for data processing. They were also responsible in administering the financial and logistic aspect of the survey within the areas of their assignment. In the data collection of the survey, a total of 1559 enumerators and 331 field supervisors were involved with an average supervisor-enumerator ratio of 1-to-5. To accomplish the data collection operation, all the enumerators were supplied with the necessary survey equipment at the completion of the training. To assist the data collection activities in deployment, supervision and retrieval of completed questionnaires, a total of 123 four-wheel vehicles were used. The following table shows distribution of the field staff and vehicles by Branch Statistical Offices.

TABLE B: DISTRIBUTION OF FIELD STAFF AND VEHICLES BY BRANCH OFFICES

Branch Office	Number of		
	Enumerators	Supervisors	Vehicles
Addis Ababa	28	6	4

Total	1559	331	123

5. TRAINING OF FIELD STAFF

The field staff training program was carried out in two stages. The first-stage consisted of trainees from the head office, Branch Statistical Office heads and some of the field supervisors. The training was given for one week at CSA's headquarters in Addis Ababa. Many of these personnel trained in the first-stage conducted similar training for field supervisors and enumerators for 10 days in branch offices which are distributed around the country. During this second-stage

training, the field staff were given detailed classroom instruction on the objectives and uses of the survey concepts and definitions of terms used, the method of area measurement, method of crop cutting, as well as correct interviewing procedures,... etc. The enumerators' training also includes a field practice to reinforce the concepts discussed in the classroom with regard to field measurement and crop cutting data collection.

6. METHOD OF DATA COLLECTION

In each selected EAs a fresh list of households was prepared and then agricultural households were identified from the list of households. From these identified agricultural households, 40 agricultural households were selected using a systematic sampling techniques. Thus all agricultural holders belonging to the selected agricultural households were interviewed and the appropriate data were collected. The reference date for enumerating livestock, poultry & beehives was February 8th of 1999.

7. DATA PROCESSING

A. EDITING, CODING AND VERIFICATION

The editing and coding instruction manuals were prepared, printed and intensive training was given to editors. About 39 editors- coders were involved to accomplish the editing and coding tasks. In due course, one professional staff was assigned to facilitate the editing and coding activities and the edited and coded questionnaires were verified by 6 statistical technicians and 3 professionals.

B. DATA ENTRY, CLEANING AND PROCESSING

About 31 data encoders have participated in the data entry activity for 19 days. The data was entered in personal computers using IMPS (Integrated Microcomputer Processing System) software. Then the data was checked and cleaned by eight regular staff members. Finally, the data processing activity was done by personal computers (PCs) to produce results which were indicated in the tabulation plan.

Part III

SUMMARY OF THE SURVEY RESULTS

1. NATIONAL DISTRIBUTION OF LIVESTOCK, POULTRY AND BEEHIVES

The estimated number and percentage distribution of livestock, poultry and beehives population of private holdings by type and sex is presented in Table 1.

TABLE 1. Number and percentage distribution of LIVESTOCK, POULTRY and BEEHIVES population by type and sex, for private holdings, NATIONAL*, 1998/99 (1991 E.C).

(Number in Thousands)

TYPE AND SEX	MALE		FEMALE		TOTAL	
	Number	%	Number	%	Number	%
Cattle	15,693.69	25.33	19,401.54	31.32	35,095.23	56.65

Camels	203.06	0.33	324.28	0.52	527.34	0.85
Total	24,030.86	38.79	37,914.42	61.21	61,945.28	100.00
Poultry	-	-	-	-	30,157.32	100.00
Beehives	-	-	-	-	3,386.97	100.00

* Urban and nomadic areas are not included.

As shown in Table 1, the total livestock population is estimated to be 61.9 million in which the share of cattle, sheep and goats is 35.1 million (56.65%), 12.24 million (19.75%) and 9.54 million (15.41%), respectively. The remaining 5.07 million (8.18%) are draught animals. Among the draught animals, asses have a considerable share which amounts to 3.1 million. The total number of poultry population is estimated to be 30.16 million and the total number of beehives is 3.39 million.

The results of 1998/ 99 Agricultural Sample Survey (AgSS) indicated that the total number of livestock are down by about four percent compared to the results of the survey of the previous year. The number of cattle, horses and asses showed a negligible decrease, i.e. a decrease from one to two percent. The number of sheep and goats both showed a consistent decrease of nine percent. The population of mules decreased by ten percent while that of camels increased by about ten percentage points.
(See Table 2).

The survey results indicate that the cattle population held fairly constant during the second half of the year (1991 E.C) despite the lack of rainfall normally expected during the Belg Season. This lack of rainfall just happened to coincide with the timing of the livestock survey data collection. Moreover, the disappearance of normal grazing land and the deterioration of pasture conditions contributed towards the partial liquidation of livestock owned by some houeholds. Thus, the survey results reflect this phenomenon particularily in the reduction of sheep and goats population.

Table 2. Number Percentage Change of LIVESTOCK, POULTRY and BEEHIVES population in 1997/98 (1990 E.C) and 1998/99 (1991 E.C) by type, for private Holdings, National *

*** Excluding Nomadic and Urban areas.**

It is a normal practice of livestock holders in Ethiopia to partially liquidate their herds in response to deteriorating pasture conditions, especially in the sedentary areas where the holder does not have the option to move livestock to better grazing areas. In the semi-nomadic areas the reduced number of livestock enumerated are reflective of the movement of the holder to other places.

Since the AgSS is designed to cover only the livestock population in the sedentary areas, it is difficult for the survey to include transient livestock from semi-nomadic regions moving into other areas.

It is important to note that sometimes survey estimates are more reflective of the change of the design, sampling., and/or sample size. CSA over the last few years has steadily increased the AgSS sample size of PSUs (Enumeration Areas). For the 1998/99 AgSS the sample increase in the Afar Region resulted in increased precision of the estimates of the livestock, particularly for camels. The ten-percent increase in camels is more likely due to this increased precision of the estimate than a true increase in camel numbers.

NOTE

1. Some estimates represented by "*" in all reporting levels are excluded due to high coefficient of variation. However, they are incorporated in the total estimates. Hence, the sum of the specific estimates may not be equal to the total estimates.**

2. Users are also advised to use cautiously those estimates with 30-50 % coefficient of variation (CV) .

3. Zonal sums may not be equal to regional or national totals because of rounding.

FIG. 1 Number of Livestock by sex, Private holdings, 1998/99 (1991 E.C)

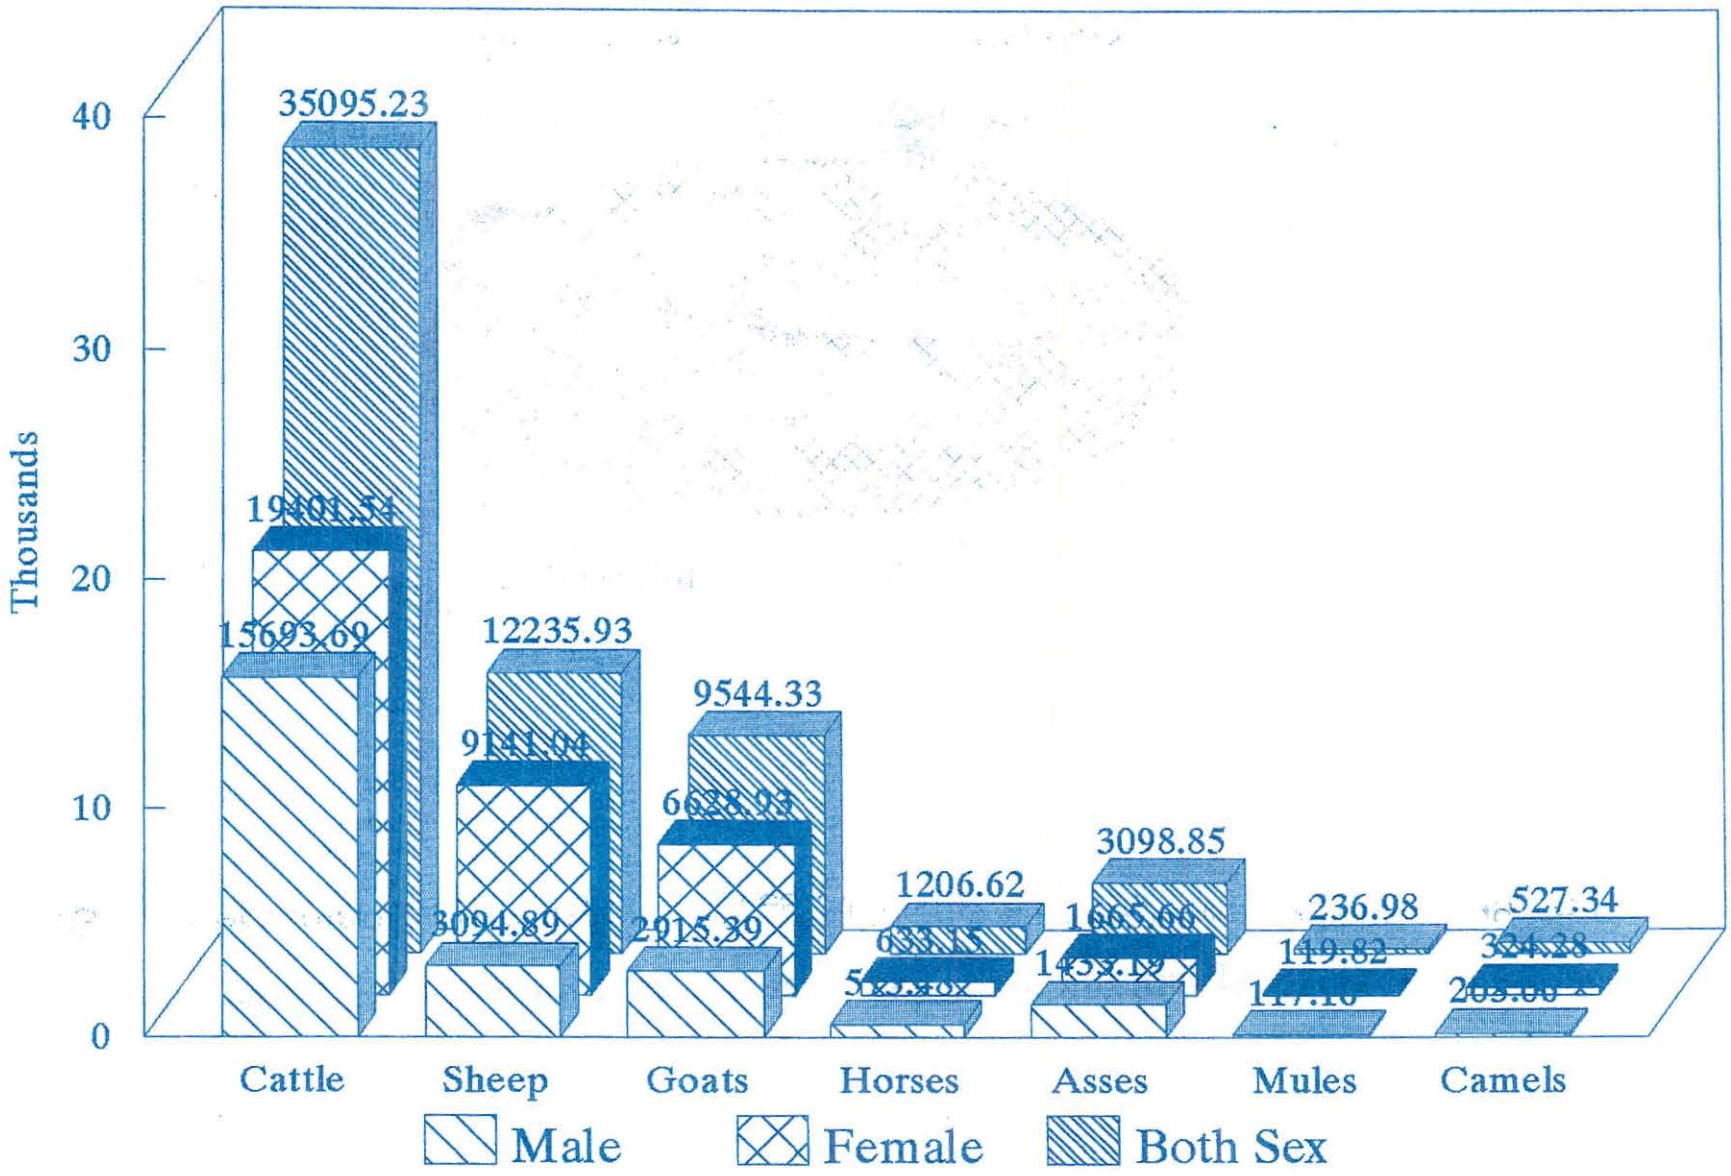

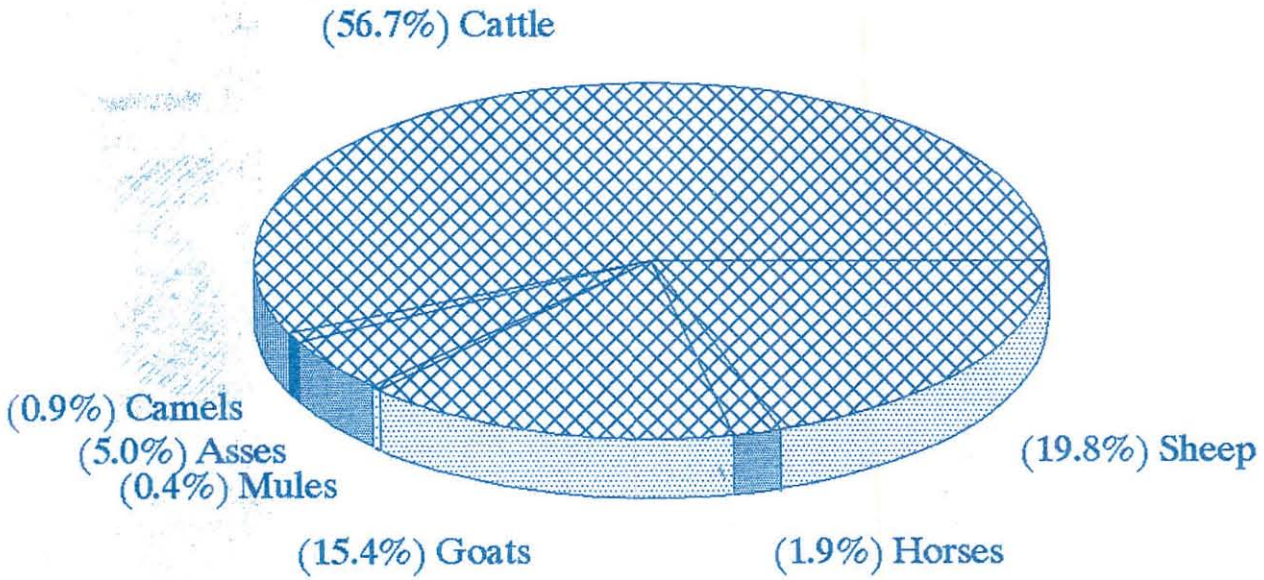

FIG. 2 Percentage Distribution of Livestock, Private holdings, 1998/99 (1991 E.C)

2. REGIONAL AND ZONAL DISTRIBUTION

2.1. CATTLE , SHEEP AND GOATS

The distribution of livestock, poultry and beehives by regions and zones are given in Tables 3 to 11.7 and a discussion for each species is given in the following paragraphs.

CATTLE

The number of cattle and its percentage distribution by regions is given in Table 3. As indicated in this table, the highest number of cattle was reported in Oromiya Region which is around 15.4 million (43.94%), followed by Amhara and S.N.N.P Regions which have reported about 8.9 million (25.45%) and 6.9 million (19.73%), respectively. The number of cattle and their percentage share by zones for each Region are given in Tables 3.1 - 3.7.

SHEEP

Table 4 presents the estimated total number of sheep for private holdings at about 12.24 million. Of this, Oromiya Region has reported 4.67 million sheep followed by Amhara Region (38.33%). which have reported 4.08 million (38.13%) while S.N.N.P.R. Region have reported 1.82 million sheep (14.89%.). Sheep population and their percentage distribution by zones are shown in Tables 4.1 - 4.7.

GOATS

Table 5 presents the regional distribution of goats population. A significant number of goats are reported in Amhara and Oromiya regions, about 3 million each and constitute close to 58% of the national goat population. Moreover, Tigray,

constitute close to 58% of the national goat population. Moreover, Tigray, S.N.N.P.R and Afar regions have reported about 1.45, 1.37 and 0.62 million, respectively. The zonal distribution of goats are given in Tables 5.1 -5.7.

2.2. DRAUGHT ANIMALS

HORSES

The regional distribution of horses is given in Table 6. As shown in this table, the three regions, i.e. Oromiya, Amhara and S.N.N.P.R constitute over 99% of the total horse population of which Oromiya's share is about 63% . Regions like Afar, Harari and Dire Dawa did not report horses The zonal distribution of horses are given in Tables 6.1 - 6.5.

ASSES

As shown in Table 7, all regions except Gambela have reported asses which is about 3.1 million . Regarding regional distribution, Oromiya and Amhara have reported 1.29 (41.66%) and 1.18 (37.94%) million asses, respectively. Moreover, Tigray and S.N.N.P regions have reported 310 and 197 thousand asses, respectively. Zonal distribution of asses are given in Tables 7.1 - 7.7.

MULES

The total number of mules in the country is estimated to be about 237 thousand. Out of the total mule population Amhara, Oromiya and S.N.N.P regions account for 96.77%. Except Gambela, Harari and Dire Dawa all regions have reported mules . Zonal distribution of mules are given in Tables 8.1 - 8.7.

CAMELS

The estimated number of camels in 1998/99 increased significantly as compared to the previous year. Lowland regions, like Afar and Somali account for 65% of the total camel population and Oromiya Region contribute about 17% of the

the total camel population and Oromiya Region contribute about 17% of the national estimate. The result of the survey indicates that where are about 527 thousand camels at national level. See table 9. In a similar way, zonal distribution of camels are given in Tables 9.1 - 9.7.

2.3. POULTRY AND BEEHIVES

POULTRY

During the survey, attempts were also made to estimate the total number of poultry at national, regional and zonal levels. As shown in Table 10, the total number of poultry in the country for private holdings is estimated to be about 30.16 million. Oromiya Region has the highest share of poultry which is 10.4 million (34.49%), Amhara, S.N.N.P.R and Tigray regions are estimated to have 9.26 million (30.71%). 6.02 million (19.95%) and 3.25 million (10.78%) birds, respectively. Detail zonal distribution of poultry are given in Tables 10.1-10.7

BEEHIVES

The estimated number of total beehives, as shown in Table 11, in the country is about 3.39 million of which 3.37 million (99.5%) are traditional beehives. The regional distribution of traditional beehives shows Oromiya has the highest share (48.69%), followed by Amhara (18.51%), and S.N.N.P.R (16.83%) of the national estimate. However, in the case of modern beehives, Oromiya region constitutes nearly half (46.95%), followed by Tigray 17.76 % and Amhara 14.41%. Tables 11 - 11.7 present regional and zonal distribution of traditional and modern beehives.

3. DISTRIBUTION OF LIVESTOCK BY AGE GROUP

The number and percentage distribution of cattle, sheep and goats by sex and age group are presented in Tables 12 and 13. Out of the total cattle population, the female cattle constitute about 55% or about 19.4 million . Concerning age groups, almost 62% of the total cattle are in the three years and under 10 years age category, with 26.95% male and 34.64% female.

TABLE 12 Number and Percentage Distribution of CATTLE by Sex and Age, Private Holdings, National, 1998/99(1991 E.C.)

Number in Thousands

Sex and Age Group	CATTLE	
	Number	%
Male Total	15,693.69	44.72
Under 6 Months	1,666.68	4.75
6 Months & Under 1 year	1,309.31	3.73

Under 6 Months	1,898.94	5.41
6 Months & Under 1 year	1,544.23	4.40
1 year & Under 3 years	3,232.79	9.21
3 years & Under 10 years	12,156.13	34.64
10 years & over	569.45	1.62
Total Animals	35,095.23	100.00

In the case of sheep and goats, the largest share are in the age group of two years and over in the female population, while the young stock under six months have the highest proportion for both the male sheep and male goat categories.

the highest proportion for both the male sheep and male goat categories. Comparing female and male stock under six months, the proportion of the female stock is higher for both sheep and goats.

TABLE 13 Number and Percentage Distribution of SHEEP and GOATS by Sex and Age, Private Holdings, National, 1997/98(1990 E.C.)

Total Animals	12,235.94	100.00	9,544.33	100.00

Referring to Table 14, the number of horses and asses in the 3 years and over age group are higher than the number in other age groups for both male and female populations. Regarding camels, the 4 years and over category constitutes over 67% of the total camel population. The proportion of female camels under 4 years is higher than that for similar aged male camels. See the details in Table 15.

4. UTILIZATION OF LIVESTOCK, POULTRY AND BEEHIVES

4.1 CATTLE

TABLE 16 CATTLE Population Aged Three Years and Over by Sex and Purpose, Private Holdings, National, 1998/99(1991 E.C.)

Number in Thousands

Sex and purpose	Number	%
Male Cattle	9,458.16	100.00
For Draught	8,798.67	93.03
For Beef	199.25	2.11
For Others	460.24	4.87
Female Cattle	12,156.13	100.00
For Dairy	10,824.25	89.04
For Draught	119.88	0.99
For Beef	58.53	0.48
For Others	1,153.47	9.49

As it is presented in Table 16, the number of dairy cows are estimated to be 10.8 million of which 7.1 million are milking cows (see Table 17). Among cattle aged three years and over, cattle used for draught purposes accounted for 41.26% and the percentage share of beef cattle is the lowest, 1.19%. Beef cattle here refer to all cattle reared exclusively for meat, either for home consumption or for sale.

In Table 17, the regional distribution of cattle aged three years and over and under ten years are estimated by purpose, such as milking cows, dairy cows, draught cattle, beef cattle and cattle used for other purposes. In addition, Tables 17.1 - 17.7 show zonal distribution of cattle used for different purposes.

FIG. 3 Percentage Distribution of Cattle aged three years and over and under ten years by purpose, private holdings, 1998/99 (1991 E.C)

4.2 SHEEP AND GOATS

Table 18 shows the number and percentage of sheep and goats raised for different purposes at the national level. The percentage of sheep and goats kept for mutton and meat is slightly higher for males. Moreover, the data indicates that female sheep and goats are primarily kept for breeding purposes. Among the sheep flock two years and over, only 15.5 thousands (0.24%) are kept for wool production and they are mainly found in the Amhara Region. Zonal distribution of sheep by purpose are given in Tables 19.1 - 19.7.

Table 20 presents the number and percentage distribution of goats aged two years and over used for different purposes at the regional level. Accordingly, goats kept for breeding accounts for 64% while goats kept for milk & meat accounts 8% each out of the total. Distribution of goats by purpose and by zone are given in Tables 20.1 - 20.7.

TABLE 18 SHEEP and GOATS Population Aged Two Years and Over by Sex and Purpose, Private Holdings, National, 1998/99 (1991 E.C)

Number in Thousands

Type	Sex and purpose	Number	%
SHEEP	Male Total	654.90	100.00
	For Mutton/Meat	311.48	47.56
	For Wool	3.38	0.52
	For Breeding	295.91	45.18
	For Other purposes	44.14	6.74
	Female Total	5,710.52	100.00
	For Mutton/Meat	52.11	0.91
	For Wool	12.08	0.21
	For Breeding	5,631.32	98.61
	For Other purposes	15.01	0.26
GOATS	Male Total	870.56	100.00
	For Meat	413.44	47.49
	For Breeding	403.32	46.33
	For Other purposes	53.80	6.18
	Female Total	3,959.71	100.00
	For Meat	43.93	1.11
	For Milk	476.34	12.03
	For Breeding	3,415.25	86.25
	For Other purposes	24.18	0.61

4.3 DRAUGHT ANIMALS

As shown in Table 21, among the total draught animals, the percentage of asses is considerably high, (79%), while horses are about 17% of the total . On the other hand, the percentage contribution of camels is the least ie 1.5% of the total draught animals. Here, draught purposes refer to animals used for agricultural practices such as ploughing, threshing and transporting to and from the farm. Furthermore, Table 22 presents regional distribution of draught animal and Tables 22.1 - 22.7 present zonal distribution.

4.4 POULTRY

The number and percentage distribution of poultry by kind at the national level is presented in Table 23. As shown in this table, the number of chicks is considerably high and accounts for about 45% of the total poultry, followed by laying hens and pullets which constitute about 23% and 10% of the total respectively. The total number of cockerels is the least of all kind, which accounts to 6.32%.

TABLE 23 Number and Percentage Distribution of POULTRY by Kind, Private Holdings, National, 1998/99(1991 E.C.)

Number in Thousands

Poultry by kind	Number	%
Cocks	2,632.68	8.73
Cockerels	1,906.95	6.32

Non-laying hens	2,052.22	6.81
Chicks	13,522.75	44.84
Total poultry	30,157.32	100.00

4.5 BEEHIVES

Frequency of honey production and total honey production are presented in Tables 24 - 24.7. Based on the survey results, the national frequency of honey production per year is 1.43 and 1.37 for traditional and modern beehives, respectively.

Moreover, the total honey produced in the country is about 13 thousand metric tonnes. The major honey producing regions are Oromiya, 4.1 thousand metric tonnes , S.N.N.P.R., 3.4 thousand metric tonnes, Amhara, 3.3 thousand metric tonnes and Tigray, 0.9 thousand metric tonne.

APPENDIX III

ESTIMATION PROCEDURES OF TOTAL, RATIO AND THEIR SAMPLING ERRORS.

APPENDIX III. ESTIMATION PROCEDURES OF TOTAL, RATIO AND SAMPLING ERRORS

Estimator of Total

The estimator of stratum total , $\hat{Y}_h$, is given by:

$$\hat{Y}_h = \sum_{i=1}^{n_h} \left[\frac{M_h}{n_h M_{hi}} \frac{H_{hi}}{h_{hi}} \sum_{j=1}^{h_{hi}} y_{hij} \right] \quad (1)$$

Where: M_h = Total number of households in stratum h obtained from the sampling frame

M_{hi} = Total number of households in EA i, stratum h obtained from the sampling frame

n_h = Sample number of EAs covered in stratum h

H_{hi} = Total number of listed agricultural households in EA i, stratum h

h_{hi} = Sample number of agricultural households successfully covered in EA i, stratum h

y_{hij} = The observed value of characteristic y from agricultural household j in EA i. stratum h

Estimator of ratio:

Ratio estimator of characteristic y to characteristic x in stratum h is:

$$\hat{R}_h = \frac{\hat{Y}_h}{\hat{X}_h} \quad (2)$$

Estimator of sampling error:

Estimator of the sampling variance of the stratum total estimate is:

$$v\left(\hat{Y}_h\right) = \frac{n_h}{n_h - 1} \left[\sum \left(\hat{Y}_{hi} - \frac{\hat{Y}_h}{n_h} \right)^2 \right] \quad (3)$$

Percentage coefficient of variation of stratum total estimate is:

$$CV\left(\hat{Y}_h\right) = \frac{\sqrt{v\left(\hat{Y}_h\right)}}{\hat{Y}_h} \times 100 \quad (4)$$

The ninety-five percent confidence interval of stratum total estimate is:

$$\hat{Y}_h \pm 1.96 \times \sqrt{v(\hat{Y}_h)} \tag{5}$$

Estimator of the sampling variance of the stratum ratio estimate is:

$$v(\hat{R}_h) = \frac{1}{\hat{X}_h^2}[v(\hat{Y}_h) + \hat{R}_h^2 v(\hat{X}_h) - 2\hat{R}_h \operatorname{cov}(\hat{X}_h, \hat{Y}_h)] \tag{6}$$

Where: $\operatorname{cov}(\hat{Y}_h, \hat{X}_h) = \frac{n_h}{n_h - 1} \sum_{i=1}^{n_h} \left(\hat{Y}_{hi} - \frac{\hat{Y}_h}{n_h} \right) \left(\hat{X}_{hi} - \frac{\hat{X}_h}{n_h} \right)$

Percentage coefficient of variation and ninety-five percent confidence interval of ratio estimate may be estimated using equation (4) and equation (5), respectively.

APPENDIX IV

ESTIMATED NUMBER OF LIVESTOCK, POULTRY AND BEEHIVES BY TYPE, THEIR STANDARD ERROR AND COEFFICIENT OF VARIATION.

ESTIMATED NUMBER OF CATTLE, SHEEP, GOATS HORSES, ASSES AND CAMELS BY AGE AND SEX, THEIR STANDARD ERROR AND COEFFICIENT OF VARIATION.

E STIMATED NUMBER OF CATTLE, AGED THREE YEARS AND OVER AND UNDER TEN YEARS, SHEEP AND GOATS AGED TWO YEARS AND OVER BY SEX AND PURPOSE, THEIR STANDARD ERROR AND COEFFICIENT OF VARIATION.

Estimated number of Livestock, Poultry and Beehives by type, standard error and coefficient of variation, for private holdings, National, 1998/99(1991 E.C.)

Type	NUMBER IN ('000)	SE ('000)	CV %
Cattle	35095.23	516.81	1.47
Sheep	6365.43	241.26	3.79
