PART IV - POPULATION PROJECTIONS BY AGE - SEX GROUPS, RURAL - URBAN, AND BY YEAR AND REGION: 1984 - 1995 .....	178

## I. Introduction

The 1984 Population and Housing Census would go a long way in providing reliable data on the size, distribution, characteristics and dynamics of the population. The preliminary census results on the size, sex and geographical distribution of the population were processed and published as "Census Preliminary Report", VI, No.1 as early as September 1984. However, the census preliminary report gave only information up to awraja level. Realizing the need of information at wereda level as well as future size of the population, and knowing that it will take some time to publish the detailed census results, this statistical supplement is prepared to serve as an interim source of additional information on the population. The first part of the supplement will give wereda population by sex and average household size classified by rural and urban breakdown as well as town level information. The second part of the supplement will provide information on population projections by age and sex for total country, regions by rural and urban breakdown for each year from 1984-1995. The population projection is expected to serve the data needs of planners and other users till they are superceded by new population projections based on analysis of the detailed census results. The presentation in this supplement is divided into four parts:

1. Regional Population by sex, and average household size, by awraja, wereda, and rural-urban: 1984
2. Population of towns by sex, average household size, awraja and wereda: 1984
3. Population projections by age-sex groups, rural-urban by year: Total Country, 1984 - 1995
4. Regional population projections by age-sex groups, rural-urban by year: 1984 - 1995.

It is important to note that in this report, the sources of population estimates (for weredas that were not covered by the census) were given in the appendix of the Census Preliminary Report. Also the urban areas used in this document refer to localities that are accorded an urban status by the Ministry of Housing and Urban Development, and are 322 instead of the 660 urban localities used in the Census Preliminary Report.

## 2. Population Projection Method and inputs

### 2.1 Population Projection Method

The 1984 Census Preliminary Report gave only total population by sex, region, rural and urban breakdown. Here projection of population by age-sex groups and rural and urban breakdown is made for the country and regions for each year for the period covering from 1984-1995. At the out-set, total population projection is made by applying estimated annual population growth rates on the basis of the exponent method of projection. This is followed by dividing the projected total population into rural and urban population according to assumed growth in the degree of urbanization of the country, as measured by the annual percentage increment in the proportion urban. Then, the annual estimates of rural and urban population so obtained was split into males and females by applying and keeping constant the sex ratios of the rural and urban population obtained in the census preliminary result. The projected population by sex, rural and urban was distributed by five year age-sex groups according to the adjusted age-sex structure obtained from the results of 1980/81 Demographic Survey for the rural population and

the results of 1978 Manpower and Housing Survey of 18 major urban areas for the urban population. The age and sex structure of the rural and urban population were summed up to arrive at the country's population age-sex structure. Finally, the regional population projections were derived from the total population projection by multiplying it by each regions rural, and urban population ratio as observed in the 1984 census and assumed constant thereafter.

## 2.2 Population Projection inputs

The population projection inputs excepting the age-structure are presented below.

### 2.21. Base Population, 1984

<u>Residence</u>	<u>Male</u>	<u>Female</u>	<u>Total</u>
Rural	19,023,427	18,847,626	37,871,053
Urban	2,004,842	2,309,071	4,313,913
Total	21,028,269	21,156,697	42,184,966

### 2.22. Estimated population growth rates: 1984-1995

<u>Period</u>	<u>Annual Growth Rate (%)</u>
1984 - 1985	2.90
1985 - 1986	2.91
1986 - 1987	2.92
1987 - 1988	2.93
1988 - 1989	2.94
1989 - 1990	2.95

<u>Period</u>	<u>Annual Growth Rate (%)</u>
1990 - 1991	2.96
1991 - 1992	2.97
1992 - 1993	2.98
1993 - 1994	2.99
1994 - 1995	3.00

2.23. Percentage of urban population: 1984 - 1995

<u>Year</u>	<u>Percentage urban</u>
1984	10.20
1985	10.32
1986	10.44
1987	10.56
1988	10.68
1989	10.80
1990	10.92
1991	11.04
1992	11.16
1993	11.28
1994	11.40
1995	11.52

2.24. Proportion among total population that are Males and Females in rural and urban areas.

<u>Residence</u>	<u>Proportion</u>	
	<u>Male</u>	<u>Female</u>
Rural	0.503	0.497
Urban	0.470	0.530

2.25. Proportion of Regional Population Distribution

<u>Region</u>	<u>Rural</u>	<u>Urban</u>
Arssi	0.0410	0.0253
Bale	0.0248	0.0157
Camò Goffa	0.0316	0.0121
Gondar	0.0717	0.0473
Eritrea	0.0592	0.0873
Illubabor	0.0241	0.0118
Hararge	0.1026	0.0636
Keffa	0.0614	0.0287
Shewa	0.1978	0.1388
Sidamo	0.0941	0.0529
Tigray	0.0577	0.0518
Wellega	0.0622	0.0279
Wello	0.0902	0.0524
Asseb Administration	0.0016	0.0072
Addis Ababa	-	0.3273
Total	1.00	1.00
