Ethiopian Trade Statistics : Jan-June 1962

Explanatory Note

Statistics published in this volume refer to the whole of the Ethiopian Empire including Eritrea. Data include goods which are customs cleared as merchandise trade; in addition passenger baggage, personal effects and goods imported or exported by diplomatic missions are also included. General trade system is adopted; imports, exports and reexports are recorded separately.

Exports are valued free on board at the ports and at the stations on the Franco Ethiopian Railway and refer to the amount declared to the State Bank of Ethiopia as foreign exchange earning. Imports are valued c.i.f.c. Ethiopian ports and stations on the Franco Ethiopian Railway including Djibouti in French Somaliland. And the amounts represent the foreign exchange declared to the State Bank. Figures for petroleum are shown at a conventional rate in the declarations and in the detailed tables; however a corrected figure is shown in the summary table for the six month period.

Quantity data are shown in net weight expressed in kilos. For imports, quantity is heavily understated due to incomplete reporting. Hence quantity figures are not comparable with value figures for imports. For exports, quantity data are complete.

Commodity Statistics are shown in the tables according to the new Ethiopian Commodity Trade Classification (E.C.T.C.) which is based on the Standard International Trade Classification (Revised).

Due to lack of space and other considerations, only summary information is published for some of the commodities. Available information especially on the second unit of quantity will be supplied to the trader on specific request to the Customs Head Office, Addis Ababa.

.....

Symbols used: — not available

- - nil or negligible

When value is nil, symbol - is used ~~both~~ both for quantity and value. When value is not nil, ~~quantity~~ quantity symbol - is used for quantity data not available.
