STATISTICAL CLASSIFICATION FOR GOODS IMPORTED
EXPORTED OR RE-EXPORTED

NOTES

The classification in this book sets out in detail the official Import and Export List which comes into force on January 1968. Importers and Exporters are required to describe their goods on the relevant Customs Declarations in accordance with this List and to insert in the declaration against each type of goods the code number (six digits) preceding each statistical heading.

DESCRIPTION OF GOODS:-

Goods must be described and declared in accordance with the code description given in this list. The technical and trade names and descriptions under which the goods are ordinarily bought and sold must also be given.

QUANTITIES:-

When the unit of quantity differs from the unit of quantity on which duty is chargeable, the quantity of the goods must be declared separately in both units. If no unit of quantity is required to be declared for statistical purposes only the value should be shown. Where the statistical quantity is a unit of weight, the net weight of the goods, that is the weight exclusive of packages and wrappings is to be declared, unless otherwise stated. The quantity declared for statistical purposes should be entered correct to one decimal place of the unit prescribed.

I M P O R T S .

VALUATION:-

The value of imports shall be the purchase price of the goods (including commission and all other costs, charges and expenses incidental to the making of the contract of sale) plus the cost of transportation and insurance of the goods to either the port or airport of delivery or the frontier station in the Ethiopian Empire and is known as the C.I.F. value.

COUNTRY OF ORIGIN:-

Imports of all articles are considered as coming from the place or country of origin or final production, i.e. the place or country in which the goods were produced or manufactured, or in the case of partly manufactured goods, the place or country in which any final operation has altered to any appreciable extent the character, composition and value of goods originally imported into that country and subsequently exported to Ethiopia.

...or country in which the goods were produced or manufactured, or...
...in the case of partly manufactured goods, the place of country...
...in which any final operation has altered to any appreciable ex-
...tent the character, composition and value of goods originally...
...imported into that country and subsequently exported to this country.

II

At the end of the import and export list there is a list of country codes based on the U.N. Minimum Standard Geographical Classification.

EXPORT AND RE-EXPORTS

Exports will be deemed to be:-

- (a) Goods and materials grown or produced in the Ethiopian Empire
- (b) Goods finished, or wholly or partly manufactured in the Empire from raw materials grown or produced in the Empire, or from imported raw materials
- (c) Goods completely or further advanced towards completion in the Empire after being imported, except goods which have undergone only minor operations such as simple blending, cleaning, drying, sorting, shelling re-packing, bottling.

Re-exports will be deemed to be:-

- (a) Goods, materials or articles exported in the identical condition in which they were imported
- (b) Goods exported after having undergone only minor operations (see above) after importation.

VALUATION:-

The value to be shown for exports shall be the cost of the goods to the purchaser abroad including packing, inland and coastal transport in the Empire, harbour dues and loading charges, and all other costs, profits, charges and expenses (e.g. insurance, commission) and duties accruing up to the point where the goods are deposited on board the exportign vessel or aircraft or at the land boundary, and is know as the "free on board" value.

COUNTRY OF CONSIGNMENT:-

The place or country of consignment must be shown on the declaration. The place or country of consignment is that to which the goods are actually consigned, with or without breaking bulk in the course of transport, but without any commercial transaction in any intermediate country. In addition to commodity list and country code principal stations with their codes are also included.
