NOTES ON THE CALENDAR

In Ethiopia various authorities use different calendar years in Compilation of statistical series.

The following table sets out the relation between the Ethiopian and Gregorian years. In the Ethiopian year, there are 12 months of 30 days and one month, Pagume, of 5 or 6 days at the end of the year. The trade year and the fiscal year are also shown in the table.

Throughout the Abstract when figures were obtained for the Gregorian year a split year is shown in the Ethiopian calendar, and inversely, split Gregorian years are shown where the data are for Ethiopian years. For Example 1971 in the Gregorian calendar is the period Tahsas 23, 1963 to Tahsas 22, 1964 E.C. and is shown as 1963/64. Likewise, 1963 E.C. covers the Gregorian year September 11, 1970 to September 10, 1971 and is shown as 1970/71.

F O R E W O R D

As in the past this eighth issue of the Statistical Abstract is presented in a bilingual form (English and Amharic) so that it can be widely used both within Ethiopia and abroad.

The Abstract contains current data on many aspects of the social and economic situation of Ethiopia. It therefore provides an essential basis for the formulation of development plans and policies both by the Imperial Ethiopian Government and the private sector of the economy.

I would like to join the numerous readers of this Abstract in congratulating the staff of the Central Statistical Office for the high standard which this publication achieves both in contents and presentation.

PREFACE

The Statistical Abstract of Ethiopia, published annually since 1963, is intended to present a summary of statistical information on the social and economic conditions of Ethiopia. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications.

This edition, the 8th annual issue of the statistical Abstract presents recent data available during the early part of 1972.

Tables included in the previous issue are revised and evaluated. Continuing series are brought up to date, new tables are added and text notes are revised as necessary.

For most part of the sections trend data are shown for 5-year period 1966-1970/71 and for 3-year period 1968/9-1970/71.

This volume, as well as previous editions, includes a selection of data from many sources. Publications and institutions cited as sources usually have additional statistical detail and more comprehensive discussion of definitions and concepts than can be presented here.

Various Ministries and agencies, as well as private institutions collect statistics in conformity with their administrative and managerial functions. The role of the Central Statistical Office is of a co-ordinating nature and is clearly indicated in the duties and functions which is given to it when it was established in 1961 as an independent government agency and by order No.79 of 1972 and Proclamation No.303 of 1972.

In order to avoid duplication of statistical surveys and utilise economically the available resources in terms of trained personnel and equipment, the Central Statistical Office develops inter-ministerial co-operation, which has been improving regularly. A number of projects are being carried out jointly, and for some the Central Statistical Office advises during the designing and preparatory phase, as well as during the final processing and tabulation of the data.

The sections of the Central Statistical Office are organized on the basis of covering almost all subjects of economic and social life. They are working on either collecting information directly from reporting units (households, enterprises, etc.) or on compilation and analysis of secondary data produced by other Ministries and private organizations.

In order to fill gaps in the basic statistics of Ethiopia, the Central Statistical Office, in co-operation and consultation with economic and development Ministries and agencies concerned, launched the following Surveys:

- (a) The National Sample Survey 1st Round, in 1963
- ~~(b)~~ The 1st Urban Population Survey in 1966
- (c) The Rural Household Consumption Survey in 1966
- (d) The Urban Consumption Survey in 1968
- (e) The National Sample Survey 2nd Round 1968
- (f) The Second Urban Population Survey in 1970
- (g) The Survey of Distributive Trade in 1971 and
- (h) The Survey of Small Scale Industry in 1971
- (i) The Household Economic Surveys in 1972

The National Sample Survey is multipurpose in character and was designed to collect information on population, vital statistics, agriculture, livestock, land tenure, etc. The Survey is planned as a continuing survey being conducted in successive rounds. The first round covering 12 (out of 14) provinces was completed during 1963-1967. The work was carried out province by province. The results for each province were published in separate reports (Central Statistical Office, Series Report on National Sample Survey). A population report based on the results of the first round has been prepared giving data on a National level. The draft report is entitled "Population of Ethiopia: Results from the National Sample Survey 1st Round 1964-67".

The second round of the National Sample Survey was started in November 1968, and completed in May 1971 covering 13 of the 14 Provinces. The items covered in this round are similar to those of the previous round, except for the addition of obtaining data on the production of main agricultural products. The emphasis was, through improving sampling techniques, in obtaining detailed and reliable estimate at the national level and overall estimate at provincial level.

Detailed information about the design and procedures of the survey, is given in the booklet "National Sample Survey, 2nd round Statistical Manual No. 4." issued by C.S.O.

The urban Population Survey, which started in 1966 has provided information about the urban population and its main demographic and economic characteristics, as well as about households and housing conditions. The data about the number of establishment by industries and the persons engaged in them were also collected. The results of the urban survey are published in the publication "Survey of Major Towns in Ethiopia", Statistical bulletin No.1. Some more towns which had not been surveyed earlier were covered by the urban survey during the second round of the National Sample Survey. Recent publications on urban studies are: Population of Addis Ababa, Results from the population Sample Survey of October 1967. Bulletin No. 8. July 1972, and Urbanization in Ethiopia Bulletin No.9 August 1972.

The Rural Consumption Survey provides information about household income, consumption and expenditure as well as the breakdown of the components. Data for the 12 provinces covered is available in the "Draft Report on Rural Household Expenditure and Consumption Survey", January 1971.

The results of the "Addis Ababa Household Expenditure Survey", covering the low - income wage earners, are now available in a draft report issued in January 1971.

In 1971, the C.S.O. has also conducted a Survey of Small Scale Industries which was completed during the same year. The survey covers about 50,000 establishments located in 55 major towns in 12 provinces. When the analysis of study is completed, it is expected to publish detailed information in a separate report concerning in-put, out-put and value added data as well as the number of persons, wages and salary paid, classified by type of activity.

In surveys conducted by the C.S.O. in the recent past the agricultural sector has been fairly well covered, and an attempt has been made to estimate household expenditure and consumption in the rural sector and in the city of Addis Ababa for lower income group. In 1972, the C.S.O. has started a more comprehensive Household Economic Survey (HES) covering the rural and urban areas. In the main enquiry of the (HES) data on receipts and disbursements of the household sector, relating to both its productive and non-productive activities, will be collected. Special attention will be given in the main enquiry to cover the households engaged in non-agricultural activities other than manufacturing. The other data to be collected in the HES cover employment and labour time disposition of the population from which it will be possible to classify the population as economically active and inactive, with an industry-occupation classification of the former class. Besides the above, in the rural HES, a special subject survey of household manufacture has been included. The HES commenced in March 1972 and the field work is expected to be completed in May 1973. It will survey a sample of 504 rural and 448 urban units covering a sample of about 10,000 rural and 9,000 urban households for the main enquiry.

The contents of this volume of the Abstract were taken, as it can be seen, from a large number of sources. The Central Statistical Office cannot accept the responsibility, for the accuracy or the limitations of the data presented here, other than those which it collects. The responsibility for selection of the material and the proper presentation, however, rests with the Central Statistical Office.

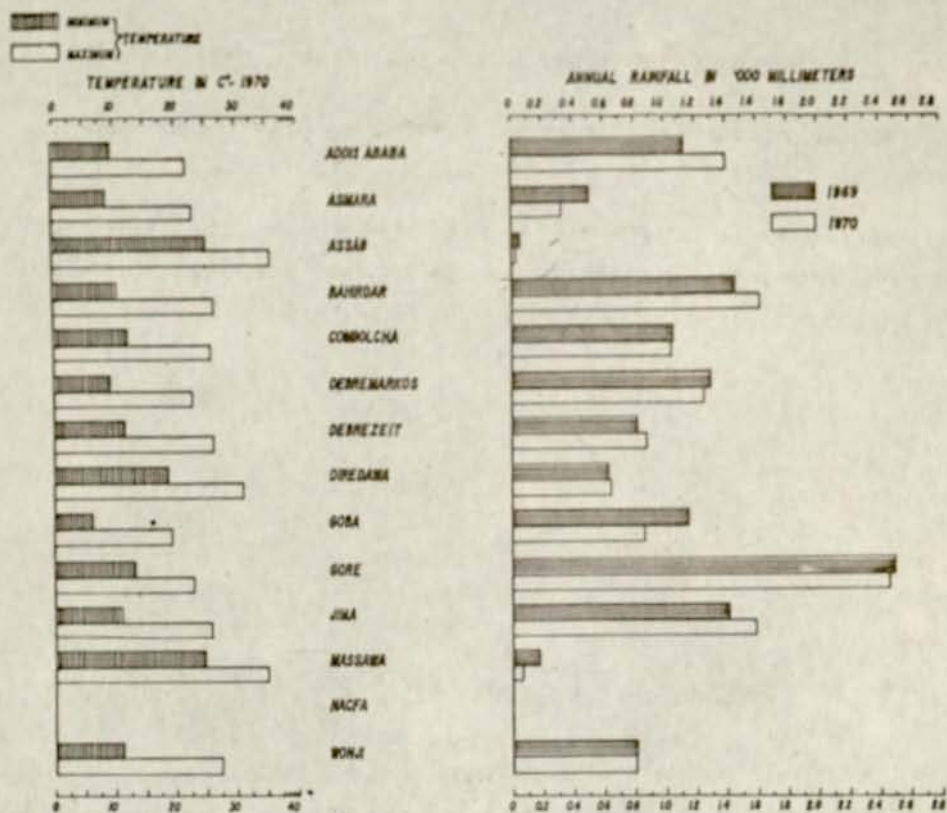

The C.S.O. wishes to record its appreciation to all those who have co-operated in the production of this Statistical Abstract. It will welcome any comments for improving the content and value of the abstract for future issues.

As in the past, the C.S.O. hopes, that the Abstract will reach a wider population of users and promote an improved knowledge of our empire.

SECTION B - POPULATION

The data in this year's population estimate is based mainly on the National Sample Survey, 1st Round (N.S.S.I. - 1964-67), which covered 83% of the rural population and around 92% of the urban population. Bale and Eritrea were not covered by the first round of the National Sample Survey.

The total population of the country is estimated to be 25,825,500 in 1971, of which 2,489,400 i.e. 9.6% is urban. (Town is here defined as a locality with more than 2,000 inhabitants). The lower and upper limits of the total population are 23.4 and 27.0 million respectively. With a yearly growth rate of about 2.5% the population will reach 27.6 million in 1975, 31.4 million in 1980, and will double in 26-27 years.

The urban population is increasing by around 6.6 yearly of which 4.0% is due to net-in-migration of people from rural areas. The urban population will double in 11 years and it will constitute about 14.0% of the total population by 1980.

Table B.1 Estimates of household size were taken from the N.S.S.I.

Table B.2 These estimates are mostly based on the information obtained from the N.S.S.I, and the first and second urban surveys, unless otherwise stated.

Table B.3 The distribution of total population by age-group and sex has been estimated on the basis of the data obtained from twelve (12) surveyed provinces through the N.S.S.I., N.S.S.II for Bale province only, Ministry of Interior estimates for Eritrea province, and urban surveys. However, the percentage distribution for urban areas has not been adjusted, but the impact on the age-distribution of the total population is negligible.

Table B.4 The list of towns with population over 2,000 is given by province and sex. Most of the towns have been covered by urban surveys, and for some only the estimates of the Ministry of Interior of 1956 and 1962 are available. Yet it is believed that there are some towns which are big but whose estimates are not available.

Table B.5 and B.6 The Public Security Department of the Ministry of Interior is the primary source of tourist and migration statistics. By Proclamation No. 57 of 1955, every foreigner is required, within 30 days of his (or her) arrival in Ethiopia or of his (or her) attaining the age of 16 years and thereafter annually, to report in person to the registrar, and an identity card (Foreigner's Registration Book) is issued to him (or her). However, the data for 1971 are not available.

The following definition have been used:

Emigrants. An emigrant is a person proceeding out of Ethiopia for a destination elsewhere without the immediate intention of returning to the country, excluding visitors and persons in transit.

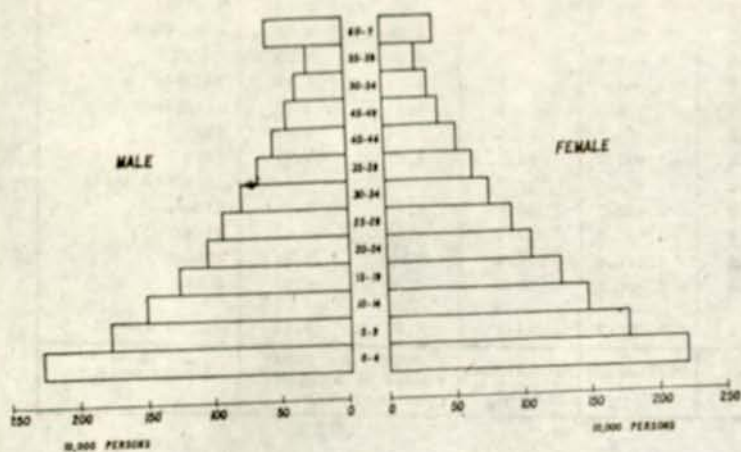

Immigrants. Persons entering the country are classified as new immigrants if they are not returning residents as defined below and have an entry permit, which allows them to become residents of the country.

Re-Entrants. Persons returning to the country are classified as returning residents if (a) they possess a valid re-entry visa, or if (b) they have been absent for less than one year, or, if for educational purposes abroad, for less than two years.

Tourists. Persons classified thus are those who have a visitor's or tourist's visa, which can be obtained either at the Ethiopian consulates abroad or at the airports in Addis Ababa and Asmara. These visas are valid up to 3 months and allow the visitor to pursue temporarily his business or profession as well as covering visitors on holiday.

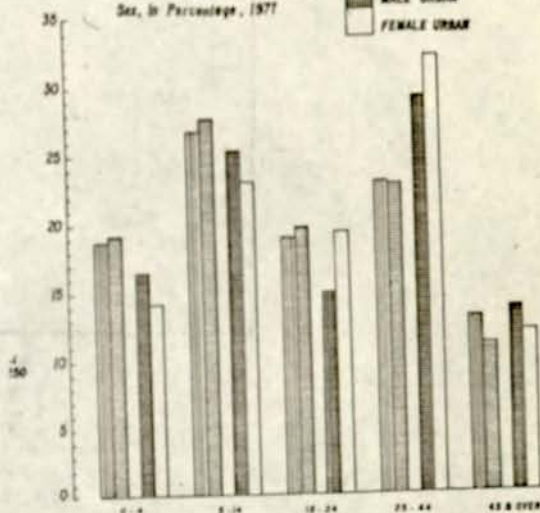

Transients. Persons in transit are defined as those who have an in-transit visa. These visas are issued at the Ethiopian consulates abroad or at the airports in Addis Ababa and Asmara to persons passing through the country to a destination outside it. They are for a period of up to seven days.

SECTION C. AGRICULTURE AND LIVESTOCK

Table C.1 Area, yield and production of major crops:

In the absence of a comprehensive statistical survey in agriculture, the area, yield and production of major agricultural crops are estimated by the Committee of agricultural experts and economists from interested institutions.

Total crop production is estimated first using an indirect method. Estimations obtained for each of the following components are added to arrive at total crop production: a) crops utilized for human consumption b) the consumption of crops for other purposes (for production of drinks, livestock feeding, etc.) c) usual loss of crops during storage d) crops used for seed and e) crops exported.

The volume of crops utilized for consumption is obtained by multiplying the estimated per capita consumption by the total population. The estimated per capita crop consumption is based on the results of rural household consumption survey in Shoa province and other observations and comparisons with countries which have similar patterns of consumption.

For some crops (cotton, sugar cane, and other industrial plants) the total production is calculated on the basis of records from manufacturing enterprises.

The production of coffee is estimated on the basis of export and assumed consumption figures and does not include losses and stocks. Coffee production figures is considered to be an underestimate and will be revised when the C.S.O's consumption data are analyzed.

The total harvested area is obtained by dividing total crop production by the average crop yield per hectare. The yield estimate is derived from crop cutting surveys and other studies.

The allocation of total harvested area to individual crops has been done on the basis of results on crop composition of nine provinces obtained from the National Sample Survey.

Table C.2 & C.3. refer to coffee inspection. All coffee intended for export has to be inspected by the National Coffee Board of Ethiopia. The coffee which is of the prescribed degree of purity is given the Board's Export certificate. The coffee that does not meet the standard is either sent back for recleaning or sold locally.

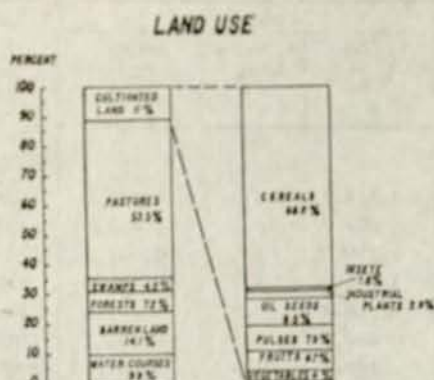

Table C.4. The total number of cattle has been taken from earlier estimates during the elaboration of the Third Five Year Plan. The distribution of cattle by age categories has been taken on the basis of structure for 9 provinces obtained through the National Sample Survey. The percentage of fertility of the cows, of average annual losses (deaths), of slaughtering, and other normatives are based on "The Livestock (cattle) Survey in Ethiopia, 1961-1962". The number of other livestock has been taken from earlier estimates, and enlarged for assumed annual increase. The total number of poultry has been estimated assuming 2 heads per habitant.

Table C.5. The volume of animal production has been estimated separately for each species of livestock.

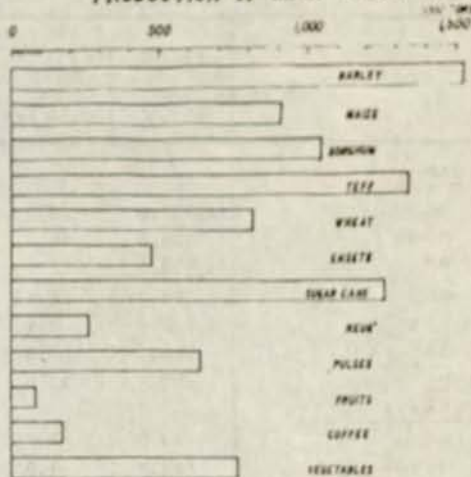

The meat production is estimated on the basis of number of slaughtered cattle and the total live weight and average dressing weight of meat from live weight. The number of slaughtered cattle is assessed on the basis of domestic consumption and export, and checked with available data about production and export of hides. The average live and dressing weights are based on slaughter-houses records.

The production of milk has been estimated on the basis of the assessed number of cows with calves and the estimated average annual production of milk per cow.

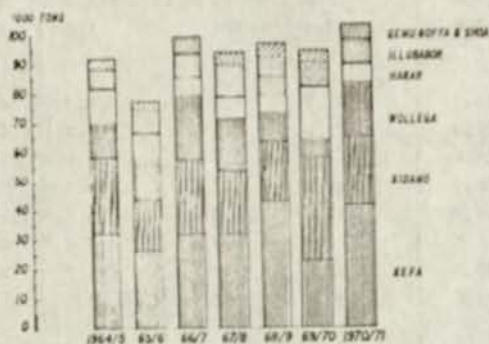

The production of hides has been estimated by taking all the hides of the slaughtered cattle and adjusting the final result to account for the hides obtained from cattle which died.

SECTION D. MINING

The Statistics relating to Mining have been compiled by the Ministry of Mines. Three and four year series are given and the year refers to the Ethiopian fiscal year (i.e. from July 8th to July 7th).

Tables D.1 and D.2 give the volume and value of mineral production from 1962/3 - 1969/70. The value figures are gross value of production.

Tables D.3 and D.4 show the volume of investment in mining; and the source and allocation of the investment fund. Detail breakdowns are given in these tables and the data is considered very reliable.

MANUFACTURING INDUSTRY

The statistics on Manufacturing Industry are obtained through the annual survey conducted by the Central Statistical Office in collaboration with the Ministry of Commerce, Industry and Tourism.

All data in this section are shown according to Ethiopian calendar. No attempt was made to adjust figures of firms which submitted information on the basis of a financial year of the gregorian year, but the approximation used is considered satisfactory.

The tables deal mainly with the result of the annual Survey for the year 1962 E.C. or 1969/70 G.C. Figures for 1966/67 are taken from the earlier abstracts. No data are shown for 1960 E.C. or 1967/68 due to incomplete coverage of the industrial establishments.

The employment figure in the food industry for 1966/67 is revised. The seasonal workers of Wonji and Shoa Sugar estates are excluded as they are employed mainly in the plantation.

Main definitions used

Establishment: An "establishment" normally comprises the whole of the premises under the same ownership or management at a particular address (for example a factory or sawmill.)

Number of employees: The number of employees includes all persons on the payroll, whether employed full-time or part-time.

Number of persons engaged: This includes the number of employees as defined above plus working proprietors and active business partners and unpaid family workers.

Gross Value of Production: The gross value of production refers to the ex-factory (including taxes) selling value of the goods produced within the year.

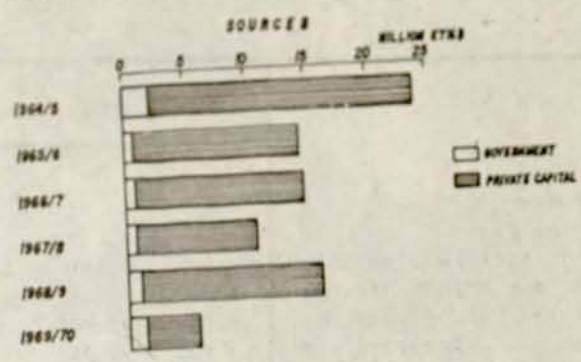

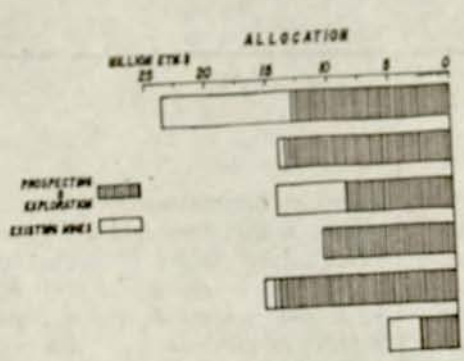

Industrial costs: Industrial costs are defined as the cost of material, fuel, electricity and cost of repairs and maintenance.

Value added: Value added is defined as the difference between the gross value of production and the industrial costs.

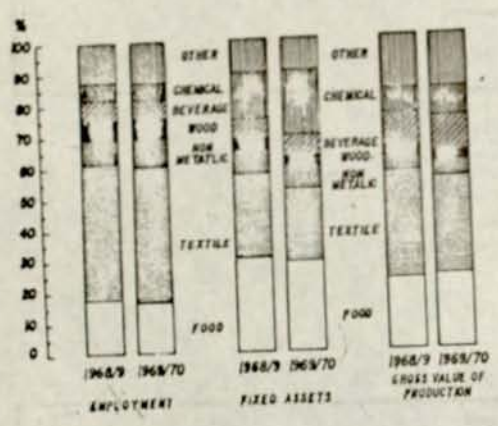

Investment: The investment includes additions whether new or second-hand assets, valued at purchase price. Besides purchase price it includes customs duties, other taxes, transfer fees, delivery and installation costs. It includes also value of work done by workers of the establishment (inclusive of materials used) on buildings, other constructions, manufacture of installation of machinery and equipment and capitalised alterations, improvements or rebuilding.

Fixed capital assets: The fixed capital assets include all acquisitions by the enterprise for its business, whether obtained from other establishments or produced by the enterprise. It includes both new and second-hand assets with the cost of major alterations and innovations. It excludes cost of repair and maintenance.

SECTION G. TRANSPORT AND COMMUNICATIONS

Table G.1: refers to the operations of the Ethiopian Airline in both the domestic and international traffic.

Table G.2: Gives the basic statistics concerning the international traffic at the Addis Ababa and Asmara airports.

Tables G.3 and 4: give details of air traffic at the Addis Ababa and Asmara airports during 1970 by month.

Table G.5: The total length of all weather roads is shown by each Highway maintenance district. The data provided cover the period 1968/69, 1969/70 and 1970/71.

Table G.6: shows the total investment in Highway operations up to June 30/1971 by source and use of fund.

Table G.7: Gives transport tariffs per metric ton on principal roads.

Tables G.8 and 9: give data for the whole Empire regarding driving licence issued and motor vehicle accidents, respectively. However for Addis Ababa separate tables are given.

Tables G.10 and 11: give data about the operations of the Franco-Ethiopian Railway. A comparison of the figures given in table 11 with those on external trade will show the importance of the railway to Ethiopia for both imports and exports.

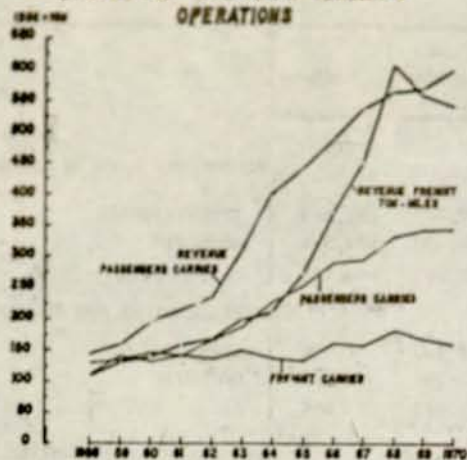

Tables G. 12 and 13: show the railway freight rates for selected import and export items. On-season rates are in effect from January to June while the off-season rates apply from December to July.

Table G. 14: refers to the traffic on the Agordat and Massawa Railway.

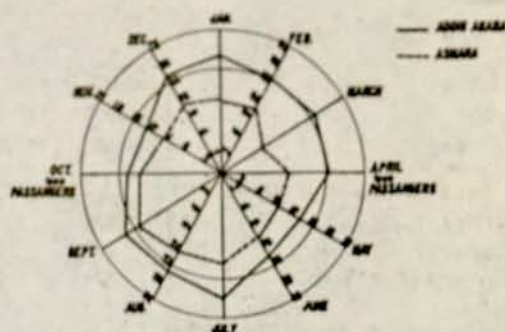

Table G. 15: gives the main operating statistics of the Ethiopian ports as obtained from the Marine Head Office, Ministry of Communication.

Tables 16 and 17: deal with telephone and telegraphic communications and posts.

SECTION II - EXTERNAL TRADE

The trade statistics refer to all customs ports, stations, airports, and post offices in the Empire.

The Ethiopian Commodity Trade Classification (ECTC), based on the Standard International Trade Classification (revised), was introduced as from the 11th September 1961. The classification consists of ten sections. The sections are further sub-divided into 177 divisions and, within these, nearly 1,000 items are specified. In this Abstract only the major classification of items - some 500 - are shown.

IMPORTS: Goods entered at the time of importation for consumption or warehousing into Ethiopia, including goods which are subsequently re-exported or re-directed.

RE-EXPORTS: Imported goods subsequently re-exported without change of form or re-exported as ships' or aircraft's stores.

EXPORTS: Ethiopian products, including imports which are exported after being transformed, improved or repaired.

COVERAGE:

Included are:

All Government and non-Government transactions,
goods financed by grants and loans,
postal trade,
bunkers' and ships' stores.

Excluded are:

Gold,
temporary imports,
personal effects of passengers, and
goods imported by Diplomatic and Consular Missions.

VALUATION: Imports - c.i.f. Ethiopian ports and customs stations; but c.i.f.-Djibouti values are accepted if so shown on the declaration. Thus transit charges, and insurance and freight charges for railway carriage between Djibouti and the border of Ethiopia are not included in values of imports using this route.

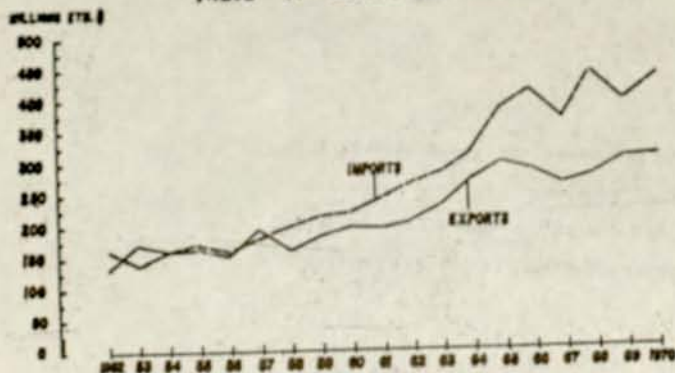

Exports - f.o.b. Ethiopian ports and customs stations, but goods dispatched through Djibouti are valued at f.o.b. the Ethiopian customs station of clearance on the Franco-Ethiopian Railway and hence exclude freight, insurance, and other charges from the loading station to the border.

COUNTRY: Origin - The importers are obliged to submit manufactures' invoices with import declarations. Generally the country of origin is then the country in which goods were grown or produced.

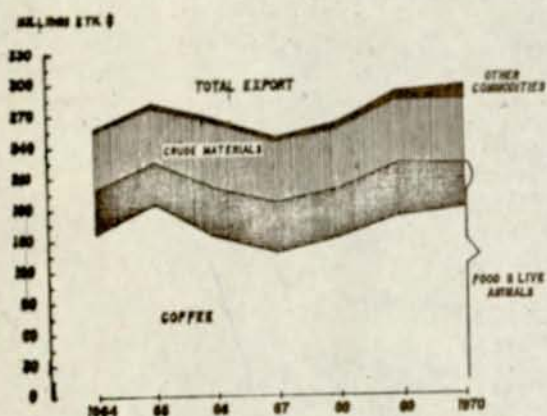

Destination - The country of final destination to the extent identifiable from records. Special care in this matter is given by the customs authorities to exports consigned to Djibouti and Aden.

The trade statistics published in the annual Abstracts are summary figures and even the detail tables give only up to the three digit level of the International Trade Classification. For more detailed information, readers are referred to both the monthly and annual Trade Statistics bulletins published jointly by the Central Statistical Office and the Customs Head Office. Both the annual and monthly Trade Bulletin are on sale at the Customs Head Office after 2 - 3 months of the period they refer to.

SECTION I. NATIONAL ACCOUNTS

The first attempt in the compilation of National Accounts of Ethiopia was in 1952 by the state Bank of Ethiopia. Later four such attempts were made by the Planning Board and the Bank. But for none of those series could proper documentation be obtained giving explanations for the concepts and methodology used.

In 1964, by the instruction of the Inter-Ministerial Committee of Statisticians, the Central Statistical Office undertook the responsibility to compile the National Accounts, and in the same year produced provisional estimates for the period 1961-1963. Since then the basic concepts and methodology have been gradually improved and the old series have been revised and brought up-to-date accordingly.

In principle, in the measurement of national accounts three basic approaches may be applied depending upon the available statistics i.e. Production, Income and expenditure approaches. (i) The production approach takes production as total value of goods and services originating in the various industries which make up the economy. (ii) the income approach considers production as the sum of income received by those producing these goods and services, and (iii) the expenditure takes the total expenditure (including savings) incurred by the residents of the country in their consumption of goods and services.

In Ethiopia's National Accounts the production approach has been used for most of sector accounts; while the expenditure approach, is applied in case of Public Administration, Defence, Education, Medical and Health services. The Income approach, is hardly used except in some service sectors like domestic service etc. The total value of goods and services thus arrived at have been given according to the industry or services producing them. But no aggregate income breakdown by type of factor income producing them have been attempted. The expenditure side of Ethiopia's National Account is given with the private expenditure arrived at as a residual; and no classification of expenditure by type of products and services is made.

The concepts and definitions of major aggregates used in the National accounts are given below:

Gross Domestic Product (GDP) at Market Prices is the market value of the goods and services, produced within the territory of Ethiopia, before any allowance is made for the consumption of fixed capital. It is equal to the sum of consumption expenditure by private consumers and government gross domestic capital formation, and net export of goods and services.

Gross Domestic Product (GDP) at Factor cost is less from Gross Domestic Product at market prices by the amount equal to the difference between indirect taxes and subsidies.

Gross National Product (GNP) at Market Prices is the market value of goods and services before deduction of provision for the consumption of fixed capital, attributable to the factors of production supplied by the residents of Ethiopia. It is equal to the sum of consumption expenditure and gross domestic capital formation, and net export of goods and services plus net factor income received from abroad. It differs from the Gross Domestic Product at Market Prices by the amount of net factor income from abroad.

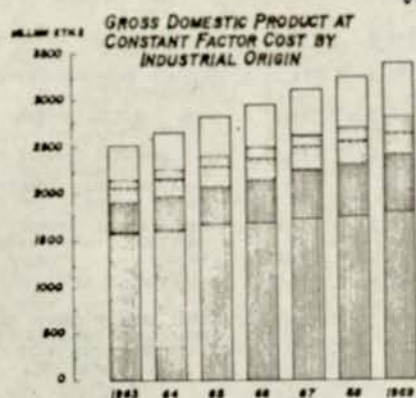

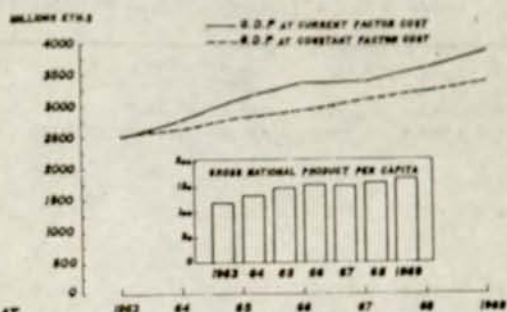

Net Factor Income from Abroad is excess of factor incomes (interest, dividends, profits, etc.) paid abroad over factor incomes received from abroad.

Private Consumption Expenditure is the value of goods and services (purchased or self-produced) consumed by households and private non-profit institutions plus the net value of gifts in kind received from abroad. It includes consumption of goods, whatever their durability, with the exception of land and building which are included in capital expenditure.

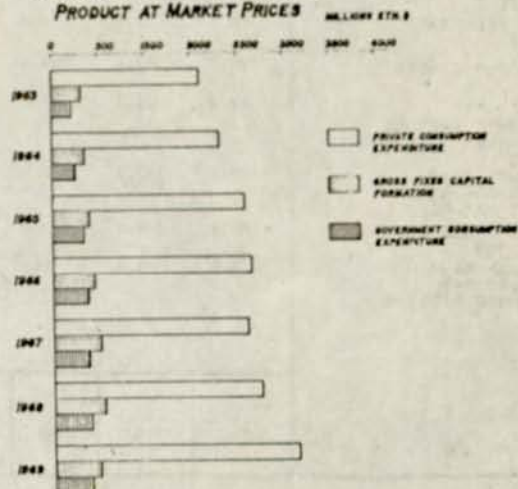

Government Consumption Expenditure represents the current expenditure on goods and services by central and municipal governments. It comprises compensation of employees, purchases by government from local enterprises and from abroad, less sales by government of goods and services. Government consumption expenditure excludes transfer payments, interest paid by government and subsidies.

Gross fixed Capital Formation includes the value of the purchases and own account construction of fixed assets (land, civil construction and works, machinery and equipment) by enterprises, households, private non-profit institutions and government.

SECTION J. PUBLIC FINANCE AND EMPLOYMENT

This section presents tables relating to the revenues and expenditures of the Central Government.

The Ethiopian fiscal year is used. (See the note on the calendar, page XVI).

Tables J. 8 and 9. Data shown for the Central Government include figures on all employees paid by the head offices of the various Ministries and Government agencies in Addis Ababa. Excluding the employees of the Ministry of Defence, Police and Security Forces and the Ecclesiastical Office. However, the Municipality of Addis Ababa, has been included in these figures.

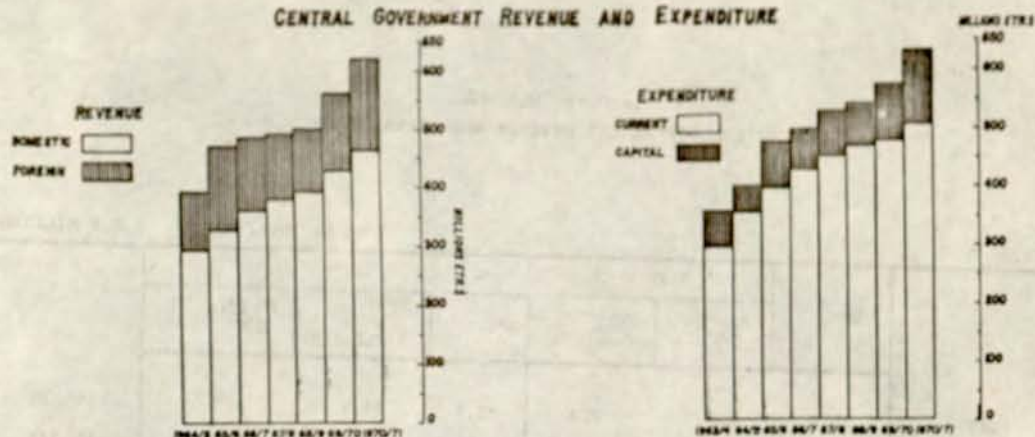

The autonomous authorities and private firms included are:-

Addis Ababa Bank	Electric Light and Power Authority,
Central Medical Stores,	Ethiopian Airlines
Commercial Bank of Ethiopia	Imperial Highway Authority,
Agro-Industrial Development Bank,	Telecommunications Board,
H.S.I. University	*Tobacco Monopoly
National Lottery	H.S.I. Foundation
Grain Corporation	Ethio-Franco Railway
National Bank of Ethiopia	National Coffee Board and
Mortgage Company of Ethiopia	*Department of Posts

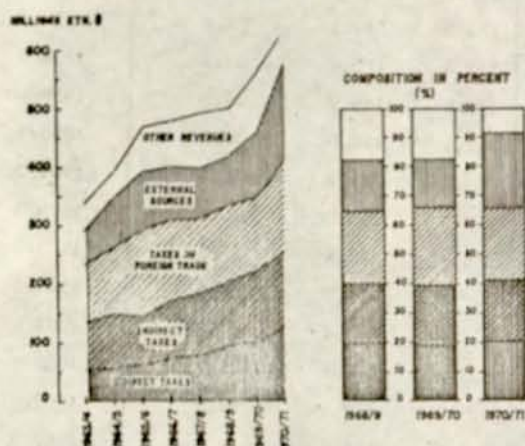

The table is derived from Central Statistical Office calculations based on the payroll records of the Central Treasury, Ministry of Finance, and on the payroll records of the autonomous Authorities.

*included in the 1970 and 1971 total only.

SECTION K. BANKING AND BALANCE OF PAYMENTS

Currency: The Ethiopian dollar is equal in value to 0.355468 grammes of fine Gold and is worth 43 US cents at par.

Banks: Prior to January 1964, the State Bank was the central bank with the power, as agent of the Ministry of Finance, to issue bank notes and coins and was the sole authorized dealer in foreign exchange. It was also up to that date that State Bank was engaged in commercial banking activities. By the Monetary and Banking Proclamation No. 206 of 1963, the State Bank was dissolved, and the National Bank of Ethiopia and the Commercial Bank of Ethiopia were formed w.e.f. 1st January 1964. The National Bank is the central bank of Ethiopia and the currency issuing authority, as agent of the Minister of Finance. The Commercial Bank, as its name indicates, undertakes all general banking business. The figures for commercial banks in the tables cover the following banks:

1. Commercial Bank of Ethiopia,
2. Addis Ababa Bank,
3. Banco di Roma (Asmara),
4. Banco di Napoli (Asmara),

Table K.7. BALANCE OF PAYMENTS

A. GOODS AND SERVICES:

Item 1. merchandise Transactions: Exports f.o.b.: Customs trade valuation plus 6 percent of the total value of exports excluding coffee to cover internal transportation costs. Imports f. o. b.: Customs trade valuations less and estimated 10 percent for ocean freight and 1 percent for insurance and transit charges through Djibouti.

Item 2. Non-monetary gold movements: The figures equal changes in non-monetary gold holdings plus exports of gold where such occurred.

Item 3. Freight and insurance: Ocean freight for imports is an estimated 14.0 per cent of the total c.i.f. value of imports. Ocean insurance is estimated at 1.1 per cent of the total c.i.f. value of imports.

Item 4. Other transportation: The entries cover receipts (credit) and expenditures (debit) aboard the Ethiopian Air Lines; also receipts (credit) from Ethiopian Shipping Lines & foreign ships calling at Massawa and Assab ports, and from foreign aircraft landing at Ethiopian airports; beginning 1962 debits include remittances abroad by travel and shipping agents in Ethiopia.

Item 5. Travel: The credit entry covers expenditure in Ethiopia by travellers from abroad. The debit entry covers expenditures by Ethiopian students abroad and foreign exchange provided for travel expenses.

Item 6. Investment income: The credit entries cover interest earned on foreign deposits and securities held by the National Bank of Ethiopia. The debit entries cover interest payments by the Central Government on loans, and the profits and dividends of the major foreign companies operating in Ethiopia.

Item 7. Government, not included elsewhere: The credit entries cover expenditure of foreign diplomatic and consular missions in Ethiopia. The debit entries cover Ethiopian consular and diplomatic expenditures abroad.

Item 8. Other services: The item covers insurance claims (credit) by Ethiopian residents on foreign insurance companies, and non-merchandise premiums and claims (debit) paid by Ethiopian residents. It further covers transfers for services which cannot be identified separately for inclusion elsewhere.

B. TRANSFER PAYMENTS:

Item 9. Private: All donations and imports of capital by religious and private organizations as well as individuals are covered under this item.

Item 10. Central Government: The credit entries cover grants received from various Governments, and International Agencies. The debit entries cover Ethiopia's contribution to International Agencies and other grants by the Ethiopian Government.

D. CAPITAL MOVEMENTS:

Item 11. Private long-term: The entries cover changes in foreign direct investment in Ethiopia in the form of cash and capital goods, re-invested capital and new foreign investment. Estimated repayments of long-term credit owed by private companies in Ethiopia and foreign capital amortization are debited under liabilities.

Item 12. Private short term: The entries cover changes in commercial credits by Ethiopian merchants from foreign merchants.

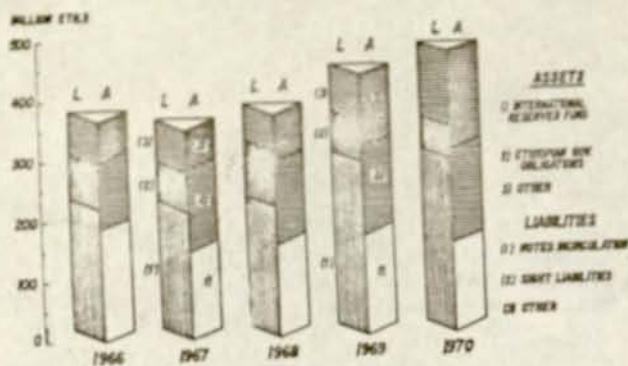

Item 13. Central Government long-term: The entries cover loan withdrawals (credit) and loan repayments (debits).

D. EXTERNAL RESERVES AND MONETARY INSTITUTIONS:

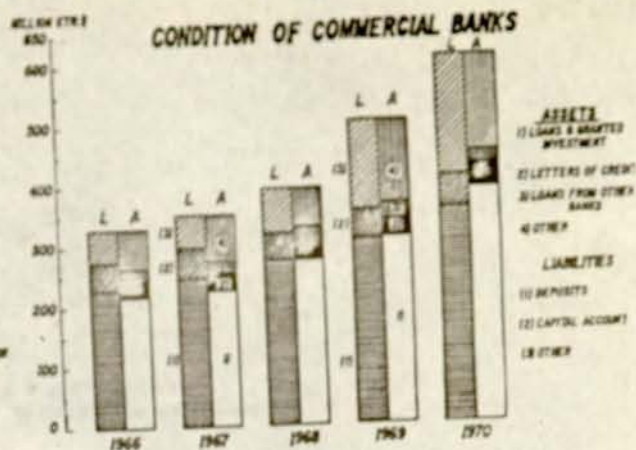

Item 14. Central monetary institutions: Credit entries under these headings cover increase in liabilities resulting from subscription payments to the International Monetary Fund in Ethiopian dollars, or decreases in holdings of gold, International Bank of Reconstruction and Development Bonds and other securities of the National Bank. Debit entries under assets represent increase in Ethiopian subscriptions to the International Monetary Fund in gold and Ethiopian dollars, or increases in gold and foreign exchange holdings of the National Bank.

Item 15. Other Monetary Institutions: The entries represent net change in foreign assets and liabilities of the Domestic and Foreign Commercial banks operating in Ethiopia.

SECTION M. PRICES

Tables M.1 and M.2 Indices of the prices of import and export commodities, collected by the National Bank of Ethiopia from selected wholesalers and customs Trade Returns.

Table M.3 shows the wholesale prices of selected import commodities collected by the Department of Economic Research of the National Bank at monthly intervals. The series presented refer to average annual prices in Addis Ababa.

Table M.4 Wholesale prices of agricultural commodities in selected towns are also collected by the National Bank. The statistics presented in this table are annual averages for the years 1969, 1970 and 1971.

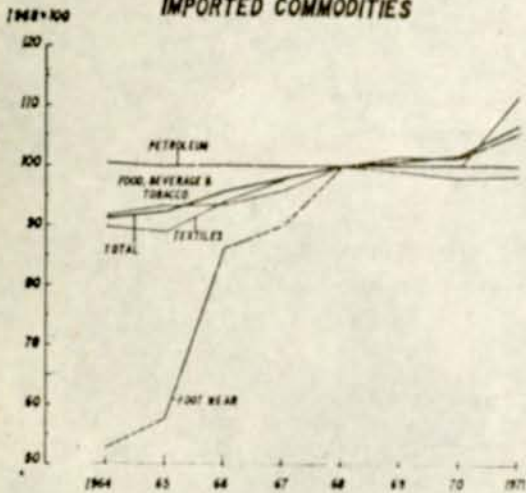

Tables M.5 and M.6 give New York spot price of selected types of coffee and the average Addis Ababa prices of coffee for export.

Coffee known as "Djima, Usually Good Quality" in New York are blends of all types of Ethiopian Coffee other than coffee from Harargie, whereas the Addis Ababa prices quoted for "Jimas" are for coffee from Kefa province only.

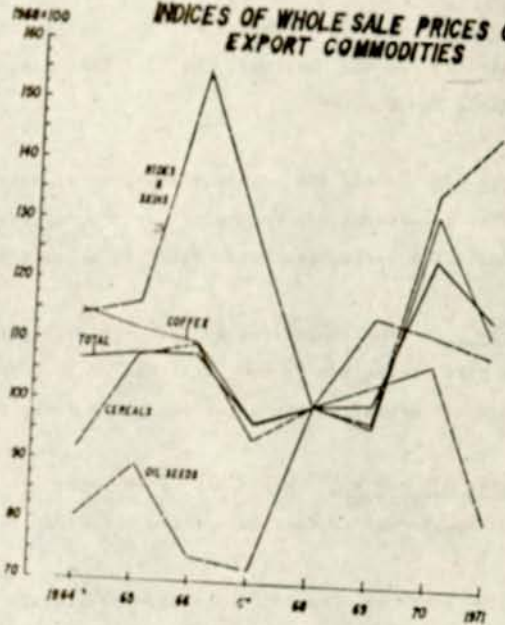

Table M.7 Here the Central Statistical Office presents a retail Price Index for Addis Ababa for the years 1970 and 1971. The information are based on Household Consumption and Expenditure Survey of 1964 and on the monthly retail prices collected by the Central Statistical Office. The index applies to Households belonging to E\$100 - 400 income groups.

Table M.8 Shows average Addis Ababa retail prices for some major items. They are averages of prices in Addis Ketema and other parts of the town, most of them are collected from at least six quotations to calculate the monthly Price Index prepared by the Central Statistical Office.

SECTION N. HEALTH

The tables under this section have been compiled in consultation with the Ministry of Public Health.

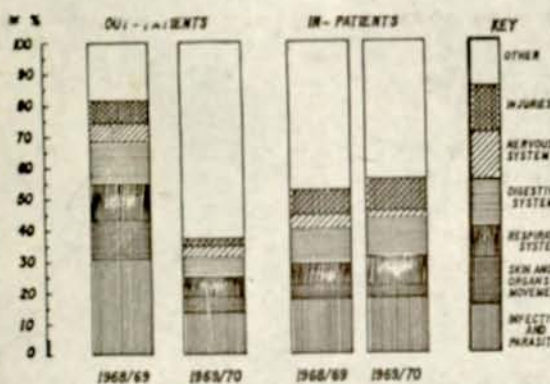

Table N.1 Medical and public health facilities are shown in this table.

Tables N.2 and N.3 The number of doctors and other medical personnel is shown in these tables.

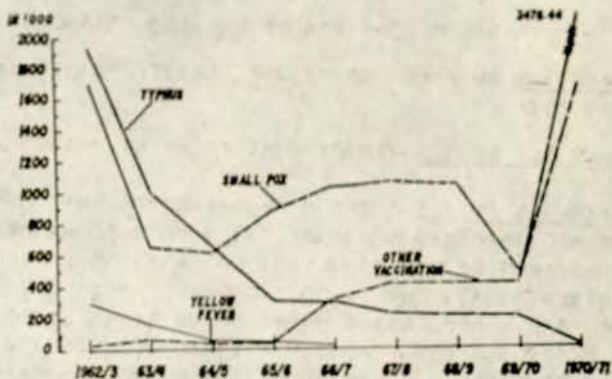

Tables N. 4 and n.5 The statistics relating to patients treated and deaths from the disease groups are compiled by the Ministry of Public Health, from periodic reports of hospitals, clinics and health centres, all of which may not report regularly as required, and to that extent the figures represent an underestimate of cases treated. For example total patients treated in 1967/8 were 2,016,057 and 2,177,368 in 1968/9. In the 1968/9 table on out-patients 3,101 people from Begemdir and Semien were excluded because the disease group classification was not made available to our Office.

Tables N.6 and N.7 are based on monthly reports of the number of people vaccinated by the Anti-Epidemic Control Service.

SECTION O. EDUCATION

Government schools are schools operated by the Ministries of Education, Public Health, Agriculture, Communications Posts, Telegraph and Telephone, etc. and, Haile Selassie I University. Community schools which were treated separately in previous publications are now included in this section.

Private schools are schools operated by a private person or institution, or a religious organization with or without assistance from the Government.

Mission schools are schools operated by religious missions with or without assistance from the Government.

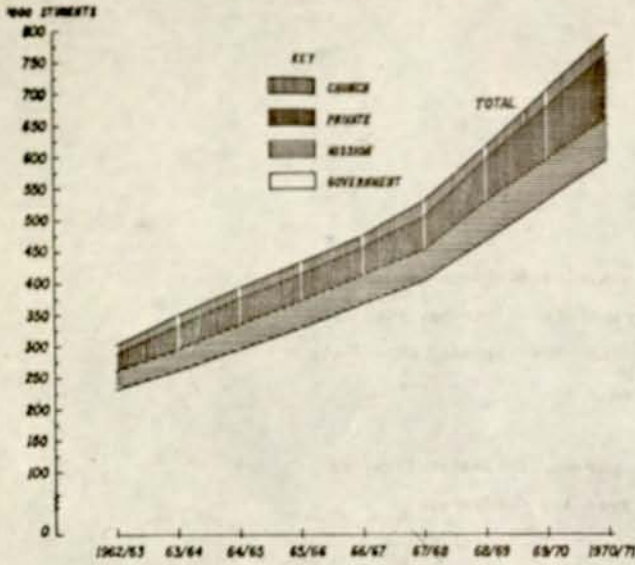

Church schools are schools maintained and operated by the Ethiopian Orthodox Church. Most of these schools teach reading, writing, and religion but some follow the Ministry of Education curriculum. The data on church schools in the tables include only the latter.

Specialized schools are schools having at least one grade in a specialized subject, such as agriculture, commerce, health, teacher training, technical and vocational training, etc.

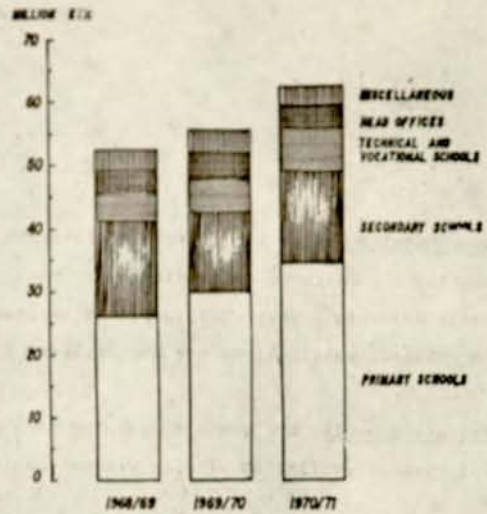

GRADES:

In the tables, grades have been grouped according to the system established by the Ministry of Education. Under the system, the primary grades are grades 1 to 6, the junior secondary include grade 7 and 8, and the senior secondary cover grades 9 to 12.

SECTION P. LAW AND ORDER

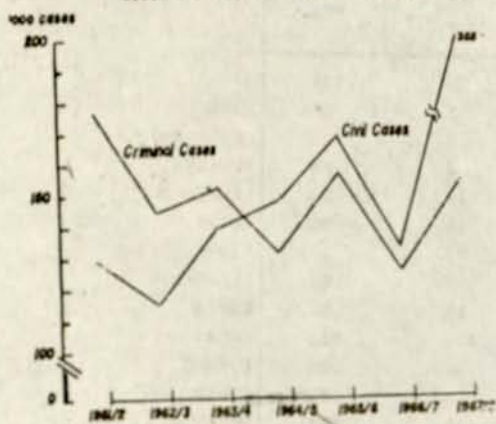

THE COURTS: Under the terms of the Administration of Justice Proclamation, 1942 (Negarit Gazeta, 1st year, No. 2); the High Court heard appeals from decisions of the province courts and also had, and still has, original jurisdiction. The High Court sat in Addis Ababa and in the provincial capitals when necessary. According to the Courts Proclamation, 1962 (Negarit Gazeta, 22nd year, No.7), from 5 May 1963, the High Court sits permanently in the provinces as well as in Addis Ababa and the province courts have been abolished.

Thus, cases which formerly were presented to district courts and then to sub-province courts now go to the district courts. Cases which formerly were presented to province courts now go to sub-province courts, and appeals from decisions of the sub-province courts are presented directly to the reorganised High Court.
