# 1. INTRODUCTION

International trade is the exchange of goods and services between nations. It enables a nation to specialize in those goods it can produce most cheaply and efficiently. Trade also enables a country to consume more than it would be able to produce if it depended only on its own resources. Moreover, trade enlarges the potential market for the goods of a particular economy. Trade has always been the major force behind the economic relations among nations. The increased international demand for goods translates into greater production and more extensive use of raw materials and labor, which in turn leads to growth in domestic employment. Competition from international trade can also force domestic firms to become more efficient through modernization and innovation. Since the beginnings of international trade, nations have striven to achieve and maintain a favorable balance of trade – that is, to export more than they import.

In view of the vital role international trade plays in the economic development of a country, and the overall responsibility of the Central Statistical Authority (CSA) to provide a convenient statistical reference in all fields of statistics, the Authority found it imperative to carry on the publication of data pertaining to Ethiopia's international trade. International trade statistics are a good starting point for market research, as they provide an overview of present imports and exports (expressed in quantities and in values) as well as trends, broken down by product and country. Moreover, analysis of trade flows allows a smooth shift of focus from national markets to regional grouping, or even towards a global view.

For exporters, an analysis of international trade statistics is important in particular, for:

- pre-selecting new export markets (market screening),
- scanning new sources of import supply,
- analyzing trends in international demand and in the target country and,
- assessing competition with exporters or importers from other countries.

For trade promotion organizations, international trade statistics are useful for:

- developing national trade development strategies and programs,
- monitoring national trade performance,
- identifying priority products and markets for special trade promotion activities such as market prospect missions, trade fair participation, and market studies and,
- as an element of trade information services.

Therefore, the purpose of this publication is to assist the user of international trade statistics in making the most of the data at hand. In this respect eight selected tables are presented. The types of data captured among others include: trade balances (export less import), quantity and value of exports by commodity and destination, import of commodities by type, quantity, country of origin and end use. These data are expected to meet most of the demands by users of international trade data. The Harmonized System (HS) trade classification as provided by the Customs Authority is used. As regards valuation, generally imports are valued c.i.f., i.e. the value at which the goods were purchased plus the cost of transportation and insurance. Exports are valued at free on board (f.o.b.) at the frontier of the country. This is the value at which the goods were sold by exporter, including transportation and insurance, to bring the goods onto the transporting vehicle at the frontier of the country.

It is hoped that, the publication will meet the growing demand for international trade data, by policy makers, entrepreneurs, researchers, and other interested groups.

## SUMMARY OF THE MAJOR RESULTS

### *2.1 Summary of Trade Balance, 2000 – 2001*

Table 1 presents data on trade balance for the years 2000 and 2001. As the figures in the table indicate in the year 2000, the country exported goods worth Birr 3,958 million while importing goods worth 10,369 million. The following year exports amounted to Birr 3,658 million (a decrease of 300 million or 7.6 percent than a year before) while imports stood at Birr 15,347 million, an increase of 4,978 million or 48.0 percent. Details reveal that monthly exports and imports and subsequently the balance showed ups and downs in both years. Export values in June (Birr 450.6 million) and February (1,144.9 million) and December (1,736.3 million) were the top ones in 2000 and 2001, respectively. Overall imports were 2.6 and 4.1 times more than exports in the year 2000 and 2001, respectively. This resulted in a huge trade deficit to the tune of Birr 6.4 billion and 11.7 billion, during 2000 and 2001, respectively. This indicates that the trade deficit at current price has showed an increase of 82.8 percent over the previous year.

### *2.2 Quantity and Value of Imports and Exports by Commodity Section, 2000 – 2001*

Table 2 refers to data on quantity and value of imports and exports in the years 2000 and 2001 classified by commodity sections. As shown in this table, in both years, most of the exported items were those grouped in section II, VIII and XIV respectively. These are vegetable products including coffee, raw-hides and skins and precious stones in that order. In 2001 value of export commodities in section II decreased significantly, while the other sectors showed ups and downs, resulting in the overall decline of exports (in value terms) against a year before.

Regarding imports, in both years, the leading imported items were those clustered in section V, XVI, XVII and VI, in descending order. These refer to mineral products, machinery and mechanical appliances, vehicles and chemical products.

## 2.3 Quantity and Value of Major Export Commodities by Destination, 2000 - 2001

Table 3 displays data on the major export commodities by country of destination. As can be seen in this table, in the year 2000 the leading export item with 53.0 percent of the total export value was coffee (not roasted or decaffeinated), followed by vegetable products n.e.s (14.3 percent) and sheep or lamb skin leather (6.6 percent). The figure in the same year also shows that, the main three export markets were Germany, Japan and Saudi Arabia for coffee, Djibouti, Somalia and UK for vegetable products and UK, India and Italy for sheep or lamb skin leather.

Similarly in the year 2001, coffee with 33.3 percent of the total export value was the prime export item. The main markets for this item were Japan, Saudi Arabia and Germany in that order. The second and third major export commodities in the stated period were vegetable products having 12.5 percent and sesame seeds having 5.7 percent share of the total export value. Djibouti, Somalia and UK for vegetable products and Israel, Yemen and Japan for sesame seeds were the main export destinations.

The country's major export item, coffee, showed a considerable decline in 2001 compared to a year before. A slight decline was also recorded on export of vegetable products and insignificant increment on sesame seeds.

Generally, as depicted in Table 3, compared to the year 2000 additional items, like dried beans, some vegetable products ...etc were exported in the year 2001. This shows that varieties of export commodities have increased. However, the percentage share of the major export commodities to the total export declined from 94.9 percent in the year 2000 to 81.9 percent in 2001.

## **2.4 Trade Balance by Partners, 2000 - 2001**

Trade balance of the country by continents is presented in Table 4. In the years 2000 and 2001, Ethiopia had a positive trade balance only with Africa, amounting to Birr 333.7 and 142.4 million, respectively. Among African countries, Djibouti, Somalia and Egypt, in that order, were the major export destinations in both years. On the other hand, Kenya, Egypt and South Africa in the year 2000 and Egypt, South Africa and Kenya in the year 2001 were the major exporters to the country, in that order.

Even though Ethiopia had a negative trade balance with Europe, compared with other continents it was a better market for Ethiopia's exports (in value terms) during the period under discussion. From this continent, in both years, Germany, Italy and Switzerland were the top importers from the country, while Italy, Germany and UK were the major exporters to the country.

In the American continent there was no noticeable export market for Ethiopia except to the USA and Canada. Besides, these two countries were the main exporters to the country during the same period. The country exhibited a negative trade balance of Birr 453.1 million and 1637.5 million in 2000 and 2001, respectively, with the continent.

From all continents, Asia was the principal exporter to Ethiopia in the periods under discussion. In the year 2000, it was the major export market for the country's merchandise which was second to Europe, but in 2001 it headed all the other continents importing from Ethiopia. In both years, Japan, Saudi Arabia and Israel were the main export markets for the country from the continent. On the other hand, Yemen, Japan and China in 2000, Saudi Arabia, China and Yemen in 2001, were the top exporters to Ethiopia. The country had a negative trade balance of Birr 4467.9 million in 2000 and 6446.6 million in 2001.

Oceania was the smallest import and export market for the country in the periods under discussion. The continent exhibited a negative trade balance of Birr 11.3 million in the year 2000 and 60.2 million in 2001. From this continent, Australia was the only country, which had a meaningful volume of trade with Ethiopia from the continent in both years.

## **2.5 Quantity and Value of Exports and Imports by Commodity Group, Destination and Origin, 2000 - 2001**

Table 5 and 6 present data on exports and Imports by commodity group, origin and destination for 2000 and 2001 in a more detailed way and complemented by unit value calculations. However users are advised to use the unit value figures with caution, as they are unit values of heterogeneous products.

## **2.6 Imports by End Use, 2000 – 2001**

Table 7 presents data on end use of imports, i.e., it shows the final use of imported commodities and how much was spent on them. If we look at the share of different items from the total imports, in the year 2000, 21 percent of imports were industrial capital goods; 20.1 percent fuel and 18.7 percent non-durable consumer goods. Comparative figures for 2001 show that, 25.1 percent of imports were non-durable consumer goods followed by industrial capital goods 18.2 percent and fuel 17.5 percent.

These figures reveal that the aforementioned three categories of goods cover the lion's share of imports. Share of non-durable consumer goods in 2001 increased by 34.1 percent compared to its level a year before, mainly due to a rise in food imports. On the other hand, during the same period, import of industrial capital goods

decreased by 12.9 percent. Similarly import of fuel showed a downturn (13.0 percent) against a year before.

As in the previous years the country spends sizable amount of money in non-durable consumables than say agricultural machinery or inputs. For example, in 2001 tractors took 0.1 percent of imports while the share of textile fabrics and clothing was 5.0 percent. By the same token, in the year 2000 textile fabrics and clothing demanded 5.6 percent of import value while the share of fertilizers manufactured was 2.2 percent of total import value.

### ***2.7 Direction of Export Trade, 2000 – 2001***

As can be seen from Table 8, in the year 2000, 46.1 percent of exports went to Europe, 30.5 percent to Asia, 19.1 percent to Africa, 4.1 percent to America and the rest 0.2 percent to Oceania. Likewise in 2001, 37.4 percent of exports went to Asia, 37.0 percent to Europe, 20.0 percent to Africa, 5.3 percent to America and the rest 0.3 percent to Oceania and 0.1 percent to unspecified destination.

Exports to Asia had grown from 30.5 percent of the total in 2000 to 37.4 percent in 2001 showing a rise of 22.6 percent, taking the first place from Europe. In 2001 Japan, Saudi Arabia and Israel were the three biggest markets for Ethiopia's exports from the continent taking 9.1, 8.9 and 5.6 percent of total exports, in that order. During the same year Israel imported goods worth 204.6 million, a rise of 60.6 percent from a year before.

Europe's market for Ethiopia's exports in 2001 has declined from its position a year ago. In 2000, the continent as a whole imported goods worth Birr 1.8 billion (46.1 percent) and in 2001 its share downsized to 37.0 percent of Ethiopia's exports or Birr 1.35 billion, leaving its usual leading position to Asia. The biggest buyers of Ethiopia's goods in the continent in 2001 were, Italy, Switzerland and Germany, with market share of 10.1, 7.8 and 6.6 percent of total exports. The share of Germany,

which was the leading market for Ethiopia in 2000, plummeted by 66.5 percent in 2001. The decrease was both in volume and value.

Much of the increase in developing country exports during the past three decades has not followed a north-south pattern. Globally, the share of developing country exports going to other developing countries has risen sharply as the importance of developing countries in the world economy has risen and barriers to trade have declined in both developing and industrial countries<sup>1</sup>. Despite this fact Ethiopia's export to African countries is not significant, save that of neighboring Djibouti and Somalia, which was 14.7 and 3.2 percent of the total, respectively. Ethiopia's trade with COMESA member countries is negligible except with Kenya and Egypt, the trade balance being in favour of the two.

From the American continent only the USA stand out as a significant market for Ethiopia's exports, which had imported goods worth Birr 165.0 million (4.5 percent) in 2001.

---

## ANNEX I: DETAILED DESCRIPTION OF SECTIONS

- SECTION I: LIVE ANIMALS; ANIMAL PRODUCTS
- SECTION II : VEGETABLE PRODUCTS
- SECTION III: ANIMAL OR VEGETABLE FATS AND OILS AND THEIR CLEAVAGE PRODUCTS; PREPARED EDIBLE FATS; ANIMAL OR VEGETABLE WAXES
- SECTION IV: PREPARED FOODSTUFFS; BEVERAGES; SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES
- SECTION V: MINERAL PRODUCTS
- SECTION VI: PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES
- SECTION VII: PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF
- SECTION VIII: RAW HIDES AND SKINS; LEATHER; FURSKINS AND ARTICLES THEREOF; SADDLERY AND HARNESS; TRAVEL GOODS; HANDBAGS AND SIMILAR CONTAINERS; ARTICLES OF ANIMAL GUT (OTHER THAN SILK-WORK GUT)
- SECTION IX: WOOD AND ARTICLES OF WOOD; WOOD CHARCOAL; CORK AND ARTICLES OF CORK; MANUFACTURES OF STRAW; OF ESPARTO OR OF OTHER PLAITING MATERIALS; BASKETWARE AND WICKERWORK
- SECTION X: PULP OF WOOD OR OF OTHER FIBROUS CELLULOSIC MATERIAL; WASTE AND SCRAP OF PAPER OR PAPERBOARD; PAPER AND PAPERBOARD AND ARTICLES THEREOF
- SECTION XI: TEXTILES AND TEXTILE ARTICLES
- SECTION XII: FOOTWEAR; HEADGEAR, UMBRELLAS, SUN UMBRELLAS, WALKING-STICKS, SEAT-STICKS, WHIPS, RIDING-CROPS AND PARTS THEREOF; PREPARED FEATHERS AND ARTICLES MADE THEREWITH; ARTIFICIAL FLOWERS; ARTICLES OF HUMAN HAIR

- SECTION XIII:** ARTICLES OF STONE, PLASTER, CEMENT, ASBESTOS, MICA OR SIMILAR MATERIALS; CERAMIC PRODUCTS; GLASS AND GLASSWARE
- SECTION XIV:** NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMI-PRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL AND ARTICLES THEREOF; IMITATION JEWELLERY; COIN
- SECTION XV:** BASE METALS AND ARTICLES OF BASE METAL
- SECTION XVI:** MACHINERY AND MECHANICAL APPLIANCES; ELECTRICAL EQUIPMENT; PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS PARTS AND ACCESSORIES OF SUCH ARTICLES
- SECTION XVII:** VEHICLES, AIRCRAFT, VESSELS AND ASSOCIATED TRANSPORT EQUIPMENT
- SECTION XVIII:** OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; CLOCKS AND WATCHES; MUSICAL INSTRUMENTS; PARTS AND ACCESSORIES THEREOF
- SECTION XIX:** ARMS AND AMMUNITION; PARTS AND ACCESSORIES THEREOF
- SECTION XX:** MISCELLANEOUS MANUFACTURED ARTICLES
- SECTION XXI:** WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES

1874
