## **i. Introduction**

The Central Statistical Authority, CSA, has been conducting the Rural Integrated Household Survey Program, RIHSP, since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP the rural price survey, which covers both retail and producers' prices, is being conducted on a monthly basis since May 1981 in selected Farmer Associations, FAs, (currently Enumeration Areas, EAs) of the country.

In an effort to fulfill data users demand the CSA, for the first time, provides price data at zone level. Hence, this report provides information on average retail prices of goods and services in rural areas from January 2000 to March 2000 (Tirr 1992 -- Megabit 1992 E.C.) on the basis of the current administrative hierarchy, i.e., Killil/regional states and zones. Due to lack of adequate space to accommodate all zones and Killils in one page the price data of the zones and Killils are presented in six parts.

**Part I** - Consists of average retail price of Tigray killil (and its zones, i.e., Mirabawi Tigray, Mehakelegdaw Tigray, Misrakawi Tigray and Debubawi Tigray) and Affar Killil (and its zones, i.e., zone 1, zone 3 and zone 5).

**Part II** - Consists of average retail price of Amhara killil (and its zones i.e., Semen Gondar, Debub Gondar, Semen Wello, Debub Wello, Semen Shewa, Misrak Gojam, Mirab Gojam, Wag Hemra, Awi and Oromiya).

**Part III** - Consists of average retail price of Oromiya killil (and its zones i.e., Mirab Wellega, Misrak Wellega, Illubabor, Jimma, Mirab Shewa, Semen Shewa, Misrak Shewa, Arssi, Mirab Harerge, Misrak Harerge, Bale and Borena).

**Part IV** - Consists of average retail price of Somali killil (and its zones i.e., Shinile, Jig-jiga and Liben) and Benishangul-Gumuz killil (Metekel, Asosa and Kamashi).

**Part V** - Consists of average retail price of Southern Nations, Nationalities and Peoples killil (and its zones and special weredas i.e., Gurage, Hadiya, Kembata-Alaba-Tembaro, Sidama,, Gedeo, Semen Omo, Debub Omo, Keficho-Shekicho, Bench-Maji, Yem special wereda, Amaro special wereda, Burji special wereda, Konso special wereda and Dirashe special wereda).

**Part VI** - Consists of average retail price of Gambella killil (and its zones i.e., zone 1, zone 2 and zone 4), Harari killil, Addis Ababa (and its zones i.e., zone 3 and zone 6), Dire Dawa and monthly national average.

This issue updates Statistical Bulletin 236-1. Earlier issues on the same subject are Statistical Bulletins 37, 45, 57, 64, 83, 93, 96, 106, 107, 115, 117, 124, 138, 143, 151, 153, 157, 164, 167, 175, 186, 195-1, 200-1, 201-1, 202-1, 203-1, 208-1, 222-1, 235-1 and 236-1.

## **II. Objectives**

The objectives of the survey are to:-

- study the level of retail prices charged by retailers;
- study the disparities between prices charged at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct rural consumer price index.

### **III. Scope and Coverage**

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in an effort to incorporate commodities mostly consumed by the rural population. The geographic coverage of the survey was revised as of September 1988 to produce price reports in one Autonomous Region and 25 Administrative Regions. The geographical coverage was revised once again in September 1995 and the present report is based on the current administrative hierarchy which is Killil (Regional States) and zones.

The major groups of items covered by the survey include food; drinks; cigarettes and tobacco; clothing and footwear; construction materials, water, and fuel and power; household equipment and durable household items; medical care; transport; personal care and effects; recreation, entertainment and reading and miscellaneous goods and services.

Information on retail prices of selected agricultural and industrial commodities is collected from retail outlets in the sample Enumeration Areas, (EAs). The allocation of EAs to the regions takes into account the population size of the regions/stratum and cost consideration. The number of EAs in each region has been considered to be a reasonable minimum size to provide meaningful estimates at regional/ reporting levels.

However, from September 1998 onwards the number of rural enumeration areas covered in price survey was reduced from 1420 to 446 in 1997. A careful analysis was made whether a reduction in the number of rural enumeration areas could affect the quality of the data. The result of the analysis showed no appreciable changes on the quality of the data after the reductions in rural enumeration areas.

#### **IV. Method of Data Collection**

Each month of the Ethiopian Calendar (September to August) data collection staff of the CSA attempt to collect prices in retail markets for a list of about 360 items with the use of kitchen balance and measuring tape in the selected EAs or from adjacent market places where households purchase most of the goods and services for consumption and other purposes. For each item on the price list the data collector is expected to get a maximum of three prices from three different retailers or shops in the local market places.

As the enumerators are stationed nearby the market outlets, it is believed that they are familiar with the market places where various items can be purchased. If one retailer or shop does not have the items, they continue searching until they find one that does. Although price is collected from traders, in some cases it is also obtained from consumer at the time of purchase. Retail price data is mainly collected on market days throughout the reference month considering the work load of the enumerators and in accordance with the purchasing habits of consumers in the selected EAs.

Since an interview method of data collection is utilized rather than an actual purchase and recording of price, it may result, in some instance, in exaggeration or under estimation of prices. However, as stated above, since enumerators are permanently assigned to each sample EA and reside there, they have a good chance of familiarizing themselves and be on friendly terms with retailers and owners of economic establishments the result of which is a reasonably reliable price information over time.

## V. Definitions

- **Retail Price:** A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.
- **Enumeration A**
- **rea:** An Enumeration Area in rural areas is a locality that is less than or equal to a farmer's association area and mostly consists of about 150-200 households.
- **Farmers' Association:-** It is the lowest administrative unit in a settled rural area with its own jurisdiction. It is an association of rural dwellers formed by the inhabitants of a given area whose members are engaged either in agricultural or non-agricultural activities.

## VI. Note

1. The minimum that the balance can weigh is 10 grams. Thus items which are sold in small quantities and whose weight fall under 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the price of these items in some respect.
2. The average column is a simple arithmetic average prices for each item.
3. The symbol “-” is used for data not available or doubtful.
