INTRODUCTION, OBJECTIVES OF THE RETAIL PRICES SURVEY AND COVERAGE	(i)
MEASURING UNITS AND THEIR CODES	(ii)
AVERAGE RETAIL PRICE OF GOODS AND SERVICES IN RURAL AREA BY REGION	1

Introduction

In order to improve the flow of coordinated and integrated statistical information that is needed for formulating, monitoring and evaluating development plans, and thereby, to substantially upgrade the capacity of the Central Statistical Office (C.S.O.), the Rural Integrated Household Survey Programme (RIHSP) was launched in 1980. The RIHSP was designed to cover wide range of subjects, the collection of data on producers' and retail prices being one among its many objectives.

The collection of price data in the rural area took place simultaneously with the household income, consumption and expenditure survey over 12 months period, May 1981 to April 1982. In this survey both retail and producers' prices were covered. The retail prices were collected from retail outlets in the selected Farmers' Association Areas or from adjacent areas where the households purchase most of goods and services. Although in principle prices are usually collected from traders, in some cases the prices were obtained from consumers at the time of purchase. For each item three price quotations were collected from three different retailers. On the other hand, data on producers' prices were collected from farm households residing in the area. Both prices were collected every month.

The present report, at regional and national level, is concerned with the results of retail prices survey covering the months of May, June and July 1981. However, reports at Farmers' Association Area, woreda and awraja level are available for reference in our library.

Objectives of the Retail Prices Survey are to:-

1. Study the level of retail prices,
2. Assess the disparity of price charged at different distribution levels,
3. Study changes in the economy,
4. Help in the valuation of consumption items from own products or non-market sources and
5. Provide data for national accounting and preparation of retail price index for rural areas.

Coverage:-

The rural retail prices survey covers about three hundred and sixty five selected agricultural and industrial products in about 361 Farmers' Association Areas in twelve regions, excluding Eritrea and Tigray. The major groups covered include feed, drinks, tobacco, household items, clothing, footwear, transport, communication, medical care, education, recreation, building materials and other goods and services.
