Table 1.4 :- Monthly Average Retail Price of Food, Drinks and Tobacco in European Type Groceries of Addis Ababa, September 1994 - August 1995 (Meskerem 1987 - Nehase 1987). 223-225

IV. METHOD OF DATA COLLECTION

The retail price of goods and services are collected from major outlets in selected urban centers by enumerators with the use of kitchen balance and measuring tape. The outlets include markets, kiosks, groceries, butcheries, pharmacies and other service giving establishments, where, households purchase most of their goods and services for household consumption and other purposes.

Retail prices of goods and services are collected from traders. However, sometimes, prices are also obtained from consumers at the time of purchase. In addition, wages of domestic servants and coolie charges are obtained from households. For each item, a maximum of three price quotations are collected from three retailers on the same day. Data collection starts on the 13th day of European Calendar and lasts for about 17 days.

Since an interview method of data collection is utilized rather than actual purchase and recording of prices, it may result, in some instances, in exaggeration or under estimation of prices. However, since enumerators were permanently assigned to every urban center and resides there, they have a good chance to familiarize themselves with the market and be on friendly terms with traders, owners of establishments and households. Thus it can be expected that respondents were cooperative and provide reliable information through time.

Finally, it has to be recalled that, since the start of price data in 1963, retail prices indicate the free market prices prevailing in the urban centers under study.

V. Definitions

Urban Center: It is generally defined as a locality with 2,000 or more inhabitants. However, for the purpose of the 1994 Population and Housing Census Map Work, urban centers include the following regardless of the number of inhabitants[2].

a) All administrative capitals,

i) regional capitals,

ii) zone capitals not included in (i),

iii) wereda capitals not included in (i) and (ii),

iv) localities with urban development associations not included in (i), (ii), and (iii),

b) Municipal towns not included in (a) above,

c) all localities which are not included either in (a) or (b) above having a population of 1,000 or more persons, and whose inhabitants are primarily engaged in non-agricultural activities.

Note that localities with population of less than 1,000 persons should be considered as rural. However, for the purpose of this survey the selected urban centers in general satisfy the following conditions:

- A capital of an administrative region,
- An industrial center and/or,
- A center for trade and commercial activities.

Retail Price: A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

Hotel: Hotel is an establishment rendering combined services of rooming, food and drinks on a fee basis.

---

[2] Transitional Government of Ethiopia, Central Statistical Authority, 1992, Manual for Census Map work. Addis Ababa. pp 3-4.

VI. Note

1. The symbol "-" is used for data not available or doubtful.

2. The minimum that the balance can weigh is 10 grams. Thus, items which are sold in small quantities and whose weight fall below 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of prices of these items in some respect.

3. The average column is a simple arithmetic monthly national average of prices for each item.
