AVERAGE RETAIL PRICES OF GOODS AND SERVICES IN RURAL AREA  
BY REGION, FOURTH ROUND, TIR - MIAZIA 1974 - - - - - 25  
(FEBRUARY - APRIL 1982)

As it might be remembered, the report on retail prices for the first quarter, i.e. May, June and July 1981, had been issued earlier. The present report, at regional and national level, is concerned with the results of retail prices survey covering the remaining three quarters i.e. from August 1981 to April 1982.

## INTRODUCTION

In order to improve the flow of coordinated and integrated statistical information that is needed for formulating, monitoring and evaluating development plans, and thereby, to substantially upgrade the capacity of the Central Statistical Office (C.S.O), the Rural Integrated Household Survey Programme (RIHSP) was launched in 1980. The RIHSP was designed to cover wide range of subjects, the collection of data on producers' and retail prices being one among its many objectives.

The retail prices were collected from retail outlets in the selected Farmers' Association Areas or from adjacent areas where the households purchase most of the goods and services. Although in principle prices are usually collected from traders, in some cases the prices were obtained from consumers at the time of purchase. For each item three price quotations were collected from three different retailers. On the other hand, data on producers' prices were collected from farm households residing in the area. Both prices were collected every month.

The collection of price data started simultaneously with the household income, consumption and expenditure survey, the first four quarters being from May 1981 to April 1982.

As it might be remembered, the report on retail prices for the first quarter, i.e. May, June and July 1981, had been issued earlier. The present report, at regional and national level, is concerned with the results of retail prices survey covering the remaining three quarters i.e. from August 1981 to April 1982.

Objectives of the Retail Prices Survey are to:-

1. study the level of retail prices
2. assess the disparity of price charged at different distribution levels
3. study changes in the economy
4. help in the valuation of consumption items from own products or non-market sources and
5. provide data for national accounting and preparation of retail price index for rural areas

Coverage

The rural retail prices survey covers about 365 selected agricultural and industrial products in about 361 Farmers' Association Areas in twelve regions, excluding Eritrea and Tigrai. The major groups covered include food, drinks, tobacco, household items, clothing, footwear, transport, communication, medical care, education, recreation, building materials and other goods and services.

Note:- Rounding off may lead to inconsistencies between the average of the constituent parts and the average column.

Symbols used:-

N.A. - data not available or doubtful

... - insufficient information to calculate average
