TABLES OF DEMOGRAPHIC DATA

FOR
NINETY ONE TOWNS

ADDIS ABABA, SEPTEMBER 1975

TABLE OF CONTENTS

PART I

	Page
Introduction	1
1. Urban Population by age group and sex	1
2. Urban Population by Marital Status, sex and age group	10
3. Urban Population by Religion, sex and age group	57
4. Urban Population by mother tongue, sex and age group	104
5. Urban Population by Nationality, sex and age group	151
6. Urban Population by length of residence, sex and age group	182
7. Urban Population ten years and over by literacy sex and age group	213

APPENDIX: SURVEYED TOWNS BY DATE OF SURVEY

PART II

Introduction	1
8. Urban Population five years and above by school grade completed, sex and age group	244
9. Economically active population ten years and above by employment status sex and age group	335
10. Economically non-active population ten years and above by reason for being non-active, sex and age group	382
11. Economically active population ten years and above by occupational classification sex and age group	429

APPENDIX: SURVEYED TOWNS BY DATE OF SURVEY

PART III

Introduction	1
12. Economically active population ten years and above by major industrial classification sex and age group	478
13. Economically active population by Industry, occupation and sex	569
14. Urban Population by size of Households	617
15. Fertility details for women aged 15 years and above	626
16. Women 15 years and above by school grade completed, number of children ever born alive and number of children born during the last 12 months	649

17.	Women 15 years of age and over by literacy, number of children ever born alive and number of children born during the last 12 months	667
18.	Mother by marital status, total number of children ever born alive and now alive and number of children born during the last 12 months and now alive	681
19.	Number of deaths during the last 12 months by sex and age group	694

APPENDIX: SURVEYED TOWNS BY DATE OF SURVEY

PART II

1	Introduction	
2	Urban population 15 years and above by school grade	
3	Urban population 15 years and above by sex and age group

8	Women 15 years and above by school grade, marital	
9	of children ever born alive and number of children born	

I N T R O D U C T I O N

The Central Statistical Office has so far undertaken two rounds of urban population and housing sample surveys. In the first and second round of urban sample surveys, 195 and 91 towns were covered respectively. However, this report is primarily concerned with tabular presentation of the results of the urban population survey collected during the second round. It should also be noted here that the results of the population and housing survey collected during the first round are published by the Central Statistical Office in:

1. Survey of Major Towns in Ethiopia
2. Urbanization in Ethiopia
3. Population of Addis Ababa
4. Population and Housing characteristics of Asmara.

There are 19 tables in this report and each table deals with a specific population characteristic. The presentation of the 19 tables is as follows: The surveyed towns are classified and listed region-wise and then for every surveyed town within the Region the data pertaining to a specific table are presented. Say, the data for Table 1, covering all the surveyed towns, are presented first followed by Table 2 and all the way through Table 19. For example Table 1 presents the total population by sex and age groups for every surveyed town arranged regionwise. Similarly Table 2 gives the marital status by sex and age group data of the population of the 91 surveyed towns.

The report consists of three parts. Part I consists of Table 1 through 7, Part II consists of Tables 8 through 11 and Part III consists of Tables 12 through 19. A detailed analytical study of urban areas based on this report is envisaged any time after the publication of this report.

In the first round of urban surveys (1964-1968), 195 towns were covered and the following criteria were used to determine a town:

- (1) If the area is a chartered municipality.
- (2) If the area comes under the jurisdiction of the municipality Department of the Ministry of Interior.

- (3) If the area has some sort of local officer who is responsible for collecting service taxes.
- (4) If the area is taken to be a town by the chiefs and elders of the area.

For the second round of urban survey, the Central Statistical Office used a different criteria to determine a town: "A town is an area in which 1. The buildings and houses are contiguously aligned, i.e. side by side in rows; 2. at least there should be one public bar in which alcoholic beverages are sold; 3. at least there should be one hotel, i.e. a house which serves as a lodging for a stranger on pay basis, 4. at least there should be one permanent shop selling different kinds of goods; and 5. at least there should be one weekly market in the town.

It should be noted that the definition of a town used by the Central Statistical Office in the two round of urban sample surveys was different. However, it is necessary to stress that the urban definition used by the Central Statistical Office should be uniform and consistent from one census/survey to another so as to facilitate future comparative studies of urbanization. The definition of a town used in the first round seemed to be based on the administrative functions of a town i.e. chartered and non-chartered municipal towns. In the second round, the provision of selected social services and amenities were mostly used to define a town. This definition is limited and narrow in scope for it only considers a single aspect of urbanization, i.e. the provision of social services and neglects many aspects of urbanization, namely population concentration, heterogeneity, and predominant employment of the labour force outside agriculture. At present the Central Statistical Office defines a town according to the population size criterion. A town is defined as a locality with 2000 or more inhabitants. Of the surveyed 91 towns during the second round, 18 have population size of less than 2000.

During the second round of urban surveys, varying sampling fraction were used for towns with different population sizes. In some small towns the sampling fraction was unity (complete enumeration). Some of these small towns are Hididola, Mendida, Mehal Meda, Jihur, Chacha, Deneba, Debreworq, Gemjabet, Assaita, Kutaber, Gohe, Dinsho, Gorro etc.

The date of survey by town varies and the number of towns by date of survey can be summarized as follows.

Date of Survey	Number of Towns
1969	13
1970	54
1971	24
Total	91

The specific date of survey for each town is given in the Appendix.

Distribution of Towns by Size of Population

Size of Population	No. Towns	%	Both Sexes	%
Less than 2000 inhabitants	18	19.8	20,777	2.4
2000 - 4999 "	24	26.4	73,305	8.6
5000 - 9999 "	24	26.4	178,105	21.0
10000 - 19999 "	15	16.5	203,347	24.0
20000 - 49999 "	9	9.9	312,409	36.8
50000 or more "	1	1.0	60,889	7.2
TOTAL	91	100.0	848,832	100.0

Out of the 91 surveyed towns only one town had more than 50,000 inhabitants; 9 towns had inhabitants between 20,000 and 50,000; 15 towns had inhabitants between 10,000 and 20,000. However, the majority of the surveyed towns, 48 in number had inhabitants between 2000 and 10,000. Also 18 of the surveyed towns had less than 2000 inhabitants. Although the majority of the surveyed towns had populations between 2000 and 10,000 they only accounted for about 30 percent of the surveyed population. However, those towns with populations of 10,000 and over (25 towns) account for a major part of the surveyed population that is 68% of the population.

Codes and Notations

M= MALES
F= FEMALES
M+F= MALES+FEMALES

+ = Plus
NS/(99+99) = Not Stated
LT1 = Resided for less than 1 year.

Codes Used for School Grade Completed

- 00 - Never been to school
- 01 - Grade 1 completed
- 02 - " 2 "
- 03 - " 3 "
- 04 - " 4 "
- 05 - " 5 "
- 06 - " 6 "
- 07 - " 7 "
- 08 - " 8 "
- 09 - " 9 "
- 10 - " 10 "
- 11 - " 11 "
- 12 - Obtained School Leaving Certificate
- 13 - ATTENDING University but not yet obtained bachelor's degree
- 14 - Bachelors degree
- 15 - Attending or attended church school
- 16 - Attending or attended Koranic school
- 17 - Attending or attended an adult literacy course.
