PART I

INTRODUCTION AND OBJECTIVES OF THE SURVEY

1.1 INTRODUCTION

Agriculture is the dominant feature of the economy in which the livestock sub-sector is an integral part. Livestock products such as hides and skins have a considerable share in the export market next to coffee and this indicates that the sub-sector plays a momentous role in generating foreign export earnings and has a great potential for development.

The country did not exploit the potential advantages of its geographical location and huge animal resources to materialize a substantial live animal and meat export to the North African & Middle East countries. To raise income of farmers and improve the nutritional status of the population, the development of this sub-sector is of a paramount importance and exploitation of these large animal resources should be part of the total strategy of the national food self-sufficiency drive. Thus, to introduce modern management systems, and improve the quality of livestock for attaining better livestock productivity, reliable statistical data is essential.

The Central Statistical Authority (CSA) has been conducting Agricultural Sample Surveys since 1980/81 (1973 E.C.) on annual basis to provide information on certain livestock characteristics. This bulletin, which is volume II of the Annual Agricultural Sample Survey, 2000/01 (1993 E.C.) presents the objectives of the survey, coverage and content of the survey, sample design, training of field staff, field organization, method of data collection, some basic concepts and definitions and survey results of Livestock, Poultry and Beehives. Furthermore, it presents

survey questionnaire, number of sampling units, sampled EAs and covered by strata and estimation procedures of total, ratio and sampling errors for livestock, poultry and beehives in Appendices I, II and III, respectively. Likewise, standard errors and coefficient of variation for cattle, sheep, and goats by age and purposes are presented in the Appendix IV at national and regional levels.

1.2 OBJECTIVES OF THE SURVEY

The general objective of the agricultural sample survey is to collect basic quantitative information on the country's agriculture that is considered essential for development planning and socio-economic policy formulation.

In particular, the objectives of the survey are to estimate the total cultivated land; total production and yield of major crops per hectare; crop land uses (temporary and permanent); number of livestock and poultry by type, purpose, sex and age; number of beehives and honey production in the private peasant holdings for the country, regions and zones.

PART II
SURVEY METHODOLOGY, DATA COLLECTION, AND PROCESSING

2.1 SCOPE, COVERAGE AND CONTENT OF THE SURVEY

The 2000/'01 (1993 E.C.) livestock survey, which is part of the annual agricultural sample survey, covered the rural part of the country, except six zones in Somali Region, three zones in Afar Region and one zone in Gambela region. Furthermore, the survey coverage was limited to weredas in the covered zones of the different regions. Accordingly a total of 55 zones and 412 weredas were covered in the survey. The areas covered by the survey are given in Table A.

For the 2000/'01 Agricultural Sample Survey a total of 1450 EAs were picked randomly. However, 24 EAs were closed/not studied for various reasons and the survey succeeded in covering 1426 (98.34%) EAs. Further, from each sample EA, 40 agricultural households were selected on random basis and 53,943 agricultural households (93.01% of the target number of agricultural households) were successfully covered. Distribution of sample units by domain (reporting levels) is given in Appendix II of this bulletin.

This volume contains estimated number of livestock by type, sex, age category, purpose; estimated number of poultry by kind; estimated number of beehives by type and total honey production for the country, regions, and zones taken as reporting levels.

Table A: Area Coverage of the 2000/'01 (1993 E.C.) Livestock Survey

TOTAL	71	55	16	417	412	5

Note

[1] Zones not covered in these regions are urban.

[2] Zones not covered in these regions are not inhabited by significant number of sedentary population.

[3] Numbers of total weredas signify those weredas in covered zones of the respective regions.

SNNPR - Southern Nations Nationalities and People's Region.

2.2 BASIC CONCEPTS AND DEFINITIONS

It is thought essential that the definitions used for some key terms in the survey should be laid open and these are given as follows.

Enumeration Area (EA): An enumeration area in rural parts of the Country is a locality that is less than or equal to a farmer's association area and usually it consists of 150-200 households.

Households: A household may be either;

a) A one person household, that is a person who makes provision for his own food or other essentials for living without combining with any other person to form part of a multi person household or

b) A multi person household, that is, a group of two or more persons who live together and make common provision for food or other essentials for living. The persons in the group may pool their incomes and have a common budget to greater or lesser extent. They may be related or unrelated persons, or a combination of both.

Agricultural Households: A household is considered an agricultural household when at least one member of the household is engaged in growing crops and /or breeding and raising livestock in private or in partnership with others.

Holder: A holder is a person who exercises management control over the operations of the agricultural holding and takes the major decision regarding the

utilization of the available resources. He also has technical and economic responsibility for the holding. He may operate the holding directly as an owner or as a manager.

Under conditions of traditional agricultural holding the holder may be regarded as the person, who with or without help of others, operates land or raises livestock in his own right, i.e. the person who decides on what, when, where and how to grow crops or raise livestock and has right to determine the utilization of the products.

Holding: A holding is all the land and/or livestock kept which is used wholly or partly for agricultural production and is operated as one technical unit by one person alone, or with others, without regard to title, legal form, size or location.

Draught Animal: For this survey, it refers to animals that are engaged in activities such as ploughing, threshing... etc.

Dairy Cow: Refers to any type of cow used to give milk previously and/or provide milk currently or have never given milk before and pregnant now. Heifers are not included in this category.

Milking Cow: Refers to cows actually milked during the year, Feb. 10, 2000 to Feb. 8, 2001.

Meat Purpose: Cattle, sheep and Goats reared only for meat purpose either for home consumption or for sale are defined as animals used for meat purpose.

Laying Hens: Refer to all hens and pullets of all types, which have laid eggs during the year Feb. 10, 2000 to Feb. 8, 2001.

Other Purposes: Cattle which participate in activities such as transporting and the like other than animals kept for draught, milk and beef purposes are categorized as cattle for other purposes. Moreover, Sheep and Goats that are kept for other purposes other than breeding, wool, meat, and milk production are included in this category.

2.3 SAMPLE DESIGN

The 2000/'01 (1993 E.C.) livestock survey covered the rural part of the country except three zones in Afar Regional State, six zones in Somalie Regional State and one zone in Gambela Regional State that are predominantly nomadic. A two-stage stratified sample design was used to select the sample. Each zone/special wereda was adopted as stratum for which major findings of the survey are reported. Nevertheless, each of the four regions; namely, Gambela, Harari, Addis Ababa and Dire Dawa were considered as strata/reporting levels. The primary sampling units (PSUs) were enumeration areas (EAs) and agricultural households were the secondary sampling units. The survey questionnaires were administered to all agricultural holders within the sample households. A fixed number of sample EAs was determined for each stratum/reporting level based on precision of major estimates and cost considerations. Within each stratum EAs were selected using probability proportional to size; size being total number of agricultural households in the EAs as obtained from the 1994 population and housing census. From each sample EA, 40 agricultural households were systematically selected for the annual

livestock survey from a fresh list of households prepared at the beginning of the fieldwork of the annual agricultural survey.

A sample of 1450 EAs was selected for the survey. However 24 EAs were closed for various reasons and the survey succeeded in covering 1426 (98.34%) EAs. With respect to ultimate sampling units, for the livestock survey, it was planned to cover 58,000 agricultural households. The response rate was found to be 93.01 % (that is, 4057 households were not covered). Survey questionnaire and distribution of the number of sampling units sampled and covered by strata are given in Appendices I and II, respectively. Estimation procedures of total, ratio, and their sampling error are presented in Appendix III.

2.4 FIELD ORGANIZATION

All the 22 branch statistical offices of the CSA participated in the survey undertaking, especially in organizing the second stage training, in deploying the field staff to their respective sites of assignment, and retrieving completed questionnaires and submitting them to the head office for data processing. They were also responsible in administering the financial and logistic aspect of the survey within the areas of their assignment. In the data collection of the survey, a total of 1558 enumerators and 336 field supervisors were involved with an average supervisor-enumerator ratio of 1-to-5. To accomplish the data collection operation, all enumerators were supplied with the necessary survey equipment at the completion of the training. To assist the data collection activities in deployment, supervision, and retrieval of completed questionnaires, 143 four-wheel vehicles

were used. Table B shows distribution of the field staff and vehicles by Branch Statistical Offices.

Table B: Distribution of Field Staff and Vehicles by Branch Offices

Total	1558	366	143

2.5 TRAINING OF FIELD STAFF

The field staff-training program was carried out in two stages. The first-stage consisted of trainees from the head office, Branch Statistical Office heads, and

some of the field supervisors. The training was given for one week at CSA's headquarters in Addis Ababa. Many of these personnel trained in the first-stage conducted similar training for field supervisors and enumerators for about two weeks in branch offices, which are distributed around the country. During this second-stage training, the field staff were given detailed classroom instruction on the objectives and uses of the survey, concepts and definitions of terms used, interviewing procedures, how to fill questionnaires, ...etc. The enumerators' training also includes a field practice to reinforce the concepts discussed in the classroom.

2.6 METHOD OF DATA COLLECTION

In each selected EAs, a fresh list of households was prepared and then agricultural households were identified from the list of households. From these identified agricultural households, 40 agricultural households were selected using systematic sampling techniques. Thus all agricultural holders belonging to each selected agricultural households were interviewed and the appropriate data were collected. The reference date for enumerating livestock, poultry, & beehives was February 8th of 2001 (Yekatit 1/1993 E.C.).

2.7 DATA PROCESSING

2.7.1 Editing, Coding and Verification

The editing and coding instruction manuals were prepared, and intensive training was given to the editors-coders. Those trained editors-coders were accomplished

the editing and coding tasks. In due course, professional staff members were assigned to facilitate the editing and coding activities and the edited and coded questionnaires were verified by statistical technicians as well as by professionals.

2.7.2 Data Entry, Cleaning and Processing

The data was entered by data encoders in personal computers using IMPS (Integrated Microcomputer Processing System) software. Then the data was checked and cleaned by regular staff members. Finally, the data processing activity was also done by personal computers (PCs) to produce results that were indicated in the tabulation plan.

CORRIGENDUM

1. In the previous reports, i.e.

i) Bulletin Nº 193-Volume II, percentages presented in column 3 of Table 3.4(page 18), Table 4.4(page 22), Table 5.4(page 26), Table 6.2(page 31), Table 7.4(page 33), Table 8.4(page 37), Table 9.4(page 40), Table 17.4(page 56), Table 19.4(page 61), Table 20.4(page 65), and Table 22.4(page 69)

ii) Bulletin Nº 206-Volume II, percentages presented in column 3 of Table 3.4(page 23), Table 4.4(page 26), Table 5.4(page 30), Table 6.4(page 37), Table 7.4(page 40), Table 8.4(page 44), Table 9.4(page 48), Table 11.4(page 56), Table 17.4(page 67), Table 19.4(page 73), Table 20.4(page 77), and Table 22.4(page 81), and

iii) Bulletin Nº 227-Volume II, percentages presented in column 3 of Table 3.4(page 21), Table 4.4(page 24), Table 5.4(page 27), Table 6.4(page 32), Table 7.4(page 35), Table 8.4(page 38), Table 9.4(page 41), Table 11.4(page 48), Table 17.4(page 58), Table 19.4(page 64), Table 20.4(page 68), and Table 22.4(page 73)

are not correct due to "*error in computer programming*". We apologize for the erratum and users are advised to calculate those percentages using the estimates.

2. On the same pages of the respective bulletins, "North South Gonder" should be read as "North Gonder", and "Bale and Borena" should be read as "Bale".

3. The total frequencies of honey production both for traditional and modern beehives indicated in Table 24 and Table 24.1 – Table 24.7 (Bulletin 227-Volume II, page 77-80), should be corrected by the averages of the frequencies given for zones in the respective regions.

PART III
SUMMARY OF THE SURVEY RESULTS

3.1 NATIONAL DISTRIBUTION OF LIVESTOCK, POULTRY AND BEEHIVES

The estimated number of livestock, poultry and beehives population of private holdings by type and sex is presented in Table 1.

Table 1. Number of *Livestock*, *Poultry* and *Beehives* Population by Type and Sex, for Private Holdings, NATIONAL*, 2000/'01 (1993 E.C).

Number in Thousands

TYPE AND SEX	MALE	FEMALE	TOTAL
Cattle	15869.99	19513.32	35383.31
Sheep	2914.86	8523.34	11438.20
Goats	2880.79	6740.10	9620.89
Horses	610.02	643.93	1253.95
Asses	1570.82	1843.88	3414.70
Mules	125.10	131.39	256.49
Camels	140.23	186.24	326.47
Poultry	-	-	37763.99
Beehives	-	-	3327.37

* Urban and Nomadic areas are not included.

As shown in this table, the female livestock population is higher than the male population for all species. The total number of cattle is the highest of all which is

estimated to be 35.38 million followed by sheep, 11.44 million. Among the draught animals, asses have a considerable share that amounts to 3.41 million. The total number of poultry population is estimated to be 37.76 million and the total number of beehives is 3.33 million.

The results of 2000/'01 Agricultural Sample Survey (AgSS) indicated an increment in the number of livestock compared to the results of the survey of the previous year. The detail data, Table 2, show an increase of 6.98, 4.45, 11.98, 9.58, 11.48, 17.88 and 24.41 percentage points in cattle, sheep, goats, horses, asses, mules and camels, respectively. The estimated number of poultry also increased significantly, by about 32 percent.

Note

*1. Some estimates represented by "***" in all reporting levels are excluded due to high coefficient of variation. However, they are incorporated in the total estimates. Hence, the sum of the specific estimates may not be equal to the total estimates.*

2. Users are also advised to use cautiously those estimates with 30-50% Coefficient of Variation (CV).

3. Zonal sums may not be equal to regional or national totals because of rounding.

4. In the tables "-" Indicates no data was reported.

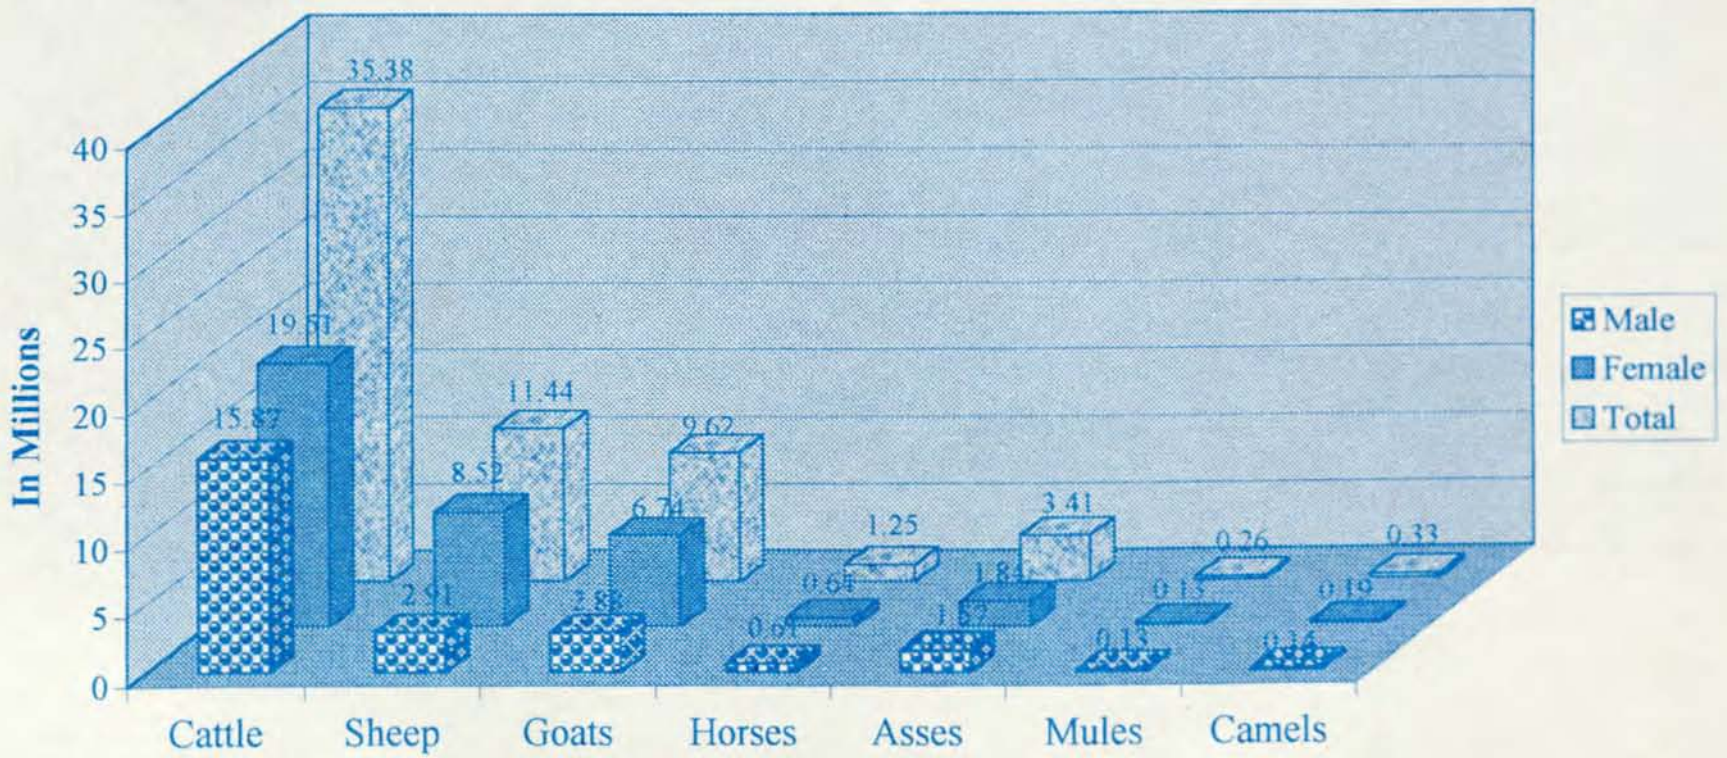

Table 2 Percentage Change in Number of LIVESTOCK, POULTRY and BEEHIVES Population in 2000/01(1993 E.C.) Compared to 1999/'00(1992 E.C.) for Private Holdings, **National***

FIG. 1 Number of Livestock by Sex, Private Holdings, 2000/'01(1993 E.C.)

3.2 REGIONAL AND ZONAL DISTRIBUTION

The distribution of livestock, poultry and beehives by regions and zones are given in Tables 3 to 11 and discussion for each species follows.

3.2.1 Cattle, Sheep and Goats

Cattle

The number of cattle by regions and zones is given in Table 3. As indicated in this table, the highest number of cattle was reported in Oromiya Region which is about 15.37 million followed by Amhara and S.N.N.P Regions which have reported about 9.12 million and 7.54 million, respectively.

Sheep

Table 4 presents sheep population by region and zones. Of the total estimated 11.44 million sheep, Oromiya Region has reported 4.41 million sheep followed by Amhara Region, which have reported 3.82 million while S.N.N.P. Region has reported 2.05 million sheep.

Goats

Table 5 presents the regional and zonal distribution of goat population. A significant number of goats are reported in Amhara and Oromiya regions, 2.96 and 2.86 million, respectively. Moreover, S.N.N.P. and Tigray regions have reported about 1.71 and 1.37 million goat population.

3.2.2 Draught Animals

Horses

The regional and zonal distribution of horses is given in Table 6. As shown in this table, the three regions, i.e. Oromiya, Amhara and S.N.N.P.R. constitute the majority of the total horse population of which Oromiya's contribution is the highest. Regions like Afar, Harari, and Dire Dawa did not report any horses.

Asses

As shown in Table 7, all regions except Gambela have reported asses. Regarding regional distribution, Oromiya and Amhara have reported 1.46 and 1.31 million asses, respectively. Moreover, Tigray and S.N.N.P regions have reported 316.88 and 212.53 thousand asses, respectively.

Mules

The regional and zonal distribution of horses is given in Table 8. Except Gambela and Dire Dawa all regions have reported mules and of the total mule population the larger share goes to Oromiya, Amhara and S.N.N.P regions.

Camels

Oromiya Region constitute about 40% of this year national estimate of which Borena zone has the highest share (91%) of the region. Somalie region has also reported the second highest number of camels, that is 91.51 thousand heads. Regions like S.N.N.P, Benshangule-Gumuz, and Addis- Ababa did not report any camels. See Table 9.

3.2.3 Poultry and Beehives

Poultry

During the survey period, data were also collected to estimate the total number of poultry at national, regional and zonal levels. As shown in Table 10, the total number of poultry population in the country for private holding is estimated to be about 37.76 million. Oromiya Region has the highest share of poultry population which is about 13 million. Amhara, S.N.N.P.R and Tigray regions are accounted for 11.95, 7.78 million and 3.70 million birds, respectively.

Beehives

The estimated number of total beehives, as shown in Table 11, in the country is about 3.33 million of which 3.30 million are traditional beehives. The regional distribution of traditional beehives shows Oromiya has the highest share followed by S.N.N.P.R and Amhara of the national estimate.

3.3 Distribution of Livestock by Age Group

The number and percentage distribution of cattle, sheep, and goats by sex and age group are presented in Tables 12 and 13. Out of the total cattle population, the female cattle constitute about 55% or about 19.5 million. Regarding age groups, about 63.46% of the total cattle are in the three years and under 10 years age category, with about 27.54% male and about 35.91% female.

TABLE 12 Number and Percentage Distribution of ***Cattle*** by Sex and Age, Private Holdings, National, 2000/'01(1993 E.C.)

Number in Thousands

Sex and Age Group	Cattle	
	Number	%
Male Total	15,869.99	44.85
Under 6 Months	1,597.22	4.51
6 Months & Under 1 year	1,255.87	3.55
1 year & Under 3 years	2,634.58	7.45
3 years & Under 10 years	9,745.12	27.54
10 years & over	637.20	1.80
Female Total	19,513.32	55.15
Under 6 Months	1,759.64	4.97
6 Months & Under 1 year	1,380.11	3.90
1 year & Under 3 years	3,146.76	8.89
3 years & Under 10 years	12,707.45	35.91
10 years & over	519.36	1.47
Total Cattle	35,383.31	100.00

In the case of sheep and goats, the largest share are in the age group of two years and over in the female population (48.38% and 42.78% in that order), while the

young stock under six months have the highest proportion (13.76% and 12.81%) for both the male sheep and male goat categories.

TABLE 13 Number and Percentage Distribution of ***Sheep*** and ***Goats*** by Sex and Age, Private Holdings, National, 2000/'01(1993 E.C.)

Number in Thousands

1 year & Under 2 years	730.12	6.38	669.22	6.96
2 years & over	5,533.94	48.38	4,115.45	42.78
Total Animals	11,438.20	100.00	9,620.88	100.00

Referring to Table 14, the number of horses and asses in the 3 years and over age group constitutes the greater portion compared to the other age group for both male and female populations. Regarding camels, the 4 years and over category constitutes about 71.47% of the total camel population. The proportion of male camels under four years is higher than the proportion of similar age female camels. See the details in Table 15.

3.4 Utilization of Livestock, Poultry and Beehives

3.4.1 Cattle

TABLE 16 *Cattle* Population Aged Three Years and Over and Under Ten Years by Sex and Purpose, Private Holdings, National, 2000/'01(1993 E.C.)

Number in Thousands

Sex and Purpose	Number	%
Male Cattle	9,745.12	100.00
For Draught	9,132.08	93.70
For Beef	142.09	1.46
For Others	470.95	4.83
Female Cattle	12,707.45	100.00
For Dairy	11,032.29	86.82
For Draught	99.84	0.79
For Beef	42.35	0.33
For Others	1,533.97	12.06

As indicated in Table 16, the number of dairy cows is estimated to be about 11.03 million of which 7.33 million are milking cows (see Table 17). Among cattle aged three years and under ten years, cattle used for draught purposes accounted for 41.12% and the percentage share of beef cattle is the lowest, 0.82%. Beef cattle here refer to all cattle reared exclusively for meat, for home consumption or for sale.

In Table 17, the regional and zonal distribution of cattle aged three years and over and under ten years are estimated by purpose, such as milking cows, dairy cows, draught cattle, beef cattle and cattle used for other purposes.

3.4.2 Sheep and Goats

Table 18 indicates the number and percentage of sheep and goats raised for different purposes at the national level. The percentage of sheep and goats kept for mutton and meat is significantly higher for males. Moreover, the data reveals that female sheep and goats are primarily kept for breeding purposes. Regional and zonal distribution of sheep by purpose are given in Table 19.

Table 20 presents the number and percentage distribution of goats aged two years and over used for different purposes at the regional and zonal level. Accordingly, goats kept for breeding accounts for about 85.72% while goats kept for meat accounts 7.10% out of the total.

3.4.3 Draught Animals

As shown in Table 21, among the total number of draught animals, the percentage of cattle is notably high, (86.10%), while asses are about 10.53% of the total. On the other hand, the percentage contribution of mules and camels is the least i.e. 0.36% and 0.19% of the total draught animals, respectively. Here, draught purposes refer to animals used for agricultural practices such as ploughing, threshing and transporting to and from the farm. Furthermore, Table 22 presents regional and zonal distribution of draught animal.

TABLE 21 Number and Percentage Distribution of ***Draught Animals*** by Type, Private Holdings, National, 2000/'01(1993 E.C.)

3.4.4 Poultry

The number and percentage distribution of poultry by kind at the national level is presented in Table 23. As shown in this table, the number of chicks is considerably high and accounts for about 49% of the total poultry, followed by laying hens and pullets which constitute about 23% and 9.74% of the total respectively. The total number of non-laying hens is the least of all kind that is only 3.77%.

TABLE 23 Number and Percentage Distribution of ***Poultry*** by Kind, Private Holdings, National, 2000/'01(1993 E.C.)

Number in Thousands

Poultry by Kind	Number	%
Cocks	3,160.95	8.37
Cockerels	2,389.72	6.33
Pullets	3.677.66	9.74
Laying hens	8.659.20	22.93
Non-laying hens	1,423.56	3.77
Chicks	18,452.90	48.86
Total Poultry	37,763.99	100.00

3.4.5 Beehives

Frequency of honey production (number of times honey produced within the survey year from a beehive) and total honey production are presented in Table 24.

Based on the survey results, the national frequency of honey production per year is 1.31 and 1.11 for traditional and modern beehives, respectively.

Moreover, the total honey produced in the country during the survey year is estimated to be about 11.94 thousand metric tones. The major honey producing regions are Oromiya with 3.27 thousand metric tones, S.N.N.P.R. with 3.23 thousand metric tones, Amhara with 3.22 thousand metric tones.

APPENDIX III

ESTIMATION PRECEDURES OF TOTALS, RATIO AND THEIR SAMPLING ERRORS

APPENDIX III. ESTIMATION PROCEDURES OF TOTAL, RATIO AND SAMPLING ERRORS

Estimator of Total

The estimator of stratum total , $\hat{Y}_h$, is given by:

$$\hat{Y}_h = \sum_{i=1}^{n_h} [\frac{M_h}{n_h M_{hi}} \frac{H_{hi}}{h_{hi}} \sum_{j=1}^{h_{hi}} y_{hij}] \qquad (1)$$

Where: M_h = Total number of households in stratum h obtained from the sampling frame

M_{hi} = Total number of households in EA i, stratum h obtained from the sampling frame

n_h = Sample number of EAs covered in stratum h

H_{hi} = Total number of listed agricultural households in EA i, stratum h

h_{hi} = Sample number of agricultural households successfully covered in EA i, stratum h

y_{hij} = The observed value of characteristic y from agricultural household j in EA i stratum h

Estimator of ratio:

Ratio estimator of characteristic y to characteristic x in stratum h is:

$$\hat{R}_h = \frac{\hat{Y}_h}{\hat{X}_h} \qquad (2)$$

Estimator of sampling error:

Estimator of the sampling variance of the stratum total estimate is:

$$v(\hat{Y}_h) = \frac{n_h}{n_h - 1} [\sum \left(\hat{Y}_{hi} - \frac{\hat{Y}_h}{n_h} \right)^2] \qquad (3)$$

Percentage coefficient of variation of stratum total estimate is:

$$CV(\hat{Y}_h) = \frac{\sqrt{v(\hat{Y}_h)}}{\hat{Y}_h} \times 100 \qquad (4)$$

The ninety-five percent confidence interval of stratum total estimate is:

$$\hat{Y}_h \pm 1.96 \times \sqrt{v(\hat{Y}_h)} \qquad (5)$$

Estimator of the sampling variance of the stratum ratio estimate is:

$$v(\hat{R}_h) = \frac{1}{\hat{X}_h^2}[v(\hat{Y}_h) + \hat{R}_h^2 v(\hat{X}_h) - 2\hat{R}_h \operatorname{cov}(\hat{X}_h, \hat{Y}_h)] \qquad (6)$$

Where: $\operatorname{cov}(\hat{Y}_h, \hat{X}_h) = \frac{n_h}{n_h - 1} \sum_{i=1}^{n_h} \left(\hat{Y}_{hi} - \frac{\hat{Y}_h}{n_h} \right) \left(\hat{X}_{hi} - \frac{\hat{X}_h}{n_h} \right)$

Percentage coefficient of variation and ninety-five percent confidence interval of ratio estimate may be estimated using equation (4) and equation (5), respectively.

APPENDIX IV

ESTIMATES, THEIR STANDARD ERRORS AND COEFFICIENT OF VARIATIONS AT NATIONAL AND REGIONAL LEVELS
