Introduction

This is the fourth report presenting the results of the retail prices survey conducted in rural areas.

The Central Statistical Authority (the then Central Statistical Office) launched the Rural Integrated Household Survey Programme (RIHSP) in 1980 with the objective of conducting of surveys on a wide range of subjects in rural areas. As part of this programme the Authority conducts monthly survey of retail and producers' prices in the rural areas and produces quarterly average prices.

The collection of rural prices started in May 1981 in selected Farmer's Association Areas in 12 regions, excluding Tigray and Eriterea.

The scope and coverage of the survey are constantly under review and necessary improvements are effected from year to year in the light of experience of the staff and in an effort to incorporate commodities mostly consumed in the area.

The present report covers the period September 1986 up to July 1987. The survey had been discontinued during August 1986 due to a training programme for supervisors and enumerators.

Objectives

Objectives of the collection of retail prices in rural areas are to:-

1. study the level of retail prices;
2. study the disparities between prices at various distribution levels;
3. study changes in the economy;
4. value own-produced household consumption items;
5. provide data for national accounting and preparation of retail price index for rural areas;

Scope and Coverage

Retail prices of selected agricultural and industrial products are collected from retail outlets in selected Farmer's Association Areas. The major groups of items covered include food, drinks, tobacco, household items, clothing, footwear, transport, communication, medical care, education, recreation, building materials and other goods and services. Producer's prices are collected for agricultural products only. The number of the selected Farmer's Associations vary from region to region and their distribution is given below.

Number of FA's in which Prices Survey was Conducted

<u>R e g i o n</u>	<u>1985/86</u> <u>(1978 E.C.)</u>	<u>1986/87*</u> <u>(1979 E.C.)</u>

T o t a l	487	730

* The total number of FA's was increased as of September 1986 (Meskerm 1979 E.C.)

Method of Data Collection

The retail prices were collected from major outlets in the selected Farmer's Association Areas or from adjacent areas where the households purchase most of the goods and services for consumption and other purposes. Although retail prices are usually collected from traders, in certain cases the prices were obtained from consumers at the time of purchase. For each item a maximum of three price quotations were collected from three different retailers. On the other hand, data on producer's prices were collected from farmers residing in area.

Prices are collected every month of the Ethiopian Calendar year. It should be noted, however, that the collection of prices is distributed throughout the month in accordance with the purchasing habits of consumers in the area.

Definition

Retail Price

A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

Symbols Used

N.A.:- data not available or doubtful.
