# I. Introduction

The Central Statistical Authority, (CSA), has been conducting the Rural Integrated Household Survey Program, (RIHSP), since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP, the Rural Price Survey, which covers both retail and producers' prices, is being conducted on a monthly basis since 1980 in selected Enumeration Areas, EAs, of the country.

This report provides information on average retail prices of goods and services in rural areas from May 1997 to August 1997 (Ginbot 1989 - Nehase 1989 E.C.) on the basis of the current administrative hierarchy, i.e., Kilil/regional states and group of zones. However, due to lack of adequate space to accommodate all Kilils in one page price data are presented in two parts.

Part I - Consists of Tigray, Afar, Amhara (and its group of zones) and Oromiya (and its group of zones).

Part II - Consists of Somali, Benshangul and Gumuz, Debub Hizboch [Southern Nations, Nationalities and Peoples, (S.N.N.P)] ( and its group of zones), Gambela, Harari, Dire Dawa, Addis Ababa and monthly national average.

Price data for Amhara, Oromiya and Debub Hizboch Kilils are presented according to their respective groups of contiguous zones<sup>1</sup> and Kilil average. For the remaining Kilils price data are presented by Kilil. Group of zones for Amhara, Oromiya and Debub Hizboch Kilils are given below:-

## Group of zones for Amhara Kilil

- 1 = North Gonder and South Gonder
- 2 = East Gojam, West Gojam and Agewawi
- 3 = North Welo and Wag Hamra
- 4 = South Welo, North Shewa and Oromiya zone

---

<sup>1</sup>Report for the three Kilils is provided in group of zones due to their relatively large area coverage as compared to others.

### Group of zones for Oromiya Kilil

- 1 = East Welega and West Welega
- 2 = Ilubabor and Jima
- 3 = North Shewa and West Shewa
- 4 = East Shewa, Arsi, Bale and Borena
- 5 = East Harerge and West Harerge

### Group of zones for Debub Hizboch Kilil

- 1= Yem, Keficho, Maji, Shekicho and Bench
- 2= North Omo, South Omo, Derashe and Konso
- 3 = Hadiya, Kembata and Gurage
- 4 = Sidama, Gedeo, Burji and Amaro

This twenty first issue updates Statistical Bulletin 175. Earlier issues on the same subject are Statistical Bulletins 37, 45, 57, 64, 83, 93, 96, 106, 107, 115, 117, 124, 138, 143, 151, 153, 157, 164, 167 and 175.

## **II. Objectives**

The objectives of the survey are to:-

- study the level of retail prices charged by retailers;
- study the disparities between prices charged at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct rural consumer price index.

## **III. Scope and Coverage**

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in an effort to incorporate commodities mostly consumed by the rural population. The geographic coverage of the survey was revised as of September 1988 to produce price reports in one Autonomous Region and 25 Administrative Regions. The geographical coverage was revised once again in

September 1995 and the present report is based on the current administrative hierarchy which is Killil (Regional States) and group of zones.

The major groups of items covered by the survey include food; drinks; cigarettes and tobacco; clothing and footwear; construction materials, water, and fuel and power; household equipment and durable household items; medical care; transport; personal care and effects; recreation, entertainment and reading and miscellaneous goods and services.

Information on retail prices of selected agricultural and industrial commodities is collected from retail outlets in the sample Enumeration Areas, (EAs). The allocation of EAs to the regions takes into account the population size of the regions/stratum and cost consideration. The number of EAs in each region has been considered to be a reasonable minimum size to provide meaningful estimates at regional/ reporting levels.

In three killils; Amhara, Oromiya and Debub Hizboch; group of zones were treated as strata/reporting level of the survey results. In the remaining regions the reporting levels were the regions themselves.

A total of 705 EAs in the country were planned to be covered by the survey. However, 4 of the sampled EAs were closed due to various reasons and the survey covered 701 EAs successfully. The distribution of EAs sampled and actually covered by stratum or reporting level is given in Table A.

## IV. Method of Data Collection

Each month of the Ethiopian Calendar (September to August) data collection staff of the CSA attempt to collect prices in retail markets for a list of about 500 items with the use of kitchen balance and measuring tape in the selected EAs or from adjacent market places where households purchase most of the goods and services for consumption and other purposes. For each item on the price list the data collector is expected to get a maximum of three prices from three different retailers or shops in the local market places.

As the enumerators are stationed nearby the market outlets, it is believed that they are familiar with the market places where various items can be purchased. If one retailer or shop does not have the items, they continue searching until they find one that does. Although price is collected from traders, in some cases it is also obtained from consumer at the time of purchase. Retail price data is mainly collected on market days throughout the reference month considering the work load of the enumerators and in accordance with the purchasing habits of consumers in the selected EAs.

Since an interview method of data collection is utilized rather than an actual purchase and recording of price, it may result, in some instance, in exaggeration or under estimation of prices. However, as stated above, since enumerators are permanently assigned to each sample EA and reside there, they have a good chance of familiarizing themselves and be on friendly terms with retailers and owners of economic establishments the result of which is a reasonably reliable price information over time.

## V. Definitions

- **Retail Price:** A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.
- **Enumeration Area:** An Enumeration Area in rural areas is a locality that is less than or equal to a farmer's association area and mostly consists of about 150-200 households.
- **Farmers' Association:-** It is the lowest administrative unit in a settled rural area with its own jurisdiction. It is an association of rural dwellers formed by the inhabitants of a given area whose members are engaged either in agricultural or non-agricultural activities.

## VI. Note

1. The minimum that the balance can weigh is 10 grams. Thus items which are sold in small quantities and whose weight fall under 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the price of these items in some respect.
2. The average column is a simple arithmetic average prices for each item.
3. The symbol "-" is used for data not available or doubtful.
