# I. Introduction

The Central Statistical Authority, (CSA), has been conducting the Rural Integrated Household Survey Program, (RIHSP), since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP, the Rural Price Survey, which covers both retail and producers' prices, is being conducted on a monthly basis since 1980 in selected Enumeration Areas, EAs, of the country.

This report provides information on average retail prices of goods and services in rural areas for June and July 1996 (Sene 1988 - Hamle 1988 E.C.) and annual average retail prices (September 1995 - July 1996) on the basis of the current administrative hierarchy, i.e., Killil/regional states and group of zones. Tables 1 and 2 show that price data for June 1996 and July 1996, in that order, while Table 3 shows annual average retail price information. However, due to lack of adequate space to accommodate all Killils in one page the price data of the Killils reports are presented in two parts.

Part I - Consists of Tigray, Afar, Amhara (and its group of zones) and Oromiya (and its group of zones).

Part II - Consists of Somali, Benshangul and Gumuz, Debub Hizboch [Southern Nations, Nationalities and Peoples, (S.N.N.P)] ( and its group of zones), Gambela, Harari, Dire Dawa, Addis Ababa and monthly national average.

Price data for Amhara, Oromiya and Debub Hizboch Killils are presented according to their respective groups of contiguous zones[1] and Killil average. For the remaining Killils price data are presented by Killil. Group of zones for Amhara, Oromiya and Debub Hizboch Killils are given below:-

[1] Report for the three Killils is provided in group of zones due to their relatively large area coverage as compared to others.

Group of zones for Amhara Killil

1 = North and South Gonder

2 = East Gojam, West Gojam and Agewawi

3 = North Welo and Wag Hamra

4 = South Welo, North Shewa and Oromiya zone

Group of zones for Oromiya Killil

1 = East and West Welega

2 = Ilubabor and Jima

3 = North and West Shewa

4 = East Shewa, Arsi, Bale and Borena

5 = East and West Hararge

Group of zones for Debub Hizboch Killil

1= Yem, Keficho, Maji, Shekicho and Bench

2= North and South Omo, Derashe and Konso

3 = Hadiya, Kembata and Gurage

4 = Sidama, Gedeo, Burji and Amaro

This eighteenth issue updates Statistical Bulletin 157. Earlier issues on the same subject are Statistical Bulletins 37, 45, 57, 64, 83, 93, 96, 106, 107, 115, 117, 124, 138, 143, 151, 153 and 157.

# II. Objectives

The objectives of the survey are to:-

- study the level of retail prices charged by retailers;
- study the disparities between prices charged at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct rural consumer price index.

# III. Scope and Coverage

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in an effort to incorporate commodities mostly consumed by the rural population. The geographic coverage of the survey was revised as of September 1988 to produce price reports in one Autonomous Region and 25 Administrative Regions. The geographical coverage was revised once again in September 1995 and the present report is based on the current administrative hierarchy which is killil (Regional States) and group of zones.

The major groups of items covered by the survey include food, drinks, tobacco and stimulants, household equipments, clothing, footwear, energy, medical care, personal care and effects, education, recreation, building materials and other goods and services.

Information on retail prices of selected agricultural and industrial commodities is collected from retail outlets in the sample Enumeration Areas, (EAs). The allocation of EAs to the regions takes into account the population size of the regions/stratum and cost consideration. The number of EAs in each region has been considered to be a reasonable minimum size to provide meaningful estimates at regional/ reporting levels.

In three killils; Amhara, Oromiya and Debub Hizboch; group of zones were treated as strata/reporting level of the survey results. In the remaining regions the reporting levels were the regions themselves.

A total of 620 EAs (1.1% of the total Number of EAs) in the country were planned to be covered by the survey. However, 11 of the sampled EAs were closed due to various reasons and the survey covered 609 EAs successfully in June 1996. In July 1996 the survey was conducted by supervisors, due to the re-allocation of enumerators to the Afar Region to conduct Population and Housing Census. Hence, the number of EAs covered in the survey was reduced to 240. As field personnel took their annual leave and yearly training is usually conducted in August 1996, data for this month has not been collected. The distribution of EAs sampled and actually covered by stratum or reporting level is given in the Table A.

Table A: Number of Sampled and Actually Covered EAs in the Survey by Killil

# IV. Method of Data Collection

Each month of the Ethiopian Calendar (September to August) data collection staff of the CSA attempt to collect prices in retail markets for a list of about 500 items with the use of kitchen balance and measuring tape in the selected EAs or from adjacent market places where households purchase most of the goods and services for consumption and other purposes. For each item on the price list the data collector is expected to get a maximum of three prices from three different retailers or shops in the local market places.

As the enumerators are stationed nearby the market outlets, it is believed that they are familiar with the market places where various items can be purchased. If one retailer or shop does not have the items, they continue searching until they find one that does. Although price is collected from traders, in some cases it is also obtained from consumer at the time of purchase. Retail price data is mainly collected on market days throughout the reference month considering the work load of the enumerators and in accordance with the purchasing habits of consumers in the selected EAs.

Since an interview method of data collection is utilized rather than an actual purchase and recording of price, it may result, in some instance, in exaggeration or under estimation of prices. However, as stated above, since enumerators are permanently assigned to each sample EA and reside there, they have a good chance of familiarizing themselves and be on friendly terms with retailers and owners of economic establishments the result of which is a reasonably reliable and accurate price information over time.

# V. Definitions

- **Retail Price**: A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

- **Enumeration Area:** An Enumeration Area in rural areas is a locality that is less than or equal to a farmer's association area and mostly consists of about 150-200 households.
- **Farmers' Association:-** It is the lowest administrative unit in a settled rural area with its own jurisdiction. It is an association of rural dwellers formed by the inhabitants of a given area whose members are engaged either in agricultural or non-agricultural activities.

# VI. Note

1. The minimum that the balance can weigh is 10 grams. Thus items which are sold in small quantities and whose weight fall under 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the price of these items in some respect.

2. The average column is a simple arithmetic average prices for each item.

3. The symbol "-" is used for data not available or doubtful.
