I. Introduction

The Central Statistical Authority, CSA, has been conducting the Rural Integrated Household Survey Program, RIHSP, since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP the rural price survey, which covers both retail and producers' prices, is being conducted on a monthly basis since May 1981 in selected Farmer Associations, FAs, (currently Enumeration Areas, EAs) of the country.

In an effort to fulfill data users demand the CSA, provides price data at zone level since September 1997. Hence, this report provides information on monthly average producers' prices of agricultural products from May 1998 to August 1998 and annual average producer's price in rural areas from September 1997 to August 1998 (Meskerem 1990 – Nehase 1990 E.C.) on the basis of the current administrative hierarchy, i.e., Killil/regional states and zones. Due to lack of adequate space to accommodate all zones and killils in one page the price data of the zones and killils are presented in six parts.

Part I - Consists of monthly and annual average producer's price of Tigray killil (and its zones, i.e., Mirabawi Tigray, Mehakelegnaw Tigray, Misrakawi Tigray and Debubawi Tigray) and Affar Killil (and its zones, i.e., zone 1, zone 3 and zone 5).

Part II - Consists of monthly and annual average producer's price of Amhara killil (and its zones i.e., Semen Gondar, Debub Gondar, Semen Wello, Debub Wello, Semen Shewa, Misrak Gojam, Mirab Gojam, Wag Hemra, Agew Awi and Oromiya).

Part III - Consists of monthly and annual average producer's price of Oromiya killil (and its zones i.e., Mirab Wellega, Misrak Wellega, Illubabor, Jimma, Mirab Shewa, Semen Shewa, Misrak Shewa, Arssi, Mirab Harerge, Misrak Harerge, Bale and Borena).

Part IV - Consists of monthly and annual average producer's price of Somali killil (and its zones i.e., Shinile, Jigjiga and Liben) and Benishangul-Gumuz Killil (and its zones i.e., Metekel, Asosa and Kamashi).

Part V - Consists of monthly and annual average producer's price of Southern Nations, Nationalities and Peoples, SNNP, killil (and its zones and special weredas i.e., Gurage, Hadiya, Kembata-Alaba-Tembaro, Sidama, Gedeo, Semen Omo, Debub Omo, Keficho-Shekicho, Bench-Maji, Yem special wereda, Amaro special wereda, Burji special wereda, Konso special wereda and Dirashe special wereda).

Part VI - Consists of monthly and annual average producer's price of Gambella killil (and its zones i.e., zone 1, zone 2 and zone 4), Harari killil, Addis Ababa (and its zones i.e., zone 3 and zone 6), Dire Dawa and national average.

This twenty first issue updates Statistical Bulletin 190. Earlier issues on the same subject are Statistical Bulletins 44, 59, 65, 85, 95, 105, 116, 122, 137, 142,148, 149 155, 162, 166, 173, 176, 181, 188 and 190.

II. Objectives

The objectives of the survey are to:

- help policy makers take decisions on production and distribution of agricultural products;
- study the level of producers' price of agricultural products charged by farmers;
- study the disparities between prices at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct producers' price indices and volume of production with respect to agricultural commodities.

III. Scope and Coverage

The scope and coverage of the agricultural producers' price survey are constantly under review and necessary improvements are effected from time to time in an effort to incorporate commodities mostly produced by farm holders. Hence, the survey currently covers about 99 selected agricultural products in about 1,300 Enumeration Areas at country level as compared to 65 products in 361 Farmers' Association Areas in May 1981.

The major groups of agricultural items covered by the survey include cereals, pulses, oil seeds, vegetables and fruits, meat, dairy products and eggs, spices, livestock, draught animals, hides and skins and other food items.

Although,about 1,380 EAs were planned to be covered at country level the number of EAs covered fluctuates from month to month. However, the number of EAs in August 1998 is smaller than the previous months since some of the field staffs were on annual leave. The distribution of planned and actually covered EAs are given in Table A.

IV. Method of Data Collection

Agricultural producers' price is collected from farm households or producers' cooperatives in the selected EAs for each month of the Ethiopian Calendar year, (September to August). For each agricultural products a maximum of three quantity and price quotations are collected from three different farmers using Kitchen balance to measure quantities sold. However, it should be noted that information on producers' price is collected from a farmer or producer who sold the output of his agricultural holding during the survey month. The data collection of producers' price is distributed throughout the month considering the work load of the enumerator and the selling habits of the farmers.

Table A: Distribution of Planned and Actually Covered EAs by Killil and Zone

V. Definitions

- **Producers' price:** Agricultural producers' price is defined as the price of the transaction carried out by the farmer at the first point of sale for a clearly specified agricultural commodity. In most cases this price may not correspond to the farm-gate price as the farmer sells his product at a place outside his farm.

- **Enumeration Area:** Enumeration Area in rural areas is a locality that is less than or equal to farmer's association areas and mostly consists of about 150-200 households.

- **Farmers' Association:-** It is the lowest administrative unit in a settled rural area with its own jurisdiction. It is an association of rural dwellers formed by the inhabitants of a given area whose members are engaged either in agricultural or non-agricultural activities.

VI Note

- The average column is a simple arithmetic average price for each item.

- The symbol "-" is used for data not available or doubtful.
