I. Introduction

The Central Statistical Authority (CSA) has been conducting the Rural Integrated Household Survey Program (RIHSP) since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP the Rural Price Survey, which covers both retail and producers' prices, is being conducted on a monthly basis since 1980 in selected Farmer Associations (FAs) of the country.

This report provides information on average Retail Prices of Goods and Services in Rural Area for the period of September 1995 to November 1995 (Meskerem 1988 - Hidar 1988 E.C.) on the basis of the current administrative hierarchy, i.e. Killil/regional states and group of Zones. Due to lack of adequate space to accommodate all killils in one page the price data of the killils are presented in two parts.

Part I - Consists of Tigray, Afar, Amhara (and its group of zones) and Oromiya (and its group of zones).

Part II - Consists of Somali, Beni-Shangul and Gumz, Debub Ethiopia, [Southern Nations, Nationalities and Peoples, (S.N.N.P)] (and its group of zones), Gambela, Harari, Dire Dawa and Addis Ababa.

Price data for Amhara, Oromiya and Debub Ethiopia killils are presented according to their respective group of zones¹ and killil average. For the remaining killils price data are presented by killil. Group of zones for Amhara, Oromiya and Debub Ethiopia killils are given below:-

¹ Report for the three Killils is provided in group of zones due to their relatively large area coverage as compared to others.

Group of zones for Amhara Killil

- 1 = North and South Gonder
- 2 = East Gojam, West Gojam and Agewawi
- 3 = North Welo and Wag Hamra
- 4 = South Welo, North Shewa and Oromiya zone

Group of zones for Oromiya Killil

- 1 = East and West Welega
- 2 = Ilubabor and Jima
- 3 = North and West Shewa
- 4 = East Shewa, Arsi, Bale and Borena
- 5 = East and West Hararge

Group of zones for Debub Ethiopia Killil

- 1= Yem, Keficho, Maji, Shekicho and Bench
- 2= North and South Omo, Derashe and Konso
- 3 = Hadiya, Kembata and Gurage
- 4 = Sidama, Gedeo, Burji and Amaro

II. Objectives

The objectives of the survey are to:-

- study the level of retail prices charged by retailers;
- study the disparities between prices charged at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct rural consumer price index.

III. Scope, Coverage and Sample Design

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in the light of staff experience and in an effort to incorporate commodities mostly consumed in the rural area.

The major groups of items covered by the survey include food, drinks, tobacco and stimulants, household equipment, clothing, footwear, energy, medical care, personal care and effects, education, recreation, building materials and other goods and services.

A two-stage stratified sample design was used for the 1995/96 (1988 E.C.) price survey. In three Killils, namely Amhara, Oromiya and Debub Ethiopia groups of contiguous zones were treated as strata/reporting levels of the survey results. In the remaining regions, the reporting levels were the regions themselves. The primary sampling units in all strata were Enumeration Areas, (EAs).

A fixed number of sample EAs was determined for each stratum/reporting level based on population size of the stratum and cost considerations. The overall sample number of EAs in a stratum was proportionately allocated to Zones/Special Weredas within the stratum to their population size. From within each stratum sample EAs were selected with probability proportional to size, size being the total number of households of the EAs as obtained from the 1994 census map work. Information on retail prices of selected agricultural and industrial products is collected from retail outlets/markets in the sample EAs or from markets in the adjacent EAs if there is no market areas in the selected EA.

A total of 620 EAs (1.1% of the total number of agricultural EAs) in the country were planned to be covered by the survey. But 12 of the sampled EAs were closed due to various reasons and the survey covered 608 EAs successfully. Area coverage of the survey, for the period under study, and distribution of EAs sampled and actually covered by stratum/reporting level are given in Table A and Table B respectively.

Table A: Areal coverage of the 1995/96 (1988 E.C.) price survey

¹ Four out five zones in Tigray have rural settled population. The remaining zone consists of only urbanites.

² Only three zones have significant rural sedentary population in Afar.

³ Only two zones in Addis Ababa have rural settled population. In the remaining four zones the entire population are urbanites.

IV. Method of Data Collection

Each month of the Ethiopian Calendar (September to August) data collection staff of the CSA attempt to collect prices in retail markets for a list of about 500 items in the selected EAs or from adjacent market places where households purchase most of the goods and services for consumption and other purposes. For each item on the price list the data collector is expected to get a maximum of three prices from three different retailers or shops in the local market places.

Enumerators are familiar with the market places and where various items can be purchased. If one retailer or shop does not have the items, they continue searching until they find one that does. Although price is collected from traders, in some cases price is obtained from consumer at the time of purchase. Retail price data is mainly collected on market days throughout the reference month considering the work load of the enumerators and in accordance with the purchasing habits of consumers in the selected EAs.

Since an interview method of data collection is utilized rather than an actual purchase and recording of price, it may result, in some instance, in exaggeration or under estimation of prices. However, since enumerators were permanently assigned to each sample EA and reside there, they have a good chance of familiarizing themselves and be on friendly terms with retailers and owners of economic establishments the result of which is a reasonably reliable and accurate information over time.

V. Definitions

- **Retail Price:** A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.
- **Enumeration Area:** Enumeration Area in rural areas is a locality that is less than or equal to farmer's association areas and mostly consists of about 150-200 households.

VI. Note

1. The average column is a simple arithmetic average prices for each item.
2. The minimum that the balance can weigh is 10 grams. Thus items which are sold in small quantities and whose weight fall under 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the price of these items in some respect.
3. The symbol "N.A." is used for data not available or doubtful.
