1. INTRODUCTION

International trade is the exchange of goods and services between nations. It enables a nation to specialize in those goods it can produce most cheaply and efficiently. Trade also enables a country to consume more than it would be able to produce, if it depended only on its own resources. Moreover, trade enlarges the potential market for the goods of a particular economy. The increased international demand for goods translates into greater production and more extensive use of raw materials and labour, which in turn leads to growth in domestic employment. Competition from international trade can also force domestic firms to become more efficient through modernization and innovation. Since the beginnings of international trade, nations have striven to achieve and maintain a favourable balance of trade – that is, to export more than they import. Trade has always been the major force behind the economic relations among nations.

In view of this vital role international trade plays in the economic development of a country, and the overall responsibility of the Central Statistical Authority (CSA) to provide a convenient statistical reference in all fields of statistics, the Authority found it imperative to carry on the publication of data pertaining to Ethiopia's international trade. International trade statistics are a good starting point for market research, as they provide an overview of present imports and exports (expressed in quantities and in values) as well as trends, broken down by product and country. Furthermore, analysis of trade flows allows a smooth shift of focus from national markets to regional grouping, or even towards a global view.

For exporters/importers, an analysis of international trade statistics is important in particular, for:

- pre-selecting new export markets (market screening),
- scanning new sources of import supply,
- analyzing trends in international demand and in the target country and,
- assessing competition with exporters or importers from other countries.

For trade promotion organizations, international trade statistics are useful for:

- developing national trade development strategies and programs,
- monitoring national trade performance,
- identifying priority products and markets for special trade promotion activities, such as, market prospect missions, trade fair participation, and market studies and,
- as an element of trade information services.

Therefore, the purpose of this publication is to assist the user of international trade statistics in making the most of the data at hand. In this respect eight selected tables are presented. The types of data captured among others include: trade balances (export less import), quantity and value of exports by commodity and destination, import of commodities by type, quantity, country of origin and end use. These data are expected to meet most of the demands by users of international trade data.

Methodological Issues

These tables are compiled from customs data, using Eurotrace System, a software specially designed for foreign trade and developed by Eurostat. The Harmonized System (HS) trade classification and guidelines set by the United Nations Statistical Office are put to practice in these tables. As regards valuation, generally imports are valued c.i.f., i.e. the value at which the goods were purchased plus the cost of transportation and insurance. Exports are valued at free on board (f.o.b.) at the frontier of the country. This is the value at which the goods were sold by exporter, including transportation and insurance, to bring the goods onto the transporting vehicle at the frontier of the country.

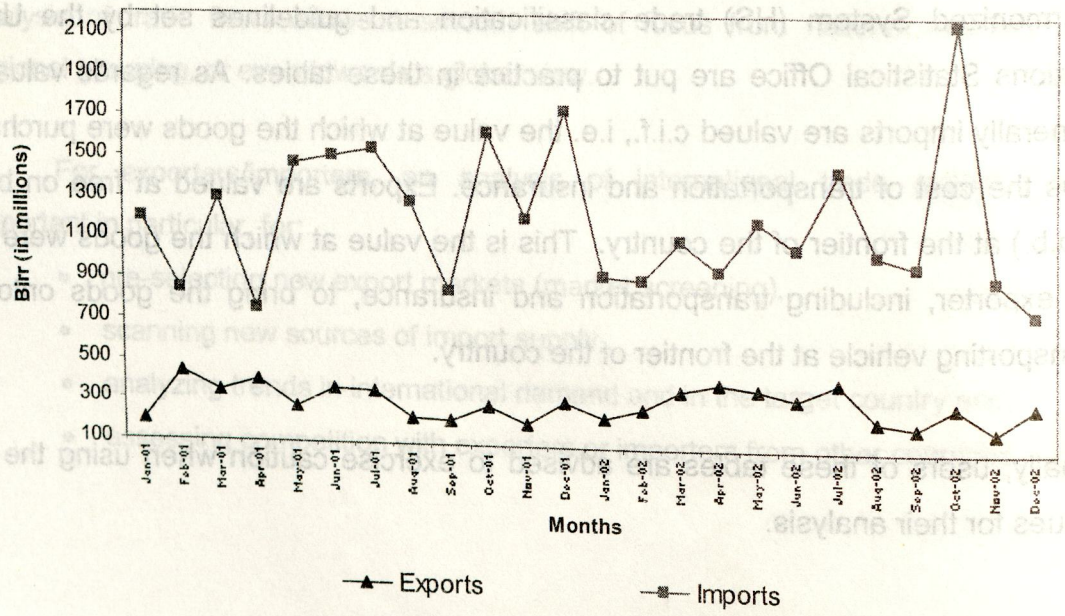
Finally, users of these tables are advised to exercise caution when using the unit values for their analysis.

SUMMARY OF THE MAJOR RESULTS

2.1 Summary of Trade Balance, 2001 – 2002

Table 1 refers to data on trade balance for the years 2001 and 2002. As the data reveal, in 2001, the country exported goods worth Birr 3,658.7 million while it imported goods worth Birr 15,347.4 million. In 2002, the country earned Birr 3,849.6 million from exported goods, a rise of 5.2 percent, while value of imports were worth Birr 13,566.5 million, a decline of 11.6 percent against a year before. Details depict that, monthly exports and imports and subsequently the balance showed fluctuation in both years (see chart below). Export values in February (442.8 million) and April (399.4 million) in 2001 and July (433.8 million) and April (421.0 million) in 2002 were the top ones. Similarly, December (1736.3 million) and October (1627.6 million) for 2001 and October (2158.8 million) and July (1451.2 million) in 2002 registered the highest import values. Overall, imports values were 4.2 and 3.5 times more than exports in 2001 and 2002, respectively. This resulted in a trade deficit to the tune of Birr 11.7 billion and 9.7 billion in 2001 and 2002, respectively. This indicates that the trade deficit at current price has showed a decrease of 17.1 percent over the previous year.

Fig. 1 Monthly Imports and Exports in 2001 and 2002



2.2 Quantity and Value of Imports and Exports by Commodity Section, 2001 – 2002

Table 2, refers to data on quantity and value of imports and exports in the years 2001 and 2002, classified by commodity sections. As shown in this table, in both years, comparatively higher income was gained from export items grouped in section II, VIII and XIV, respectively. These are vegetable products (including coffee), raw-hides and skins and precious stones, in that order. In 2002 a big jump (from Birr 17.1 million to Birr 184.6 million) was observed in the export of items grouped under section IV, i.e., prepared foodstuffs. Overall in the year 2002, value of export commodities in the above sections showed fluctuations, compared to a year before. Nevertheless, total export quantity and values showed an increase of 74.0 and 5.2 percent, respectively. The increase in quantity was mainly due to coffee, i.e. more was sent to the world market, but it didn't exhibit a proportional increase in the earnings.

Regarding imports, in both years, the leading import items were those clustered in section V, XVI, XVII and VI, except for section V, which showed a change of position in 2002. These refer to mineral products, machinery and mechanical appliances, vehicles and chemical products.

2.3 Quantity and Value of Major Export Commodities by Destination, 2001 - 2002

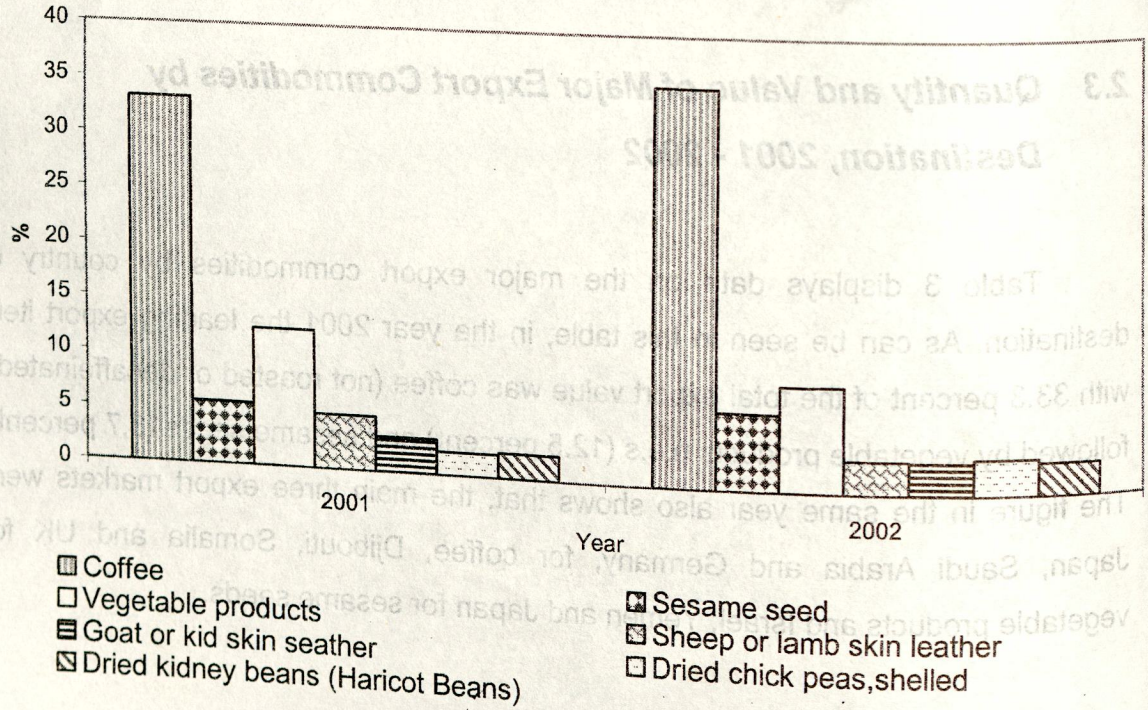
Table 3 displays data on the major export commodities by country of destination. As can be seen in this table, in the year 2001 the leading export item with 33.3 percent of the total export value was coffee (not roasted or decaffeinated), followed by vegetable products n.e.s (12.5 percent) and sesame seeds (5.7 percent). The figure in the same year also shows that, the main three export markets were Japan, Saudi Arabia and Germany, for coffee, Djibouti, Somalia and UK for vegetable products and Israel, Yemen and Japan for sesame seeds.

Similarly in 2002, coffee with 35.5 percent of the total export value was the leading export item (a chart is provided below). The main markets for this item in the year 2002 were Germany, Japan, and Saudi Arabia, respectively. The second and third major export commodities in the stated period were vegetable products, having 9.5 percent and sesame seeds having 7.0 percent share of the total export value. Djibouti, Somalia, and UK for vegetable products and Israel, Turkey and Egypt for sesame seeds were the main export destinations.

The country's major export item, coffee, showed a slight increase in 2002, compared to a year before. A small drop was recorded on export of vegetable products, while insignificant increment was observed on sesame seeds. On the other hand, in the same year, the traditional export item, sheep or lamb skin leather, left its place to the new comer, raw cane sugar. In 2002 the country earned Birr 175.2 million, or 4.6 percent of the total export from sugar export. The major buyers of this product were Djibouti and Portugal.

During the stated period, the percentage share of major export commodities to the total export increased from 81.9 percent in 2001 to 83.0 percent in 2002.

Fig 2. Major Export Commodities in 2001 and 2002



2.4 *Trade Balance by Partners, 2001 - 2002*

Trade balance of the country, by continents is presented in Table 4. In 2001, Ethiopia had a positive trade balance only with Africa, amounting to Birr 142.4 million, while the following year it recorded a negative trade balance amounting to Birr 23.0 million. Among African countries, Djibouti, Somalia, and Egypt, in that order, were the major export destinations in both years. On the other hand, Egypt, South Africa and Kenya in 2001 and Egypt, Djibouti and Kenya in 2002 were the major exporters to the country, respectively.

Eventhough Ethiopia had a negative trade balance with Europe, compared with other continents it was the biggest market, in value terms, for Ethiopia's exports, during the period under discussion. From this continent, in both years, Germany, Italy, and Switzerland, with alternating positions, were the top importers from the country, while Italy, Germany, and UK, also with changing positions between them, were the major exporters to the country.

In the American continent there was no noticeable market for Ethiopia's exports except the United States and Canada. Besides, these two countries were the main exporters to the country during the same period. The country registered a negative trade balance with the continent amounting to Birr 1637.5 million and 1228.2 million in 2001 and 2002, respectively.

Among the continents, Asia was the principal exporter to Ethiopia in the periods under discussion. In 2001 it headed all the other continents exporting to Ethiopia. In the year 2002, it was the major export market for the country's merchandise which was second only to Europe. In both years, Japan, Saudi Arabia, and Israel were the main export markets for the country from the continent. On the other hand, Saudi Arabia, China and Yemen in 2001, Japan, China and Saudi Arabia in 2002 were the top exporters to Ethiopia. The country had a negative trade balance of Birr 6446.6 million in 2001 and 6529.9 million in 2002, with the continent.

Oceania was the smallest import and export market for the country in the periods under discussion. The continent exhibited a positive trade balance of Birr 60.2 million in 2001 and 26.0 million in 2002. From this continent, Australia and New Zealand were the only two countries that had a meaningful volume of trade with Ethiopia, in both years.

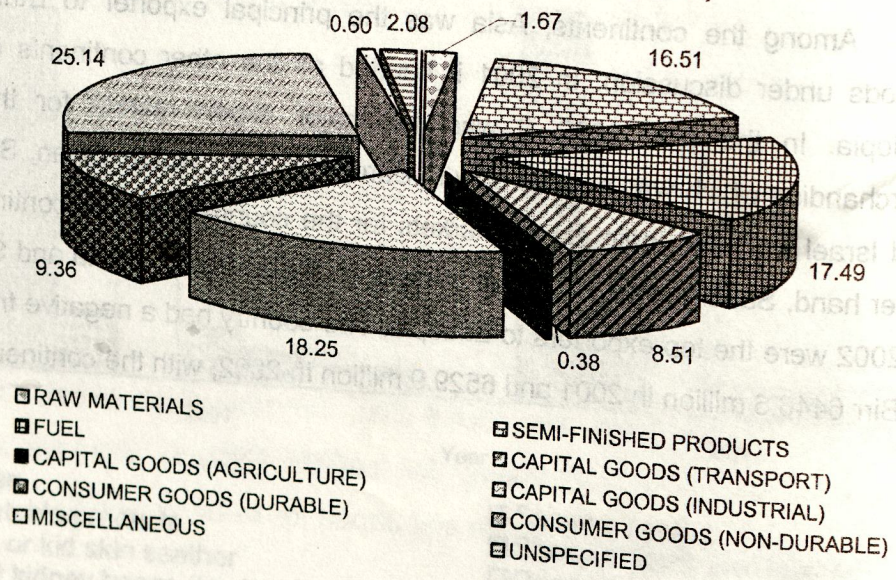
2.5 Quantity and Value of Exports and Imports by Commodity Group, Destination and Origin, 2001 - 2002

Table 5 and 6 present data on exports and Imports by commodity group, origin, and destination for 2001 and 2002 in a more detailed way and complemented by unit value calculations. However users are advised to use the unit value figures with caution, as they are unit values of heterogeneous products, and for those products which are better depicted by other unit of measurements other than kg, the unit values are of less value.

2.6 Imports by End Use, 2001 – 2002

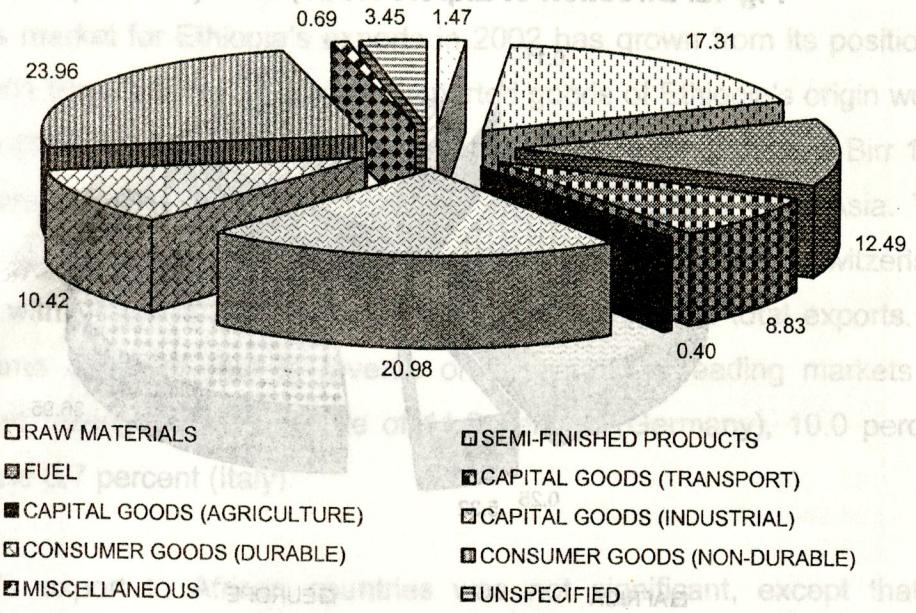
Table 7 presents data on end use of imports, i.e., it shows the final use of import commodities, and how much was spent on them. As can be inferred from the table, in 2001, the share of non-durable consumer goods, industrial capital goods and fuel was 25.1 percent, 18.2 percent and 17.5 percent of the total imports, in that order (see Fig 3a).

Fig 3a. Imports by End Use, 2001 (Percent)



Similarly in 2002, about 24.0 percent of imports were non-durable consumer goods, followed by industrial capital goods (21.0 percent) and semi-finished products (17.3 percent). This indicates that, non-durable consumer goods and industrial capital goods were the dominant imported items in both years (see Fig 3b).

Fig 3b. Imports by End Use, 2002 (Percent)



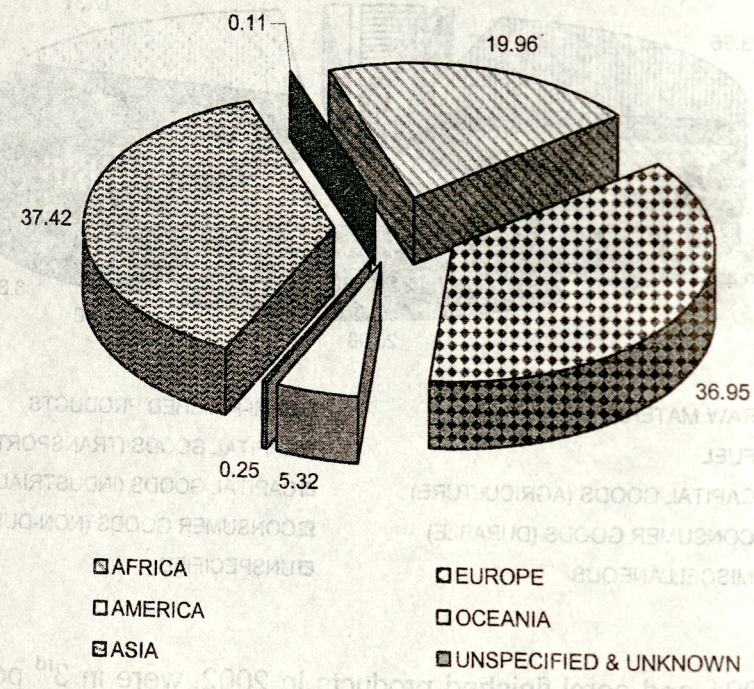
Fuel in 2001 and semi-finished products in 2002, were in 3rd position among imported items. On the other hand, compared to the year 2001, the share of imported non–durable consumer goods and fuel decreased by 4.4 percent and 28.6 percent, while the share of industrial capital goods increased by 14.8 percent in 2002.

As in the previous years, the country spent sizable amount of money in non-durable consumables, than other goods, like agricultural machinery or inputs. For example, in both years tractors took 0.1 percent of imports while the share of textile fabrics and clothing was 5.0 percent in 2001 and 6.3 percent in the following year. Similarly the share of fertilizers manufactured (of the total import values) was 2.5 and 4.2 percent in 2001 and 2002, respectively.

2.7 Direction of Export Trade, 2001 – 2002

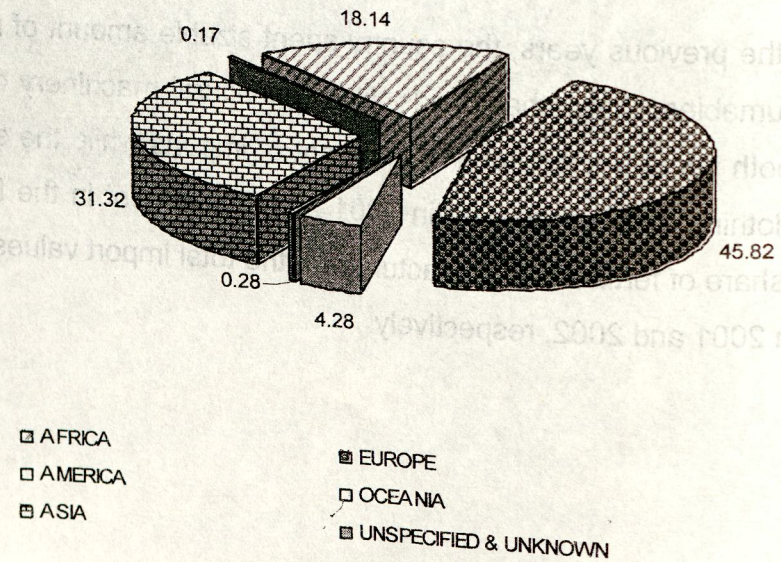
Table 8 displays data, on the amount of out-flow of goods to different countries in 2001 and 2002. As can be seen in the table, in 2001, 37.4 percent of exports went to Asia, 37.0 percent to Europe, 20.0 percent to Africa, 5.3 percent to America and the rest 0.3 percent to Oceania (see chart below).

Fig 4a. Direction of Export Trade, 2001 (Percent)



Comparative figures for 2002 show that 45.8 percent of exports went to Europe, 31.3 percent to Asia, 18.1 percent to Africa 4.3 percent to America and 0.3 percent to Oceania and the rest to unspecified destination (refer to chart below).

Fig 4b. Direction of Export Trade, 2002 (Percent)



Exports to Asia have fallen from 37.4 percent of the total in 2001, to 31.3 percent in 2002, showing a decline of 16.3 percent, leaving the leading position to Europe. In both years, Japan, Saudi Arabia and Israel were the three biggest markets for Ethiopia's exports from the continent, taking 9.1, 8.9 and 5.6 percent of total exports in 2001 and 8.3, 6.2, and 3.3 percent in 2002, in that order.

Europe's market for Ethiopia's exports in 2002 has grown from its position a year ago. In 2001 the continent as a whole imported goods of Ethiopia's origin worth Birr 1.35 billion (37.0 percent) while the corresponding figure for 2002 was Birr 1.76 billion (45.8 percent), taking the first place for Ethiopia's export from Asia. The biggest buyers of Ethiopia's goods in the continent, in 2001, were Italy, Switzerland and Germany, with market share of 10.1, 7.8 and 6.6 percent of total exports. In 2002 these same countries, but in reverse order, were the leading markets for Ethiopia's export having a market share of 11.0 percent (Germany), 10.0 percent (Switzerland) and 8.7 percent (Italy).

Ethiopia's export to African countries was not significant, except that of neighboring Djibouti and Somalia, which was 14.7 and 3.2 percent of total exports in 2001 and 13.3 and 1.9 percent in 2002, respectively. This shows the decline of the market share, which resulted in the decrease of the overall export to Africa in 2002 compared with the previous year. Ethiopia's trade with COMESA member countries is negligible except for Djibouti, the trade balance being in favor of Ethiopia.

From the American continent only the USA stand out as a significant market for Ethiopia's exports, which had imported goods worth Birr 165.0 million (4.5 percent) in 2001 and 140.7 million (3.7 percent of the total) in 2002. This indicates the decline of the out flow of export commodities to this continent when one compares the two years under discussion.

ANNEX I: DETAILED DESCRIPTION OF SECTIONS

SECTION I:	LIVE ANIMALS; ANIMAL PRODUCTS
SECTION II :	VEGETABLE PRODUCTS
SECTION III:	ANIMAL OR VEGETABLE FATS AND OILS AND THEIR CLEAVAGE PRODUCTS; PREPARED EDIBLE FATS; ANIMAL OR VEGETABLE WAXES
SECTION IV:	PREPARED FOODSTUFFS; BEVERAGES; SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES
SECTION V:	MINERAL PRODUCTS
SECTION VI:	PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES
SECTION VII:	PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF
SECTION VIII:	RAW HIDES AND SKINS; LEATHER; FURSKINS AND ARTICLES THEREOF; SADDLERY AND HARNESS; TRAVEL GOODS; HANDBAGS AND SIMILAR CONTAINERS; ARTICLES OF ANIMAL GUT (OTHER THAN SILK-WORK GUT)
SECTION IX:	WOOD AND ARTICLES OF WOOD; WOOD CHARCOAL; CORK AND ARTICLES OF CORK; MANUFACTURES OF STRAW; OF ESPARTO OR OF OTHER PLAITING MATERIALS; BASKETWARE AND WICKERWORK
SECTION X:	PULP OF WOOD OR OF OTHER FIBROUS CELLULOSIC MATERIAL; WASTE AND SCRAP OF PAPER OR PAPERBOARD; PAPER AND PAPERBOARD AND ARTICLES THEREOF
SECTION XI:	TEXTILES AND TEXTILE ARTICLES
SECTION XII:	FOOTWEAR; HEADGEAR, UMBRELLAS, SUN UMBRELLAS, WALKING-STICKS, SEAT-STICKS, WHIPS, RIDING-CROPS AND PARTS THEREOF; PREPARED FEATHERS AND ARTICLES MADE THEREWITH; ARTIFICIAL FLOWERS; ARTICLES OF HUMAN HAIR

SECTION XIII:	ARTICLES OF STONE, PLASTER, CEMENT, ASBESTOS, MICA OR SIMILAR MATERIALS; CERAMIC PRODUCTS; GLASS AND GLASSWARE
SECTION XIV:	NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMI-PRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL AND ARTICLES THEREOF; IMITATION JEWELLERY; COIN
SECTION XV:	BASE METALS AND ARTICLES OF BASE METAL
SECTION XVI:	MACHINERY AND MECHANICAL APPLIANCES; ELECTRICAL EQUIPMENT; PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS PARTS AND ACCESSORIES OF SUCH ARTICLES
SECTION XVII:	VEHICLES, AIRCRAFT, VESSELS AND ASSOCIATED TRANSPORT EQUIPMENT
SECTION XVIII:	OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; CLOCKS AND WATCHES; MUSICAL INSTRUMENTS; PARTS AND ACCESSORIES THEREOF
SECTION XIX:	ARMS AND AMMUNTION; PARTS AND ACCESSORIES THEREOF
SECTION XX:	MISCELLANEOUS MANUFACTURED ARTICLES
SECTION XXI:	WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES
