Introduction

As stated in earlier reports, the Central Statistical Authority has been collecting prices of goods and services in Addis Ababa since March 1965(Megabit 1957 E.C.). However, because of the increasing demand for the data, the coverage of the survey, which was limited only to Addis Ababa, was made to include twenty two other urban centers.

The present report which has two parts is wider in scope than the earlier ones as it incorporates as many commodities as possible. The first part consists of tables on average retail prices of goods and services while the second is on average prices of hotel services. The first part provides quarterly average retail prices of goods and services in each of the twenty three urban centers for the year 1988(1980/81 E.C.), annual average retail prices in Addis Ababa from 1971 to 1988(1963/64 - 1980/81 E.C.) and monthly retail prices of food, drinks and tobacco collected from European type groceries in Addis Ababa for the year 1988(1980/81 E.C.). Part two of the report is the first of its kind presenting the results of average prices of hotel services in twenty three selected urban centers. This part which covers the years 1979 to 1988(1971/72 - 1980/81 E.C.) provides quarterly average prices of hotel services and annual average prices of hotel services from 1979 to 1988(1971/72 - 1980/81 E.C.).

This report updates statistical bulletin number 66 of September 1988.

Objectives

The objectives of the collection of Retail Prices are:

1. to study the level of retail prices;
2. to assess the disparity of prices charged at different distributional levels in each region and between regions;
3. to study changes in the economy;
4. to provide data for national accountants and research workers;
5. to prepare retail price indices.

Scope and Coverage

This report covers prices of major agricultural and industrial groups including food, drinks, tobacco, household items, clothing, footwear, transportation, communication, medical care, education, recreation, building materials, farm equipments, hotel services (hotel bedrooms and food) and other goods and services collected from various outlets in the twenty three urban centers listed below.

1. Addis Ababa
2. Agaro
3. Arba Minch
4. Asmara
5. Assab
6. Assela
7. Awasa
8. Bahir Dar
9. Debre Markos
10. Dessie
11. Dilla
12. Dire Dawa
13. Ghimbi
14. Goba
15. Gondar
16. Harar
17. Jimma
18. Mekelle
19. Mettu
20. Nazereth
21. Negele Borena
22. Nekemte
23. Shashemene

Method of Data Collection

The retail prices of goods and services are collected from major outlets in the selected twenty three urban centers by enumerators with the help of kitchen balance and measuring tape. The outlets include markets, kiosks, groceries, butcheries, hotels and other service establishments where the households purchase most of the goods and services for household consumption and other purposes.

Most of the retail prices of goods and services are collected from traders. However, sometimes, some prices are obtained from consumers at the time of purchase. For each item a maximum of three price quotations are collected from three independent retailers on the same day. Likewise, data on the prices of hotel services are obtained by interviewing the owners of the hotels or responsible persons on the spot. This survey has been conducted simultaneously with the retail prices since September 1979(Meskerem 1972 E.C.). Prices of hotel services in Addis Ababa and Asmara have been collected quarterly since March 1979(Megabit 1971 E.C.) and September 1981 (Meskerem 1974 E.C.), respectively.

The survey is conducted for about seventeen days starting on the 13 th day of each European calendar month. In fact, only one day is in use for the collection of prices of hotel services.

Definitions

1. Urban Center

An urban center is defined as an area which has a population of at least 2,000 persons and which is normally administered by a municipality. The selected urban centers satisfy at least one of the following conditions:

a) Capital of an administrative region

b) Industrial center

c) Center for trade and commercial activities.

2. Retail Price

A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

3. Hotels

Hotels are establishments rendering combined services of rooming, food and drinks on a fee basis.

4. Restaurants

Restaurants are establishments selling food and drinks.

5. Rooming Houses

Rooming houses are establishments engaged in renting bed rooms.

Note

1. In Addis Ababa, Asmara and Mekelle retail prices are collected monthly, whereas in the other urban centers, because of limited man power and cost consideration, the collection is done quarterly, ie., in March, June, September and December. However, from September 1988 onwards, prices are collected monthly throughout the selected urban centers.

2. The quarterly prices of hotel services are the average of prices collected from three selected hotels in that quarter and the annual price is the average of at least two-quarter prices for that year.

3. The survey covered only middle class hotels. While every effort has been made to select hotels of similar standard in all urban centers, minor differences were observed during the survey. Moreover, the selected hotels in Assab are relatively of higher standard compared to those in the other urban centers. Thus, the prices for bed room services in Assab are signifcantly higher than in the other twenty two urban centers.

4. The prices of food and bedroom services in Asmara were collected from Restaurants and Rooming houses, respectively. This is because there are no middle class hotels that provide both services.

5. For convenience, in the first part of the report, the urban centers are grouped into two: Group A consists of the first twelve urban centers and Group B the remaining eleven centers. Thus, the quarterly average prices for the year are presented accordingly.

6. The symbol " - " is used for data not available or doubtful.
