Table 3 Part 2 - Average Producers' Prices of Agricultural Products of November 1995 (Hidar 1988) by killil and group of zones.	21-23

I. Introduction

The Central Statistical Authority (CSA) has been conducting the Rural Integrated Household Survey Program (RIHSP) since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP the Rural Price Survey, which covers both retail and producers' prices, is being conducted on a monthly basis since 1980 in selected Farmer Associations (FAs) of the country.

This report provides information on average producers' price of agricultural products for the period of September 1995 to November 1995 (Meskerem 1988 - Hidar 1988 E.C.) on the basis of the current administrative hierarchy, i.e. Killil/regional states and group of zones. Due to lack of adequate space to accommodate all killils in one page the price data of the killils are presented in two parts.

Part I - Consists of Tigray, Afar, Amhara (and its group of zones) and Oromiya (and its group of zones).

Part II - Consists of Somali, Beni-Shangul and Gumz, Debub Ethiopia, [Southern Nations, Nationalities and Peoples, (S.N.N.P)] (and its group of zones), Gambela, Harari, Dire Dawa and Addis Ababa.

Price data for Amhara, Oromiya and Debub Ethiopia killils are presented according to their respective group of zones¹ and killil average. For the remaining killils price data are presented by killil. Group of zones for Amhara, Oromiya and Debub Ethiopia killils are given below:-

¹ Report for the three Killils is provided in group of zones due to their relatively large area coverage as compared to others.

Group of zones for Amhara Killil

- 1 = North and South Gonder
- 2 = East Gojam, West Gojam and Agewawi
- 3 = North Welo and Wag Hamra
- 4 = South Welo, North Shewa and Oromiya zone

Group of zones for Oromiya Killil

- 1 = East and West Welega
- 2 = Ilubabor and Jima
- 3 = North and West Shewa
- 4 = East Shewa, Arsi, Bale and Borena
- 5 = East and West Hararge

Group of zones for Debub Ethiopia Killil

- 1= Yem, Keficho, Maji, Shekicho and Bench
- 2= North and South Omo, Derashe and Konso
- 3= Hadiya, Kembata and Gurage
- 4= Sidama, Gedeo, Burji and Amaro.

II. Objectives

The objectives of the survey are to:-

- help policy makers take decisions on production and distribution of agricultural products;
- study the level of producer's price of agricultural products charged by farmers;
- study the disparities between prices at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct producer's price indices and volume of production with respect to agricultural commodities;

III. Scope, Coverage and Sample Design

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in the light of staff experience and in an effort to incorporate commodities mostly produced by farm holders.

The major groups of items covered by the survey include cereals, pulses, oil seeds, vegetables and fruits, spices, livestock dairy products and egg, hides and skin and others.

A two-stage stratified sample design was used for the 1995/96 (1988 E.C.) price survey. In three Killils, namely Amhara, Oromiya and Debub Ethiopia, groups of contiguous zones were treated as strata/reporting levels of the survey results. In the remaining regions, the reporting levels were the killils themselves. The primary sampling units in all strata were Enumeration Areas, (EAs). Agricultural households were the ultimate sampling units.

A fixed number of sample EAs was determined for each stratum/reporting level based on population size of the stratum and cost considerations. The overall sample number of EAs in a stratum was proportionately allocated to Zones/special Weredas within the stratum to their population size. From within each stratum sample EAs were selected with probability proportional to size (PPS), size being the total number of households of the EAs as obtained from the 1994 census map work. From each sample EAs, 25 agricultural households were selected systematically without replacement. Information on producer's price of selected agricultural commodities is collected from farm households or producers' cooperative residing in the sample EAs

A total of 620 EAs (1.1% of the total number of agricultural EAs) in the country were planned to be covered by the survey. But 12 of the sampled EAs were closed due to various reasons and the survey covered 608 EAs successfully. Areal coverage of the survey, for the period under study, and distribution of EAs sampled and actually covered by stratum/reporting level are given in Table A and Table B respectively.

Table A: Areal coverage of the 1995/96 (1988 E.C.) price survey

Killil	Number of zones		Number of Weredas	
	Total	covered	planned	covered
Tigray ¹	5	4	35	34
Afar ²	5	2	6	4
Amhara	10	10	96	95
Oromiya	12	12	148	144
Somali	9	3	6	5
Beni-Shangul and Gumz	3	2	6	5
Debub Ethiopia	16	16	72	69
Gambela	1	1	5	4
Harari	1	1	1	1
Addis Ababa ³	6	2	5	5
Dire Dawa	1	1	1	1
Total	69	54	381	367

¹ Four out five zones in Tigray have rural settled population. The remaining zone consists of only urbanites.

² Only three zones have significant rural sedentary population in Afar.

³ Only two zones in Addis Ababa have rural settled population. In the remaining four zones the entire population are urbanites.

Table B: Number of sampled EAs and actually covered in the survey by Killil

Killil	Strata	Number of	
		Sampled EAs	Covered EAs
Tigray	1. Tgray	35	34
Afar	2. Afar	15	13
Amhara	3. North and South Gonder	40	38
	4. East Gojam, West Gojam and Agawawi	40	40
	5. North Welo and Wag Hamra	35	34
	6. South Welo, North Shewa and Oromiya zone	40	40
	7. East and West Welega	40	40
	8. Ilubabor and Jima	40	40
Oromiya	9. North and West Shewa	40	39
	10. East Shewa, Arsi, Bale, and Borena	40	40
	11. East and West Harerge	40	38
	12. Somali	15	14
	13. Beni-Shangul and Gumz	15	15
Debub Ethiopia (SNNP)	14. Yem, Keficho, Maji, Shekicho, and Bench	35	35
	15. North Omo, South Omo, Derashe and Konso	35	35
	16. Hadia, Kambata and Gurage	35	35
	17. Sidama, Gedee, Burji, and Amaro	35	35
Gambela	18. Gambela	15	14
Harari	19. Harari	10	10
Addis Ababa	20. Addis Ababa	10	10
Dire Dawa	21. Dire Dawa	10	8
Total		620	608

IV. Method of Data Collection

Agricultural producers' price is collected from farm households or producers' cooperatives in the selected FAs for each month of the Ethiopian Calendar year, (September to August). For each agricultural product a maximum of three price quotations are collected from three different farmers or producers' cooperatives. However, it should be noted that information on producers' price is collected from a farmer or producer who sold the output of his agricultural holding during the survey month. The data collection of producers' price is distributed throughout the month considering the work load of the enumerator and the selling habits of the farmers.

V. Definition

Producers' price: Agricultural producers' price is defined as the price of the transaction carried out by the farmer at the first point of sale for a clearly specified agricultural commodity. In most cases this price may not correspond to the farm-gate price as the farmer sells his product at a place outside his farm.

Enumeration Area Enumeration Area in rural areas is a locality that is less than or equal to farmer's association areas and mostly consists of about 150-200 households.

VI. Note

1. The average column is a simple arithmetic average prices for each item.
2. The symbol "NA" is used for data not available or doubtful.
