## F O R E W O R D

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence, the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Southern Nations, Nationalities and Peoples' Region which appear in five separate parts:

- Volume I: Part I - Statistical Report on Population Size and Characteristics.
- Volume I: Part II - Statistical Report on Education and Economic Activity.
- Volume I: Part III- Statistical Report on Migration, Fertility and Mortality.
- Volume I: Part IV - Statistical Report on Housing Characteristics.
- Volume I: Part V - Abridged Statistical Report.

Thus, the Office of the Population and Housing Census Commission is pleased to present the census report "The 1994 Population and Housing Census of Ethiopia: Results for Southern Nations, Nationalities and Peoples' Region, Volume I: Part II - Statistical Report on Education and Economic Activity" for users. Another report which deals with the detailed analysis of the results of the 1994 Population and Housing Census data for the region will also be produced soon.

The 1994 Population and Housing Census was a huge nationwide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non-government organizations, external donor agencies and the public in general was obtained. A number of preparatory activities were also carried-out before the census enumeration was begun. Among the major census preparatory activities was the conduct of the Population and Housing Census Map Work. In the census map work the peasant associations in rural areas and the urban dwellers associations in urban areas were sub-divided into enumeration areas with 150-200 housing units in urban areas and 150-200 households in rural areas. About 5-6 contiguous enumeration areas were formed into one supervision area. In this exercise enumeration area and supervision area maps were also prepared. In the census map work operation a total of 49,978 enumeration areas and 9,845 supervision areas were constructed in the settled rural areas and 8,724 enumeration areas and 1,575 supervision areas in the urban areas of the country. In rural areas of Southern Nations, Nationalities and Peoples' Region a total of 10,564 enumeration areas and 1,990 supervision areas were delineated. On the other hand, in the urban areas of the region, a total of 855 enumeration areas and 126 supervision areas were formed.

During the census enumeration, one enumerator was given the map of one enumeration area and was responsible to record all persons and housing units in that enumeration area. One supervisor was later assigned to a supervision area and was responsible for the quality of the information collected in that area.

The Office of the Population and Housing Census Commission would like to thank all government and non-government agencies who participated in the organization of the census, the supervision of the field work, the data collection, and the respondents who participated in providing the necessary information. The government of Ethiopia has given huge financial and unreserved administrative support in undertaking the 1994 National Population and Housing Census from its inception till the dissemination of the results. This indicates the commitment and high priority offered by the government for socio-economic and demographic data collection, processing, evaluation and dissemination of the results to users.

The Office would also like to take this opportunity to express its many thanks to the United Nations Population Fund (UNFPA) to its generous financial assistance and technical support in conducting the census. Moreover, thanks are due to United States Agency for International Development (USAID) for its financial and technical assistance for the census. Further thanks are due to the United Nations Development Program (UNDP) and to the Swedish International Development Authority (SIDA) for their financial assistance. The office hopes that the data presented in this report will be found useful by all data users.

Abdulahi Hasen(Ph.D.)

Member  
and  
Secretary,  
Central Census Commission

## CHAPTER I

### INTRODUCTION

This chapter presents an overview of the content of the census report "The 1994 Population and Housing Census of Ethiopia: Results for Southern Nations, Nationalities and Peoples' Region, Volume I: Part II - Statistical Report on Education and Economic Activity". This report presents information on education (school attendance, educational attainment, ...etc.) and economic activity (activity rates, unemployment rates, occupational distribution, industrial groups, status, ...etc.). Summaries of population sizes (for zones, weredas, and towns; and projected population figures up to the year 2000) are also presented as an Annex. The data presented in this report constitute the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Southern Nations, Nationalities and Peoples' (SNNP) Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Southern Nations, Nationalities and Peoples' Region are: Volume I: Part I- Statistical Report on Population Size and Characteristics; Volume I: Part III- Statistical Report on Migration, Fertility and Mortality; Volume I: Part IV - Statistical Report on Housing Characteristics; and Volume I: Part V- Abridged Statistical Report.

Southern Nations, Nationalities and Peoples' Region consists of nine zones and five Special Weredas. There are a total of 77 weredas and 149 towns in the region. The rural parts of the region had 3804 farmers' association areas at the time of the census. However, this number has recently declined drastically after the reorganization of the rural kebeles. The urban parts of the region have 213 kebeles in the 149 towns. The census fully covered all areas in the region except for 8 farmers' associations in the rural areas. The urban parts of the region were fully covered during the census. The 8 farmers' associations areas that were not covered in the census are found in Bench Maji.

Zone and Semen Omo Zone. Out of the 77 weredas in the region, 74 weredas were fully covered, while in three weredas a few FAs were not covered. These were five FAs in Surma Wereda, and two FAs in Sheko wereda of Bench Maji Zone; and parts of one FA in Boloso Sore Wereda of Semen Omo Zone. For details concerning the farmers' associations not covered in the census, reference may be made to Annex Table II.2 in Volume I: Part I.

The statistical tables presented in this report refer to the areas that were covered during the census, except in a few cases where it is explicitly stated that estimates for the areas not covered in the census are included. In this report, the population size of the areas covered in the census plus those that were not covered in the census is presented by zones and weredas in Annex Table 1. The estimated population size of the areas not covered in the census by zones and weredas are presented in Annex Table 2. The population projection for the region is prepared using the total of the census covered plus the estimated population sizes. All the other tables refer to the census covered population only.

Localities were identified as urban or rural during the census cartographic work. Towns were defined as localities in which Urban Kebele Administration (previously known as Urban Dwellers Association) has been established. Localities that had 1000 or more persons whose inhabitants were primarily engaged in non agricultural activities were identified as towns irrespective of whether Urban Kebele Administration has been established or not. Similarly capitals of weredas were also identified as towns even if Urban Kebele Administration has not been established. However, changes of wereda boundaries have occurred since the conduct of the census cartographic work; and in some instances two or more previous weredas have been combined to form one wereda. Thus, localities that were seats of wereda administration at the time of the census cartographic work, and subsequently identified as towns in the census report, may no longer be wereda capitals.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were prepared in Amharic. English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

- i) Short Questionnaire (Appendix I)
- ii) Long Urban Questionnaire (Appendix II)
- iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long

questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refer to population sizes, sex and age composition, language, ethnic, religion and marital distributions was collected from all persons covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Eventhough the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity,... etc. represent the entire population of Southern Nations, Nationalities and Peoples' Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling in the questionnaires designed for the purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains three chapters. The first chapter serves as an introduction to the report. Chapter III presents the educational characteristics of the population and Chapter IV deals with the economic characteristics in the region. Annex I presents five summary tables about the population size of the region. Annex Table 1 presents the population size of the region obtained from the census plus estimates for areas not covered in

the census classified into zones and weredas. Annex Table 2 presents the estimated population size of the areas not covered in the census classified into zones and weredas. Annex Table 3 presents the population size of towns, while Annex Table 4 presents the single year age distribution of the population covered in the census. Annex Table 5 presents the projected population size for the region up to the year 2000. Annex II presents the list of tables on other parts of Volume I.

The accompanying Volume I: Part I consists of Chapter II which presents the population sizes of zones, weredas, towns, and kebeles; and also the sex, age, language, ethnic, religion, marital status and disability condition of the population. Volume I: Part III presents Chapter V which deals with migration, fertility and mortality conditions. Volume I: Part IV presents Chapter VI which deals on the housing stocks and conditions. Volume I: Part V has six chapters and presents selected tables from volume I: Parts I, II, III and IV; and thus deals in an abridged form on population size and characteristics, educational characteristics, economic characteristics, migration, fertility, mortality and housing characteristics. The abridged form was found necessary as the size of the region is huge and hence data tabulated is enormous, which required binding in five separate parts.

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility and mortality exclude the homeless. Since the homeless population is very small compared to the population of the region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were sleeping, and it was not convenient to apply long questionnaires in these situations. Homeless persons were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for Southern Nations, Nationalities and Peoples' Region. The forthcoming analytical report for the 1994 Population and Housing Census data of Southern Nations, Nationalities and Peoples' Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census data are expected to continue even after the production of the analytical report.

## CHAPTER III

### EDUCATIONAL CHARACTERISTICS

This chapter presents data on educational characteristics of the population of Southern Nations, Nationalities and Peoples' Region . The data was collected from members of the sampled household. Two questions on education were included in the census questionnaire to measure school attendance and educational attainment. The information was collected from persons who were covered using the long questionnaire. However, the information has been weighted and all the figures in this chapter refer to the entire population of Southern Nations, Nationalities and Peoples' Region.

Every person aged five years and over in a sampled household was asked to report his/her educational status. The three alternative answers given were (1) attending school during the census year, (2) attended school in the past and left during the census year and (3) never attended. The resulting data is given on Table 3.1A, 3.1B and 3.1C. Similarly, data on school attendance for zones classified by urban and rural areas is given in Table 3.2.

Those who were attending school during the census year were further asked to indicate the grade in which they were attending. The distribution of the region's population classified by age and grade attending is presented on Table 3.3A, 3.3B and 3.3C. Population of zones classified by grade are given in Table 3.4. In order to measure the proportion of students out of the school age population it is essential to compute gross and net enrollment ratios.

Gross enrollment ratio in primary education is defined as the ratio of students in primary education divided by total number of children aged 7-12 years (multiplied by 100 percent). Gross enrollment ratio in junior secondary education is the number of students in junior secondary education divided by total children aged 13-14 years (multiplied by 100 percent). Gross

enrollment ratio in senior secondary education is the number of students in senior secondary education divided by total children aged 15-18 years (multiplied by 100 percent). The gross enrollment ratios for primary, junior and senior secondary levels for weredas classified by urban and rural areas are presented in Table 3.5. Enrollment ratios that exceed 100 indicate enrollment of over-aged children in each level. Since this ratio does not consider the age distribution of the enrolled population the net enrollment ratio was calculated.

Net enrollment ratio in primary education is defined as students in primary education aged 7-12 years divided by total children aged 7-12 years (multiplied by 100 percent). Net enrollment ratio in junior secondary education is defined as students in junior secondary education aged 13-14 years divided by total children aged 13-14 years (multiplied by 100 percent). Net enrollment ratio in senior secondary education is the number of students in senior secondary education aged 15-18 years divided by total children aged 15-18 years (multiplied by 100 percent). The net enrollment ratios for weredas are presented in Table 3.5.

Data on educational attainment is also given in this chapter. Those who were attending school during the census day and attended in the past and left school prior to the census day were asked to state whether they were literate or not. If literate, respondents were further enquired to report the highest grade completed in the formal education system. Following the recommendation of the United Nations that states age of 10 years as the minimum age for compiling and analyzing data on educational attainment, Table 3.6A - 3.6C and Table 3.7 present data on educational attainment for the population aged 10 years and over for the region and weredas, respectively. Similarly, data on educational attainment for the towns is given in Table 3.8.

The report in general and this chapter in particular refers to formal education only. "A formal education is defined as education in which students are enrolled or registered regardless

of the mode of teaching used. It includes both 'regular school and university education' and 'adult education'. All regular schools and university education is essentially formal. Adult education, however, can be formal and non-formal. The 1994 population and housing census covered only the formal component of the adult education and all regular and university education.

Regular and University education is used to describe the system that provides a 'ladder' by which children and young people may progress from primary schools through universities (although many drop out on the way). Adult education is used to describe out-of-school education, which provides education for people who are not in the regular school and university system and who are generally fifteen or older (although in some circumstances, younger students are accommodated along with their older colleagues)" (United Nations, 1976).

**CHAPTER IV**  
**ECONOMIC ACTIVITY STATUS**

In the 1994 population and housing census, information on economic activity status was collected for all persons aged ten years and over using the long questionnaire. The long questionnaire was administered only on selected households. The selection was done on the basis of systematic sampling and covered one fifth of the total households. However, statistical weights were later applied which makes the figures presented in this chapter to refer to the entire population. Information on economic activity collected in the census was:

- a) whether engaged in productive work during the reference period.
- b) reason for not being engaged in productive work during the reference period (for those who were not so engaged).
- c) major type of occupation.
- d) major product or service of the establishment or industry.
- e) employment status in the main activity.
- f) number of days worked during the last seven days for those engaged in productive work (for urban areas only).

The approaches used in the collection of the above information in urban and rural areas were different. The current status approach was employed in the urban areas, while the usual status approach was used in the rural areas. The main difference between the two approaches is in the length of the reference period. The current status approach is based on a short reference period, which in this case is the seven days before the census day. On the other hand, the usual status approach has a long reference period, that is, the twelve months before the census day.

In urban areas all persons aged ten years and over who were productively engaged for at least one day during the seven days reference period were classified as economically active. In rural

areas all persons aged ten years and over were classified to be participating in a productive activity if they were engaged in the production of economic goods and services during most of the twelve months prior to the census day. For those engaged in agricultural activities, persons who were engaged in agricultural and related work during most of the main agricultural season were classified to be economically active.

Economic or productive activity in the census was defined in terms of production of goods and services following the concepts presented in the United Nations System of National Accounts (SNA) production boundary (ILO, 1990a). Economic activity is defined as work which involves the production of goods or services for sell or exchange for other commodities including:- production and processing of primary products (agriculture, hunting, fishing, forestry and logging, and mining and quarrying) for own consumption, own account construction and fixed asset formation (expected life use of one year or more) for own use. Such activities could be performed for an individual, family or private enterprise, government establishment or public organization. The remuneration may be on daily, monthly, yearly or contract basis. However the activities of apprentices are considered as productive activity. On the other hand, unpaid household chores such as preparing food, cleaning the house, taking care of children or collecting firewood are not considered to be productive activities. In addition unpaid community and volunteer services and prostitution are classified as non-economic activities.

#### Economically Active and Non-active Population

The economically active population comprises all persons aged ten years and over who were employed and unemployed. The employed population consists of those who were engaged in productive activity for at least one day during the seven days prior to the census day for urban areas and most of the twelve months prior to the census day for rural areas. Persons who had regular jobs but

did not work during the reference period because of poor health, social reason, seasonality of work, annual leave or due to temporary closure of establishment were included as employed persons. The unemployed population consists of those who were not working during the reference period and were actively looking for work or were discouraged job seekers, that is, those who were not actively looking for work but were ready and willing to take up a job if one was available. A person who is looking for work but was engaged in a productive activity during the reference period is recorded as economically active and not as an unemployed person. The number of economically active and the non-active population by five year age group, sex and region is presented in Tables 4.1A - 4.1C. The tables also present activity rates which are defined as the percentage of the economically active over the total of the active plus the non-active population. Table 4.2 provides economic activity status and activity rate of zones by sex and urban/rural residence, while Table 4.3 shows economic activity status and activity rate of population of towns by sex.

The reason for not being engaged in an economic activity (for those who were not so engaged) is presented in Tables 4.4A - 4.4C. The reasons are classified as: students, homemakers, disabled, too young, pensioners, prostitutes and "others". However students, pensioners, ... etc. are considered economically active if they were productively engaged during the reference period. The distribution of the unemployed population by five year age group, sex and region is presented in Tables 4.5A - 4.5C. Table 4.6 provides unemployed population of zones by sex and urban/rural residence, while Table 4.7 shows unemployed population of towns by sex. Some of the towns in the region are very small, and because of the use of sampling in the census some bias was introduced in the estimation of rates of unemployment. Thus, high rates of unemployment was recorded for some towns while for some other towns low rates were recorded.

## Type of Activity

Employed persons were asked about the type of occupation, and major product or industrial group of the establishment in which they were engaged during the reference period and the status of their employment. This information was also collected from unemployed persons who had previous work experience. The information collected from these persons referred to the job they held before they became unemployed. The information on type of activity was not collected from unemployed persons with no previous work experience. Therefore, analysis of economically active population by occupation, major product or type of service of their establishment and status will be based on a number fewer than the total economically active persons by the number of unemployed persons who never had any work experience.

A national occupation and industrial classification code list was prepared for the census. The list prepared closely followed the International Standard Classifications of Occupation (ILO, 1990b) and International Standard Industrial Classification (UN, 1990) but took into account the prevailing national socio-economic conditions. These classifications were used for coding the responses on occupation and the type of industrial group of the establishment.

The distribution of the status in employment of the economically active population by five year age group and sex is presented in Tables 4.9A - 4.9C. The distribution of the economically active population by the major occupational group by five year age groups and sex appears in Tables 4.10A - 4.10C. The Sub-major and the minor occupational groups by sex and urban/rural residence appear in Table 4.11. Tables 4.12A - 4.12C present the distribution of the major industrial divisions classified by five year age groups and sex. The Sub-major and the minor industrial groups are presented by sex and urban/rural residence in Table 4.13. Table 4.14 presents the distribution of number of days worked

for the employed population by sex and zone. This table also presents the mean number of days worked by employed persons. The data presented in the table is limited to urban areas only because the number of days worked was not collected in rural areas.

ANNEX II - LIST OF TABLES ON OTHER PARTS OF VOLUME I

VOLUME I: PART I

CHAPTER II - POPULATION SIZE AND CHARACTERISTICS

- TABLE 2.1 Counted plus estimated population size of zones and weredas by sex, urban and rural: 1994
- TABLE 2.2 Estimated population size of areas not covered during the 1994 census by zones and weredas
- TABLE 2.3 Total population size of zones and weredas by sex, urban and rural: 1994
- TABLE 2.4 Total population of towns by sex: 1994
- TABLE 2.5A Population size by broad age group, sex and type of residence (SNNP Region-total): 1994
- TABLE 2.5B Population size by broad age group, sex and type of residence (SNNP Region-urban): 1994
- TABLE 2.5C Population size by broad age group, sex and type of residence (SNNP Region-rural): 1994
- TABLE 2.6 Population size of zones by sex and type of residence, urban and rural: 1994
- TABLE 2.7 Household size and average number of persons per household in conventional households by zones, urban and rural: 1994
- TABLE 2.8 Population size by sex and age in single year, urban and rural: 1994
- TABLE 2.9 Population size of weredas by sex and age group, urban and rural: 1994
- TABLE 2.10 Population size of towns by sex and age group: 1994
- TABLE 2.11 Population size by ethnic group and sex, urban and rural: 1994
- TABLE 2.12 Five major ethnic groups and ethnic groups with population size of 500 and over of weredas by sex, urban and rural: 1994
- TABLE 2.13 Five major ethnic groups and ethnic groups with population size of 500 and over of towns by sex: 1994
- TABLE 2.14 Population size by mother tongue and sex, urban and rural: 1994

- TABLE 2.15 Five major mother tongue and mother tongue with population size 500 and over of weredas by sex, urban and rural: 1994
- TABLE 2.16 Five major mother tongue and mother tongue with population size 500 and over of towns by sex: 1994
- TABLE 2.17 Population size by second language spoken and sex, urban and rural: 1994
- TABLE 2.18A Population size by religion, sex and age group (SNNP Region-total): 1994
- TABLE 2.18B Population size by religion, sex and age group (SNNP Region-urban): 1994
- TABLE 2.18C Population size by religion, sex and age group (SNNP Region-rural): 1994
- TABLE 2.19 Population size of weredas by religion and sex, urban and rural: 1994
- TABLE 2.20 Population size of towns by religion and sex: 1994
- TABLE 2.21A Population in conventional households by relationship to head of household, sex and age group (SNNP Region-total): 1994
- TABLE 2.21B Population in conventional households by relationship to head of household, sex and age group (SNNP Region-urban): 1994
- TABLE 2.21C Population in conventional households by relationship to head of household, sex and age group (SNNP Region-rural): 1994
- TABLE 2.22A Population aged ten years and over by marital status, sex and age group (SNNP Region-total): 1994
- TABLE 2.22B Population aged ten years and over by marital status, sex and age group (SNNP Region-urban): 1994
- TABLE 2.22C Population aged ten years and over by marital status, sex and age group (SNNP Region-rural): 1994
- TABLE 2.23 Population by broad age groups, disability status, type of disability and sex ratio: 1994
- TABLE 2.24 Population by disability status and type of disability, urban and rural: 1994

## **ANNEX I - POPULATION PROJECTIONS**

ANNEX TABLE I.1 Counted plus not-counted population size of SNNP Region by urban and rural, five years age group and sex October, 1994 census

ANNEX TABLE I.2 Population projection of SNNP Region by rural-urban, five years age group and sex, 1995 - 2000

## **ANNEX II - POPULATION SIZE OF KEBELE**

ANNEX TABLE II.1 Total population of kebeles by sex, urban areas: 1994

ANNEX TABLE II.2 Estimated population size of farmers' associations not covered by the 1994 Census

ANNEX TABLE II.3 Total population of farmers' associations by sex, rural areas: 1994

## **VOLUME I: PART III**

### **CHAPTER V - MIGRATION, FERTILITY AND MORTALITY**

#### **A - MIGRATION**

TABLE 5.1A Population by age group, sex, migration status and area of previous residence (SNNP Region-total): 1994

TABLE 5.1B Population by age group, sex, migration status and area of previous residence (SNNP Region-urban): 1994

TABLE 5.1C Population by age group, sex, migration status and area of previous residence (SNNP Region-rural): 1994

TABLE 5.2A Population of zones by sex, migration status and area of previous residence, urban and rural: 1994

TABLE 5.2B Population of towns by sex, migration status and area of previous residence (SNNP Region): 1994

TABLE 5.3A Migrant population by age group, sex and length of residence (SNNP Region-total): 1994

TABLE 5.3B Migrant population by age group, sex and length of residence (SNNP Region-urban): 1994

TABLE 5.3C Migrant population by age group, sex and length of residence (SNNP Region-rural): 1994

TABLE 5.4A Migrant population of zones by sex and length of residence, urban and rural: 1994

TABLE 5.4B Migrant population of towns by sex and length of residence (SNNP Region): 1994

**B - FERTILITY**

TABLE 5.5A Summary measures of fertility based on reported data for zones, SNNP Region: 1994

TABLE 5.5B Summary measures of fertility based on reported data for towns that have 10,000 and above persons, SNNP Region: 1994
