I. INTRODUCTION

The Central Statistical Authority has been collecting retail prices of goods and services in Addis Ababa since March 1965. However, due to the ever increasing demand for the data, the geographical coverage of the survey was revised to include fourteen urban centers in 1975 and twenty two urban centers in 1978.

This report provides data on average retail prices of goods and services in selected urban centers from May 1993-August 1994. Separate price data for Addis Ababa is also included from September 1992 - August 1993.

The 21 Urban Centers are grouped in to Group A and B.[1]

- **Group A** consists of Addis Ababa, Agaro, Arba Minch, Asela, Awasa, Bahir Dar, Debre Markos, Desie, Dila, Dire Dawa and Ghimbi.

- **Group B** Consists of Goba, Gonder, Harar, Jima, Mekele, Metu, Nazareth, Negele Borena, Nekemt and Shashemene.

This twelfth edition updates Statistical Bulletin 127. Earlier issues on the same topic are Statistical Bulletins 18, 28, 32, 41, 54, 66, 71, 80, 91, 114 and 127.

[1] There is a possibility that data for one town or more could be missing in a table for one reason or another.
1

II. OBJECTIVES

The main objectives of the survey are to:

- study the level of retail prices;
- assess the disparity of prices charged at different distribution levels in each urban center;
- study changes in the economy;
- provide data for national accountants and researchers;
- prepare retail price indices.

III. SCOPE AND COVERAGE

The retail price survey in urban areas covers the collection of prices of major agricultural and industrial groups including food, drinks, drink constituents, tobacco, clothing and footwear, building materials, energy, household equipment, medical care, transportation, education, recreation, farm equipment, and other goods and services obtained from various outlets. Due to Addis Ababa's large population the city has been given more weight than other urban centers. As a result, the town was conveniently grouped into four major zones, i.e., Merkato, Kirkos, Selassie and Piazza. Price collection is conducted independently in each zone and the average represents Addis Ababa's price.

Due to Census cartographic map work CSA practically suspended the collection of price data from August 1992 to April 1993 in all urban centers except Addis Ababa. Although, the monthly collection of price data was resumed in all urban centers since May 1993, only ten urban centers were covered in the survey during this month. This number increased to sixteen in June 1993 and to nineteen in July 1993. Data for Mekele are not available in September 1993, March 1994 and May 1994.

The list of selected urban centers is given below:

1. Addis Ababa
2. Agaro
3. Arba Minch
4. Asela
5. Awasa
6. Bahir Dar
7. Debre Markos
8. Desie
9. Dila
10. Dire Dawa
11. Ghimbi
12. Goba
13. Gonder
14. Harar
15. Jima
16. Mekele
17. Metu
18. Nazareth
19. Negele Borena
20. Nekemt
21. Shashemene

IV. METHOD OF DATA COLLECTION

The retail price of goods and services are collected from major outlets in selected urban centers by enumerators with the use of kitchen balance and measuring tape. The outlets include markets, kiosks, groceries, butcheries, pharmacies and other service giving establishments, where, households purchase most of their goods and services for household consumption and other purposes.

Retail prices of goods and services are collected from traders. However, sometimes, prices are also obtained from consumers at the time of purchase. In addition wages of domestic servants and coolie charges are obtained from households. For each item a maximum of three price quotations are collected from three retailers on the same day. Data collection starts on the 13th day of European Calendar and lasts for about 17 days.

Since an interview method of data collection is utilized rather than actual purchase and recording of prices, it may result, in some instances, in exaggeration or under estimation of prices. However, since enumerators were permanently assigned to every urban center and resides there, they have a good chance to familiarize themselves with the market and be on friendly terms with traders, owners of establishments and households. Thus it can be expected that respondents were cooperative and provide reliable information through time.

Finally, it has to be recalled that, since the start of price data in 1963 retail prices indicate the free market prices prevailing in the towns under study.

V. Definitions

Urban Center:

An urban center is an area which has a population of at least 2,000 persons and which is normally administered by a municipality. The selected urban centers satisfy at least one of the following conditions:-

- Capital of an administrative region
- Industrial Center
- Center for trade and commercial activities.

Retail Price:

A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.

VI. Note

1. The minimum that the balance can weight is 10 grams. Thus items which are sold in small quantities and whose weight fall below 10 grams can not be weighed as accurate as possible and as a result may affect the reliability of prices of these items in some respect.

2. The symbol "-" is used for data not available of doubtful.
