PART I

INTRODUCTION AND OBJECTIVES

1.1 Introduction

The manufacturing industrial sector is the most dynamic component of the goods producing sectors of an economy. In particular, Small Scale Manufacturing Industries are playing an ever-increasing role in the manufacturing industrial structures of the developing economies of the world. Expansion and development of the manufacturing sector increases agricultural productivity through providing agricultural inputs and creating demand for agricultural outputs. Furthermore, manufacturing industries play a key role in stimulating other sectors of the economy such as trade, construction and services and in reducing the growing number of unemployment. Basic data on manufacturing output, input, employment, fixed assets, investment and capacity are paramount importance for designing and formulating industrial development programs, strategies and policies.

Owing to this fact and in an effort to provide comprehensive, accurate, reliable and timely data on a regular basis on the country's manufacturing sector the Central Statistical Agency /CSA/ has conducted a survey on Small Scale Manufacturing Industries for the third time in 1998 E.F.Y..

Manufacturing is defined here according to International Standard Industrial Classification (ISIC Revision -3) as " the physical or chemical transformation of materials or components into new products, whether the work is performed by power - driven machines or by hand, whether it is done in a factory or in the worker's home, and whether the products are sold at wholesale or retail. The assembly of the component parts of manufactured products is also considered as manufacturing activities." For this survey grain milling services are also considered as manufacturing activities.

The survey of manufacturing activities are designed to provide basic information on the characteristics, structure and performance of Cottage and Handicraft, Small, Medium and Large Scale Manufacturing Industries. For the accomplishment of these objectives, manufacturing establishments are divided into three major groups. These are: -

a) Large and Medium Scale Manufacturing Establishments, engaging 10 or more persons and use power -driven machines.
b) Small Scale Manufacturing Establishments engaging less than 10 persons and use power -driven machines.
c) Cottage/Handicraft Manufacturing Establishments performing their activities by hand (i.e., using non -power driven machines/hand tools).

Among the above three major groups, the Central Statistical Agency /CSA/ has been conducting survey of Large and Medium Scale Manufacturing Industries each year and publishing the results of the survey on annual basis, to provide users with reliable, comprehensive and timely statistical data.

Concerning Small Scale Manufacturing Industries the Agency has conducted a survey for the third time in 1998E.F.Y (2005/06), in line with CSA's plan to conduct small scale manufacturing industries survey with regular time intervals and provide detailed information on the structure and performance of all groups of manufacturing industries .

This bulletin presents results of Small Scale Manufacturing Industries survey for the reference period 2005/06 (1998 E.F.Y.). The report provides information on objectives, scope, coverage and content, basic concepts and definitions, survey methodology, training of field staff, field organization and summary tables by structure and performance of Small Scale Manufacturing Industries. Furthermore, the questionnaire and estimation procedures for the survey are attached as an Annex.

1.2 Objectives

The main objectives of Small Scale Manufacturing Industries Survey are to:

a) obtain basic statistical data that are essential for development policy makers, planners and researchers by manufacturing industrial group.

b) collect basic quantitative information on employment, volume of production and consumption of raw materials, structure and performance of the country's Small Scale Manufacturing Industries .

c) compile statistical data, which will be an input to the System of National Accounts (SNA) on Small Scale Manufacturing Industries as a whole and by manufacturing industrial group.

d) examine the interaction of the Small Scale Manufacturing Industries with the rest of the economy, particularly with the agricultural sector, and collect data that indicates its share in promoting export production and consuming imported raw materials.

e) obtain the number of persons engaged in Small Scale Manufacturing Industries and find out the major problems that creates stumbling block for their activities.

f) fill in the statistical data gap concerning the Small Scale Manufacturing Industries.

PART II

SURVEY METHODOLOGY, DATA COLLECTION AND PROCESSING

2.1 Scope, Coverage and Content of the Survey

The 2006 Small Scale Manufacturing Industries Sample Survey covered all rural and urban parts of the country except all zones of Gambella region (other than Gambella town and Abobo and Godere weredas), three zones of Afar and six zones of Somali regions. Data on grain-mills were collected from urban and rural parts of the country. Information on Small Scale Manufacturing Industries other than grain-mills, however, is collected from urban parts of the country only.

In the rural parts of Ethiopia, it was planned to cover a total of 1,464 grain-mills from all weredas of the country except those which were mentioned above. Consequently, all weredas were successfully covered but 94 grain-mills were not surveyed due to unavailability of sufficient number of grain mills within some of the weredas. The ultimate response rate is, therefore, 100.00% both for weredas and grain-mills.

Regarding urban parts of the country it was initially planned to cover 80 urban centers, 936 grain-mills and 2,148 Small Scale Manufacturing Industries other than grain-mills. Ultimately, 100% of the urban centers, 95.8% of grain-mills and 96% of Small Scale Manufacturing Industries other than grain-mills were successfully covered by the survey.

In this survey, detailed information on number of establishments, number of persons engaged and number of employees by industrial groups, sex, nationality and occupation, initial and current paid up capital, gross value of production, industrial

and non-industrial costs, operating surplus, value added, value of fixed assets, investment, quantity of major manufactured articles and raw materials by industrial group, number of persons engaged by literacy status, highest grade completed and type and duration of training for the country and selected items are presented.

2.2 Basic Concepts and Definitions

i. **An Establishment**: - is defined as the whole of the premises under the same ownership or management at a particular address (e.g. a bakery, sawmill…etc.).

ii. **Paid-up Capital**:- is that part of the issued capital of an establishment that has been paid by the owners/shareholders.

iii. **Working Proprietors, Active Partners and Family Workers**:- include all unpaid working proprietors, active partners and members of their household who actively participate in the operation of the establishment.

iv. **Administrative and Technical Employees**:- include salaried directors and managers, technicians, superintendents, research workers, draftsmen and engineers, chemists, architects, accountants book-keepers, office machine operators, receptionists, sales persons, delivery personnel, guards and other office staff.

v. **Production workers**:- workers directly engaged in production i.e., persons engaged in fabricating, processing, assembling, maintenance, repair, janitorial, record keeping, and other associated activities.

vi. **Apprentices**:- include both production and administrative workers, who are working to gain experience with or without payment.

vii. **Seasonal and Temporary Workers:-** include workers who are employed for a whole or a part of the year. These workers are not regularly on the payroll of the establishment.

viii. **Number Employed:-** includes all persons on the payroll whether seasonal or temporary workers. The number of seasonal and temporary workers has been adjusted to give equivalent of full-time workers.

ix. **Number Engaged:-** includes paid employees, unpaid working proprietors, active partners, unpaid family workers and paid and unpaid apprentices.

x. **Wages and Salaries:-** includes all payments in cash or in kind made to employees during the reference year in connection with work done for the establishment (this excludes employee benefits).

xi. **Employee Benefits:-** refers to the total of commissions, bonuses and cost of living allowances, medical and educational expenses, etc.. paid by the employer.

xii. **Total Labour Cost:-** includes wages and salaries and employee benefits paid by the employer during the reference year.

xiii. **Revenue from Sales:-** represents the total sales value of all products and by-products during the reference year valued at market price.

xiv. **Receipt from Industrial Services Rendered to Others:-** includes receipt from manufacturing services done to others on the raw materials supplied by customers such as grain milling services and repair and maintenance.

xv. **Other receipts:-** include rental income from lease of machinery and equipment, income from sales of scrap and the value of fixed assets produced by the unit for its own use.

xvi. **Difference of Stocks in the Value of Finished Goods and Semi-Finished Goods:-** is the net change between the end and the beginning of the reference period in the value of finished and semi-finished goods.

xvii. **Gross Value of Production:-** includes the sales value of all products of the establishment, the net change between the beginning and end of the reference period in the value of finished goods and the value of work in-progress, the value of industrial services rendered to others and other receipts. The valuation of Gross Value of Production is in terms of producers' values where indirect taxes are included in the value of sales of the establishment and the value of subsidies received is excluded.

xviii. **Raw Materials:-** include all raw and auxiliary materials, parts and containers which are consumed during the reference year. The value of local raw materials is the value of locally produced raw materials and is the cost at the factory which includes the purchase price, transport charges, taxes and other incidental costs. The value of imported raw materials is the value of raw materials produced in other countries and obtained directly or from local source and is the cost at the factory which includes the purchase price, transport charges, taxes and other incidental costs.

xix. **Other Industrial Services Rendered by Others**: - refer to contract, repair and maintenance work done by others in the reference year on materials controlled by establishment. Included are also the cost of all goods purchased and resold without any transformation during the reference year and the cost of water consumed.

xx. **Industrial Cost: -** Includes the cost of raw materials, fuels, electricity and other supplies consumed cost of industrial services rendered by others, cost of goods bought and resold without any transformation or processing.

xxi. **Non -industrial Cost:** - includes payments like professional fees, postage, telephone, insurance, advertising, hired transport, rental payments, etc.(Depreciation is excluded).

xxii. **Census Value Added (at Market Price):** - is the difference between Gross Value of Production and Industrial Cost. Census value Added at market price minus indirect taxes net (i.e., indirect taxes less subsidies) gives census value added at factor cost.

xxiii. **Value Added in the National Account Concept (at Market Price):** - is defined as the difference between the gross value of production and industrial and non -industrial costs. To get the same indicator at factor cost indirect taxes net (i.e., indirect taxes less subsidies) are subtracted.

xxiv. **Fixed Capital Assets**: - are those with a productive life of one year or more which are intended for the use of the establishment including fixed assets made by the establishment's own labour force for its own use. They are valued in this report at book value end of the reference year, that is the net book value at the beginning plus new capital expenditure minus those sold and disposed and depreciation during the reference year.

xxv. **New Capital Expenditure (Investment):** - is the cost of new or used capital equipment bought during the reference period.

xxvi. **Operating surplus: -** is defined here as the difference between value added in national account concept at factor cost and total wages and salaries and employee benefits.

Relible

xxvii. **An Individual Proprietor:** - is a person who owns and controls an establishment.

xxviii. **Partnership:** - is an establishment owned and operated by more than one person with unlimited liability.

xxix. **Share Company: -** is a business organization formed by an agreement made between at least 5 or more persons with limited liability. The shares are transferable.

xxx. **Private limited Company**: - is a business organization formed, by an agreement between two or more persons but not exceeding fifty, with limited liability. The shares are not transferable except with consent of 3/4th of the members.

xxxi. **Co-operatives**:- an establishment owned and run jointly by its members with profits shared between them.

xxxii. **Other Forms of Ownership:** - includes legal form of organizations different from those mentioned above, such as establishments owned by joint -venture, Government, Municipalities, etc.

xxxiii. **Urban Dweller's Association (Kebele):**- is the lowest administrative unit in an urban center with its own jurisdiction. It is an association of urban dwellers (commonly known as Kebele) formed by the inhabitants, and usually constitutes a part of the urban center.

xxxiv. **Urban Center**:- is in principle defined as a locality with 2000 or more inhabitants. However for practical purposes an urban center includes the following regardless of the number of inhabitants.

a) All administrative capitals

i. Regional capitals

ii. Zonal capitals not included in (i)

iii. Wereda capitals not included in (i) and (ii)

iv. Localities with UDAs not included in (i) - (iii)

b) Municipal towns not included in (a) above

c) All localities which are not included either in (a) or (b) above having a Population of 1000 or more persons, and whose inhabitants are primarily engaged in non -agricultural activities

2.3 SURVEY METHODOLOGY

2.3.1 SAMPLING FRAME

The list containing all Small Scale Manufacturing Industries of urban centers obtained from the 2004 Urban Economic Establishments Census is used for selecting sample urban centers and kebeles. Sample grain-mill industries and Small Scale Manufacturing Industries other than grain-mills on the other hand are selected from a fresh list of establishments prepared at the beginning of the field work.

2.3.2 SAMPLE DESIGN

One of the most important features of an efficient sample design is the stratification of the sampling frame into homogeneous groups and carrying out the sample selection independently within each stratum. Therefore, in order to gain efficiency, the frame (which was used for selecting sample urban centers and kebeles) is sub-divided into the following five categories:

Group_0: Urban centers that have only one Small Scale Manufacturing Industry

Group_1: Urban centers that have greater than one but less or equal to ten Small Scale Manufacturing Industries

Group_2: Urban centers that have greater than ten but less or equal to fifty Small Scale Manufacturing Industries

Group_3: Urban centers that have greater than fifty but less or equal to one hundred Small Scale Manufacturing Industries or regional capitals with fifty or below fifty Small Scale Manufacturing Industries.

Group_4: Urban centers that have greater than one hundred Small Scale Manufacturing Industries.

The contribution of Group_0 to the total Small Scale Manufacturing Industries of the country is found to be only one percent. Hence, a cutoff point of greater than one Small Scale Manufacturing Industry is implemented and urban centers categorized in Group_0 were given no chance of being included in the sample.

SAMPLE DESIGN FOR URBAN CENTERS:

1. For groups 1 & 2 a two-stage stratified sample design is implemented. The primary sampling units are urban centers and the second stage sampling units are Small Scale Manufacturing Industries. The strata are the two-digit level International Standard Industrial Classifications (ISIC).

2. For groups 3 & 4 the same two-stage stratified sample design is implemented. However, in this case the primary sampling units are kebeles except for urban centers categorized in group 3 and are regional capitals with fifty or below Small Scale Industries. For regional capitals having fifty or below Small Scale Industries the same design as that of groups 1 & 2 is implemented. The second stage sampling units for groups 3 & 4 are Small Scale Manufacturing industry establishments.

SAMPLE DESIGN FOR RURAL:

In the rural parts of the country only grain-mill Small Scale industries are considered. A single stage sample design is used in order to select sample

grain-mills. A predetermined number of grain-mill industries are selected independently from each wereda of the country.

SAMPLE SIZE AND SELECTION SCHEME

With the resource available and the time allotted for the survey, the CSA decided to cover a maximum of 2,200 Small Scale Manufacturing Industries other than grain-mills and 2,400 grain-mills through out the country. Based on this decision the sample size determined for both urban and rural part of the country is given as follows:

URBAN:

In groups 1 & 2 thirty six and twenty two urban centers, respectively are sampled. The selection of sample urban centers in the two groups is accomplished by using probability proportional to size technique, size being number of Small Scale Manufacturing Industries. Allocation of sample size both for groups and urban centers is accomplished proportionally. For each sample urban center a fresh list of Small Scale Manufacturing Industries was prepared at the beginning of the field work. Within each sample urban center, from the list of Small Scale Manufacturing Industries prepared, the allocated numbers of Small Scale Manufacturing Industries are finally selected using a systematic sample selection technique.

In groups 3 & 4 eight and fourteen urban centers, respectively are selected. Since about 68 % of the Small Scale Manufacturing Industries of the country are found in groups 3 & 4 all urban centers of these groups are included with certainty. Kebeles from the selected urban centers of groups 3 & 4 are sampled using probability proportional to size technique. Allocation of sample size for groups, urban centers and kebeles is accomplished proportionally. A fresh list of Small Scale Manufacturing Industries for each selected kebele is prepared at the beginning of the survey and the allocated number of Small Scale

Manufacturing Industries is selected using a systematic sample selection technique.

RURAL:

For each rural wereda in the country (excluding the non-sedentary parts) a fresh list of grain-mill industries is prepared at the beginning of the field work. Three grain-mills per wereda are, therefore, systematically selected and covered by the survey.

Regarding the survey domains (reporting levels), it was planned in such a way that the results of the survey could be provided only at country level but disaggregated by two-digit ISIC. Distribution of planned and sampled units is given in Annex I. Estimation procedures and standard errors & coefficients of variations for the estimates of selected variables are also presented in Annex II & III, respectively.

2.4 Training of Field Staff

The training programs were carried out at two stages. In the first stage, the staff from the Agency's branch statistical offices, statisticians, statistical technicians and computer experts from the head office were trained for about three days at the head office. In the second stage, enumerators and field supervisors were trained for four days by those trained in the first stage at the 25 branch statistical offices, all over the country.

2.5 Field Organization

All CSA branch statistical offices were involved in this survey. Accordingly, 25 statisticians from branch statistical offices, 128 field supervisors each supervising on the average 5 enumerators depending on the extent of the area to be covered and 258 enumerators (including reserve enumerators) were participated in the survey. Supervisors did the listing and data collection activity in the rural areas.

2.6 Data Processing

a. Editing, Coding and Verification

A number of quality control steps were taken to ensure the quality of data of this survey. The first step taken in this direction was to revise the questionnaire, to make it easier for internal consistency checking or editing, both at field and office levels. Furthermore, in the enumerator's instruction manual, field editing procedures were attached to help in the editing during the data collection stage.

The editing and coding instruction manuals were prepared in which editors and verifiers were given training. The training program given to the editors and verifiers lasted for three days.

Fifty-six editors/coders and verifiers performed the coding and the manual editing and verification activities. The verification was done on 100 percent basis. Finally, the edited, coded and verified questionnaires were also re-checked on 25 percent basis by two senior statisticians.

b. Data Entry, Cleaning and Tabulation

Edit specification were prepared for computer internal consistency checking purposes. The data entry and verification were done on personal computers using IMPS (Integrated Micro Computer Processing System) and CSpro (Census and Survey Processing System) software. About 30 CSA data entry operators and 4 data entry supervisors (in two shifts) involved for this purpose for 15 working days with close supervision of the activities by one statistician and one computer programmer. Then, the data entered was cleaned by personal computer using the computer edit specification in combination with manual editing for some serious errors. Finally, the tabulation of the results of the survey were processed using the same software by one programmer with assistance from subject matter personnel.

PART III

SUMMARY OF MAJOR FINDINGS OF THE SURVEY

The summary of the results of the 2005/06 (1998 E.F.Y.) surveys on Small Scale Manufacturing Industries is presented in Summary Tables 3.1 to 3.17

3.1 The Structure and Performance of Small Scale Manufacturing Industries

Summary Table 3.1 presents number of establishments, number of persons engaged, gross value of production and value added. As indicated in this Table in 2005/06 (1998 E.F.Y.) there were 39,027 Small Scale Manufacturing Industries all over the country. All of the Small Scale Manufacturing Industries operating in rural areas are grain milling service-rendering establishments.

Summary Table 3.1 further indicates that, the structural distribution of Small Scale Manufacturing Industries in terms of number of establishments, number of persons engaged, gross value of production and value added were concentrated on grain mill services sector in 2005/06 (1998E.F.Y.) as compared to other manufacturing industrial groups. The data on the same table revealed that 19,744 (50.6 percent) constitute gain mill services. This industrial group also constitute 47.3 percent of the number of persons engaged, 29.1percent of the gross value of production and 30.9 percent of the value added in the Small Scale Manufacturing industries during the reference period. The other important manufacturing industrial groups in this respect were manufacture of furniture (14.0 percent), manufacture of wearing apparel (10.1 percent), manufacture of fabricated metal products (10.1 percent) and manufacture of food products (7.4percent). These industrial groups together contributed 41.7, 43.7, 59.4 and 56.0 percent of the total number of establishments, number of persons engaged, gross value of production and value added in that order, in the reference period. The

DISTRIBUTION OF NUMBER OF ESTABLISHMENTS, NUMBER OF PERSONS ENGAGED , GROSS VALUE OF PRODUCTION AND VALUE ADDED BY INDUSTRIAL GROUP: 2005/2006 (1998 E.F.Y)

SUMMARY TABLE 3.1

remaining was shared by publishing and printing, manufacture of wood and of products of wood, manufacture of other non- metallic mineral products, manufacture of textile, manufacture of luggage, handbags and footwear and other industrial groups.

The structural distribution of number of persons engaged and number of employees by manufacturing industrial group are given in Summary Tables 3.2 and 3.3. The data in Summary Table 3.2 makes clear that on average 87.7 percent of the total persons engaged in Small Scale Manufacturing Industries were permanent employees. The size of permanent employees as percentage of total persons engaged in intra-manufacturing industrial group distribution ranged from 74.7 percent in manufacture of fabricated metal to 94.7 percent in grain mills services.

The data in Summary Table 3.3 measures labour cost by number of establishments and number of employees in various manufacturing industrial groups. The average annual labour cost per establishment i.e. for the whole manufacturing industry was about 3,850 Birr. The highest and the lowest labour cost per establishment among manufacturing industrial groups was 7,929 and 1,229 Birr which was recorded in manufacture of furniture and manufacture of wearing apparel industrial groups, respectively. Except for grain mill services, wearing apparel and manufacture of food products, labour cost per establishment was higher than the average for all other industrial groups.

The data in Summary Table 3.4 and Fig 2 show that the percentage share of imported raw materials cost to that of total raw materials cost was about 40 percent for all manufacturing industrial groups combined. However, the share of imported raw materials as compared to that of the total cost of raw materials was significantly higher than the overall ratio i.e., (40.1 percent) except for manufacture of non-metallic mineral products (0.1 percent), manufacture of food products, manufacture of foot wear.

PERMANENT EMPLOYEES AS PERCENTAGE OF TOTAL PERSONS ENGAGED BY INDUSTRIAL GROUP
2005/2006 (1998 E.F.Y)

Summary Table 3.4 provides also the percentage share of cost of energy to total industrial cost. About 19 percent of the total industrial cost for the whole Small Scale Manufacturing Industrial groups combined was allocated for energy. The highest and the lowest share of cost of energy to total industrial cost was registered in grain mill services and manufacture of luggage, handbags and footwear with 56.8 and 1.3 percent, respectively.

3.2 Educational Background and Sex of Persons Engaged, Number of Owners and Permanent Employees

This part of the report includes persons engaged by type of general occupation and sex, literacy status, highest grade completed and training of persons engaged and the sex composition of owners of establishments and permanent employees in Small Scale Manufacturing Industries. The educational characteristics presented here covered the formal and informal education comprising all regular education and the formal and informal components of adult education and others. The training of persons engaged refer to formal training given only by certified training centers and on the job training.

The data in Summary Table 3.5 indicates that, of the total persons engaged (129,592) in Small Scale Manufacturing Industries 114,030 (88.0 percent) were male, while the remaining 15,562(12.0 percent) were female. Further, the data from the same Table shows that 48.0 percent and 39.7 percent, 6.6 percent, 3.4 percent and 2.3 percent of the total persons engaged were permanent paid employees, unpaid proprietors, active partners, family workers, and members of cooperatives, seasonal and temporary workers, unpaid apprentices and paid apprentices, in that order.

Number of Persons Engaged by Sex and Type of worker
2005/06 (1998 E.F.Y)

SUMMARY TABLE 3.5

Type of worker	Sex of Worker					
	Male		Female		Both sex	
	No.	Percent	No.	Percent	No.	Percent
Unpaid Family Worker	43,317	37.99	8,159	52.43	51,476	39.72
Unpaid Apprentices	3,536	3.10	884	5.68	4,420	3.41
Paid Apprentices	2,816	2.47	149	0.96	2,965	2.29
Permanent Paid Employees	55,823	48.95	6,370	40.93	62,193	47.99
Seasonal and Temporary Worker*	8,538	7.49	-	-	8,538	6.59
Total	114,030	100.00	15,562	100.00	129,592	100.00

*All seasonal and temporary workers are taken as male

As can be seen from the data in Summary Table 3.6, among the total permanent persons engaged (111,535) in Small Scale Manufacturing Industries 91,520 (82.05 percent) were reported to be literate. The data further makes clear that, among the total male population engaged, the proportion of literate was slightly less than 82 percent, while it had been about 83 percent for the female population engaged in small scale manufacturing industries.

Number of Reported Persons Engaged by Literacy Status and Sex
2005/06 (1998 E.F.Y)

SUMMARY TABLE 3.6

LITERACY STATUS	MALE		FEMALE		BOTH SEX	
	No.	Percent	No.	Percent	No.	Percent
LITERATE	81,033	81.97	10,487	82.71	91,520	82.05
ILLITERATE	17,823	18.03	2,192	17.29	20,015	17.95
TOTAL	98,856	100.00	12,679	100.00	111,535	100.00

Summary Table 3.7 presents the educational attainment of number of persons engaged by manufacturing industrial group and sex for Small Scale Manufacturing Industries. A comparison of the data on highest grade completed showed that 36.3 percent of the male and 20.9 percent of the female reported as having completed primary (grade 1-6) level of education, while 51.9 percent of the total literate persons engaged in the industry, have completed grades 7-12 level of education. Moreover, 5.8 percent of the males and 9.0 percent of the females, engaged in the industry attained educational level of above grade 12.

Finally, the category "level not stated" stands for literate persons whose level of education was not definable. This represented persons engaged in the industry who achieved literacy by attending religious schools (Church or Qur'an schools), by self-effort and study...etc. This category constituted 7.42 percent of the total literate persons engaged.

Number of Literate Persons Engaged by Sex and Highest Grade Completed 2005/06 (1998 E.F.Y)

SUMMARY TABLE 3.7

HIGHEST GRADE COMPLETED	MALE		FEMALE		BOTH SEX	
	No.	Percent	No.	Percent	No.	Percent
Grade 1-3	9,908	12.23	795	7.58	10,703	11.69
Grade 4-6	19,509	24.08	1,399	13.34	20,908	22.85
Grade 7-8	15,218	18.78	1,937	18.47	17,155	18.74
Grade 9-12	25,171	31.06	5,169	49.29	30,340	33.15
Above 12	4,674	5.77	948	9.04	5,622	6.14
Not Stated	6,552	8.09	238	2.27	6,790	7.42
Total	81,032	100.00	10,486	100.00	91,518	100.00

As can be seen from the data in Summary Table 3.8, from the total persons engaged (129,592) in the industry, 98,438 (76.0 percent) had training of various types including informal (on job) training. Those who had formal training including university level training numbered 91,733, which was 93.2 percent of the total trained persons engaged.

Number of Persons Engaged by Type and Duration of Training and Sex -2005/06 (1998 E.F.Y)

SUMMARY TABLE 3.8

The data in Summary Table 3.9 shows the proportion of male and female owners of establishments and permanent employees. The proportion of male and female owners of establishments were 86.3 and 13.7 percent, respectively. The data in the same table also makes clear that on the total permanent employees engaged in Small Scale Manufacturing Industries, male permanent employees make up 87.2 while female permanent employees constitute 12.8 percent.

Number of Owners of Establishments and permanent Employees by Sex-2005/06 (1998 E.F.Y)

3.3 Major Problems of Small Scale Manufacturing Industries

Summary Table 3.10 shows the distribution of number of establishments by industrial group and various types of major problems faced during commencement of operation. The data in this summary show that, 32.4 percent of the total establishments have faced problems during the commencement of their operation. However, 37.8 percent of the total reported that, they faced shortage of initial capital when commencing operation.

Establishments, which worked less than 12 months during the reference period, were asked to state their reasons for not being fully operational and the results are presented in Summary Table 3.11. It can be observed that among the total establishments working less than 12 months during the reference period (excluding newly established and other reasons) absence of market demand and shortage of water stood as the first and the second major reasons, respectively.

In a similar way establishments which were not working at full capacity were asked to state their reasons for working below capacity during the reference period and these are shown in Summary Table 3.12. When examining the major reasons, more than fifty percent (57.1 percent) of the establishments working below capacity stated that, they did not work at full capacity because of absence of market demand, followed by shortage of supply of raw materials (11.7 percent) and shortage/supply of spare parts (7.1 percent), respectively.

Percentages	11.70	7.13	57.07	3.91	.10	1.08	3.23	15.78	100.00

Data in Summary Table 3.13 depict the first major operating problems faced by establishments at the survey period. As the data in this table indicate 43.2 percent of the establishments reported that, the first major operating difficulty during the survey period was absence of market demand; followed by lack of working capital and shortage of supply of raw materials which were reported by 11.1 and 10.4percent of the total establishments, respectively.

The data in Summary Table 3.14 shows that 3,129 establishments reported that some government regulations were obstacles for their business operations during start-up. In fact this is a very small number compared to that of the total 39,027 establishments operating in Small Scale Manufacturing Industries in the reference year.

Summary Tables 3.15, 3.16 and 3.17 depict the magnitude and type of problems in obtaining information, working capital and market, respectively. Summary Table 3.15 shows the distribution of number of establishments by industrial groups and major problems in obtaining information. In summary table 3.15 lack of information to decide type of activity and lack of sufficient market information stood the first and the second major problems in access to information by the establishments, respectively.

Summary Table 3.16 shows the distribution of number of establishments by industrial groups and the main reasons for not solving the problem of shortage of working capital. The most common problem was the collateral needed for obtaining credit from banks that was reported by 42.4 percent of the establishments.

Summary Table 3.17 shows the distribution of number of establishments by industrial group and major reasons for lack of market. Unable to compete local and foreign products in market price were the first and the second problems reported by the establishments, in that order.

Estimation procedures of total, ratio and sampling errors

To estimate the required variables the following formulas were used.

1. Estimate of total $\hat{Y}$ for Small Scale Manufacturing industries other than grain mills is given by:

$$\hat{Y} = \sum_{g=1}^{4} \hat{Y}_g \quad \text{----------} \quad (1)$$

Where,

$$\hat{Y}_g = \sum_{i=1}^{a_h} \sum_{j=1}^{b_{hi}} W_{hi} y_{hij} \quad \text{----------} \quad \text{for groups 1 \& 2}$$

$$\hat{Y}_g = \sum_{b=1}^{b_g} \hat{Y}_b \,,\ \hat{Y}_b = \sum_{i=1}^{a_h} \sum_{j=1}^{b_{hi}} W_{hi} y_{hij} \quad \text{-------} \quad \text{for groups 3 \& 4}$$

$W_{hi} = \dfrac{M_h H_{hi}}{n_h M_{hi} h_{hi}}$ is the basic sampling weight

M_h = Total number of Small Scale Manufacturing Industry, in group h (for groups 1 & 2) and in urban center h (for groups 3 &4), obtained from the sampling frame.

M_{hi} = Number of Small Scale Manufacturing Industry of urban center i in group h (for groups 1 & 2) and kebele i in urban center h (for groups 3 & 4) obtained from the sampling frame.

n_h = Number of successfully covered urban centers in group h (for groups 1 & 2) and kebeles in urban center h (for groups 3 & 4).

H_{hi} = Number of Small Scale Manufacturing Industries of urban center i in group h (for groups 1 & 2) and of kebele i in urban center h (for groups 3 & 4) obtained from the fresh listing of Industries.

h_{hi} = Number of successfully covered Small Scale Manufacturing Industries of urban center i in group h (for groups 1 & 2) and of kebele i in urban center h (for groups 3 & 4).

y_{hij} = The observed value of a characteristic y for Small Scale Manufacturing industry j in urban center i and group h (for groups 1 & 2) and in kebele i and urban center h (for groups 3 & 4).

$\hat{Y}_g$ = Weighted total of characteristic y for group g.

$\hat{Y}_b$ = Weighted total of characteristic y for urban center b in groups 3 & 4.

2. Estimate of total $\hat{Y}$ for grain mill industries is given by:

$$\hat{Y} = \hat{Y}_{Urban} + \hat{Y}_{Rural} \quad \text{----------} \quad (2)$$

$\hat{Y}_{Urban}$ is calculated using the formula given in equation (1)

$$\hat{Y}_{Rural} = \sum_{h=1}^{m} \sum_{i=1}^{n_h} W_h y_{hi}$$

Where,

$W_h = \frac{H_h}{h_h}$ is the basic sampling weight.

H_h = Total number of grain mills of woreda h obtained from the listing of grain mills.

h_h = Number of successfully covered grain mills in woreda h.

y_{hi} = The observed value of a characteristic y for grain mill industry i in woreda h.

m = Total number of covered woredas in the country.

3. Sampling variance of the estimates:

Sampling variances of estimate of total for Small Scale Manufacturing Industries other than grain mills are given by the following formulas:

The variance of domain or reporting total estimate is:

$$V(\hat{Y}) = \sum_{g=1}^{4} V(\hat{Y}_g) \quad \text{----------} \quad (3)$$

Where,

$$V(\hat{Y}_g) = \frac{n_h}{n_h - 1}\left[\sum_{i=1}^{n_h}\left(\hat{Y}_{hi} - \frac{\hat{Y}_g}{n_h}\right)^2\right]$$ ---------- for groups 1 & 2

$$V(\hat{Y}_g) = \sum_{b=1}^{b_h} \hat{Y}_b \,,\; V(\hat{Y}_b) = \frac{n_h}{n_h - 1}\left[\sum_{i=1}^{n_h}\left(\hat{Y}_{hi} - \frac{\hat{Y}_b}{n_h}\right)^2\right]$$ ----for groups 3 & 4

$\hat{Y}_{hi} = W_{hi} y_{hij}$

Other notations are as defined above.

Similar procedures were followed for estimating sampling variances of gain mill industries.

$$SE(\hat{Y}) = \sqrt{Var(\hat{Y})}$$ ---------- (4)

4. Coefficient of variation and confidence interval

The following formulas were used to calculate coefficient of variation and confidence interval of the domain (reporting level) total.

The coefficient of variation (CV) of domain total in percentage is:

$$CV(\hat{Y}) = \frac{SE(\hat{Y})}{\hat{Y}} x100$$ ---------- (5)

And Ninety five percent confidence interval (CI) of domain total is:

$\hat{Y} \pm 1.96 \times SE(\hat{Y})$ ---------- (6)

5. Ratio estimates:

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$ ---------- (7)

Where the numerator and the denominator are estimates of domain totals of characteristic y and x, respectively.

$$Var\left(\hat{R}\right)=\frac{1}{\hat{X}^2}\left[Var\left(\hat{Y}\right)+\hat{R}^2\,Var\left(\hat{X}\right)-2\hat{R}\,Cov\left(\hat{Y},\hat{X}\right)\right]$$

Estimates of standard error, coefficient of variation and confidence interval for the ratio estimate can be calculated by adopting formulas 4, 5 and 6.

SURVEY QUESTIONNAIRE

SURVEY QUESTIONNAIRE

SURVEY OF SMALL SCALE MANUFACTURING INDUSTRIES
1998 E.F.Y. (2005/06 G.C.)

ITEM 1 - ADDRESS OF ESTABLISHMENT

1	2	3	4	5	6	7	8	9
Kill	Zone	Wereda	Town	Higher/ Sub-city	Kebele	Quest. S.S.I/I (for office useonly)	ISIC NO. (for office useonly)	Sr. No. of Estab. (for office useonly)

10		11	12
NAME OF ESTABLISHMENT/OWNER			
NAME	I.D. NO.	TELEPHONE NO.	P.O.BOX

ITEM 2 - PARTICULARS OF ESTABLISHMENT

2.1 MAJOR PRODUCTS OF THE ESTABLISHMENT (ENUMERATE INORDER OF THEIR VALUE OF SALES)

_____ _____ _____ _____ _____

2.2 DATE OF COMMENCEMENT OF OPERATION — 2.2 [2]

2.3 WHAT WERE THE THREE MOST DIFFICULT PROBLEMS (IN ORDER OF IMPORTANCE) YOU FACED WHEN YOU STARTED THIS ACTIVITY — 2.3 [2] [3] [4]

- NO PROBLEM FACED =1
- LACK OF FOREIGN EXCHANGE =2
- LACK OF SUFFICIENT INITIAL CAPITAL =3
- GOVERNMENT RULES AND REGULATIOI =4
- LACK OF CREDITS FROM BANKS /OTHER SOURCES/ =5
- ACCESS TO RAW MATERIAL SUPPLY =6
- LACK OF TECHNICAL KNOW HOW =7
- LACK OF SUFFICIENT INFORMATION /BUSINESS AND MARKET ACTIVITIES/ =8
- OTHERS /SPECIFY/ _____ =9

2.4 IF THE ANSWER FOR QUESTION 2.3 IS CODE 4 OR GOVERNMENT RULES AND REGULATIONS WHAT WAS THE MAJOR REASON? — 2.4 [5]

- DIFICULT TO GET LICENSE =1
- REGULATION ON OBTAINING WORINING PREMISES =2
- TAX REGULATIONS =3
- OTHER /SPECIFY/ =4

2.5 IF THE ANSWER IS YES TO 2.3 IS CODE 8, STATE THE THREE MAJOR PROBLEMS IN OBTAINING INFORMATION — 2.5 [6] [7] [8]

- LACK OF INFORMATION TO IDENTIFY TYPES OF ACTIVITES =1
- LACK OF INFORMATION ABOUT TYPES OF APROPRIATE MACHINERIES =2
- LACK OF INFORMATION WHERE TO BUY APPROPRIATE MACHINERIES =3
- LACK OF INFORMATION WHERE TO GET APOPROPRIATE TRADINING =4
- LACK OF SUFFICIENT MARKET INFORMATION =5
- LACK OF INFORMATION WHERE AND HOW TO GET LICENSE =6
- OTHERS /SPECIFY/ _____ =7

2.6 NUMBER OF MONTHS THE ESTABLISHMENT OPERATED DURING 1998 E.F.Y. (2005/06 G.C.) _____ — 2.6 [9]

2.7 WHAT ARE THE THREE MAJOR PROBLEMS THAT PREVENTED YOU FROM OPERATING FULL YEAR (ENUMERATE IN ORDER OF IMPORTANCE)

NEWLY ESTABLISHED	=1
SHORTAGE OF SUPPLY OF RAW MATERIALS	=2
SHORTAGE OF SPARE PARTS	=3
GETTING MARKET/CUSTOMERS	=4
LACK OF WORKING CAPITAL	=5
SHORTAGE OF ELECTRICITY /WATER	=6
FREQUENT BREAKAGE OF MACHINES/EQUIPMENT	=7
GOVERNMENT RULES AND REGULATIONS	=8
THE ACTIVITY IS SEASONAL	=9
OTHERS /SPECIFY/ _____	=10

2.7 [10] [11] [12]

2.8 IF ONE OF THE ANSWER TO QUESTION 2.7 IS CODE 5 DOES THE ESTABLISHMENT MADE AN EXPORT TO SOLVE THE PROBLEM OF WORKING CAPITAL THROUGH BANK LOAN?

YES =1 NO =2

2.8 [13]

2.9 IF THE ANSWER IS YES TO 2.8 WHAT IS THE MAJOR REASONE FOR NOT SOLVING THE PROBLEM OF WORKING CAPITAL?

INSUFFICIENT LOAN _____	=1
HIGH COLLATERAL REQURMENT _____	=2
HIGH INTEREST RATE _____	=3
SHORT PERIOD OF LOAN REPAYMENT _____	=4
INEFFICIENCY OF FINANCIAL INSITTUTIONS	=5
OTHER /SPECIFY/ _____	=6

2.9 [14]

2.10 DO YOU KEP BOOKS OF ACCOUNTS?

YES, FULL BOOKS OF ACCOUNTS _____	=1
YES, ONLU RECORDS OF INCOME/EXPENIDITURE	=2
NO BOOKS OF ACCOUNTS _____	=3

2.10 [15]

2.11 FORM OF ONWNERSHIP

INDIVIDUAL _____	=1
PARTNERSHIP _____	=2
SHARE COMPANY _____	=3
PRIVATE LIMITED COMPANY	=4
CO-OPERATIVE _____	=5
OTHERS /SPECIFY/ _____	=6

2.11 [16]

2.12 NUMBER OF OWNERS OF THE ESTABLISHMENT BY SEX

2.12 [17]

MALE	FEM.	TOTAL

2.13 INITIAL PAID-UP CAPITAL BY OWNERSHIP AND SEX

1. PRIVATE ETHIOPIAN MALE _____ [18]
2. PRIVATE ETHIOPIAN FEMALE _____ [19]
3. PRIVATE NON-ETHIOPIAN _____ [20]
4. GOVERNMENT _____ [21]
5. OTHERS /SPECIFY/ _____ [22]
6. TOTAL _____ [23]

2.14 CURRENT PAID-UP CAPITAL (IN BIRR) _____ [24]

2.15 OWNERSHIP OF NON-RESIDENTAL BUILDINGS

PRIVATELY OWNED _____	=1
RENTED _____	=2
OTHERS /SPECIFY/ _____	=3

2.15 [25]

2.16 IF PRIVATELY OWNED, WHAT IS THE SOURCE OF WONERSHIP?

INHEROTED _____	=1
PROVIDED FREE _____	=2
BOUGHT/CONSTRUCTED BY THE ESTAB.	=3
OTHERS /SPECIFY/ _____	=4

2.16 [26]

ITEM 3 - NUMBER OF PERSONS ENGAGED AND WAGES & SALARIES PAID IN 1998 E.F.Y. (2005/06 G.C.)

3.1 NUMBER OF PERSONS ENGAGED IN 1998 E.F.Y. (2005/06 G.C.)

SR. NO.	GENERAL OCCUPATION	NUMBER OF PERSONS ENGAGED AS OF THE LAST PAY PERIOD OF WORKING DAY IN 1998 E.F.Y. 2005/06 G.C.								
		MESKEREM		TAHASAS		MEGABIT		SENE		PERSON/ MONTHS
		MALE	FEMALE	MALE	FEMALE	MALE	FEMALE	MALE	FEMALE
