I. Introduction

The Central Statistical Authority, (CSA), has been conducting the Rural Integrated Household Survey Program, (RIHSP), since 1980/81 (1973 Ethiopian Calendar, E.C.). As part of the RIHSP the Rural Price Survey, which covers both retail and producers' prices, is being conducted on a monthly basis since 1980 in selected Farmer Associations, (FAs), of the country.

This report provides information on average Retail Prices of Goods and Services in Rural Area for the period of November 1994 to July 1995 (Hidar 1987 - Hamle 1987 E.C.) on the basis of the current administrative hierarchy, i.e., Killil/regional states and group of Zones. Due to lack of adequate space to accommodate all killils in one page the price data of the killils are presented in two parts.

Part I - Consists of Tigray, Afar, Amhara (and its group of zones) and Oromiya (and its group of zones).

Part II - Consists of Somali, Beni-Shangul and Gumuz, Debub Ethiopia, [Southern Nations, Nationalities and Peoples, (S.N.N.P)] (and its group of zones), Gambela, Harari, Dire Dawa, Addis Ababa and monthly national average.

Price data for Amhara, Oromiya and Debub Ethiopia killils are presented according to their respective group of zones¹ and killil average. For the remaining killils price data are presented by killil. Group of zones for Amhara, Oromiya and Debub Ethiopia killils are given below:-

¹ Report for the three Killils is provided in group of zones due to their relatively large area coverage as compared to others.

Group of zones for Amhara Killil

- 1 = North and South Gonder
- 2 = East Gojam, West Gojam and Agewawi
- 3 = North Welo and Wag Hamra
- 4 = South Welo, North Shewa and Oromiya zone

Group of zones for Oromiya Killil

- 1 = East and West Welega
- 2 = Ilubabor and Jima
- 3 = North and West Shewa
- 4 = East Shewa, Arsi, Bale and Borena
- 5 = East and West Hararge

Group of zones for Debub Ethiopia Killil

- 1= Yem, Keficho, Maji, Shekicho and Bench
- 2= North and South Omo, Derashe and Konso
- 3 = Hadiya, Kembata and Gurage
- 4 = Sidama, Gedeo, Burji and Amaro

This sixteenth issue updates Statistical Bulletin 143. Earlier issues on the same subject are Statistical Bulletins 37, 45, 57, 64, 83, 93, 96, 106, 107, 115, 117, 124, 138, 143 and 151.

II. Objectives

The objectives of the survey are to:-

- study the level of retail prices charged by retailers;
- study the disparities between prices charged at various distribution levels;
- study changes in the economy;
- help in the valuation of output for national accounts;
- construct rural consumer price index.

III. Scope, and Coverage

The scope and coverage of the survey are constantly under review and necessary improvements are effected from time to time in an effort to incorporate commodities mostly consumed by the rural population. The geographic coverage of the survey was revised as of September 1988 to produce price reports in one Autonomous Region and 25 Administrative Regions. The geographical coverage was revised once again and the present report is based on the current administrative hierarchy which is killil (Regional States) and group of zones.

Due to the October 1994 Population and Housing Census, CSA, practically suspended the collection of rural price data from August 1994 to October 1994. Although, the rural price survey was resumed in November 1994 and again it was discontinued in April and May 1995 to train field personnel's for the Household Income Consumption and Expenditure Survey, HICES, which was conducted over two rounds, i.e. June/July 1995 and December 95/January 96.

The major groups of items covered by the survey include food, drinks, tobacco and stimulants, household equipment, clothing, footwear, energy, medical care, personal care and effects, education, recreation, building materials and other goods and services.

Information on retail prices of selected agricultural and industrial commodities is collected from retail outlets in the sample Enumeration Areas, (EAs). The allocation of EAs to the regions takes into account the population size of the regions stratum and cost consideration. The number of EAs in each region has been considered to be a reasonable minimum size to provide meaningful estimates at regional/ reporting levels.

In three Killils, namely Amhara, Oromiya and Debub Ethiopia groups of contiguous zones were treated as strata/reporting levels of the survey results. In the remaining regions, the reporting levels were the regions themselves.

A total of 960 EAs (2% of the total number of agricultural EAs) in the country were planned to be covered by the survey. But 74 of the sampled EAs were closed due to various reasons and the survey covered 886 EAs successfully. Distribution of EAs sampled and actually covered by stratum/reporting level is given in Table A below.

Table A: Number of sampled and actually covered EAs in the survey by Killil

Killil	Strata	Number of	
		Sampled	Covered
Tigray	1. Tigray	40	33
Afar	2. Afar	15	7
Amhara	3. North and South Gonder	60	59
	4. East Gojam, West Gojam and Agewawi	75	75
	5. North Welo and Wag Hamra	45	43
	6 South Welo, North Shewa and Oromiya zone	75	72
	7. East and West Welega	60	60
Oromiya	8. Ilubabor and Jima	60	60
	9. North and West Shewa	60	56
	10. East Shewa, Arsi, Bale, and Borena	120	112
	11. East and West Harerge	60	56
Somali	12. Somali	15	2
Beni-Shangul & Gumuz	13. Beni-Shangul and Gumuz	15	9
Debub Ethiopia (SNNP)	14. Yem, Keficho, Maji, Shekicho, and Bench	62	60
	15. North Omo, South Omo, Derashe and Konso	53	53
	16. Hadia, Kembata and Gurage	60	57
	17. Sidama, Gedeo, Burji, and Amaro	40	40
Gambela	18. Gambela	15	9
Harari	19. Harari	10	4
Addis Ababa	20. Addis Ababa	10	10
Dire Dawa	21. Dire Dawa	10	9
Total		960	886

IV. Method of Data Collection

Each month of the Ethiopian Calendar (September to August) data collection staff of the CSA attempt to collect prices in retail markets for a list of about 500 items in the selected EAs or from adjacent market places where households purchase most of the goods and services for consumption and other purposes. For each item on the price list the data collector is expected to get a maximum of three prices from three different retailers or shops in the local market places.

Enumerators are familiar with the market places and where various items can be purchased. If one retailer or shop does not have the items, they continue searching until they find one that does. Although price is collected from traders, in some cases price is obtained from consumer at the time of purchase. Retail price data is mainly collected on market days throughout the reference month considering the work load of the enumerators and in accordance with the purchasing habits of consumers in the selected EAs.

Since an interview method of data collection is utilized rather than an actual purchase and recording of price, it may result, in some instance, in exaggeration or under estimation of prices. However, since enumerators were permanently assigned to each sample EA and reside there, they have a good chance of familiarizing themselves and be on friendly terms with retailers and owners of economic establishments the result of which is a reasonably reliable and accurate information over time.

V. Definitions

- **Retail Price:** A retail price is the money cost to the final purchaser of a specified unit of sale. It is inclusive of all sales and excise taxes.
- **Enumeration Area:** Enumeration Area in rural areas is a locality that is less than or equal to farmer's association areas and mostly consists of about 150-200 households.

VI. Note

1. The minimum that the balance can weigh is 10 grams. Thus items which are sold in small quantities and whose weight fall under 10 grams cannot be weighed as accurately as possible and as a result may affect the reliability of the price of these items in some respect.
2. The average column is a simple arithmetic average prices for each item.
3. The symbol "NA" is used for data not available or doubtful.
